Mercury Displacement Contactor Tube operates in relative silence, eliminating "knocking" associated with conventional hard contactors. **Specifications. Pull-in Voltage:** 96V typical. **Drop-out Voltage:** 93V typical. **Operate Time:** 50 milliseconds typical. **Release Time:** 80 milliseconds typical. **Contact Bounce:** None. $\pm 10\%$ of rated coil voltage. **Contact Resistance:** 35 amp models, .003 ohm terminal to terminal; 60 amp models, .002 ohm terminal to terminal. **Temperature Range:** -35°C to +60°C ambient (operating). **Dielectric Strength:** 2650 rms (1 sec.). **Insulation Material:** Class B (130°C) U.L. approved. **Terminals:** 35 amp models, pressure connectors for AWG6-14; 60 amp models, pressure connectors for AWG2-8. **Mounting:** vertical $\pm 10^\circ$.

The Class 211CP Time Delay Relay makes use of hybrid circuitry, combining solid state circuitry for timing function with an EMR for DPDT 10 amperes output switching. Features nylon dust covers, and reverse polarity protection on DC models. **Repeat Accuracy:** $\pm 1\%$ of setting at nominal voltage at 25°C. **Contact Combination:** DPDT standard. **Reset Time:** 100ms max. **Temperature Range:** Operate, -10°C to +55°C; Storage, 55°C to +85°C. Transient protection of 2000V for 8ms standard.

219 Series General-Purpose Relays

- ▶ 10 Amp rating
- ▶ U.L. and CSA Listed

Type 219 relays provide long reliable contact life. They are designed for machine and process control applications requiring up to 20 million cycles of miss-face-operation. 12 pin models use socket #27390; 14 pin models use socket #33377. **Specifications. Insulation:** 1/4" surface, 1/8" air. **Dielectric:** 1500 Volt Test. **Operating Time:** 20 MS max. **Release Time:** 20 MS max. **Temperature Range:** -10°C to +60°C. **Cover:** Clear Polycarbonate. **Contacts:** Fold Diffused SCO. **Life:** 20 million Mech Operations.

12 and 14 Pin Sockets

Type 27390. Twelve terminal socket accepts types 311, 219, 236, 237, 255, 349, and RSX alarm relays. Overall dimensions 2 15/32 x 2 3/16 x 2 7/32".

929-2030.....EACH 9.60

Type 33377. Fourteen terminal socket for 219 series 4 and 6 pole relays. Dimension: 2 5/64 x 2 3/16 x 2 7/32".

929-2035.....EACH 13.57

Type 276 Miniature Power Relays

1 Form A contact @ 7 A; 1 Form C contact @ 10 A. Low power coil-40 MA @ 5 VDC. Terminals on 0.1" grid. Silver alloy contacts. Permanent magnet polarized single-sided stable design. Sealed PBT case for wave soldering and immersion cleaning. 4 mm spacing coil to contacts. 5KV surge resistance. **Temperature Range:** - 40° to + 70°C. **Dielectric:** 1000 VAC between contact. **Operating Time:** 10 ms on loss. **Release Time:** 10 ms on loss. **Weight:** 0.2 oz.

Type A275KXX, Reversing Control Relay (15 AMP)

Compact reversing contactors consisting of a pair of 3-pole contactors mounted on a common frame and mechanically interlocked to prevent simultaneous closure. Designed for continuous operation in heavy-duty service. Vertical operating condition. Over 10 million mechanical operations. U.L. and CSA listed. **Weight:** 1 lb.

Type B255, 12 Pin Latching Relays

This is a two-coil latching version of the Type 219 relay. When the operate coil is momentarily energized the relay mechanically latches in the energized position even if power is interrupted. The second coil provides electrical reset. All contacts operate from a common armature to prevent contact overlapping. Coils are rated for continuous duty. **Insulation:** 1/4" surface; 1/8" air. **Dielectric:** 1500 Volt test. **Oper. Time:** 25 ms max. **Release Time:** 20 ms max. **Temp. Range:** -10°C to +60°C. **Life Expectancy:** 10 million mechanical operations. **Cover:** Clear Polycarbonate. Uses socket #27390. **Dimension:** 2 5/8 x 1 15/32 x 3 3/4".

Type A311, Sequencing Relay

A311XBXP
A311XBXP

A sequencing version of the Type 219 relay. Contacts transfer on each impulse. XBXP type transfers contacts when coil is energized. XBXP type transfers contacts when coil is de-energized. 5 amp coil. Gold diffused SCO contacts. Uses base #27390. **Insulation:** 1/4" surface; 1/8" air. **Dielectric:** 1500 Volt test. **Temp. Range:** -10°C to +60°C. **Dimension:** 2 5/8 x 1 15/32 x 2 19/32".

General-Purpose Relays with LED Indicator and Sockets

Super MK Series

Reliable, high quality, long life. Silver contact rated at 10 amps. UL, CSA rated. LED indicator lets you monitor relay operation at a glance; red LED for AC version; green LED for DC version. Quality sockets and mounting rail complete installation.

Compact, Low Profile G6H Series PC Board-Use Relays: 1 Amp Load

Low power consumption 1 amp, 30 VDC relay. Low magnetic interference allows high-density mounting. Just 5mm profile. Standard: G6H-2. Latching: G6HK-2. Surface Mount: G6H-2-F. Surge withstand voltage of 1500 VDC meets FCC Part 68 requirements. DPDT bifurcated contacts. Specifications. Rated Load: 0.5A 125 VAC (p.f.=1) and 1A 30 VDC. Pick-Up Voltage: 75% max. Dropout Voltage: 10% min. Surface mount version can be soldered by VPS, IRS and DWS methods.

G5V-2 Series PC Board Use Relays: 2 Amp Load

DPDT. Bifurcated contacts. Designed for telecommunications, computer peripherals, security equipment; low level to 2 amps maximum. Standard: G5V-2. High-Sensitivity: G5V-2-H. Ultra-Sensitive: G5V-2-H1. Specifications. Contact Resistance: 50 mΩ. Operate Time: 7 ms max. Release Time: 3 ms max. Fully sealed case allows automatic soldering and cleaning. UL and CSA approved. Meets FCC part 68 1500 V surge withstand. Pick-Up Voltage: 75% max. Dropout Voltage: 5% min.

G7J Series

— NEW —

Ideal for three-phase motor control applications and resistive and inductive loads. No contact chattering for voltage drops up to 50% of rated voltage. Withstands more than 4 kV between contacts that are of different polarity and between the coil and contacts. Flame-resistant materials (UL 94V-0) used for all insulation. Push to test button on all models lets user check contact operation. Contact ratings shown for resistive loads.

G4B Series Upper Mounting Bracket Type

Creepage distance of more than .08". Upper mounting bracket type for easy wiring and mounting. **Specifications.** Load Contact Terminal: quick connect #110. **Contact Form:** SPDT. **Contact Resistance:** 30mΩ max. **Rated Load (resistive):** 220VAC 15A, 24VDC 15A. **Carry Current:** 20A. **Max. Operating Voltage:** 250VAC, 125VDC. **Max. Operating Current:** 20A. **Max. Switching Capacity (resistive):** 3,300VA, 360W.

G6A Series PC Board-Use Relays

Plastic sealed relay with high surge dielectric for use in telecommunication equipment. High sensitivity. Low profile design for use in 1/2" PC board rack. Surge withstand voltage of 1500 VDC meets FCC Part 68 requirements. Unique moving loop (permanent magnet) armature reduces relay size, magnetic interference, and contact bounce time. DPDT or 4PDT bifurcated crossbar AgPd contacts (Au clad). Rated 2 amps carry current.

G5L Series

Sealed, SPDT relay ideal for applications in household electrical appliances. Construction resistant to flux wicking. Dip soldering is possible. **Specifications.** Contact Resistance: 100 m maximum. Operate Time: .6 mS maximum. Release Time: 7.2 mS maximum. Insulation Resistance: 100 M Ω minimum (at 500 VDC). G5L rated at 5 amps 120 VAC, 30 VDC; G5LE rated at 10 amps 120 VAC, 30 VDC. Replaces G2U and G4S.

Series KRPA General Purpose Relays

- Multi-Contact Arrangement
- Octal Plug Termination
- Clear Dust Cover
- Hold-down spring for KRPA and KRPA-N will accommodate machine screws or rivets. For use with flush mount chassis sockets.

U.L. Contact Ratings for KRPA

Material	Silver	Silver	
Code	Y	Y	
Models	SPDT,DPDT & 3PDT	SPDT,DPDT	3PDT
Ratings	5 amps @120VAC 1/8HP @120VAC 3 amps @240VAC 1/8HP @240VAC	10amps@250VAC 1/8HP@250VAC 1/8HP@120VAC	10amps@120VAC 1/8HP@120VAC 6amps@250VAC 1/8HP@250VAC

Ruggedly constructed relay offered with silver contacts, code "Y", rated 5 Amps; and silver-cadmium oxide contacts, code "G" rated 10 Amps. Contact arrangements are available up through 3 form (3PDT). Expected life exceeds 100,000 operations at rated load. Mechanical life is 10 million operations, minimum. Enclosed in a clear dust cover. U.L. recognized under file E22575. Low cost version of the KRP relay.

KRPA-N Series has an indicator lamp wired in parallel with its coil, making this model ideal for voltage or current monitoring applications. Silver-cadmium oxide contacts are rated 10 Amps. KRPA-N specifications are identical to those of other models in the KRPA series.

R10S Series CMOS-TTL Compatible Relays

X = 1.0"/25.4 (2 PDT)

Will accept drive directly from many CMOS and TTL ICs—no interface needed. Contacts are .078" in dia. made of fine silver. **Resistive Load Rating:** 28VDC or 115VAC form. 0.1 to 3A max. **Insulation Resistance:** 10,000 meg. at 25° C and 50% R.H. **Typical Capacitance:** Contact-contact, 2 picofarads; coil frame, 30 picofarads; Coil-contacts, 2 picofarads.

Temperature Range: -55°C to 75°C. Has pierced solder terminals. **Weight:** 0.8 to 1.4 oz. **Rated:** 2 Amps Typ. (3 Amps max.).

KUHP Series

KUHP Series relays are an extension of the KUP product line, offering 30 amp switching capability in a 1 Form C (SPDT) configuration and 20 amp switching capability in a 2 Form C (DPDT) configuration. This relay has been designed to meet the requirements of international regulatory agencies such as BSI and VDE for many applications. Enclosed KUHP relays are equipped with slotted flanges for bracket mounting to a chassis. Termination to this relay is normally facilitated by .250\"/>

KHAU relays are manufactured using automated techniques to provide dependable, low cost switching in a package only slightly larger than a cubic inch. KHAU has smoke-grey polycarbonate dust cover. KHS, hermetically sealed with metal cover. All models U.L. Recognized. KHS is recognized for class 1 division 2 hazardous environments. Silver contacts, rated 3 amps at 28VDC, or 120VAC res. Solder term, 3-48 mtg. stud. 2 oz. (57gm). All fit KH Series sockets.

PRD Type Heavy Duty Power Relays

PRD relays are interchangeable with PR relays; same size and mounting holes. Improved design allows use of power screwdrivers on terminals. All models are U.L. and CSA listed and have silver contacts. Model PRD-3AYO is rated 40 amps, all other rated 25 amps. Mounting: two .188" dia. holes on 1.875" centers. Weight: 11 oz.

PM17 4DPT 25-Amp Power Relays

4PDT for polyphase and heavy-duty switching. Contacts are silver-cadmium-oxide. Rated at 25 amps, 240V, 50-60 Hz, non-inductive. 1 HP per moveable arm at 120 or 240V single-phase. Mount by keyhole and 2 channels for 8-32 screws on 2 x 2 1/2" triangular centers. Screw term. 2 3/4" x 2 3/4" x 3 3/4". Weight: 1 lb. UL, CSA listed.

Dust Covers for PM and PRD Relays

PM METAL COVER 35D227

PM PLASTIC DUST COVER 35D203

35D013

Heavy steel cover screws in place on sheet metal base. Knockouts accept 0.5" diameter conduit. Pre-drilled mounting holes. Type 35D013 has holes to accept PRD mounting. Type 35D277 accepts PM mounting. Plastic dust cover for PM Series only.

T70 Series Miniature Printed Circuit Board Relays

- ▶ 10 Million Mechanical Operations
- ▶ Low Power Consumption

T70 Series relays are for printed circuit board mounting. Feature sealed, immersion-cleanable case. **Two Contact Materials Available:** type number with code 31 are fine silver with gold flash, type numbers with code 64 are silver cadmium oxide. Contact arrangement 1 Form C (SPDT). **Nominal Coil Power:** 360 mW. SPDT 1 Form XX 10 amps. UL recognized, CSA certified.

T73 Series 10 Amp Printed Circuit Board Relays

Relays are highly reliable and available in three types of contacts. Sensitive coil. Relays are enclosed in an immersion-cleanable, sealed plastic (PBT) housing. **Available in Two Arrangements:** 1 Form A (SPST NO) and Form C (SPDT). **Operating Voltage:** From 5 to 24 VDC. UL recognized. CSA certified.

T81 Series Miniature High Density Printed Circuit Board Relays

- ▶ High Dielectric
- ▶ Ideal for Office Machines, Logic and Process Control
- ▶ Standard Coil and Sensitive Coil Models Available

T81 Series relays are ultra-miniature devices for printed circuit board mounting. Permit high density packaging for savings in equipment size and cost. SPDT contacts are silver-palladium alloy with gold overlay provide load handling of 1 amp @ 24 VDC or 0.5 amp at 120 VAC, resistive. 81N Series are standard coil models and 81H Series are sensitive coil models. T81 relays are enclosed in an immersion cleanable polycarbonate case. Printed circuit terminals are on .100" x .300", DIP compatible grid layout. UL recognized, CSA certified. **Temperature Range:** -40°C to +55°C (standard coil); -40°C to +75°C (sensitive coil).

T75 Series Miniature DIP Relays

T75 Series relays feature high sensitivity for HVAC, appliance, security, and industrial applications. Nominal coil power requirement is as low as 212 mW. Low profile 0.591" (15.01) tall case uses only 0.465" (11.81) square of PC board for high-density circuit design. **Power Switching Capability:** 1 form C (SPDT) contacts rated 14 amps. **Coil Voltage:** 5-48 VDC. **Normal Power At 25°C:** 230 mW, typ. Continuous duty cycle.

T85 Series DIP relays are 2 form C DPDT and feature terminals on a .100" x .300" grid layout. This configuration permits terminal mating with a 16-pin-DIP socket. Relays are enclosed in PBT polyester dust cover designed for immersion cleaning applications using freon, alcohol or water. Contacts are bifurcated. Suitable for applications in telecommunications equipment, audio equipment and business machines. **Contact Ratings**
Maximum Switched Current: 1.25 A, AC or DC with contact style "4"; 2 amp AC or DC with contact style "5". **Maximum Switched Voltage:** 60 VDC, 120 VAC with contact style "4"; 150 VDC, 125 VAC with contact style "5". **Maximum Switched Power:** 24 W or 60 VA with contact style "4"; 30 W or 62.5 VA with contact style "5". **Maximum Carry Current:** 2 amps. **Minimum Switched Current:** 10 μ A, AC or DC. **Minimum Switched Voltage:** 50 μ V, AC or DC. **Minimum Switched Power:** 25 μ W, AC or DC.

T90 Series Low Cost, 30 A, DC Coil PC Board Relay

T90 printed circuit board relays provide an inexpensive means of switching loads up to 30 A. While these small, low-cost relays are designed primarily for the appliance industry and heating, ventilating and air conditioning markets, they are also well suited for load management automotive and other applications. The T90 is available with silver-cadmium oxide contacts in 1 Form A or C arrangements. A plastic, snap-on dust cover is available for the open-style T90, but must be ordered separately. See below. Mechanical life expectancy of T90 relays is 10 million operations. Electrical life expectancy is 100,000 operations at rated loads. T90S is sealed version.

Coil Data. Temperature, Max.: 130°C. **Insulation Class:** B. **Insulation Resistance, Initial:** 1000 megohms, minimum, at 25°C, 500 VDC and 50% relative humidity. **Breakdown Voltage, Initial:** 1500 V rms, contact to coil. **Operate Data. Must-Operate Voltage:** Less than 75% of nominal voltage at 25°C. **Must-Release Voltage:** More than 10% of nominal voltage at 25°C. **Operate Time (Including Bounce):** 15 milliseconds, maximum. **Release Time (Including Bounce):** 15 milliseconds, maximum. **Environmental Data. Ambient Temperature Range:** Storage — -55°C to +105°C; Operating — -55°C to +85°C. **Vibration:** .065" maximum excursions from 10 to 55 Hz. **Resistance, Initial:** 50 milliohms, maximum. **Breakdown Voltage, Initial:** 1500 V rms, contact to contact. **Expected Life:** 10 million operations, mechanical; 100,000 operations at rated load.

RKA Series 5 to 10 A PC Board Miniature Relays

- Immersion Cleanable, Plastic Sealed Case
- Designed To Meet VDE 8 mm Spacing, 4 kV Dielectric
- UL Recognized File E22575, CSA Certified LR72171
- VDE Licensed 1661, 1662

RKA Series miniature relays designed for printed circuit board mounting. Relays are enclosed in plastic immersion cleanable case. Contacts are silver-nickel alloy except for types RKA-xDT-xx which are silver-cadmium oxide. All contact ratings are at 24 VDC or 240 VAC. **Initial Dielectric Strength From Coil To Contacts:** 5,000 V rms. **Maximum Power:** 1.4 W at +25°C. **Operating Temperature:** -40°C to +65°C. **Operating Time Excluding Bounce:** 14 ms typical. **Release Time Excluding Bounce:** 5 ms typical.

T9AS — Mounting and Termination Code 2

9AP/S — Mounting and Termination Code 1

1 Form C
(Unused Terminals
Are Not Present)

T9A Series are low cost, printed circuit board or panel mount relays. Up to 30 A switching in SPST and 20 A in SPDT arrangements. Silver-cadmium oxide contacts in 1 Form A (SPST-NO) and 1 Form C (SPDT). Available in unsealed, plastic dust cover (T9AP) or immersion cleanable, sealed plastic case (T9AS). UL Class F insulation system standard. Well suited for various industrial, commercial and residential applications.

GLR Series Miniature PC Board Relay

16 AMP PC Board Miniature Relay in SPST and SPDT contact arrangements. Meets VDE 8 mm spacing, 5 KV dielectric, coil to contacts. Conforms to VDE 0435, 0631 and 0700. UL Class F coil insulation system. **Contact Data:** Fine grain silver — 200 mA @ 5 VDC or 12 VAC. **Termination:** Printed circuit terminals. **Enclosures:** GLRS — immersion cleanable, tape sealed plastic case, GLRV — flux-tight, top vented plastic case.

T92 Series

P.C. Board Relays

T92 Series relays are DPDT configuration with 30 amp switching capabilities, immersion cleanable, tape sealed plastic case. Designed to control compressor loads to 3.5 tons, 25.3 FLA, 110 LRA. Meets requirements of UL873 and UL508 spacings. Meets requirements of VDA 8 mm spacing, 4 KV dielectric coil-to-contacts. Meets requirements of UL class F Construction. **Contact Material:** Silver cadmium oxide. Printed circuit terminals. **Weight:** 2.95 oz. approximately.

CND Series

Multifunction DIN Mount Time Delay Relay

- 5 Programmable Timing Modes
- 0.5 Sec. To 100 Min. Programmable Timing Range
- Universal Input (24-240 VAC/VDC)
- 10 A Output Relay With SPDT Contacts
- Timing Range and Timing Function Switch Selectable
- Time Adjust Is Potentiometer Adjustable
- Fits 35 mm DIN Track

Universal input model, 24-240 VAC/VDC, screw termination. Plastic DIN Case. Silver-cadmium oxide alloy. 1 Form C (SPDT) contacts. **Contact Rating:** 10 A @ 28 VDC or 240 VAC, Resistive; 1/2 HP @ 480 VAC; 1/3 HP @ 240 VAC; 1/4 HP @ 120 VAC. Transient protection and reverse voltage protection. **Timing Adjustment:** Potentiometer adjustable within selected range.

886-2150. Type CND EACH 80.00

JWD Series DIP and JWS Series SIP Dry Reed Relays

JWD Series DIP units and JWS Series SIP units are designed not only to accommodate automatic component insertion but to permit high density packaging of components on printed circuit boards as well. Relay's mounted height is only 0.315" (8.00), allowing PC board spacing on 0.500" (12.70) centers. Molded epoxy package with terminals on 0.100" (2.54) centers compatible with automatic wave soldering, and can be immersion or spray cleaned. Will withstand 100g shock and vibration to 20g between 10 and 5000 Hz. **Operating Temperature Range:** -35°C to +85°C.

CUB51 Time-Delay Relays

Knob-adjustable delay-on-operate time delay relays. DPDT contacts 10A at 28VDC resist., or 120V, 60 Hz AC, 80% power factor. **Tol.:** adjust., -0, +20% of max. specified at high end; min. specified or less at low end. **Release:** 150 msec. **Recycle:** 150 msec. **Transient Protection:** Yes. Polarity protected. Operate room temp. Timing intervals adjust, over timing ranges *1 to 10 secs. or †1 to 120 secs. 1.53 x 1.406 x 2.78" (3.87 x 3.57 x 7.07mm) (including knob). 120VAC, 3 1/2 oz.

CB Series Relays

CB series relays are economy, octal-type plug-in models with CMOS integrated circuits. Available in delay-on-operate, delay-on-release or interval on timing modes, all units are knob-adjustable. Molded enclosure houses the timing circuit and an internal relay. All models are DPDT, except type **CB-1022B78** which is SPDT. Contacts rated 10 amps at 240VAC, 6Hz. Power requirements typically less than 3VA for AC types; 3 watts for DC types. **Operating temperature range:** -10°C to +55°C. Polarity protection. UL recognized, CSA certified.

CL Series Time Delay Relays

CL-41

CL-42

CL-51

Delay on operate. Similar to the CU Series except they don't have timing cycle interrupt transfer and will time to .1 second. DPDT rated at 10 amps. CL relays are enclosed in yellow polycarbonate dust covers. Plug-in/quick connect terminals. Uses KU Series sockets. Available in fixed, resistor adjustable and knob adjustable. **Weight:** Approx. 3.5 oz. External resistor not included.

Impulse Relays

The S89R is a bistable, impulse relay that can afford a savings of power in applications where the load is on for long periods of time. Contact rating is 15 amps, 1/2HP, 125/250VAC amps, 125VAC tungsten filament lamp load; 1/2 amp, 125VDC; and 1/4 amp, 250VDC. Life expectancy at full load is 50,000 operations minimum; 100,000 operations, mechanical. Operating temperature range is -10°C to +60°C. Mounting is by two #8-32 tapped holes on 1.84" (46.83 mm) centers. "ACI" indicates .187" (4.75 mm) quick connects. S90 relay is identical to the S89 Series except that terminals are .250" (6.35 mm) quick connect and contacts are rated at 20 amps. Coil for both series are rated for continuous duty operation.

Solid State Relays

SSR Series

SSRQ Series

SSRT Series

SSRD Series

SSR Series
SSR Series is a medium/high power, 120/240 VAC, 47-70Hz inverse parallel SCR output solid state relay that is controlled by an opto-electronic coupler intended for use as On/Off switch for loads through 110 amps. Ideal for interfacing between logic output of TTL, HTL, or MOS and AC loads such as solenoids, motors and transformers.

Stock No.	Mfr.'s Type	Input Voltage	Max. Switching Rating/Output	EACH

886-7015	SSR-240D50	3-32 VDC	.05-50A rms	47.07	44.72

*R = Random Voltage Turn-on.

SSRQ Series
SSRQ series relay comprises four totally independent, optically isolated, triac output solid state relays in one standard package. Designed to be used as four On/Off switches for loads through 20 amps.

Stock No.	Mfr.'s Type	Line Voltage	Input Voltage	Max. Switching Rating/Output	EACH

886-7024	SSRQ-240D20	24-280VAC	4-15 VDC	20A rms	94.13	89.14

SSRT Series
SSRT series relay is a triac output solid state relay that is controlled by an opto-electronic coupler. Intended for use as an On/Off switch for loads through 25 amps. EMI and RFI are greatly reduced due to zero voltage turn-on and zero current turn-off of the load. 1 Form A (SPST-NO). Plastic case is UL rated self-extinguishing.

Stock No.	Mfr.'s Type	Line Voltage	Input Voltage	Max. Switching Rating	EACH

SSRD Series
SSRD series relays comprise two totally independent, optically isolated, inverse parallel SCR output solid state relays in one standard package. Intended to be used as two On/Off switches for loads through 40 amps. UL recognized and CSA certified for industrial applications.

Input/Output Modules

Slim Line Input/Output Modules
Slim line input/output modules provide interfacing between microprocessor- or computer-based control systems and external input devices and loads such as switches, sensors, valves and motor starters. Offered in four photo-isolated versions: AC input, AC output, DC input, DC output. Units are color-coded and have high isolation and noise immunity. Packaged in a 0.4" enclosure for replacement without disturbing wiring. On modules of the same voltage, output is compatible with input of the input module. Ideal for series operation. 1 Form A (SPST-NO).

Solid State Input/Output Modules
A reliable interface between microprocessor- or computer-based control systems and external input devices and loads, these photo-isolated modules feature excellent isolation and transient immunity. On modules of the same voltage type, AC or DC, the output of the output modules is compatible with the input of the input modules, making them ideal for series operation. Modules are color-coded and packaged in industry standard plug-in enclosure. Units interchange easily without disturbing wiring. UL recognized, CSA certified. Order mounting boards separately below.

CN1 Series

**SSA-24C667
MOUNTING CLIP**

On Delay, Time Delay Relay for Plug-in or Panel Mounting. Output relay turns on at the end of a programmed time interval which is started by applying input voltage. LED flashes when output relay is off and is on continuously when the output relay is on. Removal of input voltage turns off output relay. Reapplying input voltage resets the unit. **Timing:** 0.1 sec. to 9,990 hr. Adjustable with thumbwheel switches. **Contacts:** 2 form C (DPDT) silver-cadmium oxide alloy. **Input Voltage:** 120 VAC $\pm 15\%$, 60 Hz. **Rating:** 10A @ 30 VDC or 277 VAC, resistive; 1/2 HP @ 250 VAC. **Termination:** 8-pin octal style plug. **Enclosure:** Black plastic 1/16 DIN (48mm x 48mm) case. **Sockets:** Fits either 27E122 or 27E891 (snap-on) screw terminal sockets. **Weight:** 4.3 oz.

CNS Type Multi-Function, DIP Switch Programmable, Knob Adjustable, Time Delay Relay

CNS series are economical, multi-functional, programmable, time delay relays housed in 1/16 DIN style enclosures. Available programmable functions in units with 8-pin octal-style bases are delay on operate, interval on, recycler - initially on and recycler - initially off. Units with 11-pin octal-style bases provide those timing functions plus delay on release, interval off, inverted delay on release and an additional interval on function. Timing function and range is selected by a DIP switch, and actual delay time is set with an adjustment knob and calibrated dial. Delay is selectable on all units from .1 sec. to 100 min. All models have DPDT output contacts rated 10 amps @ 240VAC/30VDC. Operating temperature range is -10°C to +55°C.

Stock No.	Mfr.'s Type	Input		Pins*	EACH

*8-pin units provide four timing functions, and 11-pin units provide eight timing functions.

CNT Type 12-Function Digitally Programmable Time Delay Relay/Counter

CNT series are multi-functional, programmable, time delay relays/counters housed in 1/16 DIN style enclosures with an octal-style 11-pin plug-ins. The units feature thumbwheel switches for digital programming. An LCD digital readout permits easy monitoring of status. Available programmable functions are delay on operate, delay on release, three interval on functions, delay on operate and release, cumulative delay on operate, 50% duty cycle recycler, output pulsing, single cycle, up counter and down counter. Delay is selectable from .1 sec. to 9990 hours. Counter range is selectable from 1 to 99,900 counts. All models have DPDT output contacts rated 10 amps @ 240VAC/30VDC. Operating temperature range is -10°C to +55°C.

Track and Mounting Accessories

Mounting track and holding clips for screw terminal sockets. The Track 24A110 is available in three foot length with mounting holes on 6" centers. Track can be cut to shorter lengths for small chassis assemblies or full sections can be used end-to-end in larger installations. Made of lightweight, sturdy extruded aluminum, track accepts several styles of screw terminal sockets: KU Series 27E121, 27E867 and 27E893; Octal Type 27E122, 27E123, 27E891 and 27E892; KH Series 27E166 and 27E894; R10 Series 27E460, 27E461 and 27E462; and K10 Series 27E487 and 27E895. The track will also mount the following relays: EOTZ, KUB, PM, PRD, SSR, SSRD, SSRQ and SSRT.

Multi-Function Model GLR2U

- 4 Functions in one unit
- Multi Time Range (0.1 sec to 10 hrs.)
- DPDT 10 Amp Relay Output
- LED Indicators — Power/Relay Status

Four Function Timer: delay on make, single shot, delay on break, interval timer. Slide switch selects time range in seconds, minutes, or hours. Easy to set dial for direct reading. Fits standard 11-pin sockets. Also available in DIN-rail version (FLR2U). Other voltages available on special order.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5004	GLR2U	110VAC	56.00
793-5005	FLR2U	110VAC	77.00

88 857 Series LCD Multifunction Timer

- 8 Timing Functions
- Multirange Timing
- Din-sized (48 x 48mm) Housing
- Large LCD Display
- NEMA 4 Front Panel
- 10 Year EEPROM Memory

The 88 857 Series is a programmable timer with multi-time ranges (0.01 s to 999.9 hrs) housed in a 1/16 Din (48 x 48mm) style enclosure. The 8 available functions—On Delay, Interval, Single Shot, Repeat Cycle... the large 4 Digit display and the NEMA 4 front panel will fit most industrial applications. The large LCD permits easy programming and monitoring of status such as time remaining, preset value, output relay, time range, functions, etc.

Stock No.	Mfr.'s Type	Description	EACH
793-5035	88857800	8-Pin 110 VAC	98.00

Repeat Cycle Timer Model DR2U

- Large Dial Face with Independently Adjustable "ON" and "OFF" Time Range
- 10 Amp DPDT Relay Output
- LED Relay and Power Status Indicators
- Dual Voltage

Selection of the time ranges (.1 sec. to 10 hrs.) is made by slide switch on the front of the case. "On" or "Off" time first is also switch selectable. Inner dial selects "On" time; outer dial selects "Off". 48 x 48 mm size for easy panel mounting. Dual voltage feature is identical to CHRONOS series. 110 VAC.

Stock No.	Mfr.'s Type	Description	EACH
793-5514	MDR2U110A	8 Pin Plug-In	71.00
793-5515	GDR2U110A/24AD	11 Pin Plug-In	73.00

Delay on Make Model MAXR2U

- 2 Delayed SPDT or 1 Delayed SPDT and 1 instantaneous SPDT
- Multi Time Range (0.1 sec to 10 hrs.)
- 48 x 48 mm
- LED indicators — Power/Relay Status

Selection of the two functions is programmed by a slide switch on the side of the timer. Easy to set dial for direct reading. Fits standard 8-pin sockets. Also available in DIN-Rail (FAXR2U), or 11-pin plug-in (GAXR2U). Other voltages available on special order.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5006	MAXR2U	110VAC	54.00

814 Series Multifunction Timer

- 6 Modes of Operation
- LCD 0.3" Display
- Multirange Timing
- Din-sized (48 x 48mm) Housing
- Up or Down Timing
- SPDT 10 Amp Relay Output
- NEMA 12 Front Panel

The 814 Timer is a multifunction timer with multi-time ranges (0.01 sec to 9999 hours) housed in a 1/16 Din (48 x 48mm) style enclosure. Easy programming from the front panel push buttons allows selection of up or down timing. 6 different timing functions (Delay on Make, Delay on Break, Interval, Single Shot, Repeat Cycle ON Time First and Repeat OFF Time First) and 11 different timing ranges. A large 4 digit LCD display indicates current and preset values as well as relay output, power input, and initiate switch status. Load such, as light bulb or contactor, can be connected to the start switch.

88 901 Series Delay on Make Timer

- 22mm Panel Mount Cut-Out
- PLC Compatible
- PNP Open Collector Output
- NEMA 4

The 88 901 Series is a front panel mount analog timer with a Nema 4 front panel. The 3 wire VDC timer can drive a contactor or be connected between the input and the output of a PLC for easy setting of a time variable. Two LEDs monitor Power On and Solid State Output. The output is a PNP Open Collector rated 200 mA at 30 VDC Max. The delay on make timer is available in 10 different time ranges from 1 sec. to 30 min. The device is protected against reverse polarity and short-circuit.

Stock No.	Mfr.'s Type	Description	EACH

Time Delay Relays

The new CHRONOS series of Timers is now available from Syrelec that will make ordering a much simpler process. Time setting and testing is simplified by the dial face and direct reading capability. Featured below are the five models including, Multifunction, Repeat Cycle, Delay on Make (two versions), and Delay on Break. CHRONOS Timers feature dual

voltages in the following combinations: 48 VAC/DC or 24 VAC/DC...110 VAC or 24 VAC/DC...220 VAC or 24 VAC/DC. 12 VDC is also available on all CHRONOS models on special request. SPDT or DPDT relay outputs available on all models.

CHRONOS Multi-Function Model OLRU

- ▶ 4 functions in one unit
- ▶ Multi time range (0.1 sec to 10 hrs.)
- ▶ SPDT or DPDT 10 Amp Relay Output
- ▶ LED Indicators - Power/Relay Status

Four Function Timer: delay on make, single shot, delay on break, interval timer. Slide switch selects time range in seconds, minutes, or hours. Easy to set dial for direct reading. Fits standard 8-pin sockets. For DIN-rail mounting, order Model BLRU. TLR2U fits standard 11-pin socket.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5000	OLRU	110VAC/24VAC/DC	45.00
793-5001	BLRU	110VAC/24VAC/DC	49.00
793-5025	TLR2U	110VAC/24VAC/DC	48.00

CHRONOS Repeat Cycle Model ODRU

- ▶ Multi Time Range (0.1 sec to 10 hrs.)
- ▶ SPDT or DPDT 10 Amp Relay Output
- ▶ LED Indicators - Power/Relay Status
- ▶ Individual "on" and "off" settings

Time range selection is made by dip switches on the case. T1 is the adjustable "off time" for relay R and T2 is the adjustable "on time". When input power is applied, the relay will alternate between "off and on" according to the preset times selected. For DIN-Rail mounting, order Model BDRU.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5002	OLRU	110VAC	53.00
793-5003	BDRU	110VAC	54.00
793-5028	ODR2U	110VAC	57.00
793-5029	TDR2U	110VAC / 24VAC/DC	59.00

CHRONOS Delay on Make Model OARU/OASU

- ▶ Multi Time Range (0.1 sec. to 10 hrs.)
- ▶ SPDT or DPDT 10 Amp Relay Output OARU/OAR2U or SCR Solid State Output OASU
- ▶ LED Indicators - Power/Relay Status OARU/OAR2U

For the relay output version OARU, when input power is applied, the relay delays the preset time period prior to energizing. The model OASU, delays the solid state output for the preset time period prior to turning on. Next timing cycle begins when the input power is re-applied. Fits standard 8-pin sockets. For DIN-rail mounting, or order models BARU or BASU.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5000	OLRU	110VAC / 24VAC/DC	32.50
793-5501	BARU	110VAC / 24VAC/DC	33.00
793-5502	OASU	10-260VAC/DC	32.50
793-5503	BASU	10-260VAC/DC	39.00
793-5506	OAR2U	110VAC	33.00
793-5027	TAR2U	110VAC / 24VAC/DC	38.00

CHRONOS Delay on Break Model OCRU

- ▶ Multi Time Range (0.1 sec. to 10 hrs.)
- ▶ SPDT or DPDT 10 Amp Relay Output
- ▶ LED Indicators - Power/Relay Status

Input power is continuously supplied to the timer. When an external initiate switch is closed, the output relay is energized. Timing begins when the initiate switch opens. At the end of the delay time, the output is de-energized and the timer is ready for another cycle. Fits standard 8-pin sockets. Order BCRU of DIN-rail mounting.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5504	OCRU	110VAC / 24VAC/DC	40.00
793-5505	BCRU	110VAC / 24VAC/DC	41.00
793-5030	TCR2U	110VAC / 24VAC/DC	45.00

TRM Series DIN Rail Multi-Function Timer

- ▶ Slimline 22.5 mm Enclosure
- ▶ 12 Modes of Operation
- ▶ 12 Selectable Time Ranges
- ▶ 24 to 240 VAC/DC Supply Power Range

The TRM Series are timers in a slimline DIN rail mount enclosure. One timer has 12 selectable time ranges, 12 selectable operation modes, and an input power supply voltage range of 24 to 240 VAC/VDC. Output relays can be programmed either as 2 SPDT delayed outputs or 1 SPDT instantaneous output and 1 SPDT delayed output.

Stock No.	Mfr.'s Type	Description	EACH
793-8001	88 893 003	DIN Rail, 24 TO 240 VAC/DC	70.00

TR 2 Series DIN Rail Timers

— NEW —

- ▶ Slimline 22.5 mm Enclosure
- ▶ Multi-Time Ranges
- ▶ 2 SPDT Output Ranges

The TR 2 Series are timers in a slimline DIN rail mount enclosure. TR2 timers are available in Delay on Make, Delay on Break, and Repeat Cycle operating modes. The TR Series features multiple supply voltage ranges, LED timing and output indication and a remote panel mount potentiometer option. Output relay can be programmed either as 2 SPDT delayed outputs or 1 SPDT instantaneous output and 1 SPDT delayed output.

Stock No.	Mfr.'s Type	Description	EACH
793-8002	88 893 135	Delay on Make 24 VAC/VDC and 110 240 VAC	43.00
793-8003	88 893 335	Delay on Break 24 VAC/VDC and 110 240 VAC	49.00

RF Relays Series RF170 and Series RF300 and RF303

— NEW —

- ▶ Hermetically Sealed
- ▶ Gold Plated Contacts
- ▶ Frequency RF170 DC to 4 GHz
- ▶ Frequency RF300, RF303 DC to 3 GHz

The RF170 series are DPDT magnetic latching relays designed to optimize isolation across contacts and poles.

The RF300 and RF303 relays are DPDT relays designed to provide RF signal repeatability over the frequency range by balancing the aggregate insertion loss of the relays' design.

General Purpose Armature Relays Series 172, 712, and 722

- ▶ Hermetically Sealed
- ▶ Surface Mount (S172 Series)
- ▶ Gold Plated Contacts
- ▶ Dry Circuit to 1 A 28 VDC
- ▶ Excellent RF Performance, DC to 1 GHz

Commercial versions of Teledyne Relays' DPDT, Established Reliability, T²R² relay line. Hermetic sealing, uni-frame design, all welded construction and gold plated, precious metal contacts assure reliable switching of loads from dry circuit to 1 ampere. Contact geometry and low inter contact capacitance provide excellent RF switching capability well into the UHF spectrum.

Solid State Computer Input/Output Interface Modules

C76 DIP I/O™ System Optically Isolated — TTL/CMOS Logic Compatible Control

Teledyne Solid State C76 DIP I/O™ Modules are designed for use in computerized control systems for noise-free isolation interfacing of computer logic to harsh industrial environments. Eliminates mounting tracks for low per point cost. Features CMOS and TTL compatibility, optical isolation, high noise immunity and function on input modules. For use in robotics, computerized process control, programmable controllers and ATE.

7 Day Programmable Controllers

4950

4950B
4950H

These Programmable Controllers program two separate relays to turn ON or OFF up to 56 times during a 7 day period. Once a pattern of events is programmed, they will operate on a continuous basis, remembering the program, time of day and day of week even during a power failure. **Operating Voltage:** 105-135 VAC, 50-60 Hz. **Operating Temperature:** 0° to +70°C. **Accuracy:** +2 minutes per month. **Display:** 4 digit, LED type, 0.5" high. **Output:** Two (2) SPDT sets of programmable contacts. 4950 — rated at 5 amperes, 4950H — rated at 15 amperes. **Construction:** 4950 — open P.C. Board with screw terminals. 4950H — Metal enclosure with a 9 pin terminal strip to accommodate 12 AWG

or smaller wiring. Two standard electrical knockout provided. **Other Voltages Available.**

*Model 4950 "B" is specially designed to ring school or factory bells.

Repeat Cycle Timers

— NEW —

4608 ON/OFF Repeat Cycle Timer. The model 4608 is a solid state timing module that operates a set of high power 20 Amp contacts on a repeat cycle basis. The on and off times of the cycle are set with DIP switches. The on and off time can be set from 1-1024 seconds in one second increments. The output contacts are closed for the portion of the cycle which always starts first on initial application of operating voltage. SPST normally open contacts rated at 20 amps. **Terminals:** (Input/Output) .250 Quick Connect. **Voltage:** 115 VAC.

4972 Count Down Interval Timer. The 4972 is a digital countdown timer with remote start, and provides 20 Amps High Capacity output contacts. The timer has a range of 99 minutes and 59 seconds and counts down in one second increments. The 4972 has a selection switch which allows the user to select 115 or 230 VAC, 50/60 Hz input voltages. Large 1/2" LED display; microcomputer control; time memory retention; tactile front panel; remote start operation.

4980 Repeat Cycle Timer. The 4980 is a microcontroller based on-off timed with digital display of timing. The 4980 controls a set of high current output contacts in accordance with a preprogrammed on-off schedule which continues for as long as power is applied. The on and off time can be programmed to be any time from 1 second to 99 minutes and 59 seconds in 1 second increments. Sealed tactile front panel; large 1/2" LED display; audible alarm; 20 Amp output. **Wiring:** 3, 1/4" quick connect terminals supplied for contacts, 2, 18 AWG Stranded Wires, 12" long supplied for operating voltage. **Voltage:** 115 VAC, 50/60 Hz. Other Voltages available by special order.

Digital Countdown Interval Timer

No need to observe polarity of operating voltage on DC models

The Model 4970 is a microcontroller-based interval timer with digital display of timing. High power 20 amp, SPDT output contacts. Preset time kept in non-volatile memory. Countdown can be stopped in middle of countdown cycle. Always remembers last time selected and resets to that time. Front panel overlay provides protection. Easy setting with two buttons. **Operating Voltage:** 105 VAC-130 VAC. **Timing Range:** 1 minute to 23 hours and 59 minutes. **Timing Resolution:** 1 minute. **Display:** 4 digit red LED, 0.5" characters. **Timing Accuracy:** Better than 1% over operating temperature and

voltage. **Operating Temperature:** 0 to 70°C. **Audible Indicator:** A solid state alarm will sound for 5 seconds at the end of a timing cycle. **Front Panel Switches:** 3 momentary push-buttons behind front panel label overlay, 2 for setting the time and 1 for starting and stopping the timer. **Mounting:** 2.62" square cutout accepts timer. Timer secured with rear attached bracket. **Wiring Terminals:** .25" quick connect terminals.

Proximity/Photoelectric Sensors

EI Inductive Sensors

- For sensing of all ferrous metals
- 12, 18 and 30 mm dia., stainless steel housing
- Limit switch style with 5 position head
- Cylindrical and limit switch style housings
- Sensing distances from 2 to 25 mm
- Easy to view LED indicator
- Common applications include:
 - End of travel detection
 - Broken drill or saw blade detection
 - RPM/zero speed detection

EC Capacitive Sensors

- For sensing of granulates, plastics and other ferrous/non ferrous objects
- 18 and 30 mm diameter polyester housings
- Sensing distances from 2 to 20 mm
- Adjustable 20 turn metal potentiometer
- LED indication
- Common applications include:
 - Grain/plastic pellet hopper level detection
 - Level control through sight glass
 - Detection inside of cardboard/plastic containers

EO Photoelectric Sensors

- For sensing of light colored/reflective objects
- Detects up to 16 inches (400mm)
- Rugged 18mm diameter nickel plated brass housing
- Adjustable 270° potentiometer
- LED indication
- Common applications include:
 - Material detection on a conveyor
 - People and/or vehicle detection through doorway/aisle
 - Detection of parts in a process

Paladin Transducer

Paladin transducers and transmitters are manufactured to the same exacting standards you have come to expect from all Crompton instruments. With a typical accuracy of $\pm 0.5\%$ R.O., Paladin's broad range of available options offer all popular input and output ratings for any indication, control, or data acquisition application. Housed in a flame-retardant molded case that can be rail or flush mounted, the Paladin meets all environmental and performance specifications required in a high accuracy utility transducer. **Transducers for:** AC Current (Sinusoidal input), RMS Current (Non-sinusoidal input), AC Voltage (Sinusoidal input), RMS Voltage (Non-sinusoidal input), Frequency.

Specification. Inputs: See individual specification. **Outputs:** 0-1mA into 0-10k Ω , 4-20mA into 0-500 Ω . **Zero Adjustment:** $\pm 2\%$ minimum (except TAA and TVA). **Span Adjustment:** $\pm 10\%$ minimum. **Accuracy Class:** 0.5. **Dielectric Test:** 2kV rms to BS.5458, IEC 414 and ANSI.C37. **Impulse Test:** 5kV transient as BEAMA 219 and BS.923. **Surge Withstand:** To ANSI.C37-90a. (IEEE Std.472 SWC where applicable). **Temperature Range:** -20°C to $+70^{\circ}\text{C}$, Operating 0°C to $+60^{\circ}\text{C}$, Calibrated at 22°C . **Humidity Range:** Up to 95% RH. **Temperature Coeff.:** 0.03% per $^{\circ}\text{C}$ (typical). **Stability:** $\pm 0.25\%$ per annum, non-cumulative. **Response Time:** $< 400\text{ms}$ to 99% rated output. **Output Protection:** Fully protected against open or short circuited output. **Output Ripple:** $< 0.5\%$ of full rated output. **Overload Capacity:** $2 \times$ rated current or $1.25 \times$ rated voltage continuous. $15 \times$ rated current or $1.5 \times$ rated voltage for 10 seconds. **Max. Output Volts under Open Circuit:** 20V DC. **Isolation:** Input/Output/Supply/Case. **Performance:** Designed to comply with BS.5149, BS.5458, IEC 414, IEC 144, AS.1384. ANSI.C37, BEAMA 219, Lloyds and CEBG.

Protector Relay Modules

The protector trip relays have been developed to provide a very comprehensive range of electronic control products for continuous monitoring of electrical quantities. The units are designed for use in severe industrial environments and incorporate the latest solid state electronics technology to eliminate spurious tripping from electrical disturbance to the equipment being protected.

Safety Requirements: BS.5458, IEC 414. **Temperature Range:** 0°C to $+60^{\circ}\text{C}$. **Storage Temperature:** -20°C to $+70^{\circ}\text{C}$. **Temp. Co-efficient:** 0.05% per 1°C of nominal. **Interference Immunity:** Electrical stress surge withstand and non-maloperation to IEEE Std 472, ANSI C37 90a, SEN 361503. **Enclosure Code:** IP50 to BS.5490, IEC 529. **Output Relay. Type:** D.P. changeover. **Rating AC:** 240V, 5A non-inductive. **Rating DC:** 24V, 5A resistive. **Operations:** 2×10^5 at above load. **Reset:** Automatic.

3 in 1 Digital Switchboard

Crompton's Digital Switchboard offers AC amps, AC volts, and frequency in a single switchboard instrument. With an industry standard switchboard panel cut-out, the 3 in 1 offers direct replacement of existing analog switchboard meters. Red digits on a dark background are easily visible in ambient or bright sunlight. The 3 in 1 Digital Switchboard is factory calibrated with the ampere input scaled to read 0 to 2,000 amps with a 0 to 5 AAC input; the voltage display is scaled to read 0 to 600 volts with a 0 to 600 VAC input; and frequency input is calibrated to read from 40 to 200 hertz. The front cover can be removed from the 3 in 1 Digital Switchboard case while in the panel for scaling in engineering units, decimal point selection, and calibration. The digital volt meter and digital amp meter may be re-scaled by the user (via DIP switches under the front cover) from 0 to 1,999 full scale counts allowing the instrument to read the user's specific Current and Potential Transformers. **Display:** 3½ (1999). **Type:** 7 segment illuminated LCD. **Decimal Point:** 3-position selectable for volts and amperes. **Overload Indication:** Three lower digits blank for readings > 1999. **Digital Conversion:** 2.5 times per second. **Tempco:** ±100 PPM typical. **Operating Temperature Range:** -20°C to +50°C. **Storage Temperature Range:** -30°C to +70°C. **Maximum Input:** 5 AC amperes, 600 AC volts. **External Power Requirement:** 115 VAC or 230 VAC ±10% -15% (user selectable), 50-400 Hz at 2 VA. **Accuracy:** AC volts ±(0.1% + 1 count), AC amperes ±(0.5% + 5 counts), frequency ±0.2 Hz (40 to 70 Hz). **Isolation:** Power supply to inputs —> 2 MegOhms, input to input —> 2 MegOhms.

Communications Adapter

The Communications Adapter has eight analog inputs, with LED status indicators, each accepting 4-20 mADC, all sharing a common ground (applications that require input signal isolation, the Crompton #250-ISAU-HF Signal Isolator is recommended). The analog signals are converted, via an internal microprocessor, to a single 9600 baud RS-232 data stream, which is transmitted via fiber optics. The Communications Adapter permits DIRECT data communications from transducers to the user's computer system via a single RS-232 port. By utilizing the user's existing computer system, complex analysis of up to eight transducers may be achieved in real time. The serial transmission of all inputs, via supplied industry standard fiber optic cable results in reliable, noise immune, data acquisition and monitoring system. Flame retardant case materials to UL/CSA approved material UL94V-0. **Dimensions:** 2.76" x 2.98" x 4.41". **External Power:** 115 VAC or 230 VAC, ±20%, 50-60 Hz.

Signal Isolator

The 250-ISA Signal Isolator is a 2-wire loop isolator requiring no external power. The device accepts 0 to 20 dcma inputs and provides isolated current output directly proportional to the input signal. The 250-ISA is designed for signal transmission and processing applications, to prevent noise and pick up problems caused by ground loops and common mode signals. **Temperature Range:** -25°C to +60°C. **Storage Temperature:** -40°C to +70°C. **Temperature Coefficient:** <0.01% per °C from +23°C to +60°C, <0.03% per °C from +23°C to -25°C. **Input Voltage:** Typically I out x (R load + 200 ohms) limited to 18 volts. **Output Load Range:** 0-500 ohms (at 20 mADC). **Nominal Accuracy:** 0.2% at 250 ohms.

AC Current Transformers

The Crompton 800 series provide a comprehensive range of measuring duty ring current transformers for installation where traditional reliability, accuracy, and quality are required. These current transformers have an accuracy better than one percent over a frequency range of 50 to 400 Hz. Designed for operation with primary voltages to 600 volts they are manufactured to meet the requirements of UL 1244 and revisions. Output termination is via brass #8-32 threaded terminals, with one flat washer, lock washer, and regular nut. The molded, flanged mounting base is slotted to permit the transformer to be secured to virtually any flat surface. Two models, in different physical sizes, are offered in a multiple of ratios.

T40A and T50A Quartz Hour Meters

ENM's Series T40/T50 hour meter is the answer to applications requiring a low power, economical, and a reliable hour meter. This compact, tamper-resistant meter is sealed against the environment to provide years of service. A quartz crystal time base insures supersilent operation and accurate time keeping. This AC voltage model is also frequency insensitive.

90 Series Delay Timers

The 90 Series is a basic time delay timer designed for remote surface mounting where infrequent adjustment of the time delay setting is anticipated. It features automatic reset upon removal of power. These timers are designed for applications that do not require high repeat accuracy, fast reset or long time cycles. Isolated SPDT load switch rated at 10 amps. **Wiring:** Motor, 6-inch leads; switch, screw terminals. 120 VAC, UL and CSA approved.

TDAB and TDAF Series Timers

Note: Size Opening Needed in Panel to fit Timer Through

The TDAB and TDAF timers are rugged, high precision time delay timers. They feature automatic reset and an infinite-resolution clutch. The TDAF is designed for panel mounting while the TDAB is designed for back or surface mounting. On both units, wiring connections are made on the screw type terminal block. Both have isolated SPDT load switch rated at 15 amps, 120 VAC. UL and CSA approved.

Series RG21, Single Switch

Designed to run continuously, repeating a set cycle of make-break switching operations as long as the motor is energized. This unit may be applied to operations requiring only a single time cycle. The unit's timing motor drives the cam to actuate a SPDT snap-action switch in a definite make-break sequence at predetermined speeds. Switch cams adjustable from minimum notch of 7° to a maximum notch of 169° (±3°). **Cam Shaft Speed for One Complete Revolution (360°):** RG21-093: 1 minute; RG21-096: 15 minutes; RG21-098: 60 minutes. 120V, 60 Hz. U.L. recognized and CSA listed.

SF and CSF Series Timers

These standard time delay timers are designed for remote surface mounting where infrequent adjustment of the time delay setting is anticipated. The SF timers are in the 6, 15, and 30 second ranges and use a clutch motor. The CSF timers operate in ranges of 1 minute and above and use an external clutch to provide fast reset. Both units feature automatic reset upon removal of power, and isolated SPDT load switch. The CSF also features a motor control feature to protect the motor at the end of the time cycle. **Repeat Accuracy:** SF—±1%; CSF—±1.5%. 10 amp load switch contacts, screw terminal wiring. 120 VAC. UL and CSA approved.

H and CH Series Timer

The H and CH series are standard time delay timers designed for panel mounting. They are designed for applications that require medium repeat accuracy and reset time and that may require the operator to change the time delay cycle. The H timers cover the 6, 15, and 30 second time ranges and have a clutch motor. The CH timers are available in 1, 3 and 5 minute time ranges and feature external clutch to enable fast reset. It also features a motor control switch to protect the motor at the end of the time cycle. Both have isolated SPDT load switch rated at 10 amps, screw terminal block wiring. 120 VAC. UL and CSA approved.

Self-Powered Counters and Tachometers

H7EC

H7EC Series. Subminiature (DIN-sized 48 X 24 mm.); improved noise immunity. Screw terminal and wire-wrap types available. AC, DC and no-voltage input types available. Printed circuit board type available. Internal 3V lithium battery allows unit to operate with no external power supply.

H7ET

H7ET Series. Subminiature (DIN-sized 48 X 24 mm.); improved noise immunity. Screw terminal and wire-wrap types available. AC, DC, and no-voltage input types available. Displays cumulative time by counting the output signals received from a sensor. Internal 3V lithium battery allows unit to operate with no external power supply.

H7ER

H7ER Tachometers. Subminiature (DIN-sized 48 X 24 mm.); improved noise immunity. Screw terminal and wire-wrap types available. DC and no-voltage input types available. DC-powered model can display the number of revolutions of an encoder in user-selectable units of measure. Internal 3V lithium battery allows unit to operate with no external power supply.

E3S-A Series

General purpose high performance small DC sensors offer fast 0.5 msec. response time for high-speed sensing. Self-diagnostic functions for easy installation. **Rating:** NEMA 4x, 6, and IP67. Choose prewired or quick disconnect models. Timer models feature an OFF-delay output from 0 to 100 ms.

E3B2 Series

— NEW —

General purpose photoelectric sensor with plug-in terminal for easy maintenance and installation. Replace sensing head without rewiring. Detect shiny objects with polarized retroreflective models and dark objects at long distances with the high-gain diffuse reflective models. Includes built-in ON-delay and OFF-delay timers, switch selectable light-ON/dark-ON operation, and mutual interference protection. Ready to use with 3 A relay and mounting brackets. Supply voltages of 24 to 240 VAC, 50/60 Hz; 12 to 240 VDC. Output of 3 A, 250 VAC.

Photoelectric Sensors

Easy-to-install photoelectric sensors meet most needs for reliable detection in conveyor and packaging applications. M18 size threaded cylindrical plastic body. Choose through beam models for reliable operation over long distances in adverse environments; retroreflective models are simpler to install; and diffuse reflective models bounce light of the object to be detected. AC and DC prewired models and DC connector-ready models available. Connector-ready models accept 3-wire Micro-Change style cordsets.

Compact, Prewired Photomicrosensors with 30cm Range

Through-beam (transmissive) sensor with in-line remote DC amplifier and compact sensing heads fit into space-confined locations. Prewired amplifier has 2m (6.6 ft.) of three-conductor cable. Sensor includes two pair of aperture decals to reduce beam width for smaller object detection. Modulated infrared light source reduces external light, dust and humidity interference. Operation indicators on both amplifier body and sensing head simplify alignment and monitoring.

Stock No.	Mfr.'s Type	Output Type	Head to Amp Cable Length	Sensing Method	Sensing Distance	Power Requirements	Control Output	EACH
821-8100	EE-SPW321	Dark-ON	0.5 m (1.64 ft.)	Transmissive	30 cm with 2mm dia. opaque object	10.8 to 26.4 VDC 30 mA current consumption	Transistor, 100 mA load 1 V max. residual voltage 1 ms max. response time	112.90
821-8101	EE-SPW321-A	Dark-ON	1.0 m (3.28 ft.)		20 cm with 1mm dia. object using 1 × 3 mm aperture			115.23
821-8102	EE-SPW421	Light-ON	0.5 m (1.64 ft.)		10 cm with 0.5mm dia. object using 0.5 × 3 mm aperture			112.90
821-8103	EE-SPW421-A	Light-ON	1.0 m (3.28 ft.)					115.23

Sensing Heads Detect Objects in Front of Mirror-Like Backgrounds

Convergent beam reflective sensors with built-in amplifier offers 5mm sensing distance to solve these tough detection problems: objects in front of highly reflective backgrounds at least 20mm away; dark colored objects; small, thin objects such as 0.05mm diameter pure copper wire. Modulated infrared light source reduces external light interference. Choose top or side sensing models. Operation indicator allows monitoring. Wire directly to sensor or use optional EE-1001 unwired or EE-1006 prewired connectors for convenience in servicing. **Output Specifications:** 80 mA load with 1.0V residual voltage; 10 mA load 0.4V residual voltage when driving TTL. **Response Frequency:** 100 Hz.

Stock No.	Mfr.'s Type	Output Type	Sensing Face Position	Sensing Method	Sensing Distance	Power Requirements	EACH
821-8104	EE-SPY311	Dark-ON	Side Face Side Face Top Top	Convergent beam reflective	2 to 6 mm (5 mm rated distance) with 15 × 15 mm 90% reflectance white mat paper 0.2 mm differential distance at 3 mm sensing distance	5 to 24 VDC ±10% 10% max. ripple peak-to-peak 15 mA current consumption 50 mA max. at peak	28.52

821-8106	EE-SPY312	Dark-ON					28.52
821-8107	EE-SPY412	Light-ON					28.52

5 mm Slot Sensing Heads in Wide Variety of Configurations

Transmissive sensing heads in standard, L-shaped, T-shaped and close-mounting configurations match most applications. Wide 5-24 VDC operating voltage range makes these photomicrosensors compatible with TTLs, relays and programmable controllers. Wire selectable Light-ON/Dark-ON output operation. Operation indicator for easy monitoring. Wire directly to sensor or use optional EE-1001 unwired or EE-1006 prewired connectors for convenience in servicing. **Output Specifications:** 100 mA load with 0.8 V residual voltage; 40 mA load with 0.4 V residual voltage when driving TTL. **Response Frequency:** 1 kHz (3 kHz typical).

Type 3S4YR-HSR Card Reader

Compact, rugged construction manual swipe card reader, capable of reading up to two tracks. Fixed cable harness for easy installation. **Signal Interface:** TTL. **Card Feed Speed:** 10 to 150 cm/sec. (3.94 to 59.06 in./sec.). **Power Consumption:** 25 mA at 5 VDC. **Operating Temperature:** -10° to +55°C (14° to 131°F). **Service Life:** Single track — 300,000 passes min.; Double track — 600,000 passes min. **Color:** Black. **Dimensions:** 100 L x 32.5 W x 32 H mm (3.94 x 1.28 x 1.26 in.).

821-9000. 3S4YR-HSR4. Reads Track 2 with EnclosureEACH 35.00
821-9001. 3S4YR-HSR6. Reads Tracks 1 and 2 with EnclosureEACH 97.00

Type 3S4YR-HNR Card Reader

Compact, manual swipe card reader capable of reading up to three tracks. Designed for low power consumption. **Signal Interface:** TTL. **Card Feed Speed:** 10 to 120 cm/sec. (3.94 to 47.24 in./sec.). **Power Consumption:** 5 mA at 5 VDC. **Operating Temperature:** -10° to +55°C (14° to 131°F). **Service Life:** 300,000 passes min. **Color:** Beige. **Dimensions:** 90 L x 28 W x 26.5 H mm (3.54 x 1.10 x 1.04 in.).

821-9002. 3S4YR-HNR1. Reads Tracks 1, 2 and 3 with EnclosureEACH 96.00
821-9003. 3S4YR-HNR6. Reads Tracks 1 and 2 with EnclosureEACH 48.00
821-9004. 3S4YR-HNR4. Reads Track 2 with EnclosureEACH 30.00

Type 3S4YR-SFR

Compact, insert magnetic/IC card reader reads 100% of up to three magnetic tracks. Universal magnetic strip and IC card reader models available. **Signal Interface:** TTL. **Service Life:** Magnetic head — 300,000 passes min.; IC contact — 500,000 passes min. **Card Feed Speed:** 10 to 100 cm/sec. (4 to 39 in./sec.). **Power Consumption:** 70 mA at 5 VDC. **Operating Temperature:** -5° to +55°C (23° to 131°F). **Color:** Black. **Dimensions:** 120 L x 60 W x 194 H mm (4.72 x 2.36 x 0.75 in.).

821-9006. 3S4YR-SFR6N. Reads Tracks 1 and 2 (IC Card/None)EACH 142.00

"Eagle" Self-Powered, Digital Counters and Tachometer

Small size and large numerals make this LCD device ideal for control panels, business machines and instrumentation designed to monitor operational cycles and functions. All models are 7 Figure, with .315" high numerals. Requires only 1.79" x .89" panel cutout. Inputs available include non-voltage (switch, 3-30 VDC or 6-250 VAC/VDC; remote only or manual and remote reset; and termination by either a terminal block or an optional connector with wire leads. UL Recognized, CSA Certified. 20 year typical life with lithium battery. Weighs 2 ozs.

Series 5300, 5301: Electronic, Dual-Speed Counter

10

Electromechanical Counters/Totalizers

Series 44. Rugged, low cost, 6-figure, non-resettable totalizer. "RV" combines behind the panel and base mounts for flexibility in assembly. Size: 1.36" x .78" x 2.36". UL Recognized.

Series 4904 and 4906. Economical, compact, 4 or 6-figure, panel mount, pushbutton reset totalizer. Model 4904 fits 1.46" x 1.01" panel cut-out; 4906 fits 2.00" x 1.01" cut-out. Both UL Recognized.

Series 100. Premium quality, 6-figure electromechanical counter with heavy-duty rectifier, transient protection, convenient reset, 1000 CPM capability. Size: 3.92" x 1.74" x 2.51". UL Recognized, CSA Certified.

Series 128. General purpose, 4-figure, reset electromechanical counter, with heavy-duty rectifier, transient protection, 1000 CPM capability. Size: 2.66" x 2.26" x 2.42". UL Recognized, CSA Certified.

Electromechanical AC Hourmeters

Series 711 “Blackbird” AC Hourmeters. Lightweight, low power, rugged electromechanical design, with .138" high figures. Records to 99,999.99 hours. Available in both round or square bezel with retainer clip or 3-hole round versions (with mounting hardware), sealed front bezel and tell-tale operation-indicator. UL Recognized, CSA Certified.

Series 711 “Bullseye” AC Minimeters. Compact, low-cost, synchronous motor controlled AC hourmeters, .138" magnified figures, records to 99,999.99 hours. Panel Cutout: 1.45" x .87". UL Recognized, CSA Certified.

WRL Series Phase Control Relay

— NEW —

- Monitors: Phase Sequence; Loss of Any Phase Even if Induced Voltage Reaches 95% of Nominal Voltage
- Under Voltage Detection
- Trip Delay Timer Built-In
- LED Relay Status Indicator
- SPDT and DPDT Relay Output

The WRL Phase Control Relay monitors the sequence loss or reversal of three phase power supplies. The output relay is energized when the phase sequence is correct and the phase voltage is above the voltage threshold set by the front knob. The output relay will de-energize after 2 seconds (built-in timer) when the phase voltage drop is under the voltage threshold or when phase sequence is lost.

JR/JRS Series

- Duplex Alternating Control
- SPDT or DPDT Control Relay
- 10 Amp Rated
- Externally Controlled

The electronic alternating relay is designed to replace mechanical style devices used in control applications requiring a duplexing or alternating action of the control circuit to operate pumps, compressors, etc. This is achieved by activating a control switch which is common to one side of the input control voltage. The output contact of the relay(s) change state when this switch is opened (on de-energization of the control circuit). When the control initiate switch is actuated and released or opened, the relay will change state. The next time the initiate switch is actuated, it will change back to its original state. Two red LEDs located on the top of the dust-resistant enclosure provide the status of the relay. The JRS Series offers a three position switch to select normal operation (alternating) or manual selection of lead or lag load.

NRU Series Liquid Level Control Pump Up NR Series Liquid Level Control Pump Down

- LED Relay Indicator
- 8-Pin Plug-In Style
- Pump Up Control
- 4.7 K Ω to 100 K Ω Sensitivity

Control of conductive liquids (tap water, sea water, sewage, chemical solutions, coffee, ice cream, etc).

The relay is energized when the level falls below the low level probe. It de-energizes when the high level probe is reached. The NRU will also control a single level. In this case, a single probe is used, and the relay operates when that probe is not immersed.

In either case, a common electrode is needed if the container is nonconductive.

4541 Series and 4542 Series Up/Down Counter

- ▶ DIN-sized (48 × 48 mm) Housing
- ▶ Single or Dual Preset
- ▶ Built-in Prescaler
- ▶ Built-in Sensor (12 V) Supply
- ▶ Memory Module Option
- ▶ Nema 12 Front Panel

The 4541 Series is a single preset up/down counter housed in a DIN-sized (48 × 48) enclosure. The 4542 Series is a dual preset version enclosed in the same housing. The large LED display permits easy programming and monitoring of status such as counts, preset values, output, scaling factor. Unauthorized front panel changes can be prevented by a lockout function. Data such as counts, preset values, setup data, are saved in case of power failure by a 10 year EEPROM memory.

A memory module, available as an option, allows a programmed configuration to be saved or to be down-loaded to the unit. The front panel is rated NEMA 12.

- ▶ DIN-sized (72 × 72 mm) Housing
- ▶ Single or Dual Preset
- ▶ Built-in Prescaler
- ▶ Built-in Sensor (12 V) Supply
- ▶ Memory Module Option
- ▶ Lockout Function
- ▶ Nema 12 Front Panel

The 7541 Series is a single preset up/down counter housed in a DIN-sized (72 × 72) enclosure. The 7542 Series is the dual preset version enclosed in the same housing. Both versions have a dual display which indicates current and preset values. The dual display permits easy programming as well as monitoring status of different values. The counter will accept either NPN or PNP inputs. Data such as counts, preset values, setup data are saved in case of power failure by a 10 year EEPROM memory.

A plug-in memory module, available as an option, allows a programmed configuration to be saved or to be down loaded to the unit.

10108 Series Totalizing Counter

10108H Elapsed Time Indicator

10506 Programmable Elapsed Time Indicator

- ▶ 8 Digit 0.3" High LCD Display
- ▶ Totalizer or Elapsed Time Indicator
- ▶ Replaceable Battery Supply
- ▶ Custom CMOS Technology

The 10108 Series consists of two models: the 10108 Totalizer and the 10108H Elapsed Time Indicator for recording time in hours and hundredths of hours (0.01 Hr.). Count input or time enable can be a contact closure. NPN or PNP open collector transistor, 2 or 3 wire proximity switch, or voltage pulse 24 VDC max. In addition, a voltage converter module, p.n. 10,000, will accept voltage inputs from 6 to 240 VAC/DC. Input speed is 40 Hz (low) or up to 5 KHz (high).

Count total or time is displayed on 0.3" high (7 mm) liquid crystal displays, LCDs. Power for the internal logic and displays is provided by two (2) Size N alkaline batteries with a projected four (4) year life. Mercury batteries, with an estimated eight (8) year life, can also be used. Two (2) of the alkaline batteries are included with each unit.

Model 13026 Up and Down Counter, Batch Counter, Chronometer and Ratemeter

- ▶ LCD Display with Back Light
- ▶ DIN Sized (72 × 72 mm)
- ▶ Dual Preset or Single Preset Plus Batch
- ▶ Built-in Prescaler
- ▶ Relay and Solid State Outputs
- ▶ Built-in Sensor Supply
- ▶ Lockout Function

The 13026 is a programmable dual preset up/down counter, batch counter, chronometer and rate meter (selectable by dip-switch), which provides both relay and solid state outputs. The 13026 LCD display shows both actual count and preset values. Both count and preset values are saved (in case of power failure) by EE PROM memory. The unit provides a built-in sensor power supply of 12 VDC 100mA and will accept either NPN or PNP input (switch selectable). A programmable prescaler (0.00001 to 99.9999) is also available. Unauthorized front panel changes can be prevented by a lockout function.

Specifications

Power Supply: 115/230 VAC or 24/48 VAC or 12/24 VDC ± 10%. **Output:** relay, 3 Amp/250VAC resistive load; solid state, NPN open collector 100mA, 40 VDC. **Inputs:** Sourcing (NPN) or sinking (PNP) inputs can be selected by a slide switch located on the side of the unit; Low Level 0 to 1VDC Max.; High Level 4 to 30 VDC Max.

VEEDER-ROOT brand HT100 Hand Tachometer System

Big, bright, red LED display provides a highly visible reading, even in dim light or at indirect viewing angles. When used as a non-contact indicator, reflective tape (supplied) is placed on the shaft or other target that is to be measured. By simply pointing the HT100 at the target, rate-per-minute, time-per-event, or counts can be read. For in-contact measurements, an adapter is provided that allows display of linear feet or meters per minute, RPM, or counts. Measures speeds from 3 rpm to 99,999 rpm. System is packaged in a rugged carrying case. Batteries and a generous supply of reflective tape is included.

Model HT100. Complete system includes in-contact adapter and case. **687-5000.** HT100.....EACH 247.38

DYNAPAR brand Series 21/22 QUBE™ Encoders

The Series 21/22 QUBE is a family of rugged cube-style encoders. Heavy duty bearings, high mechanical and electronic operating speeds, and 0° to 70° C operating temperature range make it ideal for use in demanding industrial environments. All models generate accurate digital incremental pulses proportional to shaft rotation. Series 21 provides a single channel output, while Series 22 features two channel quadrature outputs can be used to determine direction of rotation. Its general-purpose design makes the Series 21/22 QUBE compatible with most programmable controllers, electronic counters, motion controllers, and motor drives. The Series 21/22 QUBE is electrically and physically interchangeable with most cube-style encoders on the market. It can easily be applied with measuring wheels, belts and pulleys, leadscrews, rack and pinions, lineshafts, etc.

Specifications. **Bearings:** ABEC precision bearings. **Sealed Bearings:** Standard. **Shaft Loading:** 30 lbs. axial; 40 lbs. radial. **Slew Speed:** 6000 RPM, 120 kHz max. **Enclosure:** Environmentally sealed. **Operating Temperature Range:** 0° to +70°C (Standard). **Storage Temperature Range:** -40° to +90°C. **Output Signal:** Squarewave, TTL compatible, with or without index; Logic "1": VCC-2 V min.; Z_{OUT}=200 Ohms (typ.). **Logic "0":** 0.4 Volts max. at 20 mA (max.). **Resistance of 1000 pF.** **Power Requirements:** 5-26 VDC, 80 mA plus load max. **Connector:** 6 pin: style MS3102E-14S-6P; 7 pin: style MS3102E-16S-1P. **Mating Connector:** 6 pin: style MS3106A-14S-6S; 7 pin: style MS3106A-16S-1S.

DYNAPAR brand Max Jr. Electronic Counters and Rate Indicators

The **MAXjr** family includes totalizing counters, predetermining counters, and rate indicators with the flexibility required for the most demanding measurement and control applications. All models have bright, high-contrast red LED displays, and NEMA 4 front panel rating.

- Calibrator scales input signal for display in engineering units
- Selectable decimal point positioning
- Non-volatile memory retains count and program during power loss
- Panel mounts in 1/2 DIN cut-out – NEMA 4 water and oil integrity
- Friendly menu-driven programming with display prompting – sealed tactile response keys
- Internal 12 VDC power supply supports external sensors

MAXjr Count 1 Totalizing Counter

Input Power: Switch selectable, 115 (95-130) VAC, or 230 (190-260) VAC; 50/60Hz, 6VA; Optional: 10-26 VDC, 0.4A MAX. **Accessory Power:** DC output provided for transducer, 12 VDC $\pm$ 25%, 125 mA max. **Display:** 8 digit, 0.3" (7.6mm) red LED with $\pm$ polarity indicator. Selectable decimal point. **Calibration:** input scaling common to inputs A and B; range 0.0001 to 9.9999. **Counting Modes:** Add/subtract; input A adds, B subtracts. Quadrature; inputs A and B count bidirectionally from quadrature signal source. **Count Rate:** to 10kHz.

Stock No.	Mfr.'s Type	Description	EACH
687-4108	MCJR1S00	MAXjr Count 1 (115/230 VAC, 50/60 Hz)	221.61
687-4109	MCJR1D00	MAXjr Count 1 (10-26 VDC operation)	252.53

MAXjr Count 2 & 3 Predetermining Counter

Display: 5 digit, 0.56" (14.2mm) red LED. 8 annunciators for ease of programming and operation. Selectable decimal point. **Calibration:** input scaling common to inputs A and B. Range 0.0001 to 9.9999. **Preset Limits:** 2 individual, each allows preset to any 5 digit value. **Preset Modes:** Upmode; resets to zero, process presets 1 and 2 when count matches limit value, down mode; resets to present limit 2 value, outputs are actuated at preset limit 1 value and at zero. Totalizer mode; presets not active, 8 decade capacity, displays either 4 most or least significant digits. **Counting Modes:** add/subtract; input A adds, B subtracts. Quadrature; inputs A and B count bidirectionally from quadrature signal source. **Count Rate:** to 10kHz, 5kHz signal rate. **Signal Inputs:** open collectors (sinking or sourcing), magnetic or contact closure (input speed limited to 20 Hz). **Control Inputs:** Reset and stop count (commands initiated when switched to common). **Control Outputs:** 2 open collector NPN (sinking), 30 VDC maximum applied voltage, 100 mA maximum load. **Reset:** Front panel pushbutton, remote, programmable automatic.

Stock No.	Mfr.'s Type	Description	EACH
687-4110	MCJR2S00	MAXjr Count 2 (115/230 VAC, 50/60 Hz)	242.23
687-4111	MCJR2D00	MAXjr Count 2 (10-26 VDC operation)	273.15
687-4112	MCJR3S00	MAXjr Count 3, with preset batch counter (115/230 VAC, 50/60 Hz)	242.23
687-4113	MCJR3D00	MAXjr Count 3, with preset batch counter (10-26 VDC operation)	335.00

MAXjr Count 4 Totalizing Counter with Rate Indicator

Input Power: Switch selectable 115(95-130) VAC or 230 (190-260) VAC; 50/60 Hz, 6 VA; optional: 10-26 VDC, 0.4 A max. **Accessory Power:** DC output provided for transducer, 12 VDC $\pm$ 25%, 125 mA max. **Display:** 8 digit, 0.3" (7.6mm) red LED with $\pm$ polarity indicator (5 digits for rate), legends for PGM (program mode), and OVF (overflow). Independent selectable decimal point for totals and rate. **Calibration:** Independent calibrators for count and rate; count scaling common to inputs A and B, rate scaled from input A, range 0.0001 to 9.9999. **Counting Modes:** Add/subtract; input A adds, B subtracts. Quadrature; inputs A and B count bidirectionally from quadrature signal source. **Rate Mode:** signal from input A; rate is calculated by converting time interval measurement to rate; programmable for minimum counts between conversions, and minimum time between conversions. **Count Rate:** to 10 kHz maximum, 5 kHz signal rate. **Signal Inputs:** open collector (sinking or sourcing), magnetic or contact closure (input speed limited to 20 Hz). **Control Inputs:** Reset and stop count.

Stock No.	Mfr.'s Type	Description	EACH
687-4114	MCJR4S00	MAXjr Count/Rate 4, (115/230 VAC, selectable)	252.53
687-4115	MCJR4D00	MAXjr Count/Rate 4, (12 VDC operation)	283.46

DYNAPAR brand Series 54Z Sensor

The 54Z Sensors operate over a wide range of air gaps making them suitable for parts counting and speed sensing applications. The wide operating voltage makes them compatible with most counters, indicators or controllers. The 54Z Series does not require a minimum target speed, and can operate from zero up to 20,000 targets per second. **Power Requirements:** 5-18 VDC, 10 mA plus load. **Weight:** 2 oz. **Operating Temperature:** -40° to +105°C. **Vibration:** 15G, 10 to 2000 Hz. **Speed Range:** 0 to 20,000 targets/second. **Output:** 1 sink 17 mA. At 18 V supply; 1 sink 23 mA @ 5 V supply; 1 source 2200 Ω pull-up. **Cable:** 105°C PVC insulation, 10 feet long.

VEEDER-ROOT brand Series 77853 Motion Detector

Used to detect zero speed or underspeed conditions in motors, shafts, belts and other applications where linear or rotary motion exists. A state-of-the-art replacement for zero speed switches 3.248" (82.5mm) long, 10mm nominal sensing distance. Shielded tubular design. 93-132VAC. Normally open output function.

Stock No.	Mfr.'s Type	Adjustable Freq. Range	Max. Operating Range	EACH
687-0069	778534-611	0.1-2.5 Hz	100 Hz	231.92
687-0070	778534-612	2-50 Hz	8000 Hz	231.92

VEEDER-ROOT brand Tubular Proximity Switches

Self-contained, shielded, non-contact, long-life replacement for mechanical switches in automated machinery. Electronics encapsulated in high density, threaded tubular packages. NPN (sinking) and PNP (sourcing) outputs interface with programmable controllers and counters. 2 meter (6'6") cable. Nickel-plated brass housing and nuts.

VEEDER-ROOT brand Series 7990 Tachometer/Totalizer/Running Hourmeter/Elapsed Time Indicator

Low-cost, combined unit, the Series 7990, Model 200 is programmable as tachometer, totalizer, running hour meter, or precise elapsed time indicator. 8 digit LCD display (5 digits in tachometer mode), 0.35" high characters. Rugged die-cast metal housing, sealed, meets NEMA 4 standards. **Power:** 3 volt Lithium battery. Fits 2.6" x 1.3" panel cutout, 1" depth. Series 7990 is available without the tachometer mode. Accessories include three snap-on modules, a panel adapter and panel adapter with key-lock reset. Panel adapters retrofit popular electro-mechanical general purpose totalizers. The Screw Terminal Module provides for the convenience of screw terminal connection. The High Voltage AC/DC Input Module features the above, plus provides for input of AC or DC signal of 25 to 270 volts. The TRIAC Input Module features the above, plus provides for AC-type, solid state input devices such as TRIAC switching devices.

To obtain the latest data sheets available on Analog Devices products, call AnalogFax™, the 24 hour automated literature delivery system at 1-800-446-6212.

at 1-800-ANALOGD (1-800-262-5643). Voice support is available 8:00 AM to 8:00 PM (E.S.T.) on Linear/Converter IC's, 8:00 AM to 5:00 PM (E.S.T.) on all other products.

To obtain technical support call Analog Devices Customer Support Hotline

To obtain data books, call Analog Devices Literature Center at (617) 461-3392.

Figure 1 — Model-Number Designations for Standard Analog Devices Monolithic and Hybrid IC Products. S, T and U Grades Have the Added Suffix /883B for Devices that Qualify to the Latest Revision of MIL-STD-883, Level B.

Figure 2 — Precision Monolithics Division's Product Designations

Two model numbering schemes are used by Analog Devices. The first model numbering scheme is used for designating standard Analog Devices monolithic and hybrid products. The second scheme is used by our Precision Monolithics Division (formerly PMI) as designators for its product line.

Figure 2 shows a different numbering scheme used by our Precision Monolithics Division. This numbering scheme starts with a prefix which designates the device type and model number. It is then followed by a suffix consisting of alphabetic designators (as applicable) to indicate additional functional designations or options and packaging options.

Figure 1 shows the form of model number used for our proprietary standard monolithic ICs and many of our hybrids. It consists of an "AD" (Analog Devices) prefix, a 3-to-5 digit number, an alphabetic performance/temperature-range designator and a package designator. One or two additional letters may immediately follow the digits ("A" for second-generation redesigned ICs, "DI" for dielectrically isolated CMOS, e.g., AD536AJH, AD7512DIKID).

For some models, the combination (digit) (letter) (two or three digits) is used instead of ADXXXX, e.g., 2S80.

Digital Signal Processors

32-Bit Code Fixed-Point Digital Signal Processors

Mfr.'s Type	MIPS	Input Voltage Supply (V)	PM RAM	PM ROM	DM RAM	Serial Ports	Host Port	On-Chip AD and D/A	Package Type
ADSP-2105KP-55	13.8	5	1 K	—	0.5 K	1	—	—	68 Lead PLCC
ADSP-2115KP-80	20.0	5	1 K	—	0.5 K	2	—	—	68 Lead PLCC
ADSP-2171KS-133	33.0	5	2 K	8 K	2.0 K	2	Yes	—	128 Lead PLCC

Digital Signal Processor Development Tools

The EZ-KIT packages provide everything a designer needs to start designing a DSP system — an EZ-LAB development board and a complete set of development software.

Mfr.'s Type	Description
ADDS-2101-EZ-KIT	Supports ADSP2100 Family 16-Bit Fixed-Point DSP Designs.
ADDS-2106X-EZ-KIT	Supports ADSP21000/SHARC Family 32-Bit Floating Point Designs.

Analog-to-Digital Converters

This section contains selection guides for stand alone, general — and special purpose — analog-to-digital converters (ADCs), including many sampling types.

High Speed ADCs

Mfr.'s Type	Resolution in Bits	Throughput Rate MSPS Max.	Linearity Error (LSB @ TA = +25°C)	Full Power BW MHz Typ.	Bus Interface Bits*	Reference Voltage Int/Ext†	Comments

AD9032AD	12	25.00	1.25	150	12	Int	World's Fastest Complete 12-Bit ADC

*This column lists the data format for the bus with "uP" indicating microprocessor capability — i.e., for a 12-bit converter 8/12, uP indicates that the data can be formatted for an 8-bit bus or can be in parallel (12 bits) and is microprocessor compatible. †Ext. indicates external reference with the range of voltages listed where applicable. Ext.(M) indicates external reference with multiplying capability. Int. indicates reference is internal. A voltage value is given if the reference is pinned out.

Digital-to-Analog Converters

A Digital-to-Analog (DAC) Converter accepts a digital input and produces an analog output. The basic DAC consists of a voltage or current reference, binary weighted precision resistors, a set of electronic switches and a means of summing the weighted currents.

Three important criteria are required for selecting the right DAC: resolution, accuracy and speed. Other requirements to be considered are temperature stability, input coding, output format, reference requirements and power consumption.

Single DACs, Current Output

Mfr.'s Type	Resolution in Bits	Settling Time μ s Typ.	Linearity Error (LSB @ TA = +25°C)	Bus Interface Bits*	Reference Voltage Int/Ext (M)†	Comments

*This column lists the data format for the bus with "μP" indicating microprocessor capability — i.e., for a 12-bit converter 8/12, μP indicates that the data can be formatted for an 8-bit bus or can be in parallel (12 bits) and is microprocessor compatible.
†Ext. indicates external reference with the range of voltages listed where applicable. Ext.(M) indicates external reference with multiplying capability. Int. indicates reference is internal. A voltage value is given if the reference is pinned out.

Analog Switches and Multiplexers

Analog Devices offers a complete line of monolithic analog multiplexers and switches which are well suited for a wide range of applications including data acquisition, process control, instrumentation, video systems and telephony systems. Solid-state analog multiplexers and switches provide the ability to control and select a specified transmission path for an

analog signal. In selecting analog multiplexers and switches attention must be paid to several key specifications which affect system performance, including ON Resistance (R_{on}) and Analog Input Leakage Current (I_{off}).

AD204KN	2000	1-100	±0.025	5	Lowest Cost, Small Size, Multichannel
AD204KY	2000	1-100	±0.025	5	Lowest Cost, Small Size, Multichannel

AD203 Military Temperature Range Isolation Amplifier

Full Power Bandwidth: 10 kHz.

AD203SN	2000	1-100	±0.025	10	Rugged, Military Temperature Range, Wide 10 kHz Bandwidth
---------	------	-------	--------	----	---

AD208 Precision, mV Input Isolation Amplifier

Gain Range: 1 to 1000 V/V. Input Offset Voltage: 0.27 mV max.

Mfr.'s Type	Peak Volt I_{in} V pk	Gain Range V/V	Gain Nonlin. % Max.	Freq. Resp. kHz	Comments
AD208AY	1000	1-1000	±0.030	0.4-4 kHz	Precision, Low Cost, Single Channel, mV Input
AD208BY	2000	1-1000	±0.015	0.4-4 kHz	Precision, Low Cost, Single Channel, mV Input

AD210 Precision, 3-Port Input and Output Isolation Amplifier

Input, output power ports. Isolated Power: ±15 V at 5 mA.

AD210AN	3500	1-100	±0.025	20	Precision, 3-Port Isolation, Wide Bandwidth
AD210BN	3500	1-100	±0.012	20	Precision, 3-Port Isolation, Wide Bandwidth
AD210JN	1500	1-100	±0.025	20	Precision, 3-Port Isolation, Wide Bandwidth

Sample/Track-and-Hold Amplifiers

A sample/track-and-hold amplifier (SHA/THA) is a device that samples an analog input signal then holds the instantaneous value upon the command of a logic control signal. This device is basically an analog memory where a capacitor serves as the storage element.

Popular applications utilizing the sample-and-hold function include data acquisition in which the SHA is used to capture the last instantaneous sampled analog input voltage prior to a conversion and hold this sample with minimal degradation

during the conversion process. SHAs/THAs are also popular in signal processing applications using ADCs with a subranging or successive approximation architecture.

Significant improvement in dynamic performance can be made by placing fast SHAs with low aperture jitter ahead of flash ADCs. SHAs are also useful in applications including D/A deglitchers, simultaneous sampling systems, peak detectors, pulse stretchers, delay lines and data distribution systems.

Mfr.'s Type	Nonlinearity % FS Max.	Acquisition Time (to 0.01%)	Aperture Time ns Typ.	Aperture Jitter Typ.	Droop Rate $\mu V/\mu s$ Max.	Comments

Audio Amplifiers

ADI offers a full line of products for high-end audio applications. Below are listed a sampling of the audio amplifier products. Other listings show audio switches, matched transistors, DACs, and others. Featured here are the OP176 and OP275 with excellent noise specs, low power consumption and small packaging.

Mr.'s Type	Description
OP176GP	The OP176 is a low noise, high output drive op amp with a combination bipolar and JFET front end.
OP176GS	Noise = 6 nV/√Hz, SR = 25 V/μs, ISY = 2.5 mA, GBW = 10 MHz-excellent for high performance applications.
OP275GP	The OP275 is a dual, bipolar/JFET amplifier featuring low distortion (0.0006%) at low supply current (5 mA). Noise = 6 nV/√Hz, SR = 22 V/μs, GBW = 9 MHz. 8-pin DIP and SOIC.
OP275GS	The OP275 is a dual, bipolar/JFET amplifier featuring low distortion (0.0006%) at low supply current (5 mA). Noise = 6 nV/√Hz, SR = 22 V/μs, GBW = 9 MHz. 8-pin DIP and SOIC.
SSM2017P	The SSM2017, ultralow noise audio preamplifier features 0.95 nV/√Hz at 20 kHz BW and low cost.
SSM2018P	The SSM2018 Voltage Controlled Amplifier has the highest performance available. No external amp req'd.
SSM2024P	The SSM2024 quad is a low cost current controlled amplifier.
SSM2120P	The SSM2120 dual VCA also encompasses 2 level detectors on board for dynamic range processing.
SSM2135P	The SSM2135 is a dual, single supply amplifier offering high output drive capability with excellent sonic characteristics. 5.2 nV/√Hz, 0.001% THD+N, 8-pin SOIC and PDIP.
SSM2135S	The SSM2135 is a dual, single supply amplifier offering high output drive capability with excellent sonic characteristics. 5.2 nV/√Hz, 0.001% THD+N, 8-pin SOIC and PDIP.
SSM2141P	The SSM2141 is a high CMR differential line receiver complementing the SSM2142 line driver.
SSM2142P	The SSM2142 is a balanced differential line drivers, capable of driving 10 V RMS into a 600 Ω load.
SSM2143P	The SSM2143 is a -6 dB differential line receiver. CMR = 90 dB typ. with ultralow THD (0.0006% typ.).

Analog Multipliers/Dividers

Analog Multipliers/Dividers are devices that can accept analog voltages and multiply, divide, square and/or square-root them. These devices can process signals over a wide frequency range (from DC to over 500MHz) and with varying degrees of accuracy, (from 0.4% full scale to 2% full scale), depending on the device selected. Most of these devices are referred to as "4-quadrant multipliers," meaning that these devices can accept any combination of input signal polarity

and provide output signals of appropriate polarity. Analog Multipliers can be used to implement a wide variety of signal processing functions including modulation and demodulation, fixed and variable remote gain adjustment, power measurement and mathematical operations in analog computing, curve fitting and linearizing.

Modulator/Demodulator

This category is unusual in that it includes a single product, the AD630. The AD630 is a fast, flexible switched dual-input op amp with an on-chip comparator. The AD630 is intended to operate in wide-band, low level and wide-dynamic range instrumentation applications and coherent systems. The AD630 is capable of many analog signal processing functions such as balanced modulation and demodulation, phase detection, square-wave multiplication, absolute-value

amplification, and two-channel precision multiplexing. It can also be used as a lock-in amplifier, synchronous detector, rectifier, and much more. The AD630 essentially provides a complete, solution, with on-chip scaling resistors and requires little or no additional circuitry.

Mr.'s Type	Unity Gain Channel BW MHz Typ.*	Open Loop Gain Min./dB	Input Offset Voltage Max./μV	Output Voltage Swing Min.	Comments

*Unity gain small signal bandwidth.

RMS-to-DC Converters

RMS-to-DC converters continuously compute the instantaneous square of an input signal, average it, and take the square root of the result, to provide a dc voltage proportional to the rms of the input. Some of these devices, like the AD536A and the AD636, also provide an auxiliary dc output voltage that is proportional to the logarithm of the rms value, for dB measurements.

True rms devices like these are widely used for the measurement of electrical signals derived from mechanical phenomena, such as strain, stress, vibration, shock, expansion, bearing noise, thermal noise and acoustical noise. The electrical signals produced by these mechanical actions are often noisy, nonperiodic, nonsinusoidal, and superimposed

on dc levels, and require true rms measurement for consistent, valid and accurate measurements. RMS converters are also useful for accurate measurements on low-repetition-rate pulse trains having high crest factors (ratio of peak to rms value), and for the measurements of Silicon Controlled Rectifier waveforms at different firing angles.

These devices provide excellent pre-trimmed performance, improvable by simple optional trims, making them ideal for all types of laboratory and OEM rms instrumentation where amplitude measurements must be made with high accuracy and independent of wave shape.

Signal Compression

Signal compression products fall into two categories: variable gain amplifiers and logarithmic amplifiers. Logarithmic amplifiers like the AD606 and the AD640 provide an output voltage proportional to the logarithm of the input voltage for signals from dc to 120 MHz. Variable gain amplifiers like the AD600/602 and AD603 use a patented (X-AMP) technology which allows the amplifier gain to be varied as the dynamic range of the input signal changes.

Logarithmic amplifiers are excellent in all applications that require compression of wide-range analog input data. Variable gain amplifiers are typically employed as fast-response automatic gain control (AGC) elements in RF and IF systems. Alternatively, they can be used to provide time gain control (TGC) in applications such as commercial sonar.

Special Function

Analog RGB-to-NTSC/PAL encoders like the AD720 encode red, green and blue (RGB) component video signals into National Television Standards Committee (NTSC) or Phase Alternating Line (PAL) luminance (brightness), chrominance (color), and composite (luminance summed with chrominance) baseband signals. This device can be used to perform

video signal encoding in many OEM systems including personal computers, CATV converters, flight simulators, CD ROMs and medical ultrasound systems. The AD720 is a highly integrated, cost-effective video encoding system, which offers substantially better video picture quality than that of other analog video encoders available today.

Mfr.'s Type	Video Output BW Typ.	Supply Voltage	Power Consumption mW	Comments
AD720JP	5 MHz	± 5 V	200	RGB to NTSC/PAL Encoder

Interface Products

The ADM2XXL family is designed to meet the EIA-232E specifications while operating from a single +5 V power supply. This is achieved by the use of an on-chip voltage doubler. Older generation RS-232 drivers required three separate power supplies: +5 V, +12 V, and -12 V, resulting in large bulky power supply units. Linear voltage regulators tend to be inefficient and are wasteful of power. This is especially a problem in today's portable equipment which operates with

battery powered supplies. Ideally the single power supply should be used which can easily be derived from a battery pack. A new design, Analog Devices' process for the 5 V RS-232 market offers lowest ICC, lowest I shutdown and the highest speed in its class. Our ADM23XL series of line drivers/receivers are major upgrades.

Power Management Products

μ Processor Supervisory Circuits

The ADM69X series are CMOS Microprocessor Supervisory Circuits that operate from a single 5 V supply. This family of parts are monitor circuits that take emergency action when the main V_{CC} supply or other system monitors to the processor drop below a precisely defined level. These products are superior upgrades to other manufacturers, with five times less supply current to deliver twice the output current. Chip Enable (CE) propagation delay an order of magnitude

faster, a V_{CC} to reset comparator response time an order of magnitude faster and a guaranteed valid reset down to 1 V V_{CC} . These benefits over other manufacturer's products will extend battery life, allow for a wider application base and offer faster response times allowing for more accurate system supervision at competitive prices.

Mfr.'s Type	Operating Voltage Range	V_{CC} Timeout Delay (ms)	Reset (mA Max.)	I_{DD} (Norm. Oper.)	R_{ON}^* (Battery 8 U.)	Output Current Drive	Valid RESET @ 1 V	Specified Over Temp.	CE Propagation Delay	Comments

Voltage-to-Frequency/Frequency-to-Voltage Converters

Voltage-to-Frequency Converters (VFCs) convert analog voltage or current levels to pulse trains or square waves in logic compatible form (usually TTL) at frequencies that are accurately proportional to the analog quantity. The output continuously tracks the input signal, responding directly to changes in the input signal. Frequency-to-Voltage Converters (FVCs) perform the inverse operation; they accept a wide variety of periodic waveforms and produce an analog output

proportional to frequency. Combining adjustable threshold, gain and output offset with low linearity error, F/V converters offer economical solutions to a wide variety of applications where it is required to convert frequency to an analog voltage. Applications of both forms of conversion, as appropriate to specific device types, are illustrated with varying degrees of detail on the individual product datasheets.

Voltage-to-Frequency Converters

Voltage References

The Voltage Reference's main purpose is to resist any change in the output of a circuit. Therefore, the ideal reference maintains a constant output voltage, independent of load changes, temperature, or variations in input voltage and time.

Micropower Linear Voltage Regulators

The ADM663/ADM666 contains a micropower bandgap reference voltage source, an error amplifier, two comparators and a series pass output transistor. A P-Channel Fet and NPN transistor are used on the ADM663 while the ADM666 uses an NPN output transistor.

Mfr.'s Type	VTC Sink Current, ITC	LBI Input Threshold, VLBI	Dropout Voltage	Load Regulation*	Line Regulation	Quiescent Current @ TA=25°C	Maximum Power Dissipation	Comments

Temperature Sensor with Signal Conditioning

Monolithic temperature sensor with on-chip signal conditioning. The signal conditioning eliminates the need for any trimming, buffering, or linearization circuitry, greatly simplifying the system design and reducing the overall system cost. Operating Voltage Range: 4.0-6.0 V.

Mfr.'s Type	Temperature Range	Initial Error TA=25°C	Error Over Temperature	Package
AD22100KT	Commercial	±2.0	±2.0	T0-92
AD22100AT	Industrial	±2.0	±3.7	T0-92

Accelerometers

- Full Scale Measurement Range: ADXL05 — ±5 g; ADXL50 — ±50 g
- Self-Test on Digital Command
- Single Supply Operation
- Sensitivity Precalibrated to 200 mV/g (ADXL05), to 19 mV/g (ADXL50)
- Internal Voltage Reference
- Internal Output Buffer Amplifier for User Adjustable Span and Zero-g Levels
- Post Filtering with External Passive Components
- Complete Acceleration Measurement System on a Single Monolithic IC
- Frequency Response: ADXL05 — DC to 4 kHz; ADXL50 — DC to 10 kHz
- High Shock Survival: ADXL05 — >1000 g; ADXL50 — >2000 g
- Internally Temperature Compensated

Temperature Sensor/Controller

TMP01 is a temperature sensor which generates a voltage output proportional to absolute temperature and a control signal from one of two outputs when the device is either above or below a specific temperature range. Both the high/low temperature trip points and hysteresis (overshoot) band are determined by user-selected external resistors.

Mfr.'s Type	Operating Voltage Range (V)	Accuracy Typ.	Vos mV	Package	Temperature Range
TMP01EP	4.5-13.2	±0.5°C	0.25	Plastic DIP	-55 to +125°C
TMP01FP	4.5-13.2	±1.0°C	0.25	Plastic DIP	-55 to +125°C
TMP01ES	4.5-13.2	±0.5°C	0.25	SOIC	-55 to +125°C
TMP01FS	4.5-13.2	±1.0°C	0.25	SOIC	-55 to +125°C
TMP01FJ	4.5-13.2	±1.0°C	0.25	CAN	-55 to +125°C

ADXL05 ±1 to ±5 g Single Chip Accelerometer with Signal Conditioning

Low g designed for ±1 and ±2 g applications. **Tilt Measurement:** Virtual reality headsets, pointing devices/joysticks, compass correction. **Inertial Measurement:** GPS navigation systems, missile guidance and control, stabilized platforms. **Vibration and Shock:** Machine health, instrumentation. **Resolution:** 0.005 g.

Mfr.'s Type	Measurement Range	Typical 0 g Bias Drift*	Temperature Range (°C)	Package Type
ADXL05JH	±1 to ±5 g	±0.5	0 to +70	10 Lead Header (T0-100)
ADXL05AH	±1 to ±5 g	±0.5	-40 to +85	10 Lead Header (T0-100)
ADXL05SP†	±1 to ±5 g	±0.5	0 to +70	10 Lead Header (T0-100)

ADXL50 0 to ±50 g Monolithic Accelerometer with Signal Conditioning

Mfr.'s Type	Measurement Range	Typical 0 g Bias Drift*	Temperature Range (°C)	Package Type
ADXL50JH	0 to ±50 g	±15 mV	0 to +70	10 Lead Header (T0-100)
ADXL50AH	0 to ±50 g	±35 mV	-40 to +85	10 Lead Header (T0-100)
ADXL50SP†	0 to ±50 g	±35 mV	-40 to +85	10 Lead Header (T0-100)

*% of reading, specification refers to the maximum change in parameter from its initial at +25°C to its worst case value at Tmin. to Tmax. †Sample Pack. Contains two ADXL05 plus circuit boards and application notes. ‡Sample Pack. Contains two ADXL50AH and application notes.

Diode and Rectifier Kits

CEC-115
1 Watt Zener Diode Kit

- ▶ 12 of the Most Popular 1 Watt Design Voltages
- ▶ Double Plug Package, Highly Reliable and Rugged
- ▶ Low Leakage Current
- ▶ Uniform Sharp Reverse Breakdown Voltages
- ▶ Uniform Heat Dissipation
- ▶ Easy to Read Label Clearly Shows Zener Type and Voltage
- ▶ Total of 120 Zener Diodes

Features

- ▶ Excellent Clamping Characteristics
- ▶ High Discharge Current Capability — Up to 4000 Amps
- ▶ Fast Response Time — Under 50 Nanoseconds
- ▶ Wide Operating Temperature Range
- ▶ Eliminate Follow-On Current
- ▶ Improve Product Safety
- ▶ Protect Circuit Insulation and Improve System Reliability
- ▶ Low Installation Cost
- ▶ UL Recognized (UL1414, UL1449)
- ▶ Lead Wire: High Temperature Solder Plated Mild Copper Wire
- ▶ Molded Material: Flame Resistant Epoxy Resin (UL, 94V0 Equivalent)

*Indicates UL listed.

Notes: The waveform of the maximum DC applied voltage is flat. When a ripple voltage as from a rectifier source is applied, make sure that the peak voltage is within the Vdcm rating.

The AC applied voltage (50/60 Hz) is sine waveform.

When waveform distortion is extensive, make sure that the peak voltage is less than $\sqrt{2}$ times the Vacm rating.

*Energy, Wtm.

Transient energy ratings are given in the Wtm column in Joules (watt-second). The rating is the maximum allowable energy of a single 2 ms square-waveform impulse current continuously applied. Energy ratings are based on a shift of

Vnom of less than $\pm 10\%$ of the initial value.

*Nominal varistor voltage: Vnom.

Indicates the varistor terminal voltage measured with 1 mA DC applied.

*Maximum clamping voltage: Vc.

Indicates the peak terminal voltage.

Operating Ambient Temperature: -40°C to $+85^{\circ}\text{C}$.

Storage Temperature: -40°C to $+125^{\circ}\text{C}$.

Series CG, CG2 and PMT3 (310)

- ▶ Fastest surge arresting response.
- ▶ High peak surge current capability.
- ▶ Lowest interelectrode capacitance.
- ▶ Rugged ceramic construction.
- ▶ Available on tape and reel for automatic insertion for some product types.
- ▶ Hermetically sealed.
- ▶ Meets the requirements of REA PE-80, IEEE 587 and CCITT K12.
- ▶ UL recognition on some products.

Clare surge arrestors protect personnel and equipment from damaging high-voltage surges from lightning, inductive switching, nuclear electromagnetic generation, or electrostatic discharge. Through ongoing research and engineering improvements, Clare has developed a family of surge arrestors that offer impressive characteristics for a variety of applications.

Engineering Specifications	AC	CG/CG2	PMT 3 (310)

600 Watt Surface Mount Transient Voltage Suppressors

Case Type: SMB/DO214AA. Tolerance: $\pm 5\%$. Peak Impulse Current Waveform: 10/1000 μ s at $T_A = 25^\circ\text{C}$. Modified J-Bend Leads (C-Bend). For bidirectional types having V_{BR} of 10 volts and less, the I₀ limit is doubled.

*All bridge series are UL recognized under component index, file number E54214. All bridge series are made with glass passivated chip junctions. †Surface mountable bridge rectifiers. ‡Add W to part number for wire leads.

Harris AnswerFax®: (407) 724-7800

AnswerFax® is Harris' new automated facsimile response system. AnswerFax® allows users access to data sheets and application notes on the latest Harris Semiconductor products, 24 hours a day and 7 days a week.

To access AnswerFax® from any touch-tone phone: Call (407) 724-3818 and touch-tone your way through the simple instructions. Then enter the AnswerFax® order numbers from the selection guide and you'll have the information you requested at your facsimile machine in minutes.

Harris Application Hotline: 1-800-442-7747

Call the Applications Hotline to obtain technical assistance on designing in Harris semiconductors.

Harris Semiconductor 1994 Product Selection Guide

This 320 page product selection guide offers key product information on all Harris Semiconductor Devices. Sectioned (Analog, Data Acquisition, Digital, Application Specific, Power, Hi-Rel and Rad-Hard, ASIC) for easy use and includes cross references and alphanumeric part number index. To obtain your copy, simply fax your name and mailing address to: Harris Fulfillment, FAX# (610) 265-2520, Attn: Laurie Malantonio. Request Publication Number: PSG2091.20.

80Cxx Microprocessors

80C286, 16 Bit High Performance Microprocessor with Memory Management and Protection

Fully compatible with NMOS 80286. **Static CMOS Design for Low Power Operation:** ICCSB = 5 mA max., ICCOP = 220 mA (80C286-12). **Large Address Space:** 16 Mbytes physical, 1 Gbyte virtual per task. **High Bandwidth Bus Interface:** 25 Mbytes.

Mfr.'s Type	Max. Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
CS80C286-12	12.5	5.0	68 Lead PLCC	0 to +70	2947

IS80C286-20	20.0	5.0	68 Lead PLCC	-40 to +85	2947

80C86, CMOS 16 Bit High Performance Microprocessor

Fully compatible with NMOS 8086. **Static CMOS Design for Low Power Operation:** ICCSB = 500 µA max., ICCOP = 10 mA at 10 MHz Typ. 1 Mbyte of direct memory addressing capability, 24 operand addressing modes.

Mfr.'s Type	Max. Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)

CDP18xx Microprocessors, 8 Bit Microprocessors with 64 K Memory Addressing

16 × 16 matrix of registers for use as multiple program counters, data pointers or data registers. Single phase clock; optional on chip crystal controlled oscillator. Flexible programmed I/O mode. 8 bit parallel organization with bidirectional

data bus and multiplexed address bus.

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)

Microprocessor Peripherals (82Cxx)

82C37A, CMOS High Performance Programmable DMA Controller

Fully compatible with the NMOS 8237A. Four independent maskable channels with autoinitialization capability. Cascadable to any number of channels. **High Speed Data Transfers:** Up to 4 Mbytes/sec. with 8 MHz clock, up to 6.25 Mbytes/sec

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
CP82C37A	8.0	5.0	40 Lead PDIP	0 to +70	2967

IS82C37A-12	12.5	5.0	44 Lead PLCC	-40 to +85	2967

82C237A, Enhanced CMOS High Performance Programmable DMA Controller

Optimized for 10 MHz and 12.5 MHz 80C286 Systems. Fully compatible with Harris 82C37A. Special mode permits 16 bit, zero wait state DMA transfers. **High Speed Data Transfers:** Up to 6.25 Mbytes/sec. with 12.5 MHz clock, up to 12.5 Mbytes/sec. with 12.5 MHz clock in 16 bit mode. Memory to memory transfers. Compatible with the NMOS 8237A.

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
CP82C237	8.0	5.0	40 Lead PDIP	0 to +70	2965
CP82C237-12	12.5	5.0	40 Lead PDIP	0 to +70	2965

CS82C237-12	12.5	5.0	44 Lead PLCC	0 to +70	2965

Four independent maskable channels with autoinitialization capability. Cascadable to any number of channels. **Static CMOS Design For Low Power Operation:** ICCSB = 10 µA max., ICCOP = 2 mA/MHz max. Fully TTL/CMOS compatible.

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
IP82C237	8.0	5.0	40 Lead PDIP	-40 to +85	2965
IP82C237-12	12.5	5.0	40 Lead PDIP	-40 to +85	2965
IS82C237	8.0	5.0	44 Lead PLCC	-40 to +85	2965
IS82C237-12	12.5	5.0	44 Lead PLCC	-40 to +85	2965

82C54, CMOS Programmable Interval Timer

Fully compatible with NMOS 8254, enhanced version of NMOS 8253. Three independent 16 bit counters. Six programmable counter modes. Binary or BCD counting. Status read back command. **Static CMOS Design For Low**

Mfr.'s Type	Max. Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
CP82C54	8.0	5.0	24 Lead PDIP	0 to +70	2970
CP82C54-12	12.5	5.0	24 Lead PDIP	0 to +70	2970

IS82C54	8.0	5.0	28 Lead PLCC	-40 to +85	2970
IS82C54-12	12.5	5.0	28 Lead PLCC	-40 to +85	2970

82C55A, CMOS Programmable Peripheral Interface

Fully compatible with NMOS 8255A. 24 programmable I/O pins. High speed, no wait state operation with 5 MHz and 8 MHz 80C86 and 80C88. Direct bit set/reset compatibility. Enhanced control word read capability. 2.5 mA drive capability

Mfr.'s Type	Max. Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
CP82C55A	8.0	5.0	40 Lead PDIP	0 to +70	2969
CS82C55A	8.0	5.0	44 Lead PLCC	0 to +70	2969

on all I/O ports. **Static CMOS Design For Low Power:** ICCSB = 10 µA. Fully TTL compatible.

Mfr.'s Type	Max. Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
IP82C55A	8.0	5.0	40 Lead PDIP	-40 to +85	2969
IS82C55A	8.0	5.0	44 Lead PLCC	-40 to +85	2969

82C59A, CMOS Priority Interrupt Controller

Fully compatible with the NMOS 8259A. Eight level priority controller, expandable to 64 levels. Programmable interrupt modes, individual request mask capability. **Static CMOS Design For Low Power Operation:** ICCSB = 20 µA max.,

Mfr.'s Type	Max. Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
CP82C59A	8.0	5.0	28 Lead PDIP	0 to +70	2784
CP82C59A-12	12.5	5.0	28 Lead PDIP	0 to +70	2784
CS82C59A	8.0	5.0	28 Lead PLCC	0 to +70	2784
CS82C59A-12	12.5	5.0	28 Lead PLCC	0 to +70	2784

ICCOP = 1 mA/MHz max. Fully TTL compatible.

Mfr.'s Type	Max. Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
IP82C59A	8.0	5.0	28 Lead PDIP	-40 to +85	2784
IP82C59A-12	12.5	5.0	28 Lead PDIP	-40 to +85	2784

Microprocessor Peripherals (82Cxx) — Continued

82C84A, CMOS Clock Generator Driver

Fully compatible with the NMOS 8284A. Generates the system clock for CMOS or NMOS microprocessors up to 25 MHz operation. Uses a parallel mode crystal circuit or external frequency source. Provides read synchronization. Generates

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
CP82C84A	25	5.0	18 Lead PDIP	0 to +70	2974
CS82C84A	25	5.0	20 Lead PLCC	0 to +70	2974

system reset output from schmitt trigger input. TTL compatible inputs/outputs. Very low power consumption.

CDP18xx Series CMOS Peripherals — Can be used with CMOS and NMOS Processors

CDP1851, 20 Line Programmable Input/Output Interface

Programmable for Operation in Four Modes: Input, output, bidirectional, bit-programmable. Operates in either I/O or memory space.

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
CDP1851CD	8	5.0	40 Lead CDIP	-40 to +85	1056
CDP1851CE	8	5.0	40 Lead PDIP	-40 to +85	1056

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
CDP1851E	16	10.0	40 Lead PDIP	-40 to +85	1056

CDP1852, High Reliability Byte Wide Input/Output Port

Parallel 8 bit data register and buffer. Handshaking via service request. Low quiescent and operating power. Single voltage supply. Static silicon gate CMOS circuitry.

CDP1852CD	2	5.0	24 Lead CDIP	-40 to +85	1166
CDP1852CE	2	5.0	24 Lead PDIP	-40 to +85	1166

CDP1852D	5	10.0	24 Lead CDIP	-40 to +85	1166
CDP1852E	5	10.0	24 Lead PDIP	-40 to +85	1166

CDP1853, High Reliability CMOS N-Bit 1 of 8 Decoder

Provides direct control of up to 7 input and 7 output devices when used with a CDP18xx Series microprocessor. Chip Enable (CE) allows easy expansion for multi-level I/O systems.

CDP1853CD	—	5.0	16 Lead CDIP	-40 to +85	1189
CDP1853CE	—	5.0	16 Lead PDIP	-40 to +85	1189

CDP1853D	—	10.0	16 Lead CDIP	-40 to +85	1189
CDP1853E	—	10.0	16 Lead PDIP	-40 to +85	1189

CDP1854A, Programmable Universal Asynchronous Receiver/Transmitter (UART)

Two Operating Modes: Mode 0 — Functionally compatible with industry types such as the TR1602A; Mode 1 — Interfaces directly with CDP18xx Series microprocessors without additional components. Full or half duplex operation.

CDP1854ACD	0.2	5.0	40 Lead CDIP	-40 to +85	1193
CDP1854ACE	0.2	5.0	40 Lead PDIP	-40 to +85	1193
CDP1854ACQ	0.2	5.0	44 Lead PLCC	-40 to +85	1193

Parity framing and overrun error detection. False start bit detection. **Baud Rate:** DC to 200 KBits/s at $V_{DD} = 5$ V. DC to 400 KBits/s at $V_{DD} = 10$ V.

CDP1854AD	0.4	10.0	40 Lead CDIP	-40 to +85	1193
CDP1854AE	0.4	10.0	40 Lead PDIP	-40 to +85	1193
CDP1854AQ	0.4	10.0	44 Lead PLCC	-40 to +85	1193

CDP1855, 8-Bit Programmable Multiply/Divide Unit

Cascadable up to 4 units for 32-bit by 32-bit multiply or 64÷32 bit divide. 8-bit by 8-bit multiply or 16÷8 bit divide in 5.6 μ s at 5 V or 2.8 μ s at 10 V. Significantly increases throughput of microprocessor used for arithmetic calculations.

CDP1855CD	—	5.0	28 Lead CDIP	-40 to +85	1053
CDP1855CE	—	5.0	28 Lead PDIP	-40 to +85	1053

CDP1855D	—	10.0	28 Lead CDIP	-40 to +85	1053
CDP1855E	—	10.0	28 Lead PDIP	-40 to +85	1053

CDP1857C, 4-Bit Bus Buffer/Separator

Provides easy connection of I/O to CDP18xx Series microprocessors data bus. Non-inverting fully buffered data transfer.

CDP1857CD	—	5.0	16 Lead CDIP	-40 to +85	1192
-----------	---	-----	--------------	------------	------

CDP1857CE	—	5.0	16 Lead PDIP	-40 to +85	1192
-----------	---	-----	--------------	------------	------

CDP1871, CMOS Keyboard Encoder

Scans and generates code for 53 key ASCII keyboard plus 32 HEX keys (SPST mechanical contacts switches). Shift, control, and alpha lock input. RC-controlled debounce circuitry. N-key lockout. 3-state outputs. Low power dissipation.

CDP1871ACD	—	5.0	40 Lead CDIP	-40 to +85	1374
CDP1871ACE	—	5.0	40 Lead PDIP	-40 to +85	1374
CDP1871ACQ	—	5.0	44 Lead PLCC	-40 to +85	1374

CDP1871AD	—	10.0	40 Lead CDIP	-40 to +85	1374
CDP1871AE	—	10.0	40 Lead PDIP	-40 to +85	1374

CDP1874C, CDP1875C, High Speed 8-Bit Input and Output Ports

Parallel 8-bit input/output register with buffered outputs. High speed data-in to data-out, 85 ns (max.) at $V_{DD} = 5$ V. 3-state output.

CDP1874CE	—	5.0	22 Lead CDIP	-40 to +85	1255
-----------	---	-----	--------------	------------	------

CDP1875CE	—	5.0	22 Lead PDIP	-40 to +85	1255
-----------	---	-----	--------------	------------	------

CDP1877, Programmable Interrupt Controller (PIC)

Programmable long branch vector address and vector interval. 8 levels of interrupt per chip. Latched interrupt requests. Hard wired interrupt priorities. Memory mapped. Multiple chip select inputs to minimize address space requirements.

CDP1877CE	—	5.0	28 Lead PDIP	-40 to +85	1319
-----------	---	-----	--------------	------------	------

CDP1877E	—	10.0	28 Lead PDIP	-40 to +85	1319
----------	---	------	--------------	------------	------

CDP1878C, CMOS Dual Counter-Timer

Two 16-bit down counters and two 8-bit control registers. Programmable gate level select. Two complemented output pins for each counter-timer.

CDP1878CD	1	5.0	28 Lead CDIP	-40 to +85	1341
-----------	---	-----	--------------	------------	------

CDP1878CE	1	5.0	28 Lead PDIP	-40 to +85	1341
-----------	---	-----	--------------	------------	------

CDP1879, CMOS Real-Time Clock

Time of day/calendar. Reads seconds, minutes, hours, day of month and month. Alarm circuit with seconds, minutes or hours operation. Power down mode. On-board oscillator. Separate clock output selects 1 of 15 square wave signals.

CDP1879CD1	4.19 MHz, 2.09 MHz, 1.048 MHz, or 32 KHz	5.0	24 Lead CDIP	-40 to +85	1360
CDP1879CE1	4.19 MHz, 2.09 MHz, 1.048 MHz, or 32 KHz	5.0	24 Lead PDIP	-40 to +85	1360

Interrupt Output Activated By Clock Output and/or Alarm Circuit.

CDP1879E	4.19 MHz, 2.09 MHz, or 1.048 MHz	10.0	24 Lead PDIP	-40 to +85	1360
—	—	—	—	—	—

CDP1881, CDP1882, CMOS 6-Bit Latch and Decoder Memory Interfaces

Performs memory address latch and decoder functions multiplexed or non-multiplexed. Decodes up to 16 Kbytes of memory. Can replace CDP1866 and CDP1867 (upward speed and function capability).

CDP1881CE	—	5.0	20 Lead PDIP	-40 to +85	1367
CDP1882CE	—	5.0	18 Lead PDIP	-40 to +85	1367

CDP1882D	—	10.0	18 Lead CDIP	-40 to +85	1367
—	—	—	—	—	—

CDP1883, CMOS 7-Bit Latch and Decoder Memory Interfaces

Performs memory address latch and decoder functions multiplexed or non-multiplexed. Decodes up to 32 Kbytes of memory. Can replace CDP1866.

Data Communications

HS-3182, ARNIC 429 Bus Interface Line Driver Circuit

TTL and CMOS compatible inputs. Adjustable rise and fall times via two external capacitors. Programmable output differential voltage via VREF input. Operates at data rates up to 100 KBits/s. Output short circuit proof and contains

HS1-3182-8	—	+15, -15, +5	16 Lead CDIP	-55 to +125	2963

HS-3282, CMOS ARNIC Bus Interface Circuit

ARNIC Specification 429 compatible. Data rates of 100 KBits or 12 KBits. Separate receiver and transmitter section. Dual independent receivers, connecting directly to ARNIC bus. Serial to parallel receiver conversion. Parallel to serial

HS1-3282-8	—	5.0	40 Lead CDIP	-55 to +125	2964
------------	---	-----	--------------	-------------	------

HD-4702, CMOS Programmable Bit Rate Generator

Provides 13 commonly used bit rates. Uses a 2.4576 MHz crystal/input for standard frequency Output (16 times bit rate). Conforms to EIA RS-404. One HD-4702 controls up to eight transmission channels. Initialization circuit facilitates

HD1-4702-9	—	5.0	16 Lead CDIP	-40 to +85	2954
HD3-4702-9	—	5.0	16 Lead PDIP	-40 to +85	2954

CDP6402, CMOS Universal Asynchronous Receiver/Transmitter (UART)

Low Power CMOS Circuitry: 7.5 mW (typ.) at 3.2 MHz (max freq.) at VDD = 5V. Baud Rate: DC to 200 KBits/s (max.) at 5 V, DC to 400 KBits/s (max.) at 10 V. Automatic data formatting and status generation. Fully programmable with

CDP6402CE	3.20	5.0	40 Lead PDIP	-40 to +85	1328
-----------	------	-----	--------------	------------	------

HD-6402, CMOS Universal Asynchronous Receiver/Transmitter (UART)

Low power CMOS design. Programmable word length, stop bits, and parity. Automatic data formatting and status generation.

HD1-6402B-9	8.00	5.0	40 Lead CDIP	-40 to +85	2956
HD1-6402R-9	2.00	5.0	40 Lead CDIP	-40 to +85	2956
HD3-6402B-9	8.00	5.0	40 Lead PDIP	-40 to +85	2956

HD-6408, CMOS Asynchronous Serial Manchester Adapter (ASMA)

Low bit error rate. **Data Rate:** 1 MBits/s. Sync identification and lock-in. Clock recovery. Manchester II encoder, decoder. Separate encode and decode. **Low Operating Power:** 50 mW at 5 V. Single power supply.

HD1-6408-9	1.25	5.0	24 Lead CDIP	-40 to +85	2952
------------	------	-----	--------------	------------	------

HD-6409, CMOS Manchester Encoder/Decoder

Converter or repeater mode. Independent manchester encoder and decoder operation. Static 1 MBits/s data rate guaranteed. Low bit error rate. Digital PLL clock recovery. On chip oscillator. **Low Operating Power:** 50 mW (typ.) at 5 V.

HD3-6409-9	1.00	5.0	20 Lead PDIP	-40 to +85	2951
HD4-6409-9	1.00	5.0	20 Lead LCC	-40 to +85	2951

HD-15530, CMOS Manchester Encoder/Decoder

Support of MIL-STD-1553. **Data Rate:** 1.25 MBits/s. Sync identification and lock-in. Clock recovery. Manchester II encode and decode. Separate encode and decode. **Low Operating Power:** 50 mW at 5 V.

HD1-15530-9	1.25	5.0	24 Lead CDIP	-40 to +85	2960
-------------	------	-----	--------------	------------	------

HD-15531, CMOS Manchester Encoder/Decoder

Support of MIL-STD-1553. **Data Rate:** 15531B — 2.5 MBits/s; 15531 — 1.25 MBits/s. Variable frame length to 32-bits. Sync identification and lock-in. Separate manchester II encode, decode. **Low Operating Power:** 50 mW at 5 V.

HD1-15531B-9	1.25	5.0	40 Lead CDIP	-40 to +85	2961
HD1-15531B-9	2.50	5.0	40 Lead CDIP	-40 to +85	2961

overvoltage protection. Requires 3 power supplies.

*Primary to Back-Up Source Voltage Differential.

HIP2030EVAL Isolated MCT/IGBT Gate Driver Evaluation Board

The Harris HIP2030EVAL is a printed circuit board developed to help evaluate the performance of the HIP2030 in power switching circuits. The component layout of the HIP2030EVAL circuit enable the user to conveniently utilize either photocoupled or fiber-optic receivers. In addition, the PCB layout has provisions for "on board prototyping" and special function components.

The HIP2030 is a medium voltage integrated circuit capable of driving large capacitive loads at high voltages slow rates. This device is optimized for driving 60 nF of MOS gate capacitance at 30 Vp-p in less than 200 ns. The half bridge gate driver is ideal for driving MOS Controlled Thyristor and IGBT modules.

HIP2030EVAL. AnswerFax® Doc. # 3918

HSP50016-EV DDC Evaluation Platform

The HSP50016-EV is the evaluation board for the HSP50016 Digital Down Converter (DDC). It provides a mechanism for rapid evaluation and prototyping. The HSP50016-EV consists of a series of busses which provide input, output, and control to the DDC. These busses are brought out through dual 96 Pin connectors to support daisy chaining HSP50016-EVs with other Harris evaluation boards for multichip prototyping and evaluation.

The HSP50016-EV was built into a 3U Euro-Card form factor with dual 96-pin Input/Output connectors. The I/O connectors conform to the VME J2/P2 connector standard.

HSP50016-EV. AnswerFax® Doc. # 3637

HIP5600 Evaluation Boards

The HIP5600IS used on the HIP5600 evaluation boards is an adjustable 3-terminal positive linear voltage regulator. Protection within the HIP5600 is provided by the on chip thermal shutdown and output current limiting circuitry.

Evaluation boards are fused to protect board when improperly connected.

HIP5600EVAL1 High Voltage DC to DC Evaluation Board

- ▶ Operates from 50 VDC to 400 VDC
- ▶ Adjustable Output Voltage 1.2 VDC to V_{IN} — 50 VDC
- ▶ Output Current to 10 mA at 400 VDC Input

HIP5600EVAL1. AnswerFax® Doc. # 3747

HIP5600EVAL2 High Voltage AC to DC Evaluation Board

- ▶ Operates from 80 VRMS to 132 VRMS
- ▶ Adjustable Output Voltage 1.2 VDC to V_{IN} — 50 VDC
- ▶ Output Current to 10 mA at 400 VDC Input

HIP5600EVAL2. AnswerFax® Doc. # 3748

HIP5600EVAL3 High Voltage AC to DC Evaluation Board

- ▶ Operates from 80 VRMS to 320 VRMS
- ▶ Adjustable Output Voltage 1.2 VDC to V_{IN} — 50 VDC
- ▶ Output Current to 10 mA at 400 VDC Input

HIP5600EVAL3. AnswerFax® Doc. # 3749

ZA Series

LA Series

ML Series. Operating Ambient Temperature (without Derating): -55° to +125°C. Storage Temperature: -55° to +150°C. HiPot Encapsulation: NA. Voltage Temperature Coefficient (Vc at Specified Test Current): <.01%/°C. Insulation Resistance (MΩ): NA.

LA, ZA Series. Operating Ambient Temperature (without Derating): -55° to +85°C. Storage Temperature: -55° to +125°C. HiPot Encapsulation: 2500. Voltage Temperature Coefficient (Vc at Specified Test Current): <.01%/°C. Insulation Resistance (MΩ): >1000.

ZA Series

► Average Power Dissipation of Transients Not to Exceed 0.2 W, 0.25 W, 0.4 W, 0.6 W, or 1 W for Model Sizes 5 mm, 7 mm, 10 mm, 14 mm, and 20 mm Respectively

► ZA Series Varistors Are Listed Under UL File No. E135010 as a UL Recognized Component

LA Series

► LA Series Varistors Are Listed Under UL File No. E75961 and E56529 as a UL Recognized Component
 ► LA Series Varistors Are Listed Under CSA File No. LR91768 as a CSA Recognized Component

► Average Power Dissipation of Transients Not to Exceed 0.25 W, 0.4 W, 0.6 W or 1 W for Model Sizes 7 mm, 10 mm, 14 mm, and 20 mm Respectively

"C" III Series

Radial Lead Metal-Oxide Varistors for the TVSS Environment

- ▶ Recognized as "Transient Voltage Surge Suppressors" to UL 1449; File #E75961
- ▶ Recognized as "Transient Voltage Surge Suppressors" to CSA C22.2, No. 1; File #LR91788
- ▶ High Energy Absorption Capability W_{tm} : 45 J to 240 J (2 ms)

The expanded version of the LA series of metal-oxide varistors, designation "C" III series, consists of AC line voltage rated MOVs with extremely high current and energy handling capabilities. This new "C" III series of MOVs were primarily designed for the transient voltage surge suppressor (TVSS) environment. They provide the increased level of protection now deemed to be necessary for the transients expected in this environment. The occurrence of high voltage transients in

- ▶ High Peak Pulse Current Capability I_{tm} : 6000 A to 9000 A (8/20 μ s)
- ▶ Wide Operating Voltage Range $V_{M(AC)RMS}$: 130 V to 300 V
- ▶ Available in Tape and Reel for Automatic Insertion; Also Available Crimped and/or Trimmed

the AC power network can be detrimental to the associated line equipment. Such transient occurrences may cause product failure and the subsequent faulty operation of the electrical systems. This new expanded version of the Harris 20 mm LA series of metal oxide varistors is also available with 10 mm lead spacing, in tape and reel and in a variety of distinctive crimped and trimmed offerings.

*Note: Average power dissipation of transients not to exceed 0.6 W and 1 W for model sizes 14 mm and 20 mm, respectively.

Surgecutor Products

- ▶ High Input Impedance Until Breakdown (i.e., Low Leakage)
- ▶ Repeatable Breakdown/Threshold Voltage
- ▶ High Surge Current Handling Capability
- ▶ Withstand and Respond to Rapidly Recurring Surges
- ▶ Fast Recover to High Impedance State (Turn Off)
- ▶ Dual Polarity Protection
- ▶ No Degradation of Essential Characteristics with Use
- ▶ Zener (Avalanche) Diode and SCR-Type Thyristor
- ▶ Zener Provides Continuous Low Voltage Protection
- ▶ Thyristor Provides Instantaneous Protection Against Fast Rising Transients

Provide transient protection for central office equipment, repeaters, supervisory equipment, line concentrator, switchgear equipment, receivers, data transmission, headsets, handsets, modem, EPABX, PABX, PBX, and PCM. Two bidirectional Surgecutor devices are placed between the tip and ring lines just after lines enter the telephone to protect delicate telecommunications equipment.

NOTES: ¹Dependent on trigger circuit. ²Devices UL recognized to 497B — File Number E135010.

ML Series

Features

- ▶ Leadless Chip Form — "Zero" Lead Inductance
 - ▶ Multilayer Construction Technology
 - ▶ -55°C to +125°C Operating Temperature Range
 - ▶ Wide Operating Voltage Range $V_{M(OC)} = 3.5$ V to 68 V
 - ▶ Broad Range of Energy Handling Capabilities
 - ▶ Low Profile, Compact Industry Standard Chip Sizes
 - ▶ Inherent Bidirectional Clamping
 - ▶ Low Capacitance Models Available
 - ▶ No Plastic or Epoxy Packaging Assures Better than 94V-0 Flammability Rating
- Applications
- ▶ On-Board Transient Voltage Protection for ICs and Transistors
 - ▶ ESD Protection for Components Sensitive to EIC 801-2, MIL-STD-3015.7
 - ▶ Replace Larger Surface Mount Zener Diodes

ML Series transient surge suppressors are designed to protect sensitive electronic devices from destruction by high voltage transients. These suppressors are designed to fail short when overstressed and protect the associated equipment. The ML suppressor is manufactured from semiconducting ceramics which offer rugged protection, excellent transient energy absorption and increased internal heat dissipation. The devices are in chip form, eliminating lead inductance and assuring fast speed of response to transient surges. These transient suppression devices have significantly smaller footprints and lower profiles than traditional TVS diodes or radial MOV's (metal oxide varistors), thus allowing designers to reduce size and weight while increasing system reliability.

Mfr.'s Type	Maximum Rating (125°C)					Characteristics (25°C)		
	Maximum Continuous Working Voltage	Maximum Nonrepetitive Surge Current (8/20 μ s)	Maximum Nonrepetitive Surge Energy (10/1000 μ s)	Max. Clamping Voltage at 10A or as noted (8/20 μ s)	Nominal Voltage @ 1 mA D-Test Current	Typical Capacitance @ f=1 MHz

Notes: L suffix is a low capacitance and energy version. Typical leakage at +25°C < 50 μ A, maximum Leakage 100 μ A. Average power dissipation of transients for 0805, 1206 and 1210 sizes not to exceed 0.10 W, 0.10 W and 0.15 W, respectively. Devices specifically characterized for automotive applications also available. (See AUMLA Series).

** For Logic, the "54" Series (e.g. IDT54FCT138) — -55°C to +125°C; the "74" Series (e.g. IDT74FCT138) — 0°C to +70°C

SRAM Components

In order to provide SRAM products that meet the varying needs of its customers, IDT uses both CMOS and BiCMOS process technologies and offers 16K, 64K, 256K and 1 Meg density SRAMs in a number of speed, power and packaging configurations. SRAM cache memory provides intermediate storage between fast microprocessors and relatively slow

DRAM main memory. This serves to significantly increase overall system speed and performance in systems like personal computers based on the Intel Pentium microprocessor and the PowerPC microprocessor. IDT's new products are being designed to operate at higher speeds and provide greater levels of integration in smaller sizes.

Special Memory Products

Complex electronic systems which have different data transfer rates within the system or use multiple microprocessors may utilize specialty memory products, such as FIFOs and multi-port memory devices, to enhance performance. Specialty memories are frequently used to improve the flexibility and throughput of systems, including LANs and WANs.

FIFOs

IDT is leading supplier of both synchronous and asynchronous FIFOs. Synchronous FIFOs are faster and provide an easier user interface than asynchronous FIFOs, which make them ideal for many of the newer networking products. IDTs offers an ultra-high performance 83MHz unidirectional sync FIFO and a 40 MHz bidirectional sync FIFO in the new space-saving 64-pin Thin Quad Flat Pack (TQFP) package.

Synchronous FIFOs

512 × 9 CMOS Synchronous FIFO W/PROG Flags

High-speed, high-performance logic devices interconnect the various elements of a microprocessor-based system. IDT's 16-bit family of logic products is available in small packages, enabling board area to be reduced. These products are designed for new applications requiring high speed, small size, low power and extra low noise. IDT also has a series of 8-bit and 16-bit 3.3V logic products and a 3.3V to 5V translator circuit directed at the growing notebook and laptop computer markets.

Intel Architecture Embedded Processors

The Intel architecture embedded processors offer high performance and high integration, and they are well suited for the embedded market segment.

Intel386™ Processor Family

MCS® 251 and MCS 51 Microcontrollers (Continued)

Intel's 8-bit MCS 251 and MCS 51 Microcontrollers have become an industry standard for embedded control. The architecture is optimized for control oriented applications.

MCS® 51 Classic (Continued)

Generic Gate Array Logic

GAL16V8 and GAL20V8, High Performance E²CMOS PLD Generic Array Logic™

Performance ranges from the industries fastest at 5 ns T_{pd} to the popular 25 ns versions. Low power consumption with Low Power versions rated at 75 mA typical and Quarter power versions rated at 45 mA typical. 8 powerful Output Logic Macrocells (OLMCs) with 8 Product Terms each. V_{cc}: 5 V ±5%. Temperature Range: 0 to +75°C.

GAL16VP8 and GAL20VP8, High Speed E²CMOS PLD Generic Logic Array™

High output drive versions of the GAL16V8 and GAL20V8. 10L: 64 mA vs standard 24 mA. Combines GAL architecture with high drive of 74XX244 buffer families. Fast 15 ns/80 MHz performance. V_{cc}: 5 V ±5%. Temperature Range: 0 to +75°C.

GAL22V10, High Performance E²CMOS PLD Generic Array Logic™

Available in industry leading 5 ns/200 MHz versions through 25 ns versions. Low power consumption with Low Power versions at 90 mA and Quarter Power versions at 45 mA typical. 10 OLMCs with variable Product Terms per OLMC ranging from 8 to 16 for increased logic capability. V_{cc}: 5 V ±5%. Temperature Range: 0 to +75°C.

ispGAL22V10, In-System Programmable E²CMOS PLD Generic Gate Array Logic™

Offers in-system programmability. Popular GAL22V10 architecture. Same 28-pin PLCC as the GAL22V10. Fast 7.5 ns/111 MHz performance. Unprecedented design and manufacturing flexibility. V_{cc}: 5 V ±5%. Temperature Range: 0 to +75°C.

GAL18V10, High Performance E²CMOS PLD Generic Array Logic™

20-pin space saving subset of the popular GAL22V10. 8 to 10 Product Terms per OLMC. Ideal for printed circuit board area constrained designs. This is the only 20-pin PLD on the market. V_{cc}: 5 V ±5%. Temperature Range: 0 to +75°C.

GAL26CV12, High Performance E²CMOS PLD Generic Array Logic™

Expanded logic density in a 28-pin DIP/PLCC. 28-pin superset of the popular GAL22V10. World's fastest 28-pin PLD at 7.5 ns. 26 inputs and 12 outputs. Flexible 22V10 OLMC. Fully utilized 28-pin PLCC package gives added functionality over the 22V10 at no space premium. V_{cc}: 5 V ±5%. Temperature Range: 0 to +75°C.

GAL20RA10, High Speed Asynchronous E²CMOS PLD Generic Logic Array™

Performance ranges from 10 ns T_{pd} to 20 ns versions. Faster and lower power than bipolar PALs. Low power consumption with Low Power versions rated at 75 mA typical. 10 powerful Output Logic Macrocells (OLMCs) with independent product term clocks. 10 independently programmable clocks. V_{cc}: 5 V ±5%. Temperature Range: 0 to +75°C.

GAL20XV10, High Speed E²CMOS PLD Generic Logic Array™

Utilizes powerful XOR function for efficient implementation of arithmetic functions. 10 ns/100 MHz performance significantly outperforms bipolar PALs. Perfect for fast counters, decoders, comparators, video, multimedia, and graphics applications. Replaces: PAL20L10, 20X10, 20X8, 20X4, and 20L10. V_{cc}: 5 V ±5%. Temperature Range: 0 to +75°C.

Generic Gate Array Logic

GAL6001 and GAL6002, High Performance E²C²MOS FPLA Generic Array Logic™

The logic density of an FPLA architecture, unprecedented in a 24/28-pin DIP/PLCC. Functional Equivalent Of 2 GAL22V10s. 38 Macrocells: 10 Input, 10 Output, 10 I/O, and 8 Buried Logic. 15 ns/75 MHz performance. Ideal for register intensive applications. The GAL6002 has Active Pull-Ups on all pins. Vcc: 5 V ±5%. Temperature Range: 0 to +75°C.

Mfr.'s Type		Tpd (ns)	Fclk (MHz)	Icc (mA)	Low/Quarter Power	Description	No. of Leads

ispGDS14/18/22, in-system programmable Generic Digital Switch™

This new family combines the in-system programmability, high performance and low power of Lattice's GAL programmable logic technology with a switch matrix architecture, resulting in an innovative programmable signal router. The ispGDS is a configurable switch matrix which provides the ability to quickly change p.c. board connections without changing mechanical switches or other system hardware. Vcc: 5 V ±5%. Temperature Range: 0 to +75°C.

High Density Programmable Logic

The Lattice programmable Large Scale Integration (pLSI)™ and in-system programmable Large Scale Integration (ispLSI)™ families are the logical choice for your next design project. They're the first programmable logic devices to combine the performance and ease of use of PLDs with the density and flexibility of FPGAs. And at 135 MHz system speed, and up to 14000 PLD gates, they're the worlds fastest and highest density programmable logic devices!

pLSI and ispLSI1000: The Premier High Density Family

isp-SK2, isp Starter Kit

The isp Starter Kit is designed to make Lattice's innovative in-system programmable device technology available in a single, complete package. The isp Starter Kit contains all the software, hardware, device samples, and information needed to begin designing with Lattice isp products.

Features

- Easy To Use Kit Contains Everything Needed For In-System Programmable Device Design-In
- Supports Lattice's ispLSI1016 and ispLSI2032 Devices
- Supports Lattice's New ispGDS (Generic Digital Switch) For Applications Such As Multiple Dip Switch Replacement

Samples

- ispLSI2032-80LJ Device In 44 Lead PLCC
- ispGAL22V10B-15LJ Device In 28 Lead PLCC
- ispGDS14-7LJ Device In 20 Lead PLCC

Interface Products

Maxim's RS-232 and RS-485 transceivers are designed for communication interfaces where ± 12 V supplies are not available. For our RS-232 devices, on board charge pumps convert the +3 V or +5 V input to the ± 10 V needed for RS-232 levels. For our RS-485 devices, Maxim uses a proprietary low dropout output stage to provide output voltages of 2 V into

110 ohms from either 3 V or 5 V. Maxim has also upgraded the original MAX232 and MAX485 solutions, providing ± 15 KV ESD protection, +3 V and +5 V interoperability, Isolation and Autoshtutdown. Maxim continues to provide value added solutions that offer the highest performance and quality. For samples or literature call Maxim at 1-800-998-8800.

Analog-to-Digital Converters

Maxim offers a wide range of analog-to-digital converters that provide benefits in many applications, including instrumentation, industrial, medical and telecommunications. The resolutions range from 8-bits to 16-bits, and the speeds

range from DC to 500 MHz. Each device has features that add value, such as high-accuracy, a high level of integration, low-power, shutdown, a serial interface, etc. Evaluation kits are also available for most of these ADCs.

Mfr.'s Type	Resolution (Bits)	Speed (ksp/s)	Interface	Input Channels	Features
MAX100CFR*	8	250000.00	Parallel	1	50 ohm input resistance. ECL-compatible I/O
MAX101CFR*	8	500000.00	Parallel	1	50 ohm input resistance. ECL-compatible I/O
MAX110ACPE	14	0.05	Serial	2	Sigma-delta, no external components, ± 5 V supplies
MAX111ACPE	14	0.05	Serial	2	Sigma-delta, no external components, single ± 5 V supply
MAX120CNG	12	500.00	μ P/12	1	High-speed complete sampling ADC
MAX121CPE	14	308.00	Serial	1	High-speed complete sampling ADC with DSP interface
MAX132CNG	18	0.10	Serial	1	Integrating ADC, <1 mW, 3 LSBs used for averaging
MAX138CPL	± 2000 counts	0.01	LCD output	1	Integrating ADC, 2.75 V to 7 V single supply, $\pm$ inputs
MAX152CPE	8	400.00	μ P/8	1	3 V ADC with 1 μ A power-down
MAX153CPE	8	1000.00	μ P/8	1	5 V high-speed ADC with 1 μ A power-down
MAX176ACPA	12	250.00	Serial	1	Includes T/H in 8-pin mini-DIP
MAX180ACPE	12	100.00	μ P/8 or 12	8	Complete data acquisition system
MAX186ACPP	12	133.00	Serial	8	Low-power (7 mW) with 10 μ A power-down, internal reference
MAX188ACPP	12	133.00	Serial	8	MAX186 without the reference
MAX187ACPA	12	75.00	Serial	1	7 mW, 8-pin package
MAX189ACPA	12	75.00	Serial	1	MAX187 without the reference
MAX191ACNG	12	100.00	Serial and μ P/8	1	15 mW, 20 μ A power-down, ± 5 V or ± 5 V supplies
MAX192ACPP	10	133.00	Serial	8	Low power, low cost, available in small (SSOP) package
MAX194ACPE	14	85.00	Serial	1	14-bit high-speed ADC with 10 μ A shutdown
MAX195BCPE	16	85.00	Serial	1	High-speed 16-bit ADC with 10 μ A shutdown
MAX197ACNI	12	100	μ P/8	8	Range-switching provides 14-bits effective dynamic range, fault protected inputs

*84-pin ceramic flat pack. The parts listed above are the plastic DIP package devices, but the devices are also available in surface mount (SO) CERDIP, and some are available in a shrink-small outline (SSOP). Many are available in more than 1 performance grade.

Digital-to-Analog Converters

Maxim's digital-to-analog converters provide the required performance with minimum power usage. The DACs range from low-power devices (140 μ A supply current) to high-speed (4 ns settling time) and high-integration (13 octal DACs in

a single package) devices. The resolutions range from 8-bits to 13-bits.

Mfr.'s Type	Resolution	Settling Time (μ s)	Interface	Reference*	Output Type	Features
MAX503CNG	10	25.000	μ P/8	int/MDAC	Voltage	Ultra-low power complete DAC
MAX504CPD	10	25.000	Serial	int/MDAC	Voltage	Serial version of MAX503
MAX505ACNG	8	6.000	μ P/8	MDAC	Voltage	Quad, rail-to-rail outputs, separate reference inputs
MAX506ACPP	8	6.000	μ P/8	MDAC	Voltage	Quad, rail-to-rail outputs, single reference input
MAX507ACNG	12	5.000	μ P/12	int	Voltage	Complete voltage output DAC
MAX508ACPP	12	5.000	μ P/8	int	Voltage	Complete voltage output DAC
MAX509ACPP	8	6.000	Serial	MDAC	Voltage	5 V or ± 5 V supplies, rail-to-rail outputs, 4 reference inputs
MAX510ACPE	8	6.000	Serial	MDAC	Voltage	5 V or ± 5 V supplies, rail-to-rail outputs, 1 reference input
MAX512CPD	8	60.000	Serial	MDAC	Voltage	Triple, ± 5 V supply, low power with shutdown
MAX513CPD	8	70.000	Serial	MDAC	Voltage	Triple, ± 3 V supply, low power with shutdown
MAX514ACNG	12	1.000	Serial	MDAC	Current	Quad, current output
MAX515CPA	10	25.000	Serial	ext	Voltage	5 V supply, ultra-low power, 8-pin SO
MAX517BCPA	8	6.000	Serial (2-wire)	ext	Voltage	Single ± 5 V DAC with 2-wire interface
MAX518BCPA	8	6.000	Serial (2-wire)	int ($V_{REF}=V_{DD}$)	Voltage	Dual ± 5 V DAC with 2-wire interface in 8-pin DIP/SO package
MAX521ACPP	8	6.000	Serial (2-wire)	ext	Voltage	Octal, 5 reference inputs, 2-wire interface
MAX522CPA	8	70.000	Serial	ext	Voltage	Two Vout DACs in 8-pin DIP/SO package, single 2.7 V to 5.5 V supply
MAX526CCNG	12	3.000	μ P/8	ext	Voltage	Quad, ± 12 V and ± 5 V supplies
MAX527CCNG	12	3.000	μ P/8	ext	Voltage	Quad, ± 5 V supplies
MAX528CPP	8	5.000	Serial	ext	Voltage	μ P-selected buffered and unbuffered output
MAX529CPP	8	5.000	Serial	ext	Voltage	± 5 V version of MAX528
MAX530ACNG	12	25.000	μ P/8	int/MDAC	Voltage	5 V or ± 5 V supplies, ultra low power
MAX531ACPD	12	25.000	Serial	int/MDAC	Voltage	Serial version of MAX530
MAX532ACPE	12	4.000	Serial	MDAC	Voltage	Dual DAC, ± 15 V supplies, 16-pin SO
MAX536ACPE	12	-3.000	Serial	ext	Voltage	Serial version of MAX526
MAX537ACPE	12	3.000	Serial	ext	Voltage	Serial version of MAX527
MAX538ACPA	12	25.000	Serial	ext	Voltage	5 V supply, 8-pin SO, ultra low power, 2 V (max) output
MAX539ACPA	12	25.000	Serial	ext	Voltage	5 V supply, 8-pin SO, ultra low power, 5 V (max) output
MAX543ACPA	12	1.000	Serial	MDAC	Current	8-pin DIP/SO
MAX547ACMH**	13	5.000	μ P/13	ext	Voltage	Unipolar/bipolar outputs, 4 reference inputs
MAX555CQK†	12	0.004	Parallel	ext	Voltage	Ultra-high speed, -5.2 V supply, complementary ECL outputs

*MDAC = 4-quadrant multiplying capability. **Plastic flat pack package. †68-pin thermally enhanced PLCC.

The parts listed above are the plastic DIP package devices, but the devices are also available in surface mount (SO) CERDIP and some are available in a shrink-small outline (SSOP). Many are available in more than 1 performance grade.

 μ P Supervisory Circuits

Maxim has the largest μ Processor Supervisory family available — over 50 unique ICs. These products signal a μ Processor or μ Controller when the power is on and holds the μ Processor or μ Controller in reset when the power is low.

Other functions include watchdog timing, chip enable gating, battery back-up switches, and manual reset.

 μ P Supervisory Circuits in the SOT-23 Package, 2500 Piece Tape and Reels

12 V Flash Memory Programming Supplies

Maxim makes the world's smallest 5 V and 12 V flash memory programming supplies, fitting in spaces as small as 0.1 in². Their small size, low supply currents, low input voltage ranges, and high efficiency permit use in applications ranging from host machines to solid state disk drives to PCMCIA applications and memory cards.

Flash-memory power supplies are commonly specified in multiples of 30 mA — the worst-case IPP current drawn by a typical byte-wide flash EEPROM chip during its erase cycle.

Mfr.'s Type	Min. V _{in} (V)	I _{out} (mA)	Package	Comments
MAX761CSA	1.80	35	8 SOIC	200 µA supply current, 1 µA shutdown
MAX717CSE	1.80	120	16 N. SOIC	Dual-Output (5 V and 12 V) system IC
MAX761CSA	3.00	150	8 SOIC	200 µA supply current, 1 µA shutdown
MAX824ISE	3.00	70	16 N. SOIC	Thin components, PCMCIA cards, Dual-Output
MAX606CUA	3.00	70	8 µMAX	<1.1 mm high packages, fits PCMCIA cards

Mfr.'s Type	Min. V _{in} (V)	I _{out}
-------------	--------------------------	------------------

Charge-Pumps: Voltage Converters without Inductors

Maxim's charge-pump devices use only capacitors to boost or invert input voltages to useful output voltages. These small circuits save space and cost over inductor-based solutions. They are also free of EMI noise. They provide convenient and

economical circuits to bias small LCD panels, boost low voltages in back-up circuits, bias GaAsFET power amplifiers in RF applications, and program flash memories. Their outputs are either regulated or unregulated.

Mfr.'s Type	V _{IN} Range (V)	V _{OUT} (V)	I _{OUT} (mA)	Package	Comments
MAX1044CSA	1.5 to 10	−V _{IN} or 2 V _{IN}	20	8 SOIC	60 kHz osc. boost mode
MAX660CSA	1.5 to 5.5	−V _{IN} or 2 V _{IN}	100	8 SOIC	6.5 ohm output impedance
MAX860CUA	1.5 to 5.5	−V _{IN} or 2 V _{IN}	50	8 µMAX	1.1 mm high, 130 kHz switch freq.
MAX860CSA	1.5 to 5.5	−V _{IN} or 2 V _{IN}	50	8 SOIC	130 kHz switch freq.
MAX861CUA	1.5 to 5.5	−V _{IN} or 2 V _{IN}	50	8 µMAX	1.1 mm high, 250 kHz switch freq.
MAX861CSA	1.5 to 5.5	−V _{IN} or 2 V _{IN}	50	8 SOIC	250 kHz switch freq.
ICL7660CUA	1.5 to 10	−V _{IN} or 2 V _{IN}	10	8 µMAX	1.1 mm high
ICL7660CSA	1.5 to 10	−V _{IN} or 2 V _{IN}	10	8 SOIC	
MAX680CSA	2.0 to 6	−2 V _{IN} and 2 V _{IN}	10	8 SOIC	Dual-output

Mfr.'s Type	V _{IN} Range (V)	V _{OUT} (V)	I _{OUT} (mA)	Package	Comments
MAX619CSA	2.0 to 3.6	5	60	8 SOIC	Complete 1 µA shutdown, back-up
MAX662ACSA	4.5 to 5.5	12	45	8 SOIC	Flash memory programmer
MAX850CSA	4.5 to 10	−4.1 or Adjust.	5	8 SOIC	GaAsFET bias
MAX852CSA	4.5 to 10	−4.1 or Adjust.	5	8 SOIC	GaAsFET bias, osc. input
MAX853CSA	4.5 to 10	Adjust.	5	8 SOIC	GaAsFET bias, ref. input adjustable
MAX840CSA	2.5 to 10	−2 or Adjust.	4	8 SOIC	GaAsFET bias
MAX843CSA	2.5 to 10	Adjust.	4	8 SOIC	GaAsFET bias, ref. input adjustable
MAX844CSA	2.5 to 10	Adjust.	4	8 SOIC	GaAsFET bias with LCD output

Battery Chargers

Maxim's battery-charging products provide convenient, economical ways to charge and monitor Nickel Metal Hydride (NiMH), Nickel Cadmium (NiCd), and Lithium Ion (Li+) cells. Product offerings include intelligent chargers with built-in

termination algorithms, current-sources that can be used in conjunction with microprocessors, and monolithic charge counters for measuring energy flow into and out of batteries.

Mfr.'s Type	Function	Package	Description
MAX713CSF	Intell. Charger	16 N SOIC	3 A switch-mode charger; 4 term. methods: neg. volt slope, max. volt, max. temp., max time.
MAX713CPE	Intell. Charger	16 PDIP	3 A switch-mode charger; 4 term. methods: neg. volt slope, max. volt, max. temp., max time.
MAX712CSE	Intell. Charger	16 N SOIC	3 A switch-mode charger; 4 term. methods: zero volt slope, max. volt, max. temp., max time.
MAX712CPE	Intell. Charger	16 PDIP	3 A switch-mode charger; 4 term. methods: zero volt slope, max. volt, max. temp., max time.
MAX713CSE	Intell. Charger	16 N SOIC	1 A linear-mode charger; 4 term. methods: neg. volt slope, max. volt, max. temp., max time.
MAX713CPE	Intell. Charger	16 PDIP	1 A linear-mode charger; 4 term. methods: neg. volt slope, max. volt, max. temp., max time.

LCD Power Supplies

Maxim makes compact, high-efficiency LCD bias supplies for every size screen: from low-cost single-line pager displays to the newest TFT color screens used in notebook computers.

Maxim offers both digital and potentiometer adjustable supplies for both positive and negative voltage screens. Choose from higher-power switch mode devices for large screens or low-power charge-pump based circuits for smaller pager-size displays.

Mfr.'s Type	V _{IN} Range (V)	V _{OUT} (V)	Type	Package	Comments

Low-Voltage Boost Converters

Maxim's step-up DC-DC converters provide the best combination of low quiescent current, high efficiency, and small size. They are the perfect choice for battery powered applications. Maxim offers a broad range of low-voltage step-up DC-DC converters that operate from single-battery-cell inputs (0.9 V start-up) to regulated 3.3 V system supply inputs. They are

used to generate main system supplies, 5 V flash supplies, or low-current back-up supplies. They can also be used as local 5 V supplies in otherwise 5 V-only systems.

High-Efficiency Step-Down DC-DC Converters

Maxim's step-down converters feature greater than 90% efficiency over wide load current ranges, prolonging battery life at both light loads (10 mA) and heavy loads (up to 10 A). Many of these employ Maxim's proprietary Idle-Mode™ control scheme, which saves battery life automatically changing operating modes depending on load current. Idle-Mode optimizes the converter's performance by responding to changing load demands without software intervention, simplifying system software design.

At heavy and moderate loads, the Idle-Mode products pulse-width modulate (PWM) to diminish resistive losses due to high peak currents. At light loads, they pulse-frequency modulate (PFM) to reduce gate-charging losses and thus reduce quiescent supply current. Additionally, these Idle-Mode controllers drive an external N-channel MOSFET on the high-side as the main switch and also on the low-side as a synchronous rectifier. This dual-N-channel approach improves provides better efficiency and value than P-channel approaches.

Low Dropout Linear Regulators

Maxim's linear regulators combine low-dropout voltages with very low quiescent currents to give longer battery life. Maxim's MAX603 and MAX882 families save space and permit wide operating ranges by using special high-power packaging that has the same form factor as a standard 8-lead SOIC. They also maintain extremely low supply currents

(even at high output currents) because they use P-channel MOSFET pass transistors. Unlike PNP regulators, these CMOS devices do not draw large base currents (especially in dropout) and permit longer battery life.

Mfr.'s Type	V _{IN} (Max.) (V)	V _{OUT} (V)	Dropout Voltage (mV)	Package	Package Poiss (Watts)	Quiescent Current (μA)	Comments

Micron DRAMs

MICRON
DataFax
208-368-5800

Micron Technology, Inc., gives customers and potential customers instant access to technical information via Micron DataFax[®], a user-friendly, fax-on-demand system.

Micron DataFax allows callers to make automated requests for data sheets, product literature and other product information during and after regular business hours. Micron DataFax improves customer support by offering up-to-date product information 24-hours-a-day.

How It Works

Micron DataFax makes ordering product information quick and easy using the touchtone keypad on your fax machine. Here's how it works: 1. From your fax machine, call 208-368-5800; 2. Press 1 to order, when requested, enter document number(s)*; 3. The documents you ordered will be sent to the fax machine you called from. *An index of the documents available from Micron DataFax. This index is available through the system itself and is updated periodically. Follow the voice instructions to receive the latest revision of the index.

Company Background

Mosel Vitelic designs, develops, manufactures, and markets high performance DRAMs, SRAMs, Video RAMs, SIMMs and application specific memories. Mosel Vitelic's memory products employ proprietary high speed, low power designs with the state-of-the-art CMOS technology. The technology uses CMOS for low power consumption, multi-layer poly-silicon and two layers of metal interconnect for high packing density, and gate lengths of the sub-micron level for high speed

performance. In addition, Mosel Vitelic uses the most advanced state-of-the-art CMOS manufacturing facilities to ensure a high level of performance and reliability. Advanced circuit design techniques and process technology are used to provide high degrees of ESD protection and latch-up immunity.

Data Books

RF Device Data **Rev. 6 Q1/95**
The RF Device Data book presents technical information on Motorola's RF products. The RF portfolio includes bipolar, LDMOS, MOSFET RF Power, RF Integrated Circuits, and gallium arsenide chip technologies. This publication also includes a cross reference, selector guide information, case dimensions, and a list of devices not recommended for new design.
504-9800. DL110/D

Bipolar Power Transistor Data **Rev. 6 Q2/92**
Motorola produces more than 1100 off-the-shelf power transistors covering a very wide range of applications. Their electrical, thermal and mechanical characteristics are presented here in the form of data sheets, with a competitor cross-reference and a selector guide showing devices by package, produce category and major application.
504-9801. DL111/D

Optoelectronics Device Data **Rev. 4 Q3/93**
In the optoelectronics field, Motorola has concentrated on infrared GaAs and GaAlAs emitters, silicon detectors, high-technology optocouplers/isolators, and an innovative approach to fiber optics. This data book contains up-to-date information on the complete product line. A selector guide and industry cross-reference follow a general introduction and quality/reliability data. Data sheets are grouped in sections covering Discrete Emitters/Detectors, Fiber Optic Components, Optoisolators/Optocouplers, Slotted Optical Switches and Opto Chips. Includes 82 pages of application notes.
504-9802. DL118/D

FAST and LS TTL Data **Rev. 5 Q2/92**
Low Power Schottky (LS TTL) has become the industry-standard logic in recent years, replacing the original 7400 TTL with lower power and higher operating speeds. In addition to producing the standard LS TTL circuits, Motorola also offers the FAST™ Schottky TTL family. Complete specifications for both LS and FAST families are provided here in data sheet form. Functional selector guide provides an overview of the principal characteristics of the two families.
504-9803. DL121/D

MECL Device Data **Rev. 5 Q1/93**
Presents full technical data for Motorola's monolithic Emitter Coupled Logic families, including MECL 10H, MECL 10K and MECL III, plus MECL memories and Phase-Locked Loop products. MECL offers very high speeds — with propagating delays down to 1.0 ns — for use in computer systems, high-performance ATE and process control systems, signal processors and navigation systems. The families also offer other advantages which combine to reduce package count and simplify system design. This book includes a technical introduction to MECL and a detailed discussion of system design considerations.
504-9804. DL122/D

Small-Signal Transistors, FETs and Diodes **Rev. 5 Q4/94**
Presents technical information for the several families that make up Motorola's small-signal semiconductor produce range, including bipolars, FETs and diodes. Complete device specifications and typical performance curves are given on individual data sheets, which are grouped by families and by their metal can and plastic/surface mount packages. A selector guide provides a quick comparison of performance characteristics. Additional sections describe package outline drawings and tape and reel specifications, and clarify the Hi-Rel processing and testing procedures.
504-9805. DL126/D

Linear/Interface Integrated Circuits (2 Volume Set) **Rev. 4 Q3/93**
Presents detailed technical information in the form of data sheets on Motorola's broad range of linear and interface ICs. Products are divided into 10 sections, including Amplifiers and Comparators, Power Supply Circuits, Motor Control, Voltage References, Data Conversion, Interface Circuits, Communications, Consumer and Automotive. Each section includes its own comprehensive selector guide, while an industry cross-reference lists over 3000 products with their Motorola direct or similar replacements. Full mechanical data is provided, plus a listing of device availability for surface mount.
504-9806. DL128/D

High Speed CMOS Logic Data **Rev. 5 Q2/93**
For many years, CMOS devices have been used in applications where low power consumption, wide power supply range and high noise immunity are the important factors. For higher speed applications, designers were forced to sacrifice the CMOS benefits and choose families such as LS TTL. Motorola's High Speed CMOS family is fast enough for such applications, while retaining the CMOS features. The HSCMOS Data Book includes a selector guide by function, a discussion of design and handling considerations, and full electrical and performance data in the form of data sheets.
504-9807. DL129/D

CMOS Logic Data **Rev. 3 Q4/91**
Presents technical data for Motorola's broad line of Metal-Gate CMOS Logic ICs. Complete specifications are provided in the form of data sheets. In addition, a produce selector guide and a handling and design guidelines chapter are included for further information. Includes data on all the logic circuits from the MC14000 series.
504-9808. DL131/D

TMOS Power MOSFET Transistor Data **Rev. 5 Q1/95**
Power MOSFETs offer unique characteristics and capabilities that are not available with bipolar power transistors. They have high switching speeds, simpler gate drive requirements, reduced need for snubber circuits, and low ON-voltages. This book provides a comprehensive selector guide by package, and full data on all Motorola's TMOS/9 Power MOSFETs in the form of data sheets. It contains more than 200 pages of theory and applications information in 15 chapters, including Gate Drive Requirements, Paralleling and Characterization, plus a number of specific designs.
504-9809. DL135/D

Communications Device Data **Rev. 3 Q4/93**
Motorola is a major supplier of semiconductors to communications equipment manufacturers worldwide. This book includes complete specifications for a wide variety of devices designed for this market, in the form of over 1300 pages of data sheets. A selector guide is included to simplify the task of choosing appropriate devices for a system. Applications information, handling and design guidelines, and quality and reliability overviews provide additional support for users of these circuits.
504-9810. DL136/D

Thyristor Device Data **Rev. 5 Q3/93**
Thyristors are extremely useful across a broad range of control applications. Compared to a mechanical switch, a thyristor has a long service life and fast switching times; its regenerative action and low ON-resistance allow it to be used to control AC loads as well as for simple switching tasks. Thyristor Device Data presents data sheet information plus a comprehensive selector guide and industry cross-reference on Motorola's thyristor families, including SCRs, Triacs, TGTOS and trigger devices. It includes 252 pages of theory and applications information.
504-9811. DL137/D

FACT Data **Rev. 3 Q4/93**
FACT utilizes a sub 2 micron silicon gate CMOS process to attain speeds similar to that of Advanced Low Power Schottky while retaining the advantages of CMOS logic, namely, ultra low power and high noise immunity. As an added benefit, FACT offers the system designer superior line driving characteristics and excellent ESD and latchup immunity. This data book describes Motorola's produce line with device specifications and a selector guide, plus over 30 pages of design considerations and comparisons with previous technologies.
504-9812. DL138/D

ECLinPS Device Data **Rev. 2 Q1/94**
This data book contains device specifications in the form of data sheets for Motorola's ECLinPS advanced Emitter Coupled Logic family. ECLinPS (ECL in picoseconds) was developed in response to demand for an even higher performance logic family of standard logic functions, especially for the computer, ATE, instrumentation and communications industries. ECLinPS offers a maximum signal gate delay of 500 ps including package delay, and a flip-flop toggle frequency up to 800 MHz. Each function is available with either MECL 10H or 100K compatibility.
504-9813. DL140/D

ECLinPS Lite **Rev. 2 Q2/93**
ECLinPS Lite™ is a family of single, essential logic primitives — gates, muxes, flops, etc. — housed in a space-efficient, cost-effective standard package, the 8-lead SOIC. Packaged gates switch in 250 ps type, with flops toggling at over 2 GHz. Being a single gate family, ECLinPS Lite offers better AC specs and higher speeds than even the ECLinPS™ family. At the same time the family provides superior isolation over multiple gate logic. Its small package size makes it ideal for pin cards and other applications that require density, but not at the expense of signal integrity. This book contains device specifications in the form of data sheets as well as applications information for Motorola's ECLinPS Lite family.
504-9814. BR1330/D

Commercial Plus and Mil/Aero Applications Memory Products **Q2/93**
This book presents technical data for a broad line of Motorola (Commercial Plus and Mil/Aero Applications) Memory products. Complete specifications for the individual circuits are provided in the form of data sheets.
504-9815. DL144/D

TVS/Zener Device Data **Rev. 1 Q2/94**
Presents technical data for Motorola Transient Voltage Suppressors and Zener Diodes. Complete specifications for the individual devices are provided in the form of data sheets. A comprehensive selector guide and industry cross-reference are included to simplify the task of choosing the best of components required for a specific application. For the first time, this data book includes theory and applications information in addition to the actual product-specific data. The actual layout has been revised to be more user friendly with sections on the three major categories of Zener Diodes — Regulation, Temperature Compensation, and Transient Voltage Protection.
504-9816. DL150/D

Rectifier Device Data **Rev. 2 Q1/95**
This book presents technical data for Motorola's broad line of rectifiers. Complete specifications are provided in the form of data sheets, and accompanying selection guides provide a quick comparison of characteristics to simplify the task of choosing the best device for a circuit. Continuing investment in research and development for discrete products has led to a rectifier manufacturing facility that matches the precision and versatility of the most advanced integrated circuits. As a result, Motorola's silicon rectifiers span all applications categories with quality levels capable of passing the most stringent environment tests — including those for automotive under-hood applications.
504-9817. DL151/D

MDA15 CMOS Standard Cell Data **Q4/90**
Motorola's MDA 15 Standard Cell family features a common set of cells and design rules for 1.5 micron geometries. This book provides data sheet information on all the digital and analog cells in the library. It discusses the factors that affect production costs and describes the development cycle. Technical chapters consider timing, design matter, standard input and output configurations, and designing for testability.
504-9818. DL152/D

MDA12 CMOS Standard Cell Data **Q3/91**
Motorola's MDA 12 Standard Cell family features a common set of cells and design rules for 1.2 micron geometries. This book provides data sheet information on all the digital and analog cells in the library. It discusses the factors that affect production costs and describes the development cycle. Technical chapters consider timing, design matter, standard input and output configurations, and designing for testability.
504-9819. DL154/D

Dynamic RAM Data **Rev. 1 Q3/94**
Motorola offers a broad range of reliable dynamic RAMs and DRAM modules for virtually any digital data processing system application. Complete specifications for the individual circuits are provided in the form of data sheets. A selector guide and a cross-reference are included.
504-9820. DL155/D

FAST Static RAM **Rev. 2 Q1/95**
BICMOS, CMOS and Module Data
Motorola offers a broad range of fast SRAMs for virtually any digital data processing system application. This data book contains complete specifications for individual FSRAM circuits in data sheet form, as well as an explanation of Motorola's reliability and quality program and an application's section.
504-9821. DL156/D

Pressure Sensor Device Data **Rev. 1 Q1/94**
Motorola is pleased to introduce their first Pressure Sensor Data Book. This data book provides technical information on Motorola's Pressure and Temperature Sensor products. Specifications are provided in the form of data sheets for individual devices and application notes describe interface circuitry to assist the end user. Additional sections provide reliability information, advanced new product information, package outline drawings, and information on sensor evaluation boards.
504-9822. DL200/D

FPGA Data Fields Programmable Gate Arrays
This data book discusses implementing your design with the Motorola MPA1000 family of FPGAs. These series of high performance, high density, reconfigurable arrays and high quality software meet the multiple demands of ever shrinking development cycles, system emulation, early prototyping and applications that exploit field reconfiguration to competitive advantage.
504-9823. DL201/D

8-Bit MCU Application Manual **Rev. 1**
This manual is a compilation of Application Notes, Article Reprints and other applications literature relating to Motorola's range of 8-bit Microcomputer Units (MCUs). Specific data on all Motorola products, including the 8-bit MCU devices mentioned in this manual, can be obtained from Allied.
504-9824. DL408/D

16/32-Bit Applications Manual **Rev. 1**
This manual is a compilation of Application Notes, Article Reprints and other applications literature relating to Motorola's range of 16- and 32-bit microprocessors and peripherals. Specific data on all Motorola products, including the power devices mentioned in this manual, can be obtained from Allied.
504-9825. DL409/D

Power Applications Manual **Rev. 1**
This manual is a compilation of 60 Application Notes, Article Reprints and other applications literature relating to Motorola's range of power semiconductors. A Device Cross-Reference indicates where specific components are featured in applications documents in the manual; in addition to the index, an abstract of each document is provided as an aid to the location of particular topics.
504-9826. DL410/D

Communications Applications Manual **Rev. 1**
This manual is a compilation of 44 Application Notes, Article Reprints and other applications literature relating to Motorola's semiconductors for Communications and related applications. A Device Cross-Reference indicates where specific components are featured in applications documents in the manual, and an abstract of each document is provided in addition to the index. Topics range from Speakerphones and Key Systems to FM Receivers, from Fiber Optics to DSP, from RS232 to MAP and ISDN.
504-9827. DL411/D

Industrial Control Applications Manual **Rev. 1**
This manual is a compilation of 42 Application Notes, Article Reprints and other applications literature relating to Motorola's semiconductors for Industrial Control Applications. A Device Cross-Reference indicates where specific components are featured in applications documents in the manual, and an abstract of each document is provided in addition to the index. Topics include temperature and pressure measurement, A/D conversion for industrial applications, motor control and industrial interfacing.
504-9828. DL412/D

Radio, RF and Video Applications Manual **Rev. 1**
This manual is a compilation of 37 Application Notes, Article Reprints and other applications literature relating to Motorola's semiconductors for Radio, RF and Video applications. A Device Cross-Reference indicates where specific components are featured in applications documents in the manual, and an abstract of each document is provided in addition to the index. Topics include RF amplifier designs, the application of Motorola's TV ICs, designing for very high speed logic, and PLL fundamentals.
504-9829. DL413/D

FET Applications Manual
This manual is a compilation of 34 applications documents concerned with Motorola's FETs for small signal, audio and power applications. A Device Cross-Reference indicates where specific components are featured in applications documents in the manual, and an abstract of each document is provided in addition to the index. Topics include MOSFET/bipolar comparisons, the application of MOSFETs in motor control and switching power supplies, driving MOSFETs from logic and other sources, and audio and VHF MOSFET-based amplifiers.
504-9830. DL414/D

DSP56100, Digital Signal Processor Family Manual **Q3/93**
The DSP56100 Family Manual provides a description of the components that are common to all DSP56100 family processors and includes a detailed description of the basic DSP56100 family instruction set.
504-9831. DSP56100FM/AD

Timing Solutions **Rev. 4**
With frequencies regularly reaching 33 MHz and approaching 40-50 MHz in today's CISC and RISC microprocessor systems, well controlled and precise clock signals are required to maintain a synchronous system. Many microprocessors also require input clock duty cycles very close to 50%. These stringent timing requirements mandate the use of specially designed, low skew clock distribution circuits or clock drivers. This book contains device specifications in the form of data sheets as well as applications information for Motorola's low skew timing circuits.
504-9832. BR1333/D

Hipercomm **Rev. 1**
This book contains device specifications in the form of data sheets as well as applications information for Motorola's high performance frequency control products. Motorola's portfolio of state-of-the-art low power prescaler includes over 40 different combinations of frequency, divide ratio and power to meet the needs of most designs. Information is also included about Motorola's integrated single chip synthesizers which provide significant savings in power dissipation. Making them ideal for hand-held, battery-operated applications. Of course, the world of RF does not depend on prescalers and synthesizers alone. Motorola's current and future efforts include integrated communication VCOs, as well as higher levels of integration for the transmit and receive sections of various wireless applications.
504-9833. BR1334/D

DSP56002EVM Evaluation Module

The DSP56002EVM Evaluation Module (EVM) is a low-cost platform designed to familiarize the user with Motorola's DSP56002 Digital Signal Processor (DSP). The 24-bit precision of the DSP combined with the on-board 32 K words of external SRAM and stereo CD-quality audio codec makes the EVM ideal for implementing and demonstrating many audio processing algorithms as well as for learning the architecture and instruction set of the DSP56002 processor. The user need only supply a 7-9 volt calculator-style power supply and an RS-232 serial cable.

The DSP56002EVM comes with Motorola's DSP56000 cross assembler and Domain Technologies' debug software with windowed user interface. The software runs under MS-DOS on an IBM PC-compatible computer (~386 class or higher) and communicates with the EVM over an RS-232 serial port.

Hardware. Fully assembled and tested printed circuit board containing:

- ▶ 24-Bit DSP56002 Digital Signal Processor Operating at 40 Mhz
- ▶ Up to 20 Million Instructions Per Second (MIPS) — 50 ns Instruction Cycle at 40 Mhz
- ▶ Up to 120 Million Operations Per Second (MOPS) at 40 Mhz
- ▶ Executes A 1024-Point Complex Fast Fourier Transform (FFT) in 59.898 Clocks
- ▶ Four 24-Bit Internal Data Buses and Three 16-Bit Internal Address Buses for Simultaneous Accesses to One Program and Two Data Memories
- ▶ 512 x 24-Bit On-Chip Program RAM with Bootstrap ROM
- ▶ Two 256 x 24-Bit On-Chip Data RAMs
- ▶ Two 256 x 24-Bit On-Chip Data ROMs Containing Sine, A-Law and μ -Law Tables
- ▶ External Memory Expansion with 16-Bit Address and 24-Bit Address and 24-Bit Data Buses
- ▶ Byte-Wide Host Interface (HI) with Direct Memory Access Support
- ▶ Synchronous Serial Interface (SSI) to Communicate with Codecs and Synchronous Serial Devices
- ▶ Serial Communication Interface (SCI) for Full-Duplex Asynchronous Communications
- ▶ 24-Bit Timer/Event Counter also Generates and Measures Digital Waveforms
- ▶ On-Chip Emulation (On_{CE}) Port for Unobtrusive, Processor Speed-Independent Debugging
- ▶ Software-Programmable, Phase-Locked Loop-based (PLL) Frequency Synthesizer
- ▶ 32 K x 24-Bit Zero-Wait-State External Static RAM for Expansion Memory
- ▶ Option for 32 K x 8 Bits of Flash EEPROM for Program Bootstrapping and Stand-alone Operation
- ▶ Crystal Semiconductor's CS4215 Stereo CD-Quality Sigma-Delta Analog-to-Digital and Digital-to-Analog Converter for High Quality Audio
- ▶ 24.576 Mhz Crystal for Audio Sampling Rates 0148, 32, 16, 9.6, Or 8 KHz
- ▶ 16-Bit Linear, 8-Bit μ -Law, 8-Bit A-Law, and 8-Bit Linear Data Formats
- ▶ Option for other Crystals/Frequencies for other Sample Rates, Such As 44.1 KHz
- ▶ MC7805ACT Voltage Regulator
- ▶ RS-232 Interface to On_{CE} Controller and Serial Communications Interface (SCI)
- ▶ Option for A Second RS-232 Connector for Access to The DSP56002 Processor's Serial Communications Port (SCI)
- ▶ MC68HC705K1 Microcontroller Performing RS-232-to-On_{CE} Command Conversion
- ▶ MC33078 Pre-Amp for Analog Buffering
- ▶ Strip Connectors for External Access to the DSP56002's Memory Expansion, Host Interface, and Serial Communications Ports
- ▶ Jacks for Stereo Inputs, Outputs, and Headphones
- ▶ 2.1 mm Jack and Two Screw Terminals for Power Connection
- ▶ Documentation for The DSP56002, CS4215, Assembler, and Debugger, Plus Board Schematics

Software

- ▶ Motorola's DSP5600X Cross Assembler
- ▶ DSP56002 Binary Code From Source Code Using Labels, Line Numbers, Definitions, and Titles Incorporating the Architecture's Complete Instruction Set and Addressing Modes, Memory Spaces, and Parallel Data Transfers
- ▶ Macros, Expression Evaluation, and Functions for Strings, Data Conversion, and Transcendentals
- ▶ Reports for Cross-References, Instruction Cycle Count, and Memory use
- ▶ Extensive Error Checking and Reporting
- ▶ Domain Technologies' Debug Software with Windowed User Interface
- ▶ Symbolic Debugging
- ▶ Four Independent Windows for Data, Disassembly, DSP Register, and Commands
- ▶ Data and Registers Displayed as Fractions, Decimals, or Hexadecimals
- ▶ Symbolic Addressing and Animated ASCII Graphical Display of Memory Segments
- ▶ Up to 8 Simultaneous Breakpoints
- ▶ Built-in Assembler and Disassembler
- ▶ Installation Instructions and User Notes on Disk
- ▶ Demo Software Showing the Advantages of 24-Bits Over 16-Bits in Audio Processing
- ▶ Self-Test Files — Executable and Source Code

Requirements. The user must have the following:

- ▶ Power Supply (7-9 VAC or DC, 700 mA)
- ▶ RS-232 Cable with DB-9 Connectors
- ▶ IBM PC-Compatible Computer (~386 Class or Higher) Running MS-DOS with a Serial Port Capable of Operation at 19,200 Baud

Options. The EVM easily accommodates the following user additions:

- ▶ 32 K x 8-Bit Flash EEPROM for Program Bootstrapping and Stand-Alone Operation
- ▶ A Second Crystal for Other Sample Rates, Such as 44.1 KHz
- ▶ A Second RS-232 Connector to Access the DSP56002's Serial Communications Port (SCI)

DSP56002, HCMOS Low Power 24-Bit DSP

With its triple Harvard architecture of seven internal buses and three parallel execution units — Data ALU, Address Generation Unit (AGU) and Program Controller — has set the standard for high end DSP devices. These products are used extensively in telecommunications, control and audio. The DSP56000 family's unique 24-bit architecture has made these products the industry standard for CD-quality sound. The DSP56002 provides clock speeds up to 66 Mhz, a phase locked loop (PLL) and an On-Chip Emulation (On_{CE}). The DSP56L002 is a low voltage implementation of the DSP56002. Its 3.3 V operation effectively extends the battery life of portable applications up to three times longer than 5 V systems.

DSP56004, HCMOS Low Power 24-Bit DSP

The DSP56004 contains audio peripherals specially designed for consumer and automotive audio applications. The Serial Audio Interface (SAI) provides two stereo inputs and three stereo outputs with I2S Sony or Matsushita formats. The External Memory Interface (EMI) supports a byte-wide data port to DRAM or SRAM. The Serial Host Interface (SHI) provides a low cost microcontroller interface using SPI or I2C.

Motorola M68000 Family Upward Compatible 16-/32-Bit Microprocessors

MC68HC000, 16-/32-Bit HCMOS Micropower Microprocessor

Completely pin and timing compatible and gives all the functions and performance of the MC68000 at one-tenth the operating power requirements, 0.175 watts. It is designed for large multiprocessing systems and realtime applications with vectored interrupts, seven priority levels and a 16 megabyte addressing space. It offers mainframe-like performance, supporting high-level languages and sophisticated operating systems.

Motorola M68000 Family Upward Compatible 16-/32-Bit Microprocessors (Continued)

MC68020, 32-Bit HCMOS Microprocessor

The 020 has a full 32-bit internal and 32-bit external, regular, symmetrical architecture. It offers all the functionality of the M68000 Family MPUs and maintains software user-code compatibility. The unique on-chip instruction cache helps provide burst-mode operation to 12.5 MIPS. The 020 is the proven leader in high performance systems in office automation, engineering workstations, fault tolerant computers, parallel processors, telephone switching systems, and intelligent controllers.

MC68030, Second Generation 32-Bit HCMOS Microprocessor

The 030 contains two independent 32-bit address buses and two 32-bit data buses which allows the CPU, caches, MMU, and the bus controller to operate in parallel. This makes it possible for the 030 to simultaneously access an instruction from the instruction cache, data from the data cache and instruction/data from external memory. Performance is further enhanced by on-chip 256 byte instruction and data caches, on-chip MMU, and enhanced bus controller.

Mfr.'s Type		Operating Frequency (MHz)	MIPS	MFLOPS	Address Range (Bytes)	Data Bus (Bit)	Instruction Cache (Bytes)	Data Cache (Bytes)	Burst Mode	General Purpose Registers	Address Modes	On-Chip MMU	Floating Point Solution

MC68040, Third Generation 32-Bit HCMOS Microprocessor

The 040 is a virtual memory microprocessor employing multiple, concurrent execution units and a highly integrated architecture. On a single chip, the 040 integrates a MC68030 compatible integer unit, an IEEE 754 compatible floating point unit (FPU) and fully independent instruction and data demand-paged memory units (MMUs), including independent 4 K-byte instruction and data caches. A high degree of parallelism is achieved through use of multiple independent execution pipelines, multiple internal buses, and a full Harvard architecture, including separate physical caches for instruction and data accesses. The 040 also directly supports cache coherency in multimaster applications with dedicated on-chip bus snooping logic.

Mfr.'s Type		Operating Frequency (MHz)	MIPS	MFLOPS	Address Range (Bytes)	Data Bus (Bit)	Instruction Cache (Bytes)	Data Cache (Bytes)	Burst Mode	General Purpose Registers	Address Modes	On-Chip MMU	Floating Point Solution

MC68882, Enhanced Floating Point Coprocessor

The MC68882 is pin-to-pin hardware and software compatible with the MC68881 Floating Point Coprocessor and implements a variety of performance enhancements including dual-ported registers and an advanced pipeline. Additional enhancements allows execution of multiple instructions in parallel for 2-4 times the Floating Point performance of the MC68881.

MC68EC000, 8-/16-/32-Bit HCMOS Embedded Controller

Low cost embedded control MPU with 8-/16-bit selectable data bus. The EC000 has a flexible data bus that can operate in either 8- or 16-bit modes and a 24-bit address bus that provides 16 Mbytes of memory addressing capability. The EC000 represents the lowest cost entry point to any 32-bit architecture.

Mfr.'s Type		Operating Frequency (MHz)	MIPS	Address Range (Bytes)	Instruction Cache (Bytes)	Data Cache (Bytes)	Burst Fill Caches (Bytes)	General Purpose Registers	Address Modes	Floating Point Hardware

MC68EC020, 32-Bit Embedded Controller

The EC020, with a complete 32-bit internal implementation, has a 32-bit data bus and an on-chip instruction cache to provide dramatically increased performance over 8- and 16-bit microprocessors. Upward migration to the EC020 is made simple with dynamic bus sizing, allowing 8-, 16-, and 32-bit peripherals to communicate with the microprocessor.

MC68EC030, 32-Bit Enhanced Embedded Controller

32-bit MPU for embedded applications. On-chip 256 byte instruction and data cache provide high speed access for control routines and data. The EC030 utilizes a low cost DRAM bus interface and a burst mode bus interface is provided for efficient DRAM access. Dynamic bus sizing is available for interfacing to 8-, 16-, and 32-bit devices.

High Performance 68K Integrated Processors

MC68306, Integrated 68EC00 Processor

The 68306 includes a 68EC000 core processor, a 68681 Dual Universal Asynchronous Receiver Transmitter (DUART), system integration functions and a DRAM controller. The on-chip DRAM controller gives the 68306 the simplest interface to DRAM based designs. The DRAM controller easily accommodates 64 Mbytes of memory. The 68306 saves time in the design cycle by providing valuable 68000 system components in one chip.

MC68340, Integrated Multiprotocol Processor with DMA

The 68340 features a CPU32 core and a high speed two channel, 32-bit Direct Memory Access (DMA) controller that eliminates the usual bus arbitration and synchronization delays, maximizing data throughput (25-Mbytes per second on a 16-bit bus). It also contains a SIM, a 68681/2681 compatible DUART, two identical counters/timers each with a 16-bit counter and an 8-bit prescaler with 80 ns resolution.

MC68302, Integrated Multiprotocol Processor

The 68302 is a three channel communications device that may be configured to support a number of popular industry interfaces, including those for the Integrated Services Digital Network (ISDN) basic rate and terminal adapter applications. Through a combination of architectural and programmable features concurrent operation of different protocols (HDLC/SDLC, UART, BISYNC, DDCMP, or transparent modes) can easily be achieved. The 68302 contains on-chip DMA, RAM, timers, I/O, chip select and a wait state interrupt controller.

MC14000: Metal Gate CMOS Logic Integrated Circuits

Mfr.'s Type		Description	No. of Leads
PDIP	SOIC		
MC14001BCP	MC14001BD	Quad 2-Input NOR Gate	14
—	MC14001UBD	Quad 2-Input NOR Gate, Inverting/Non-Buffered	14
MC14002BCP	—	Dual 4-Input NOR Gate	16
MC14006BCP	—	18-Bit Static Shift Register	14
MC14007UBCP	MC14007UBD	Dual Complementary Pair Plus Inverter	14
MC14008BCP	—	4-Bit Full Adder	16
MC14011BCP	MC1411BD	Quad 2-Input NAND Gate	14
MC14011UBCP	MC14011UBD	Quad 2-Input NAND Gate, Inverting/Non-Buffered	14
MC14012BCP	—	Dual 4-Input NAND Gate	14
MC14013BCP	MC14013BD	Dual Type D Flip-Flop	14
MC14014BCP	MC14014BD	8-Bit Static Shift Register, Synchronous Parallel Input/Serial Output	16
MC14015BCP	MC14015BD	Dual 4-Bit Static Shift Register, Serial Input/Parallel Output	16
MC14016BCP	MC14016BD	Quad Analog Switch/Quad Multiplexer	14
MC14017BCP	MC14017BD	5-Stage Johnson Decade Counter with Code Converter, Divide by N, Presettable/Resettable Divide By N Johnson Counter	16
MC14018BCP	—	14-Bit Binary Counter	16
MC14020BCP	MC14020BD	8-Bit Static Shift Register, Asynchronous Parallel Input/Serial Output	16
MC14021BCP	MC14021BD	4-Stage Johnson Octal Counter	16
MC14022BCP	—	Triple 3-Input NAND Gate	14
MC14023BCP	MC14023BD	7-Stage Ripple Counter	14
MC14024BCP	MC14024BD	Triple 3-Input NOR Gate	14
MC14025BCP	—	Dual J-K Flip-Flop	16
MC14027BCP	MC14027BD	BCD to Decimal Decoder, Binary to Octal Decoder	16
MC14028BCP	MC14028BD	Binary/Decade Up/Down Counter	16
MC14029BCP	—		

Mfr.'s Type		Description	No. of Leads
PDIP	SOIC		
MC14035BCP	—	4-Bit Parallel-In/Parallel-Out Shift Register	16
MC14040BCP	MC14040BD	12-Bit Binary Counter	16
MC14042BCP	—	Quad Transparent Latch	16
MC14043BCP	MC14043BD	Quad NOR R-S Latch	16
MC14044BCP	—	Quad NAND R-S Latch	16
MC14046BCP	MC14046BDW	Phase Locked Loop	16
MC14049BCP	MC14049BD	Hex Inverter/Buffer	16
MC14049UBCP	MC14049UBD	Hex Inverter/Buffer	16
MC14050BCP	MC14050BD	Hex Non-Inverting Buffer	16
MC14051BCP	MC14051BD	8-Channel Analog Multiplexer/Demultiplexer	16
MC14052BCP	MC14052BD	Dual 4-Channel Analog Multiplexer/Demultiplexer	16
MC14053BCP	MC14053BD	Triple 2-Channel Analog Multiplexer/Demultiplexer	16
MC14060BCP	—	14-Bit Binary Ripple Counter and Oscillator	16
MC14066BCP	MC14066BD	Quad Analog Switch/Quad Multiplexer	14
MC14067BCP	—	16-Channel Analog Multiplexer/Demultiplexer	24
MC14068BCP	—	8-Input NAND Gate	14
MC14069UBCP	MC14069UBD	Hex Inverter	14
MC14070BCP	MC14070BD	Quad Exclusive OR Gate	14
MC14071BCP	MC14071BD	Quad 2-Input OR Gate	14
MC14072BCP	—	Dual 4-Input OR Gate	14
MC14073BCP	—	Triple 3-Input AND Gate	14
MC14075BCP	—	Triple 3-Input OR Gate	14
MC14076BCP	—	4-Bit D-Type Register with Three-State Outputs	16
MC14077BCP	—	Quad Exclusive NOR Gate	14

MC14000: Metal Gate CMOS Logic Integrated Circuits (Continued)

MC74F08N	MC74F08D	Quad 2-Input AND Gate	14	MC74F299DW	MC74F299D	8-Input Universal Shift Register with Common Parallel I/O Pins	20
MC74F109N	MC74F109D	Dual JK Positive Edge Triggered Flip-Flop	16	MC74F32N	MC74F32D	Quad 2-Input OR Gate	14
MC74F110N	MC74F110D	Triple 3-Input NAND Gate	14	MC74F350N	—	4-Bit Shifter with Three-State Outputs	16
MC74F112N	MC74F112D	Dual JK Negative Edge Triggered Flip-Flop	16	—	MC74F365D	Hex Buffer/Driver Gate Enable Non-Inverting, Three-State	16
MC74F111N	MC74F111D	Triple 3-Input AND Gate	14	MC74F367N	MC74F367D	Hex Buffer/Driver 4-Bit Plus 2-Bit Non-Inverting, Three-State	16
MC74F1245N	—	Octal Bidirectional Transceiver With Three-State Inputs/Outputs	20	MC74F373N	MC74F373DW	Octal Transparent Latch with Three-State Outputs	20
MC74F125N	MC74F125D	Three-State Quad Buffer, Enable Low	14	MC74F374N	MC74F374DW	Octal D-Type Flip-Flop with Three-State Outputs	20
MC74F126N	MC74F126D	Three-State Quad Buffer, Enable High	14	MC74F377N	MC74F377DW	Octal D-Type Flip-Flop with Enable	20
MC74F132N	—	Quad 2-Input NAND Schmitt Trigger	14	MC74F378N	MC74F378D	Parallel D Register with Enable	16
MC74F138N	MC74F138D	1 Of 8 Decoder/Demultiplexer	16	MC74F379N	—	Quad Parallel Register	16
MC74F139N	MC74F139D	Dual 1 Of 4 Decoder	16	MC74F38N	MC74F38D	Quad 2-Input NAND Buffer, Open Collector	14
MC74F148N	MC74F148D	8-Line to 3-Line Priority Encoder	16	MC74F399N	MC74F399D	Quad 2-Port Register	16
MC74F14N	MC74F14D	Hex 2-Input Schmitt Trigger Inverter	14	MC74F51N	—	Dual 2-Wide 2-input, 2-Wide 3-Input AND-OR-Invert Gate	14
MC74F151N	MC74F151D	8-Input Multiplexer	16	MC74F521N	MC74F521DW	8-Bit Identity Comparator	20
MC74F153N	MC74F153D	Dual 4-Input Multiplexer	16	MC74F533N	MC74F533DW	Octal Transparent Latch with Three-State Outputs	20
MC74F157AN	MC74F157AD	Quad 2-Input Multiplexer	16	MC74F534N	—	Octal D-Type Flip-Flop with Three-State Outputs	20
MC74F158AN	MC74F158AD	Quad 2-Input Multiplexer	16	MC74F543N	MC74F543DW	Octal Registered Transceiver, Non-Inverting, Three-State	24
MC74F160AN	—	Synchronous Presettable BCD Decade Counter	16	MC74F544N	MC74F544DW	Octal Registered Transceiver, Inverting, Three-State	24
MC74F161AN	MC74F161AD	Synchronous Presettable 4-Bit Binary Counter	16	—	MC74F568DW	Synchronous 4-bit Bidirectional BCD Decade Counter with Three-State Outputs	20
MC74F163AN	MC74F163AD	Synchronous Presettable 4-Bit Binary Counter	16	MC74F569N	MC74F569DW	Synchronous 4-Bit Bidirectional Binary Counter with Three-State Outputs	20
MC74F164N	MC74F164D	8-Bit Serial-In, Parallel-Out Shift Register	16	MC74F574N	MC74F574DW	Octal D-Type Flip-Flop with Three-State Outputs	20
MC74F169N	MC74F169D	4-Stage Synchronous Bidirectional Modulo-16 Binary Counter	16	MC74F579N	MC74F579DW	8-Bit Bidirectional Binary Counter, Three-State	20
MC74F174N	MC74F174D	Hex D Flip-Flop With Master Reset	16	—	MC74F620DW	Octal Bus Transceiver with Three-State Outputs, Inverting	20
MC74F175N	MC74F175D	Quad D Flip-Flop	16	MC74F623N	—	Octal Bus Transceiver with Three-State Outputs, Non-Inverting	20
MC74F194N	MC74F194D	4-Bit Bidirectional Universal Shift Register	16	MC74F640N	—	Octal Bus Transceiver, Inverting with Three-State Outputs	20
MC74F20N	MC74F20D	Dual 4-Input NAND Gate	14	MC74F646N	MC74F646DW	Octal Transceiver/Register with Three-State Outputs	24
MC74F21N	MC74F21D	Dual 4-Input AND Gate	14	MC74F64N	—	4-2-3-2-Input AND-OR-Invert Gate	14
MC74F240N	MC74F240DW	Octal Inverting Buffer/Line Driver With Three-State Outputs	20	MC74F657AN	MC74F657ADW	Octal Bidirectional Transceiver with 8-Bit Parity Generator Checker	24
MC74F241N	MC74F241DW	Octal Buffer/Line Driver With Three-State Outputs	20	MC74F74N	MC74F74D	Dual D-Type Positive Edge Triggered Flip-Flop	14
—	MC74F243D	Quad Bus Transceiver With Three-State Outputs	14	MC74F779N	MC74F779D	8-Bit Bidirectional Binary Counter, Three-State	16
MC74F244N	MC74F244DW	Octal Buffer/Line Driver With Three-State Outputs, Enable Low	20	MC74F803N	MC74F803D	Clock Driver Quad D-Type Flip-Flop with Matched Propagation Delays	14
MC74F245N	MC74F245DW	Octal Bidirectional Transceiver With Three-State Inputs/Outputs	20	MC74F823N	MC74F823DW	9-Bit D-Type Positive Edge Triggered Flip-Flop	24
MC74F251N	MC74F251D	8-Input Multiplexer With Three-State Outputs	16	MC74F827N	MC74F827DW	10-bit Buffer/Line Driver with Three-State Outputs, Enable Low	16
MC74F253N	MC74F253D	Dual 4-Input Multiplexer With Three-State Outputs	16	MC74F85N	MC74F85D	4-Bit Magnitude Comparator	14
MC74F257AN	MC74F257AD	Quad 2-Input Multiplexer With Three-State Outputs	16	MC74F86N	MC74F86D	Quad 2-Input Exclusive OR Gate	14
MC74F258AN	MC74F258AD	Quad 2-Input Multiplexer With Three-State Outputs, Inverting	16	—	—	—	—
MC74F259N	MC74F259D	8-Bit Addressable Latch	16	—	—	—	—

MC74HC and MC74HCT: High Speed and High Speed-TTL Compatible CMOS Logic Integrated Circuits

Mfr.'s Type				Description	No. of Leads
MC74HC		MC74HCT			
PDIP	SOIC	PDIP	SOIC		
MC74HC00AN	MC74HC00AD	MC74HCT00AN	MC74HCT00AD	Quad 2-Input NAND Gate	14
MC74HC02AN	MC74HC02AD	—	—	Quad 2-Input NOR Gate	14
MC74HC03AN	MC74HC03AD	—	—	Quad 2-Input NAND Gate With Open Drain Outputs	14
MC74HC04AN	MC74HC04AD	MC74HCT04AN	MC74HCT04AD	Hex Inverter	14
MC74HC004N	MC74HC004D	—	—	Hex Unbuffered Inverter	14
MC74HC08AN	MC74HC08AD	MC74HCT08AN	—	Quad 2-Input AND Gate	14
MC74HC107N	MC74HC107D	—	—	Dual JK Flip-Flop With Reset	14
MC74HC109N	MC74HC109D	—	—	Dual JK Flip-Flop With Set and Reset	16
MC74HC110N	MC74HC110D	—	—	Triple 3-Input NAND Gate	14
MC74HC112N	MC74HC112D	—	—	Dual JK Flip-Flop With Set and Reset	16
MC74HC111N	MC74HC111D	—	—	Triple 3-Input AND Gate	14
MC74HC125AN	MC74HC125AD	—	—	Quad Three-State Non-Inverting Buffer, Active Low Enable	14
MC74HC126AN	MC74HC126AD	—	—	Quad Three-State Non-Inverting Buffer, Active High Enable	14
MC74HC132AN	MC74HC132AD	—	—	Quad 2-Input NAND Gate With Schmitt Trigger Inputs	14
MC74HC133N	—	—	—	13-Input NAND Gate	16
MC74HC137N	MC74HC137D	—	—	1 Of 8 Decoder/Demultiplexer With Address Latch	16
MC74HC138AN	MC74HC138AD	MC74HCT138AN	MC74HCT138AD	1 Of 8 Decoder/Demultiplexer	16
MC74HC139AN	MC74HC139AD	—	—	Dual 1 Of 4 Decoder/Demultiplexer	16
MC74HC147N	MC74HC147D	—	—	Decimal To BCD Encoder	16
MC74HC144AN	MC74HC144AD	MC74HCT144AN	MC74HCT144AD	Hex Schmitt Trigger Inverter	14
MC74HC151N	—	—	—	8-Input Data Selector/Multiplexer	16
MC74HC153N	MC74HC153D	—	—	Dual 4-Input Data Selector/Multiplexer	16
MC74HC154N	MC74HC154DW	—	—	1 of 16 Decoder/Demultiplexer	24
MC74HC157AN	MC74HC157AD	MC74HCT157AN	—	Quad 2-Input Data Selectors/Multiplexers	16
MC74HC158N	—	—	—	Quad 2-Input Data Selector/Multiplexer	16
MC74HC160N	—	—	—	Asynchronous Presettable BCD Counter	16
MC74HC161AN	MC74HC161AD	MC74HCT161AN	—	Asynchronous Presettable Binary Counter	16
MC74HC163AN	MC74HC163AD	MC74HCT163AN	—	Synchronous Presettable Binary Counter	16
MC74HC164N	MC74HC164D	—	—	8-Bit Serial-Input/Parallel-Output Shift Register	14
MC74HC165N	MC74HC165D	—	—	8-Bit Serial or Parallel-Input Serial-Output Shift Register	16
MC74HC173N	MC74HC173D	—	—	Quad Three-State D Type Flip-Flop With Common Clock and Reset	16
MC74HC174AN	MC74HC174AD	MC74HCT174AN	MC74HCT174AD	Hex D Type Flip-Flop With Common Clock and Reset	16
MC74HC175N	MC74HC175D	—	—	Quad D Type Flip-Flop With Common Clock and Reset	16
MC74HC194N	—	—	—	4-Bit Bidirectional Universal Shift Register	16
MC74HC195N	—	—	—	4-Bit Universal Shift Register	16
MC74HC20N	—	—	—	Dual 4-Input NAND Gate	14
MC74HC237N	—	—	—	1 Of 8 Decoder/Demultiplexer With Address Latch	16
MC74HC240AN	MC74HC240ADW	MC74HCT240AN	MC74HCT240ADW	Octal Three-State Inverting Buffer/Line Driver	20
MC74HC241AN	MC74HC241ADW	—	—	Octal Three-State Non-Inverting Buffer/Line Driver/Line Receiver	20
MC74HC242N	—	—	—	Quad Three-State Bus Transceiver	14
MC74HC244AN	MC74HC244ADW	MC74HCT244AN	MC74HCT244ADW	Octal Three-State Non-Inverting Buffer/Line Driver/Line Receiver	20
MC74HC245AN	MC74HC245ADW	MC74HCT245AN	MC74HCT245ADW	Octal Three-State Non-Inverting Bus Transceiver	20
MC74HC251N	MC74HC251D	—	—	8-Input Data Selector/Multiplexer With Three-State Outputs	16
MC74HC253N	MC74HC253D	—	—	Dual 4-Input Data Selector/Multiplexer With Three-State Outputs	16
MC74HC257N	MC74HC257D	—	—	Quad 2-Input Data Selector/Multiplexer With Three-State Outputs	16
MC74HC259N	MC74HC259D	—	—	8-Bit Addressable Latch/1 Of 8 Decoder	16
MC74HC273AN	MC74HC273ADW	MC74HCT273AN	MC74HCT273ADW	Octal D Type Flip-Flop With Common Clock and Reset	20
MC74HC27N	—	—	—	Triple 3-Input NOR Gate	14
MC74HC280N	MC74HC280D	—	—	9-Bit Odd/Even Parity Generator/Checker	14
MC74HC299N	MC74HC299DW	—	—	8-Bit Bidirectional Universal Shift Register With Parallel I/O	20
MC74HC30N	MC74HC30D	—	—	8-Input NAND Gate	14
MC74HC32AN	MC74HC32AD	MC74HCT32AN	MC74HCT32AD	Quad 2-Input OR Gate	14

MC74HC and MC74HCT: High Speed and High Speed-TTL Compatible CMOS Logic Integrated Circuits (Continued)

MC74HC		MC74HCT		Description	No. of Leads
PDIP	SOIC	PDIP	SOIC		
MC74HC354N	—	—	—	8-Input Data Selector/Multiplexer With Data and Address Latches and Three-State Outputs	20
MC74HC365N	—	—	—	Hex Three-State Non-Inverting Buffer With Common Enable	16
MC74HC367N	—	—	—	Hex Three-State Non-Inverting Buffer With Separate 2-Bit and 4-Bit Sections	16
MC74HC368N	—	—	—	Hex Three-State Inverting Buffer With Separate 2-Bit and 4-Bit Sections	16
MC74HC373AN	MC74HC373ADW	MC74HCT373AN	MC74HCT373ADW	Octal Three-State Non-Inverting Transparent Latch	20
MC74HC374AN	MC74HC374ADW	MC74HCT374AN	MC74HCT374ADW	Octal Three-State Non-Inverting D Type Flip-Flop	20
MC74HC390N	MC74HC390D	—	—	Dual 4-Stage Binary Ripple Counter With Divide By 2 and Divide By 5 Sections	16
MC74HC393N	MC74HC393D	—	—	Dual 4-Stage Binary Ripple Counter	14
MC74HC4002N	MC74HC4002D	—	—	Dual 4-Input NOR Gate	14
MC74HC4017N	MC74HC4017D	—	—	Decade Counter	16
MC74HC4020N	—	—	—	14-Stage Binary Ripple Counter	16
MC74HC4024N	MC74HC4024D	—	—	7-Stage Binary Ripple Counter	14
MC74HC4040N	—	—	—	12-Stage Binary Ripple Counter	16
MC74HC4046AN	MC74HC4046AD	—	—	Phase Locked Loop	16
MC74HC4049N	MC74HC4049D	—	—	Hex Inverting Buffer	16
MC74HC4050N	MC74HC4050D	—	—	Hex Buffer	16
MC74HC4051N	MC74HC4051D	—	—	8-Channel Single-Ended Break-before-Make Analog Multiplexer/Demultiplexer	16
MC74HC4052N	MC74HC4052D	—	—	4-Channel Differential Break-before-Make Analog Multiplexer/Demultiplexer	16
MC74HC4053N	MC74HC4053D	—	—	Triple 2-Channel Single-Ended Break-before-Make Analog Multiplexer/Demultiplexer	16
MC74HC4060N	—	—	—	14-Stage Binary Ripple Counter With Oscillator	16
MC74HC4066N	MC74HC4066D	—	—	Quad Analog Switch/Multiplexer/Demultiplexer	14
MC74HC4075N	MC74HC4075D	—	—	Triple 3-Input OR Gate	14
MC74HC4078N	MC74HC4078D	—	—	8-Input NOR/OR Gate	14
MC74HC42N	—	—	—	1 of 10 Decoder	16
MC74HC4316N	MC74HC4316D	—	—	Quad Analog Switch/Multiplexer/Demultiplexer With Separate Analog and Digital Power Supplies	16
MC74HC4351N	—	—	—	8-Channel Single-Ended Break-before-Make Analog Multiplexer/Demultiplexer with Address Latch	20
MC74HC4511N	—	—	—	BCD To Seven Segment Latch/Decoder/Display Driver	16
MC74HC4514N	—	—	—	1 Of 16 Decoder/Demultiplexer With Address Latch	24
MC74HC4538AN	MC74HC4538AD	—	—	Dual Precision Monostable Multivibrator, Retriggerable/Resettable	16
MC74HC51N	—	—	—	2-Wide, 2-Input/2-Wide, 3-Input AND-NOR Gates	14
MC74HC534AN	—	—	—	Octal Three-State Inverting D Type Flip-Flop	20
MC74HC540AN	MC74HC540ADW	—	—	Octal Three-State Inverting Buffer/Line Driver/Line Receiver	20
MC74HC541AN	MC74HC541ADW	MC74HCT541AN	MC74HCT541ADW	Octal Three-State Non-Inverting Buffer/Line Driver/Line Receiver	20
MC74HC563N	—	—	—	Octal Three-State Inverting Transparent Latch	20
MC74HC564N	—	—	—	Octal Three-State Inverting D Type Flip-Flop	20
MC74HC573AN	MC74HC573ADW	MC74HCT573AN	MC74HCT573ADW	Octal Three-State Non-Inverting Transparent Latch	20
MC74HC574AN	MC74HC574ADW	MC74HCT574AN	MC74HCT574ADW	Octal Three-State Non-Inverting D Type Flip-Flop	20
MC74HC589N	—	—	—	8-bit Serial Or Parallel-Input/Serial-Output Shift Register With Three-State Output	16
MC74HC58N	—	—	—	2-Wide, 2-Input/2-Wide, 3-Input AND-OR Gates	14
MC74HC595AN	MC74HC595AD	—	—	8-Bit Serial-Input/Serial Or Parallel-Output Shift Register With Latched Three-State Outputs	16
MC74HC597N	MC74HC597D	—	—	8-Bit Serial Or Parallel-Input/Serial-Output Shift Register With Input Latch	16
MC74HC646N	—	—	—	Octal Three-State Bus Transceiver and D Type Flip-Flop, Non-Inverting Outputs	24
MC74HC688N	MC74HC688DW	—	—	8-Bit Equality Comparator	20
MC74HC7266N	—	—	—	Quad 2-Input Exclusive NOR Gate	14
MC74HC73N	—	—	—	Dual JK Flip-Flop with Reset	14
MC74HC74AN	MC74HC74AD	MC74HCT74AN	MC74HCT74AD	Dual D Type Flip-Flop with Set and Reset	14
MC74HC75N	—	—	—	Dual 2-Bit Transparent Latch	16
MC74HC85N	—	—	—	4-Bit Magnitude Comparator	16
MC74HC86N	MC74HC86D	—	—	Quad 2-Input Exclusive OR Gate	14

Phase-Locked Loop Frequency Synthesizers

Mfr.'s Type		Description	Frequency (MHz)	Supply Voltage (V)	Nominal Supply Current (mA)	Phase Detector	Standby	Interface	No. of Leads
PDIP	SOG								
MC145106P	MC145106DW	PLL Frequency Synthesizer	4 @ 5 V	4.5 to 12.0	6.0 @ 5 V	Single-Ended Three-State	No	Parallel	18/20
MC145146P2	MC145146DW2	4-Bit Data Bus Input, PLL Synthesizer	20 @ 5 V	3.0 to 9.0	7.5 @ 5 V	Single-Ended Three-State, Double-Ended	No	4-Bit	20
MC145151P2	MC145151DW2	Parallel Input PLL Synthesizer	20 @ 5 V	3.0 to 9.0	7.5 @ 5 V	Single-Ended Three-State, Double-Ended	No	Parallel Input, Single Modulus	28
MC145152P2	MC145152DW2	Parallel Input PLL Synthesizer	20 @ 5 V	3.0 to 9.0	7.5 @ 5 V	Double-Ended	No	Parallel Input, Dual Modulus	28
MC145155P2	MC145155DW2	Serial Input PLL Synthesizer	20 @ 5 V	3.0 to 9.0	7.5 @ 5 V	Single-Ended Three-State, Double-Ended	No	Serial Input, Single Modulus	18
MC145156P2	MC145156DW2	Serial Input PLL Synthesizer	20 @ 5 V	3.0 to 9.0	7.5 @ 5 V	Single-Ended Three-State, Double-Ended	No	Serial Input, Dual Modulus	20
MC145157P2	MC145157DW2	Serial Input PLL Synthesizer	20 @ 5 V	3.0 to 9.0	7.5 @ 5 V	Single-Ended Three-State, Double-Ended	No	Serial Input, Single Modulus	16
MC145158P2	MC145158DW2	Serial Input PLL Synthesizer	20 @ 5 V	3.0 to 9.0	7.5 @ 5 V	Single-Ended Three-State, Double-Ended	No	Serial Input, Dual Modulus	16
MC145162P	MC145162D	Universal Programmable Dual PLL Synthesizer for Cordless Phones	60 @ 3 V	2.5 to 5.5	3.0 @ 3 V	Two Single-Ended Three-State	Yes	Serial	16
—	MC145191F	1.1 GHz PLL Frequency Synthesizer, Includes 64/65 Prescalers	1100 @ 5 V	4.5 to 5.5	7.0 @ 5 V	Current Source/Sink, Double-Ended	Yes	Serial	20

ISDN: Integrated Services Digital Network Integrated Circuits

MC14LC5472, ISDN U-Interface

ANSI T1.601 compliant, pin selectable LT or NT operation, industry standard IDL interface, slave-slave timing mode, control and status provided through four wire serial control port.

Mfr.'s Type	Function	Package Type
MC14LC5472FE	Line Cards, NT1s, Pair Gain, ISDN Compatible Bridge Routers, ISDN Terminals	68 Lead CQFP
MC14LC5472FU	Same Function as MC14LC5472FE	68 Lead PQFP

MC145474 and MC145475, ISDN S/T Interface Transceiver

Conforms to CCITT I.430 and ANSI T1 605, pin selectable NT and TE modes, Interchip Data Link (IDL), serial control port (SCP), full multiframe capabilities, S/T and IDL loopbacks.

Mfr.'s Type	Function	Package Type
MC145474P	Network Termination (NT1), PC Based and Standalone ISDN Terminal Adapters, ISDN Telephone, ISDN Video Phone	22 Lead PDIP
MC145475DW	Same Functions as the MC145474 and Supports Optional NT1 Star Mode	28 Lead SOG

Voice Coding Integrated Circuits

MC145480, +5 V PCM Codec Filter

5 V single power supply PCM codec-filter. Pin selectable Mu-Law or A-Law Commanding with serial PCM interface.

Mfr.'s Type	Function	Package Type
MC145480P	ISDN, PABX, DSP Interface, Cordless Telephone, Radio	20 Lead PDIP

Mfr.'s Type	Function	Package Type
MC145480DW	ISDN, PABX, DSP Interface, Cordless Telephone, Radio	20 Lead SOG

Remote Control Integrated Circuits

Mfr.'s Type		Function	Number of Address Lines	Maximum No. of Address Codes	Number of Data Bits	Operation	No. of Leads

Fully Integrated Pressure Sensor

The performance of Motorola's MPX series of pressure sensors is based on its patented strain gauge design. Unlike the more conventional pressure sensors which utilize four closely matched resistors in a Wheatstone bridge configuration, the MPX series uses only a single piezoresistive element ion implanted on an etched silicon diaphragm to sense the stress induced on the diaphragm by an external pressure. The extremely linear output is an analog voltage that is proportional to pressure input and ratiometric with supply voltage. High sensitivity and excellent long-term repeatability make these units suitable for the most demanding applications.

Motorola pressure sensors support three types of pressure measurements: Absolute Pressure, Differential Pressure and Gauge Pressure.

relative negative pressure to the "Pressure" side of the sensor.

Differential Pressure Sensors measure the difference between pressures applied simultaneously to opposite sides of the diaphragm. A positive pressure applied to the "Pressure" side generates the same (positive) output as an equal negative pressure applied to the "Vacuum" side.

Gauge pressure readings are a special case of differential measurements in which the pressure applied to the Pressure side is measured against the ambient atmospheric pressure applied to the Vacuum side through the vent hole in the chip of the differential pressure sensor elements.

To make the designer's job even easier, Motorola's integrated devices carry sensor technology one step further. Besides the on-chip temperature compensation and calibration offered currently on the MPX2000 series, amplifier signal conditioning has been integrated on-chip in the MPX5000 series to allow interface directly to any microcomputer with an on-board A/D converter.

The signal conditioning is accomplished by means of a four-stage amplification network, incorporating linear bipolar processing, thin-film metalization techniques, and interactive laser trimming to provide the state-of-the-art in sensor technology.

Motorola designates the two sides of the pressure sensor as the Pressure (top) side and the Vacuum Pressure (back) side. The Pressure side is the side containing silicone gel which protects the die from harsh media. The Motorola MPX pressure sensor is designed to operate with positive differential pressure applied (i.e., top side pressure is greater than or equal to back side pressure). The Pressure side may be identified by using the tables below. Note: Stainless steel cap is not installed on devices with a port attached to the pressure (gel) side.

Absolute Pressure Sensors measure an external pressure relative to a zero-pressure reference (vacuum) sealed inside the reference chamber of the die during manufacture. This corresponds to a deflection of the diaphragm equal to approximately 15 PSI (one atmosphere), generating a quiescent full-scale output for the MPX100A (15 PSI) sensor, and a half-scale output for the MPX200A (30 PSI) device. Measurement of external pressure is accomplished by applying a

Silicon Temperature Sensors

Available in a standard (TO-92) plastic package, these temperature sensing transistor elements are suitable for applications in automotive, consumer and industrial products requiring low cost and high accuracy.

Device	VBE @IC=0.1mA, TA=25°C (Typ)	Temperature Over -40°C to 150°C	Thermal Time Constant		Case
			Liquid-to-Liquid (Typ)	Flowing Air (Typ)	
MTS102	595 mV	±2°C	3 s	8 s	29-04
MTS105	595 mV	±5°C	3 s	8 s	29-04

29-04
(TO-92)**

Optoisolators

An optoisolator consists of a gallium arsenide infrared emitting diode, IRED, optically coupled to a monolithic silicon photodetector in a wide array of standard devices and encourages the use of special designs and selections for special applications. All Motorola optoisolators have Viso rating of 7500 Vac(pk), exceeding all other industry standard ratings.

Bipolar Transistors

Plastic-Encapsulated Transistors

Motorola's Small Signal TO-226 plastic transistors encompass hundreds of devices with a wide variety of characteristics for general-purpose, amplifier and switching applications. The popular high-volume package combines proven reliability, performance, economy and convenience to provide the perfect solution for industrial and consumer design problems. All devices are laser marked for ease of identification and shipped in antistatic containers, as part of Motorola's ongoing practice of maintaining the highest standards of quality and reliability.

Plastic-Encapsulated Multiple Transistors

The Manufacturing trend has been toward printed circuit board design with requirements for smaller packages with more functions. In the case of discrete components the use of the multiple device package helps to reduce board space requirements and assembly costs.

Many of the most popular devices are offered in the standard plastic DIP and surface mount IC packages. This includes small-signal NPN and PNP bipolar transistors, N-channel and P-channel FETs, as well as diode arrays.

Bipolar Transistors (Continued)

Plastic-Encapsulated Surface Mount Transistors

This section of the selector guide lists the small-signal plastic devices that are available for surface mount applications. These devices are encapsulated with the latest state-of-the-art mold compounds that enhance reliability and exhibit excellent performance in high temperature and high humidity environments. This package offers higher power dissipation capability for small-signal applications.

Plastic-Encapsulated Surface Mount General-Purpose Transistors

Pinout: 1—Base, 2—Emitter, 3—Collector (Case 318-07—TO-236AB (SOT-23)—NPN)

The following tables are a listing of small-signal general-purpose transistors in the SOT-23 surface mount package. These devices are intended for small-signal amplification for DC, audio, and lower RF frequencies. They also have applications as oscillators and general-purpose, low voltage switches. Devices listed in order of descending breakdown voltage.

Metal-Can Transistors

Metal-can packages are intended for use in industrial applications where harsh environmental conditions are encountered. These packages enhance reliability of the end products due to their resistance to varying humidity and extreme temperature ranges.

Metal-Can General-Purpose Transistors
(Case 22-03—TO-206AA (TO-18)—NPN)

These Transistors are designed for DC to VHF amplifier applications, general-purpose switching applications, and complementary circuitry. Devices are listed in decreasing order of V_{BRICEO} within each package group.

Field Effect Transistors

JFETs

JFETs operate in the depletion mode. They are available in both P- and N-channel and are offered in both Through-hole and Surface Mount Packages. Applications include general-purpose amplified, switches and choppers, and RF amplifiers and mixers. These devices are economical and very rugged. The drain and source are interchangeable on many typical JFETs.

JFET Low-Frequency/Low-Noise (Case 29-04 — TO-226AA (TO-92) — N-Channel)
The following table is a listing of small-signal JFETs intended for low-noise applications in the audio range. These devices exhibit good linearity and are candidates for hi-fi and instrumentation equipment.

Mfr.'s Type	R _{DS(on)} @ f		R _{DS(on)} @ f		C _{iss} (pF) Max.	C _{oss} (pF) Min.	V _{BR(ss)} V _{BR(DS)} (V) Min.	V _{GS(off)} (V)		I _{SS} (mA)		Style

Motorola RF Power MOSFETs are constructed using a planar process to enhance manufacturing repeatability. They are N-Channel field effect transistors with an oxide insulated gate which controls vertical current flow.

Compared with bipolar transistors, RF Power FETs exhibit higher gain, higher input impedance, enhanced thermal stability and lower noise. The FETs listed in this section are specified for operation in RF Power Amplifiers and are grouped by frequency range of operation and type of application. Arrangement within each group is first by order of voltage then by increasing output power.

To 150 MHz HF/SSB

V_{DD}=50 Volts, Class AB

Motorola's broad line of bipolar RF power transistors are characterized for operation in RF power amplifiers. Typical applications are in military and commercial landmobile, avionics and marine radio transmitters. Groupings are by

frequency band and type of application. Within each group, the arrangement of devices is by major supply voltage rating, then in the order of increasing output power. All devices are NPN polarity except where otherwise noted.

HF Transistors

In small signal RF applications, the package style is often determined by the end application or circuit construction technique. To aid the circuit designer in device selection, the Motorola broad range of RF small signal amplifier transistors is organized by package type. These devices are NPN polarity unless otherwise designated.

RF Amplifiers

High Power

Complete amplifiers with 50 ohm in/out impedances are available for a variety of applications including land mobile radios, base stations, TV transmitters and other uses requiring large-signal amplification, both linear and Class C.

Land Mobile/Portable

The advantages of small size, reproducibility and overall lower cost become more pronounced with increasing frequency of operation. These amplifiers offer a wide range in power levels and gain, with guaranteed performance specifications for bandwidth, stability and ruggedness.

Low Power

The following categories describe a wide range of complete amplifier assemblies both hybrid and monolithic for use in CATV distribution systems, instrumentation, communications and military equipment. A variety of power levels and frequencies of operation is offered for many applications.

CATV Distribution

Motorola Hybrids are manufactured using fourth generation technology which has set new standards for CATV system performance and reliability. These hybrids have been optimized to provide premium performance in all CATV systems up to 152 channels.

MOTOROLA

— NEW —

Tuning, Hot-Carrier and Switching Diodes

Abrupt Junction Tuning Diodes

Motorola supplies voltage-variable capacitance diodes serving the entire range of frequencies from HF through UHF. Used in RF receivers and transmitters, they have a variety of applications.

Two families of devices are available: Abrupt Junction and Hyper Abrupt Junction. The Abrupt Junction family includes devices suitable for virtually all tuned-circuit and narrow-range tuning applications throughout the spectrum.

General Purpose Plastic Abrupt Tuning Diodes

Capacitance Ratio @ 2.0 Volts/30 Volts

Case 182 — TO-226AC (TO-92) — 2-Lead

The following is a listing of plastic package, general-purpose, abrupt tuning diodes. These devices exhibit high Q characteristics.

Hot-Carrier (Schottky) Diodes

Hot-Carrier diodes are ideal for VHF and UHF mixer and detector applications as well as many higher frequency applications. They provide stable electrical characteristics by eliminating the point-contact diode presently used in many applications.

Hot-Carrier (Schottky) Diodes

Case 182 — TO-226AC (TO-92)

The following is a listing of hot carrier (Schottky) diodes that exhibit low forward voltage drop for improved circuit efficiency.

Mfr.'s Type	V _{RRM} (V)	Cr @ V _R		V _F @ 10 mA (V) Max.	I _R @ V _R (nA) Max.	Minority Lifetime (ps) Typ.	Device Marking	Style

¹Dual diodes.

Switching Diodes

Small-signal switching diodes are intended for low current switching and steering applications. Hot-Carrier, PIN and general-purpose diodes allow a wide selection for specific application requirements.

PIN Switching Diodes

Case 182 — TO-226AC (TO-92)

The following PIN diodes are designed for VHF band switching and general-purpose low current switching applications.

Mfr.'s Type	V _{RRM} (V) Min.	Cr @ V _R @ 1.0 MHz		I _R @ V _R (nA) Max.	Series Resistance (Ω) Max.	Device Marking	Style

Tuning Diodes — Hyper-Abrupt Junction

The Hyper-Abrupt family exhibits higher capacitance, and a much larger capacitance ratio. It is particularly well suited for wider-range application such as AM/FM radio and TV tuning.

Hyper-Abrupt Tuning Diodes For Telecommunications — Single

Case 182 — TO-226AC (TO-92)

The following is a listing of hyper-abrupt tuning diodes intended for high frequency, FM radio, and TV tuner applications.

[†]Zener Voltage is the key parameter for each device type. It is specified at a particular test current applied at either thermal equilibrium (T.E.) or pulse test condition. The voltage tolerance for the device types listed is, in general, $\pm 5\%$; however, for some series, the voltage tolerance varies from device type to device type over a range of $\pm (5$ to $8.5)\%$. Consult the complete data sheet to determine the exact test conditions and minimum/maximum limits for the zener voltage. Consult Application Note AN924 regarding measurement of Zener Voltage (pulse versus thermal equilibrium). Power Ratings represent the capability of the case size listed as supplied by Motorola. These ratings may be higher than the JEDEC registration and/or the same device types supplied by other manufacturers. **V_Z Test Conditions and Tolerances.** *1N4370A/1N468A Series: I_{ZT}=20 mA (T.E.) — A suffix= $\pm 5\%$; C suffix= $\pm 2\%$; D suffix= $\pm 1\%$. 1N957B Series: I_{ZT}=50 μ A (T.E.) — No suffix= $\pm 5\%$; C suffix= $\pm 2\%$; D suffix= $\pm 1\%$. Also has delta V_Z parameter and limit. *1N5221B-42B, 1N5243B-81B: I_{ZT}=20 mA (T.E.), I_{ZT} @ approximately 125 mW point (T.E.) — B suffix= $\pm 5\%$; C suffix= $\pm 2\%$; D suffix= $\pm 1\%$. *1N4728A-64A: I_{ZT} @ approximately 250 mW point (T.E.) — A suffix= $\pm 5\%$; C suffix= $\pm 2\%$; D suffix= $\pm 1\%$. *1N5333B-88B: I_{ZT} varies from 0.9 to 1.5 W point depending on type number (pulse) — B suffix= $\pm 5\%$; Also has delta V_Z parameter and limit. *Glass Case 299 — (DO-35). **Glass Case 59-03. †Plastic Surmetic 40.

Voltage Reference Diodes
Temperature Compensated Reference Diodes

For applications where output voltage must remain within narrow limits during changes in input voltage, load resistance and temperature, Motorola guarantees all reference devices to fall within the specified maximum voltage variations, ΔV_z , at the specifically indicated test temperatures and test current (JEDEC Standard #5). Temperature coefficient is also specified but should be considered as a reference only — not a maximum rating. Devices in this table are hermetically sealed structures.

Current Regulator Diodes
Electrical Characteristics (Ta=25°C unless otherwise noted)

High impedance diodes whose "constant current source" characteristic complements the "constant voltage" of the zener line. Currents are available for 0.22 to 4.7 mA, with usable voltage range for a minimum limit of 1.0 to 2.5 Volts, up to a voltage compliance of 100 Volts, for the 1N5283 series.

¹Zener Voltage is the key parameter for each device type. It is specified at a particular test current applied at either thermal equilibrium (T.E.) or pulse test condition. The voltage tolerance for the device types listed is, in general, $\pm 5\%$; however, for some series, the voltage tolerance varies from device type to device type over a range of $\pm (5$ to $8.5)\%$. Consult the complete data sheet to determine the exact test conditions and minimum/maximum limits for the zener voltage. Power Ratings represent the capability of the case size listed as supplied by Motorola. These ratings may be higher than the same device types supplied by other manufacturers. **Vz Test Conditions and Tolerances.** *MMBZ5221BL-42BLT1, MMBZ5243L-70BLT1: Izt=20 mA, Izt @ approximately 125 mW point (pulse) — BL suffix $\pm 5\%$. *MMSZ4678T1 Series: Izt=50 μ A (T.E.) — No suffix $\pm 5\%$. *MMSZ5221B-42B1, MMSZ5234B-63B1: Izt=20 mA (T.E.), Izt @ approximately 125 mW point (T.E.) — A suffix $\pm 10\%$; B suffix $\pm 5\%$. *1SMB5913BT3 Series: Izt @ approximately 375 mW point (T.E.) — BT3 suffix $\pm 5\%$; T3 suffix designates tape and reel of 2500 units. *Plastic — TO-236AB. **Plastic — Style 1. †Plastic Cathode-Notch. Note: T1 suffix indicates 3000 pieces tape and reel. T3 suffix indicates 2500 piece tape and reel.

TVS (Transient Voltage Suppressors)

Transient Voltage Suppressors are designed for applications requiring protection of voltage sensitive electronic devices in danger of destruction by high energy voltage transients. The purpose of this section is to present the families of Motorola Zeners that are specified with the key transient voltage suppressor parameters and limits, e.g., maximum clamping voltage at maximum surge current rating and working peak reverse (stand-off) voltage.

Axial Leaded for Through-Hole Designs

Peak Power Dissipation* (500 Watts @ 1 ms Surge — Figure 1) Case 59-04 — Mini Mosorb

¹ Exponential decay 2 μs wide at 5 times constants, f=12 Hz. ² Peak capacitor discharge current for t=1 ms. t_w is defined as five time constants of an exponentially decaying current pulse.

Thyristor Triggers

Programmable Unijunction Transistor — PUT

Similar to UJTs, except that I_V, I_P and intrinsic standoff voltage are programmable (adjustable) by means of external voltage divider. This stabilizes circuit performance for variations in device parameters. General operating frequency range is from 0.01 Hz to 10 kHz, making them suitable for long-duration timer circuits.

DM74ALS and DM74LS Logic

Mr.'s Type				Description	No. of Leads
74ALS		74LS			
SOIC	PDIP	SOIC	PDIP		
DM74ALS00AM	DM74ALS00AN	DM74LS00M	DM74LS00N	Quad 2-Input NAND Gate	14

Logic (continued)

DM74AS Logic

Mfr.'s Type		Description	No. of Leads
SOIC	PDIP		
DM74AS00M	DM74AS00N	Quad 2-Input NAND Gate	14
DM74AS02M	DM74AS02N	Quad 2-Input NOR Gate	14
DM74AS04M	DM74AS04N	Hex Inverter	14
DM74AS08M	DM74AS08N	Quad 2-Input AND Gate	14
DM74AS1000AM	DM74AS1000AN	Quad 2-Input NAND Driver	14
DM74AS1004AM	DM74AS1004AN	Hex Inverting Driver	14
—	DM74AS1032AN	Quad 2-Input OR Driver	14
DM74AS1034AM	DM74AS1034AN	Hex Non-Inverting Driver	14
DM74AS10M	DM74AS10N	Triple 3-Input NAND Gate	14
DM74AS157M	DM74AS157N	Quad 2/1 Data Sel/Multiplexer	16
—	DM74AS158N	Quad 2/1 Data Sel/Multiplexer	16
—	DM74AS174N	Hex D Flip-Flop	16
—	DM74AS1804N	Hex 2-Input NAND Line Driver	20
—	DM74AS20N	Dual 4-Input AND Gate	14
—	DM74AS21N	Dual 4-Input AND Gate	14
DM74AS240WM	DM74AS240N	Octal Inv Bus/Line Driver	20
DM74AS244WM	DM74AS244N	Octal Bus/Line Driver	20
DM74AS245WM	DM74AS245N	Octal State Octal Transceiver	20
—	DM74AS257N	Quad Tri-State 2/1 Multiplexer	16
DM74AS258M	DM74AS258N	Quad Tri-State 2/1 Multiplexer	16
—	DM74AS27N	Triple 3-Input NOR Gate	14
—	DM74AS280N	9-Bit Parity Generator/Checker	28
DM74AS286M	DM74AS286N	9-Bit Parity Generator	14
—	DM74AS30N	8-Input NAND Gate	14
DM74AS32M	DM74AS32N	Quad 2-Input OR Gate	14
DM74AS373WM	DM74AS373N	Tri-State Octal Latch	20
DM74AS374WM	DM74AS374N	Tri-State Octal D Flip-Flop	20
DM74AS573WM	DM74AS573N	Octal D-Type Latch	20
—	DM74AS574N	Octal D-Type Flip-Flop	20
—	DM74AS640N	Tri-State Octal Transceiver	20
—	DM74AS645N	Tri-State Octal Transceiver	20
DM74AS646WM	DM74AS646NT	Octal Bus Transceiver	24
—	DM74AS648NT	Octal Bus Transceiver	24
DM74AS651WM	DM74AS651NT	Octal Bus Transceiver	24
—	DM74AS74N	Dual D-Type Flip-Flop	14
DM74AS760WM	DM74AS760N	Octal Buffer/Line Driver	20
DM74AS804BWM	DM74AS804BN	Hex 2-Input NAND Line Driver	20
—	DM74AS874NT	Octal D-Type Flip-Flop	24

MM74C Logic

—	MM74C00N	Quad Two-Input NAND Gate	14
—	MM74C02N	Quad Two-Input NOR Gate	14
—	MM74C08N	Quad 2-Input AND Gate	14
—	MM74C10N	Triple 3-Input NAND Gate	14
—	MM74C154N	4 Line To 16 Line Decoder	24
—	MM74C157N	Quad 2-Input Multiplexer	16
—	MM74C164N	8-Bit Serial In/Parallel Out Shift Register	14
—	MM74C221N	Dual Monostable Multivibrator	16
—	MM74C240N	Tri-State Octal Buffers	20
—	MM74C244N	Tri-State Octal Buffers	20
—	MM74C30N	8-Input AND Gate	14
—	MM74C32N	Quad 2-Input OR Gate	14
—	MM74C373N	Octal Flow-Through Latch 3-State	20
—	MM74C374N	Octal D Flip-Flop 3-State	20
—	MM74C42N	BCD To Decimal Decoder	16
MM74C74M	MM74C74N	Dual D Flip-Flop	14
—	MM74C85N	4-Bit Comparator	16
—	MM74C902N	Hex Inverting Buffer	14
—	MM74C905N	12-Bit CMOS Successive Approximation Register	24
MM74C906M	MM74C906N	Open Drain Hex Buffer-Active Pull	14
—	MM74C911N	Display Controller	28
—	MM74C912N	Display Controller	28
—	MM74C914N	Hex Schmitt Trigger Inverter	14
—	MM74C922N	16 Key Keyboard Encoder	18
—	MM74C923N	20 Key Keyboard Encoder	20
—	MM74C925N	4-Digit Counter w/Multiplexer D Segment Driver	16
—	MM74C926N	4-Digit Counter w/Multiplexer D Segment Driver	18

74F Logic

74F00PC	74F00SC	Quad 2-Input NAND	14
74F02PC	—	Quad 2-Input NOR	14
74F04PC	74F04SC	Hex Inverter	14
74F08PC	74F08SC	Quad 2-Input AND	14
—	74F1056SC	8-Bit Schottky Barrier Diode Array	16
—	74F1071SC	Under/Over Clamp ESD-18-Bit	20
74F109PC	—	Dual JK Flip-Flop	16
74F10PC	—	Triple 3-Input NAND	14
74F112PC	—	Dual JK Flip-Flop	16
74F113PC	—	Dual JK Flip-Flop	16
74F11PC	74F11SC	Triple 3-Input AND	14
74F125PC	74F125SC	Quad Buffer	14
74F138PC	74F138SC	1 of 8 Decoder/Demux	16
74F139PC	74F139SC	Dual 1/4 Decoder/Demux	16
74F148PC	—	8-Bit Priority Encoder	16
74F153PC	—	Dual 4-Input Mux	16
74F157APC	—	Quad 2-Input Mux	16
74F158APC	—	Quad 2-Input Mux	16
74F161APC	—	4-Bit Binary Counter, Asynchronous	16
74F163APC	74F163ASC	4-Bit Binary Counter	16
74F169PC	74F169SC	Up/Down Binary Counter	16
74F174PC	—	Hex D Flip-Flop	16
74F175PC	74F175SC	Quad D Flip-Flop with Clear	16
—	74F181SPC	ALU	24
74F189PC	74F189SC	64-Bit RAM, 3-State	16
74F191PC	74F191SC	Up/Down Binary Counter	16
74F193PC	—	Up/Down Binary Counter	16
74F20PC	—	Dual 4-Input NAND	14
74F219PC	—	64-Bit RAM, 3-State	16
74F2244PC	74F2244SC	Octal Buffer with 25 Ohm Series Resistors	2
74F240PC	74F240SC	Octal Inverting Bus Driver	20
74F241PC	—	Octal Bus/Line Driver	20

74F273PC	—	9-Bit Parity Generator	20
74F280PC	—	4-Bit Binary Full Adder	14
74F283PC	—	Shift/Storage Register	20
74F299PC	74F299SC	Octal 2-Input OR Gate	14
74F32PC	74F32SC	Hex Buffer/Driver	16
74F365PC	—	Octal D Latch	20
74F373PC	74F373SC	Octal D Flip-Flop	20
74F374PC	74F374SC	ALU	20
74F382PC	—	Quad 2-Port Register	16
74F399PC	74F399SC	CRC Generator/Checker (9401 Type)	14
74F401PC	—	Serial Data Polynomial Generator/Checker	16
74F402PC	—	Register Stack (9403 Type)	18
74F410PC	—	64 x 4 FIFO with Parallel In/Out	16
74F413PC	—	64 x 4 FIFO with Serial and Parallel In/Out	24
74F433SPC	—	8-Bit Identity Comparator	20
74F521PC	74F521SC	8-Bit Registered Comparator	20
74F524PC	74F524SC	Programmable Counter	28
74F525PC	74F525SC	Inverting Octal D Register	20
74F534PC	—	1 of 8 Decoder, 3-State	20
74F538PC	—	Octal Buffer/Line Driver	20
74F541PC	74F541SC	Octal Bidirectional Latch	24
74F543PC	74F543SC	Octal Bidirectional Latch	24
74F543SPC	74F544SC	Octal Bidirectional Latch	24
74F545PC	—	Octal Bus Transceiver	20
74F548PC	—	3 to 8 Decoder/Demux	20
74F552QC*	—	Octal Registered Transceiver with Parity	28
74F569PC	74F569SC	4-Bit Binary Counter, 3-State	20
74F573PC	74F573SC	Octal D-Type Latch	20
74F574PC	74F574SC	Octal D Flip-Flop	20
74F579PC	—	8-Bit Bidirectional Binary Counter	16
74F583PC	—	4-Bit BCD Adder	16
—	74F620PC	Invert Octal Transceiver	20
—	74F623PC	Octal Invert Transceiver	20
74F632VC*	—	32-Bit Error Detection/Correction Circuit	52
74F646BSC	74F640PC	Invert Octal Transceiver	20
74F646SC	74F646BSPC	Octal Bus Transceiver	24
—	74F646SPC	Octal Bus Transceiver	24
—	74F64PC	AND/OR-Invert Gate	14
74F652SC	74F652SPC	Octal Bus Transceiver /Register	24
74F657SC	74F657SPC	Octal Transceiver w/Parity	24
74F673ASC	74F673ASPC	16-Bit Shift Register	24
—	74F675ASPC	16-Bit Serial In/Parallel Out Shift Register	24
—	74F675SPC	16-Bit Serial In/Parallel Out Shift Register	24
74F74SC	74F74PC	Dual D-Type Flip	14
74F779SC	74F779PC	8-Bit Bidirectional Binary Counter	16
74F821SC	74F794PC	Read Back Register	20
—	74F821SC	10-Bit D Flip-Flop	20
74F823SC	74F823SPC	9-Bit D Flip-Flop	24
74F825SC	74F825SPC	8-Bit Dual Flip-Flop	24
74F827SC	—	10-Bit Buffer/Line Driver	24
—	74F841SPC	10-Bit Transparent Latch	24
74F86SC	74F86PC	Quad Excl OR Gate	14
74F899QC*	—	Transceiver with Parity Generator/Checker	28

*PLCC Package

CD4000 CMOS Logic

CD4001BCM	CD4001BCN	Buffered Quad 2-Input NOR Gate	14
—	CD4001CN	Quad 2-Input NOR Gate	14
CD40106BCM	CD40106BCN	Hex Schmitt Trigger	14
CD4011BCM	—	Buffered Quad 2-Input NAND Gate	14
—	CD4013BCN	Dual D Flip-Flop	16
—	CD4014BCN	8-Bit Static Shift Register	16
—	CD4015BCN	Dual 4-Bit Static Register	16
CD40168BCM	CD40168CN	Quad Bilateral Switch	14
—	CD40174BCN	Hex D Flip-Flop	16
—	CD40175BCN	Quad D Flip-Flop	16
CD40178BCM	CD40178CN	Decade Counter/Divider	16
—	CD40193BCN	Binary Up/Down Counter	16
CD4020BCM	CD4020BCN	14-Stage Ripple-Carry Binary Counter	16
CD4021BCM	CD4021BCN	8-Bit Static Shift Register	16
—	CD4022BCN	Divide By 8 Counter/Divider	16
—	CD4023BCN	Buffered Triple 3 Input NAND Gate	14
CD4024BCM	CD4024BCN	7-Bit Binary Counter	14
—	CD4027BCN	Dual J-K Flip/Flop	16
—	CD4029BCN	Presetable Up/Down Counter	16
CD4040BCM	CD4040BCN	12-Bit Binary Ripple Counter	16
—	CD4044BCN	Quad Tri-State NAND R/S Latch	16
CD4046BCM	CD4046BCN	Phase Locked Loop	16
CD4047BCM	CD4047BCN	Monostable Multivibrator	14
CD4049UBCM	CD4049UBCN	Hex Inverting Buffer	16
—	CD4050BCN	Hex Buffer	16
—	CD4051BCN	Single 8-Channel Multiplexer	16
CD4052BCM	CD4052BCN	Differential 4-Channel Multiplexer	16
CD4053BCM	CD4053BCN	Triple 2-Channel Multiplexer	16
—	CD4060BCN	14-Bit Counter Osc	16
CD4066BCM	CD4066BCN	Quad Bilateral Switch	14
CD4070BCM	—	Quad Exclusive OR Gate	14
—	CD4071BCN	Buffered Quad 2-Input OR Gate	14
—	CD4081BCN	Buffered Quad 2-Input AND Gate	14
CD4093BCM	CD4093BCN	Quad 2-Input NAND Schmitt Trigger	16
—	CD4099BCN	8-Bit Addressable Latch	14
—	CD4503BCN	Tri-State Hex Buffer	16
—	CD4514BCN	4-Bit Latch 4 to 16 Line Decoder	24
—	CD4515BCN	4-Bit Latch 4 to 16 Line Decoder	24
—	CD4528BCN	Dual Monostable Multivibrator	16
—	CD4538BCN	Dual Monostable Multivibrator	16
—	CD4541BCN	Programmable Timer	14
—	CD4724BCN	8-Bit Addressable Latch	16

EEPROMs

IIC™ Standard EEPROMs

NTE Selection Guide

► Over 253,000 Devices Replaced with NTE Numbers

The NTE catalog has become the industry's guide when you need semi-conductors for maintenance and repair work. Now available is the 6th edition containing over 250,000 cross references to American, European and Japanese, industrial and commercial devices. The catalog includes short form specifications and cross reference in a new easier to read format for the over 3500 devices in NTE's line. Each NTE transistor, triac, silicon controlled rectifier (SCR), integrated circuit, thyristor or microprocessor can be used to replace a broad variety of devices used in electronic equipment. Electrical characteristics are equal to or better than originally specified components.

The easy to use cross reference section enables you to locate the exact replacement needed for over 253,000 solid state devices.

Quick Cross

► NTE's Computer Based Cross Reference Disk For Semiconductors and Relays

NTE Electronics, Inc. has taken its entire Semiconductor and Relay Cross References and put them on IBM PC compatible diskettes. These disks, once loaded into your PC, will only take up a little more than 2 Megabytes of disk space. You will have instant access to over 250,000 Semiconductor Cross References and 22,000 Relay Cross References. Minimum system requirements are an IBM PC compatible computer with 640K RAM, 5 MB hard disk.

Stock No.	Mfr.'s Type	Diskette Type	EACH
935-0003	QC-001	5 1/4" (1.2M)	6.75
935-0008	QC-002	3 1/2" (7.20K)	9.16
935-0006	QC-003	5 1/4" (1.44M)	7.50
935-0009	QC-005	3 1/2" (1.44M) for Windows	10.00

Thermo-Pads

NTE's THERMO-PADS do away with the old fashioned and messy mica wafer and conductive grease method of mounting power semiconductor. These thermally conductive insulators offer low heat transfer resistance while still providing high electrical isolation between the parts of the assembly. The elastomeric material combines the electrical isolation of rigid insulators with the ability to conform to rough surfaces and reduce contact resistance in much the same manner as thermal greases. Proper selection and use of these thermo-pads results in a securely-mounted power semiconductor and minimum resistance to the heat transfer between it and the heat sink.

Typical Properties

Color: .009 Inch Thickness-Gray; Test Method-Visual. **Breaking Strength, Lbs./Inch:** .009 Inch Thickness-100; Test Method-ASTM D 1458. **Elongation, percent:** .009 Inch Thickness-4; Test Method-ASTM D 412. **Volume Resistance Ohm Metre Minimum Normal:** .009 Inch Thickness- 1.0×10^{10} ; Test Method-ASTM D 257. **Volume Resistance Ohm Metre Minimum Moist:** .009 Inch Thickness- 1.5×10^{10} ; Test Method-ASTM D 257. **Breakdown Voltage, Minimum Normal:** .009 Inch Thickness-5000; Test Method - ASTM D 149. **Moist:** .009 Inch Thickness-2500; Test Method-ASTM D 149. **Dielectric Constant 1000 Cps (Hz):** .009 Inch Thickness-5.5; Test Method-ASTM D 150. **Continuous Use Temp. °C:** .009 Inch Thickness -60 to +160. **Thermal Conductance W/m-k:** .009 Inch Thickness-0.7. **Thermal Vacuum Weight Loss Percent (TML) Maximum as Manufactured:** .009 Inch Thickness-40; Test Method-NASA. **Thermal Vacuum Weight Loss Percent (TML) Maximum Post Cure 24 Hrs @ 400°F:** .009 Inch Thickness-25; Test method - SP-R-0022A. **Volatile Condensable Material, Percent, Maximum (CVCM) as Manufactured:** .009 Inch Thickness-11; Test Method-NASA. **Volatile Condensable Material, Percent, Maximum (CVCM) Post Cure 24 Hrs @ 400°F:** .009 Inch Thickness-07; Test Method-SP-R-0022A. **Hardness, Shore A:** .009 Inch Thickness-85; Test Method-ASTM D 2240. **Specific Gravity:** .009 Inch Thickness-2.0-2.1. **Thickness (Expressed in Inches):** .009 Inch Thickness-.009 (+.002, -.001). **Thermal Resistance (TO-3 transistor) °C/watt:** .009 Inch Thickness-50.

74ABT Logic Devices Ordering Information

74ABT Logic Devices

Mfr.'s Type		Description	No. of Leads
SOIC	PDIP		
74ABT125D	—	Quad Buffer, 3-State	14
74ABT244D	74ABT244N	Octal Buffer/Line Driver, 3-State	20
74ABT245D	74ABT245N	Octal Transceiver, 3-State	20
74ABT541D	74ABT541N	Octal Buffer/Line Driver, 3-State	20
—	74ABT573N	D-Type Transparent Latch	20
74ABT574D	74ABT574N	Octal D Flip-Flop, 3-State	20
74ABT657D	—	Octal Transceiver with Parity Generator/Checker	24
74ABT821D	—	10-Bit D-Type Flip-Flop, 3-State	24
74ABT841D	—	10-Bit Bus Interface Latch, 3-State	24

74F Fast TTL Logic Devices Ordering Information

74F Fast TTL Logic Devices

74F04D	74F04N	Hex Inverter	14
74F06D	—	Hex Inverter Buffer/Driver, Open-Collector	14
74F07D	74F07N	Hex Inverter Buffer/Driver, Open-Collector	14
—	74F08N	Quad 2-Input AND Gate	14
74F1244D	74F1244N	Octal Bus/Line Driver	20
74F125D	—	Quad 3-State Bus Buffer	14
74F14D	—	Hex Schmitt Trigger	14
—	74F153N	Dual 4-Input Multiplexer	16
—	74F164N	8-Bit Serial In/Parallel Out Shift Register	14
74F166D	74F166N	8-Bit Shift Register	16
—	74F189AN	64-Bit Random Access Memory, Inverter, 3-State	16
74F191D	74F191N	Binary Up/Down Counter	16
—	74F194N	4-Bit Shift Register	16
74F244D	74F244N	Octal Buffer, 3-State	20
74F245D	74F245N	Octal Bus Transceiver	20
—	74F259N	8-Bit Addressable Latch	16
74F269D	74F269N	8-Bit Bidirectional Binary Counter	24
74F273D	74F273N	Octal D-Type Flip-Flop	20
74F283D	—	4-Bit Adder	16
74F2952D	74F2952N	Octal Register Transceiver, Non-Inverting, 3-State	24
74F299D	—	Octal Shift/Storage Register, 3-State	20
74F3037D	74F3037N	Quad 2-Input NAND Transceiver/Line Driver	16
74F3038D	—	30-Ohm Transceiver/Line Driver	16
74F32D	74F32N	Quad 2-Input OR Gate	14
74F367D	—	Hex Buffer, 4-Bit & 2-Bit, 3-State	16
74F373D	74F373N	Octal 3-State Latch	20
74F374D	74F374N	Octal D Flip-Flop, 3-State	20
74F377D	74F377N	Octal D Flip-Flop with Enable	20
74F38D	74F38N	Quad 2-Input NAND Buffer, Open-Collector	14
—	74F393N	Dual Binary Ripple Counter	14
—	74F521N	8-Bit Ident Comparator	20
74F540D	74F540N	Octal 3-State Driver/Buffer	20
74F541D	74F541N	Octal 3-State Driver/Buffer	20
74F543D	74F543N	Octal Transceiver, Bidirectional Latch	24
—	74F544N	Octal Transceiver, Bidirectional Latch	24
—	74F545N	Octal Bus Transceiver	20
74F573D	74F573N	Octal D-Type Latch	20
74F574D	74F574N	Octal D Flip-Flop	20
74F579D	74F579N	8-Bit Counter Common I/O, 3-State	20
74F595D	74F595N	8-Bit Shift Register with Latch	16
74F623D	74F623N	Octal Bus Transceiver, 3-State	20
74F646D	74F646N	Octal Bus Transceiver and Register, Non-Inverting, 3-State	24
74F652AD	74F652AN	Octal Buffer with Parity Generator/Checker	24
74F657D	74F657N	Octal Buffer Register Serial In/Parallel Out	24
—	74F676N	16-Bit Shift Register Serial In/Parallel Out	20
—	74F711-1N	Quint 2-Input Mux, 30-Ohm Term.	14
74F74D	74F74N	Dual D-Type Edge Triggered Flip-Flop	20
74F760D	—	Octal Bus/Line Driver, Inverting	16
74F779D	74F779N	8-Bit Counter	16
74F786D	74F786N	4-Input Asynchronous Bus Arbiter	24
74F821D	74F821N	10-Bit Register, Non-Inverting, 3-State	24
74F823D	74F823N	9-Bit Register, Non-Inverting, 3-State	24
74F825D	74F825N	8-Bit Register, Non-Inverting, 3-State	24
74F827D	74F827N	10-Bit Buffer/Driver, Non-Inverting, 3-State	24
74F841D	74F841N	10-Bit Latch, Non-Inverting, 3-State	24
74F85D	74F85N	4-Bit Magnitude Comparator	16

74HCT High Speed TTL Compatible CMOS and 74HC CMOS Logic Devices Ordering Information

SIOV™ Metal Oxide Varistors

The SIOV will fit applications requiring protection at operating voltage levels as low as 11 volts and as high as 1100 volts with energies rated up to 15000 Joules, depending on the device selected.

Typical Protection Applications

- Protection of Semiconductors (Diodes, Transistors, Thyristors, ICs, Etc.)
- Appliances Connected to 110 V or 220 VAC
- Industrial Equipment Vulnerable to Transients on the AC Power Line (Computers, Traffic Controls, Motor Controllers, Etc.)
- Protection of Equipment Connected to Telephone or Signal Lines, Such as Security Systems, Railroad Equipment, Fire Alarm Systems, Etc.
- Arc Suppression Across Relay and Switch Contacts
- Protection of Instrument Input Terminals from Accidentally Connected High Voltages
- Power Control Equipment for Power Distribution Lines
- GFI (Ground Fault Interrupters)

Features

- Nanosec. Switching Response Time, <15 nsec., with Minimal Lead Length
- High Transient Current Capability (Up to 100,000 Amps)
- No Extinguishing or Follow-On Current Limitations
- Small Size for Compact Designs
- Wide Operating Temperature Range: -40 to +85°C
- Compatible with Automatic Insertion; Tape and Reel Configuration Available on S05, S07, S10 and S14 Series
- Excellent Clamping Characteristics
- Low Standby Power Consumption

Benefits

- Eliminates Dangerous Voltage Transients
- Lowers Overall System Costs by Reducing Downtime and Maintenance Costs
- Improves Component and System Reliability
- Reduces Lightning Effects
- Reduces EMP/RFI Interference
- Promotes Personal Safety

SVP — Surge Voltage Protectors

- High Surge Current Capacity at 20KA Maximum
- High Insulation Resistance at ≥ 1010 Ohm
- Low Capacitance — Down to 1pF
- High Breakdown Speed
- Low Cost
- Small Size
- Designed to Meet Industry Specifications
- Proven Performance: Millions in Service

The SVP is bipolar and has a symmetrical V-1 characteristic as shown below.

Voltage-current characteristic and voltage variation across the protector.

Vs striking voltage
Vgt glow voltage
Va arc voltage
Ve extinguishing voltage
G glow range
A arc range

Surge Voltage Protectors. SVPs are gas discharge tubes, hermetically sealed, composed of 2 or 3 electrodes properly spaced by insulators and filled with a rare gas. SVPs mainly serve to provide a conductive path for unwanted, excessive transients, which prevents the transient energy and associated voltages from damaging sensitive equipment and components, and from harming personnel. Designed for rapid switching at a specific voltage level (breakdown voltage) from a non-conductive state to a conductive state (arc mode) when subjected to an excessive voltage transient. The SVP momentarily carries very high currents during conduction. After discharge of the transient, the circuit allows the SVP to restore itself. In the restored conduction, the high impedance of the SVP causes very little loss. Normal AC or DC operating circuit voltages may cause the SVP to remain in a conducting mode after the transient has passed, unless the following precautions are taken: for AC Applications — the AC follow current must not be exceeded. For DC Applications — if the normal operating voltage across the tube is greater than the glow voltage, and the current into the SVP while in arc mode, (10-20 V across the SVP) does not exceed 0.2A, a 0.68 μ F capacitor placed in parallel with the tube will cause it to extinguish. If the DC is greater than the given values, current must be momentarily interrupted. **Electrical Characteristics Common To All Types:** Transition Time — 0.1 μ s typ. Rms: $\geq 10,000$ megohm. Capacitance: 1 pF typ. at 1 MHz. **Operating and Storage Temperature Range:** -55°C to +130°C.

Fig. 1

Fig. 2

Fig. 3

Button Type SVPs. Compact medium-duty 2-electrode tubes provide protection for most circuit applications. Features high breakdown speed by means of a patented process. Economical; easily mounted onto PC boards.

Special Button Type SVPs. Special L71 types for AC applications undergo AC burn-in to guarantee good extinguishing characteristics at high follow currents — excellent for CATV amplifiers and other applications where AC Voltage is present.

Fig. 4

Fig. 5

Three-Electrode Type SVPs. Developed and refined through experience gained from actual use in telecommunications equipment. These units are designed to meet or exceed parameters specified in REA Specification PE-80.

*With Standard Cable (50-pin Centronics). **With High Density Cable (DB-50). ***With Both Cables.

Memory Upgrades by Simple Technology

Simple Technology supplies memory upgrades for the world's major computer brands including:

ACER AST CHICONY DIGITAL HYUNDAI LEXMARK OKI SHARP TOSHIBA
ALR AT&T COMPAQ EPSON IBM MAGNAVOX PACKARD BELL SILICONE GRAPHICS TWINHEAD
ALTIMA Brother COMPUDYNE EVEREX INTEL NCR PANASONIC SUN ZENITH
APPLE CANON DELL HEWLETT PACKARD KYOCERA NEC QMS TEXAS INSTRUMENTS ZEOS

Due to the vastness of Simple Technology's product line, not all products can be listed here. Contact Allied for the latest Simple Technology Product Catalog. For Technical Assistance Contact Simple Technology at: 1-800-367-7330.

Logic

SN7400: TTL Logic

Mr.'s Type		Description	No. of Leads
SOIC	PDIP		
SN7400D	SN7400N	Quad 2-Input NAND Gate	14
—	SN7402N	Quad 2-Input Positive-NOR Gate	14
—	SN7404N	Hex Inverter	14
SN7405D	SN7405N	Hex Inverter with Open Collector Outputs	14
SN7406D	SN7406N	Hex Inverter with Open Collector Outputs	14
SN7407D	SN7407N	Hex Inverter with Open Collector Outputs	14
—	SN7410N	Triple 3-Input Positive-NAND Gate	14
—	SN74121N	One Shot Multivibrator	14
—	SN74123N	Dual Monostable Multivibrator	16
—	SN74128N	50 Ohm Line Driver	14
—	SN74132N	Quad 2-Input Positive-NAND Schmitt Trigger	14
—	SN74145N	BCD-to-Decimal Decoder/Driver	16
SN7414D	SN7414N	Hex Schmitt-Trigger Inverter	14
—	SN74150N	Data Selector/Multiplexer	24
—	SN74154N	4-to-16 Line Decoder/Demultiplexer	24
—	SN74156N	Dual 1-4 Decoder with Open Collector Outputs	16
—	SN74157N	Quad 1-of-2 Data Selector/Multiplexer	16
—	SN74159N	4-16 Line Decoder/Demultiplexer	24
—	SN74164N	8-Bit Parallel-Out Serial Shift Register	14
SN7416D	SN7416N	Hex Inverter/Driver	14
—	SN74175N	Quad D-Type Flip-Flop	16
SN7417D	SN7417N	Hex Buffer/Driver with Open Collector Outputs	14
—	SN74279N	Quad Set/Reset Latch	16
—	SN7430N	8-Input Positive-NAND Gate	14
—	SN7432N	Quad 2-Input Positive-OR Gate	14
—	SN7437N	Quad 2-Input Positive-NAND Buffer	14
SN7438D	SN7438N	Quad 2-Input NAND Buffer with Open Collector Outputs	14
—	SN7445N	BCD-to-Decimal Decoder/Driver	14
—	SN7447AN	BCD-to-7 Segment Decoder/Driver	16
—	SN7474N	Dual D-Type Flip-Flop	14
—	SN7486N	Quad 2-Input Exclusive-OR Gate	14
—	SN7490AN	Decade Divide-by-12 Counter	14
—	SN7525N	Dual 4-Input NOR Gate	14

74ACT11: Advanced CMOS TTL Logic

74ACT11008D	74ACT11008N	Quad 2-Input Positive-AND Gate	16
74ACT11240DW	74ACT11240NT	Octal Buffer/Line Driver with 3-State Outputs	24
74ACT11244DW	74ACT11244NT	Octal Buffer/Line Driver with 3-State Outputs	24
74ACT11245DW	74ACT11245NT	Octal Bus Transceiver with 3-State Outputs	24
74ACT11337D	74ACT11337NT	Octal D-Type Transparent Latch with 3-State Outputs	24
—	74ACT11374NT	Octal D-Type Flip-Flop with 3-State Outputs	24
74ACT11544DW	74ACT11544NT	Octal Registered Transceiver with 3-State Outputs	28
74ACT11593DW	74ACT11593NT	8-Bit Binary Counter with 3-State I/O Register	24
74ACT11657DW	—	Octal Xceiver with Parity Generator/Counter	28
74ACT11898DW	—	10-Bit Parallel-Out Shift Register	20
74ACT16241DL	—	16-Bit Buffer/Line Driver with 3-State Outputs	48
74ACT16244DL	—	16-Bit Buffer/Line Driver with 3-State Outputs	48
74ACT16245DL	—	16-Bit Bus Transceiver with 3-State Outputs	48
74ACT16373DL	—	16-Bit D-Type Transparent Latch with 3-State Outputs	48
74ACT16374DL	—	16-Bit D-Type Flip-Flop with 3-State Outputs	48
74ACT16470DL	—	16-Bit Registered Transceiver with 3-State Outputs	56
74ACT16474DL	—	18-Bit Flip-Flop	56
74ACT16540DL	—	16-Bit Buffer/Line Driver with 3-State Outputs	48
74ACT16541DL	—	16-Bit Buffer/Line Driver with 3-State Outputs	48
74ACT16543DL	—	16-Bit Registered Transceiver with 3-State Outputs	56
74ACT16620DL	—	16-Bit Transceiver with 3-State Outputs	48
74ACT16646DL	—	16-Bit Bus Xceiver AND Register with 3-State Outputs	56
74ACT16648DL	—	16-Bit Bus Xceiver AND Register with 3-State Outputs	56
74ACT16652DL	—	16-Bit Bus Xceiver AND Register with 3-State Outputs	56
74ACT16861DL	—	20-Bit Transceiver with 3-State Outputs	56
74ACT16864DL	—	18-Bit Transceiver with 3-State Outputs	56

SN74ALS: Advanced Low Power Schottky TTL Logic

SN74ALS00AD	SN74ALS00AN	Quad 2-Input Positive-NAND Gate	14
SN74ALS02AD	—	Quad 2-Input Positive-NOR Gate	14
SN74ALS04BD	SN74ALS04BN	Hex Inverter	14
SN74ALS05AD	SN74ALS05AN	Hex Inverter with Open-Collector Outputs	14
SN74ALS08D	SN74ALS08N	Quad 2-Input Positive-AND Gate	14
SN74ALS1005D	SN74ALS1005N	Hex Inverting Buffer with Open-Collector Outputs	14
—	SN74ALS1034N	Hex Driver	14
SN74ALS1035D	SN74ALS1035N	Hex Noninverting Buffer with Open-Collector Outputs	14
SN74ALS109AD	SN74ALS109AN	Dual J-K-Bar Flip-Flop	16
SN74ALS10AD	SN74ALS10AN	Triple 3-Input Positive-NAND Gate	14
—	SN74ALS11AN	Triple 3-Input Positive-AND Gate	14
SN74ALS139D	SN74ALS139N	Dual 2-To-4 Decoder/Demultiplexer	16
SN74ALS151D	SN74ALS151N	8-To-1 Data Selector/Multiplexer	16
SN74ALS153D	SN74ALS153N	Dual 4-To-1 Data Selector/Multiplex	16
SN74ALS157AD	SN74ALS157AN	Quad 1-Of-2 Data Selector/Multiplex	16
SN74ALS161BD	SN74ALS161BN	4-Bit Synchronous Binary Counter	16
SN74ALS163BD	SN74ALS163BN	4-Bit Synchronous Binary Counter	16
SN74ALS1645ADW	SN74ALS1645AN	Octal Bus Transceiver with 3-State Outputs	20
—	SN74ALS165N	8-Bit Parallel-Load Shift Register	16
SN74ALS17AD	SN74ALS174N	Hex D-Type Flip-Flop	16
SN74ALS175D	SN74ALS175N	Quad D-Type Flip-Flop	20
SN74ALS240ADW	SN74ALS240AN	Octal Buffer/Line Driver with 3-State Outputs	16
SN74ALS241BDW	SN74ALS241BN	Octal Buffer/Line Driver with 3-State Outputs	20
SN74ALS245A-1DW	SN74ALS245A-1N	Octal Bus Transceiver with 3-State Outputs	20
SN74ALS245ADW	SN74ALS245AN	Octal Bus Transceiver with 3-State Outputs	20
SN74ALS251D	SN74ALS251N	1-Of-8 Data Selector/Mux with 3-State Outputs	16
SN74ALS253D	SN74ALS253N	Dual 4-To-1 Data Selector/Mux with 3-State Outputs	16
SN74ALS259D	SN74ALS259N	8-Bit Addressable Latch	16
SN74ALS273DW	SN74ALS273N	Octal D-Type Flip-Flop	20
SN74ALS29821DW	SN74ALS29821NT	10-Bit D-Type Flip-Flop with 3-State Outputs	24
SN74ALS29827DW	SN74ALS29827NT	10-Bit Buffer/Driver with 3-State Outputs	24

SN74ALS: Advanced Low Power Schottky TTL Logic (continued)

Mr.'s Type		Description	No. of Leads
SOIC	PDIP		
SN74ALS29863DW	SN74ALS29863NT	9-Bit Transceiver with 3-State Outputs	24
SN74ALS2990D	SN74ALS2990N	8-Bit Universal Shift/Storage Register	20
SN74ALS32D	SN74ALS32N	Quad 2-Input Positive-OR Gate	14
SN74ALS373ADW	SN74ALS373AN	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74ALS374ADW	SN74ALS374AN	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74ALS520DW	SN74ALS520N	8-Bit Identity Comparator	20
SN74ALS521DW	SN74ALS521N	8-Bit Identity Comparator	20
SN74ALS540DW	SN74ALS540N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74ALS541DW	SN74ALS541N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74ALS569ADW	SN74ALS569AN	4-Bit Synchronous Up/Down Binary Counter	20
SN74ALS573CDW	SN74ALS573CN	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74ALS574BDW	SN74ALS574BN	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74ALS576BDW	SN74ALS576BN	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74ALS623ADW	SN74ALS623AN	Octal Transceiver with 3-State Outputs	20
SN74ALS640B-1DW	SN74ALS640B-1N	Octal Bus Transceiver with 3-State Outputs	20
SN74ALS640BDW	SN74ALS640BN	Octal Bus Transceiver with 3-State Outputs	20
SN74ALS641A-1DW	SN74ALS641A-1N	Octal Bus Transceiver with Open-Collector Outputs	20
SN74ALS645A-1DW	SN74ALS645A-1N	Octal Bus Transceiver with 3-State Outputs	20
SN74ALS645ADW	SN74ALS645AN	Octal Bus Transceiver with 3-State Outputs	20
SN74ALS646DW	SN74ALS646NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74ALS648DW	SN74ALS648NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74ALS651DW	SN74ALS651NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74ALS652-1DW	SN74ALS652-1NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74ALS652DW	SN74ALS652NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74ALS666DW	SN74ALS666NT	Octal D-Type Transparent Read-Back	24
SN74ALS688DW	SN74ALS688N	8-Bit Identity Comparator	20
SN74ALS74AD	SN74ALS74AN	Dual D-Type Flip-Flop	14
SN74ALS841DW	SN74ALS841NT	10-Bit D-Type Latch with 3-State Outputs	24
SN74ALS867ADW	SN74ALS867ANT	8-Bit Synchronous Up/Down Binary Counter	24
SN74ALS869DW	SN74ALS869NT	8-Bit Synchronous Up/Down Binary Counter	24
SN74ALS86D	SN74ALS86N	Quad 2-Input Exclusive-OR Gate	14
SN74ALS874BDW	SN74ALS874BNT	Dual 4-Bit D-Type Flip-Flop with 3-State Outputs	24
SN74ALS990DW	SN74ALS990N	8-Bit D-Type Transparent Read-Back	20
SN74ALS992DW	SN74ALS992NT	9-Bit D-Type Read-Back Latch with 3-State Outputs	24
SN74ALS996DW	SN74ALS996NT	8-Bit D-Type Read-Back Latch with 3-State Outputs	24

SN74AS: Advanced Schottky TTL Logic

SN74AS00D	SN74AS00N	Quad 2-Input Positive-NAND Gate	14
SN74AS04D	SN74AS04N	Hex Inverter	14
SN74AS08D	SN74AS08N	Quad 2-Input Positive-AND Gate	14
SN74AS1000AD	SN74AS1000AN	Quad 2-Input Positive-NAND Buffer/Driver	14
SN74AS1004AD	SN74AS1004AN	Hex Inverting Driver	14
SN74AS1032AD	SN74AS1032AN	Quad 2-Input Positive-OR Buffer/Driver	14
SN74AS1034AD	SN74AS1034AN	Hex Driver	14
SN74AS11D	SN74AS11N	Triple 3-Input Positive-AND Gate	14
SN74AS138D	SN74AS138N	3-To-8 Decoder/Demultiplexer	16
SN74AS157D	SN74AS157N	Quad 1-Of-2 Data Selector/Multiplexer	16
SN74AS158D	SN74AS158N	Quad 1-Of-2 Data Selector/Multiplexer	16
SN74AS161D	SN74AS161N	4-Bit Synchronous Binary Counter	16
SN74AS163D	SN74AS163N	4-Bit Synchronous Binary Counter	16
SN74AS174D	SN74AS174N	Hex D-Type Flip-Flop	16
SN74AS175AD	SN74AS175AN	Quad D-Type Flip-Flop	20
—	SN74AS1804N	Hex 2-Input NAND Driver	20
SN74AS240DW	SN74AS240N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74AS244DW	SN74AS244N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74AS245DW	SN74AS245N	Octal Bus Transceiver with 3-State Outputs	20
SN74AS258D	SN74AS258N	Quad 2-To-1 Data Selector/Mux with 3-State Outputs	16
SN74AS277D	SN74AS277N	Triple 3-Input Positive-NOR Gate	14
SN74AS280D	SN74AS280N	9-Bit Parity Generator/Checker	14
SN74AS286D	SN74AS286N	9-Bit Parity Generator/Checker	14
SN74AS32D	SN74AS32N	Quad 2-Input Positive-OR Gate	14
SN74AS373DW	SN74AS373N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74AS374DW	SN74AS374N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74AS573ADW	SN74AS573AN	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74AS574DW	SN74AS574N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74AS640DW	SN74AS640N	Octal Bus Transceiver with 3-State Outputs	20
SN74AS646DW	SN74AS646NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74AS648DW	SN74AS648NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74AS651DW	SN74AS651NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74AS652DW	SN74AS652NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74AS74D	SN74AS74N	Dual D-Type Flip-Flop	14
SN74AS760DW	SN74AS760N	Octal Buffer/Line Driver with Open-Collector Outputs	20
SN74AS804BDW	SN74AS804BN	Hex 2-Input NAND Driver	20
SN74AS805BDW	SN74AS805BN	Hex 2-Input NOR Driver	20
SN74AS808BDW	SN74AS808BN	Hex 2-Input Positive-AND Driver	20
SN74AS821ADW	SN74AS821ANT	10-Bit Bus Interface Flip-Flop with 3-State Outputs	24
SN74AS867DW	SN74AS867NT	8-Bit Synchronous Up/Down Binary Counter	24
SN74AS869DW	SN74AS869NT	8-Bit Synchronous Up/Down Binary Counter	24
SN74AS873ADW	SN74AS873ANT	Dual 4-Bit D-Type Latch with 3-State Outputs	24
SN74AS874DW	SN74AS874NT	Dual 4-Bit D-Type Flip-Flop with 3-State Outputs	24
SN74AS885DW	SN74AS885NT	8-Bit Magnitude Comparator	24

SN74BCT: BiCMOS Bus Interface Logic

SN74BCT2240DW	SN74BCT2240N	Octal Buffer with 3-State Outputs (Series Resistors)	20
SN74BCT2244DW	SN74BCT2244N	Octal Buffer with 3-State Outputs (Series Resistors)	20
SN74BCT2245DW	SN74BCT2245N	Octal Bus Xver with 3-State Outputs (Series Resistors)	20
SN74BCT2244DW	SN74BCT2244N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74BCT245DW	SN74BCT245N	Octal Bus Transceiver with 3-State Outputs	20
SN74BCT25245DW	SN74BCT25245NT	25-Ohm Octal Bus Transceiver with 3-State Outputs	24
SN74BCT2827CDW	SN74BCT2827CNT	10-Bit Buffer with 3-State Outputs (Series Resistors)	24
SN74BCT2828BDW	SN74BCT2828BNT	10-Bit Buffer with 3-State Outputs (Series Resistors)	24
SN74BCT2953DW	SN74BCT2953NT	Octal Reg Transceiver with Clock Enable	24
SN74BCT29854DW	SN74BCT29854NT	8-To-9 Bit Parity Transceiver/Latch	24
SN74BCT373DW	SN74BCT373N	Octal D-Type Transparent Latch with 3-State Outputs	24
SN74BCT543DW	SN74BCT543NT	Octal Registered Transceiver with 3-State Outputs	24
SN74BCT646DW	SN74BCT646NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74BCT652DW	SN74BCT652NT	Octal Bus Xceiver AND Register with 3-State Outputs	24

SN74F: F-TTL Logic

Mfr.'s Type		Description	No. of Leads
SOIC	PDIP		
SN74F00D	SN74F00N	Quad 2-Input Positive-NAND Gate	14
SN74F02D	SN74F02N	Quad 2-Input Positive-NOR Gate	14
SN74F04D	SN74F04N	Hex Inverter	14
SN74F08D	SN74F08N	Quad 2-Input Positive-AND Gate	14
SN74F1056D		8-Bit Schottky Barrier Diode	16
SN74F11D	SN74F11N	Triple 3-Input Positive-AND Gate	14
SN74F125D	SN74F125N	Quad Bus Buffer Gates with 3-State Outputs	14
SN74F126D	SN74F126N	Quad Bus Buffer Gates with 3-State Outputs	14
SN74F138D	SN74F138N	3-To-8 Decoder/Demultiplexer	16
SN74F157AD	SN74F157AN	Quad 1-Of-2 Data Selector/Multiplexer	16
SN74F161AD	SN74F161AN	4-Bit Synchronous Binary Counter	16
SN74F163AD	SN74F163AN	4-Bit Synchronous Binary Counter	16
SN74F240DW	SN74F240N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74F243D	SN74F243N	Quad Bus Transceiver with 3-State Outputs	14
SN74F244DW	SN74F244N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74F245DW	SN74F245N	Octal Bus Transceiver with 3-State Outputs	20
SN74F257D	SN74F257N	Quad 2-To-1 Data Selector/Mux with 3-State Outputs	16
SN74F260D	SN74F260N	Dual 5-Input Positive-NOR Gate	14
SN74F27D	SN74F27N	Triple 3-Input Positive-NOR Gate	14
SN74F280BD	SN74F280BN	9-Bit Parity Generator/Checker	14
SN74F30D	SN74F30N	8-Input Positive-NAND Gate	14
SN74F32D	SN74F32N	Quad 2-Input Positive-OR Gate	14
SN74F373DW	SN74F373N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74F374DW	SN74F374N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74F38D	SN74F38N	Quad 2-Input P-NAND Buffer with Open Collector Outputs	14
SN74F521DW	SN74F521N	8-Bit Identity Comparator	20
SN74F541DW	SN74F541N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74F543DW	SN74F543N	Octal Registered Transceiver with 3-State Outputs	24
SN74F573DW	SN74F573N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74F574DW	SN74F574N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74F574D	SN74F574N	Dual D-Type Flip-Flop	14

SN74HC: High Speed CMOS Logic

SN74HC00D	SN74HC00N	Quad 2-Input Positive-NAND Gate	14
SN74HC02D	SN74HC02N	Quad 2-Input Positive-NOR Gate	14
SN74HC04D	SN74HC04N	Hex Inverter	14
SN74HC05D	SN74HC05N	Hex Inverter with Open-Collector Outputs	14
SN74HC08D	SN74HC08N	Quad 2-Input Positive-AND Gate	14
SN74HC10D	SN74HC10N	Triple 3-Input Positive-NAND Gate	14
SN74HC125D	SN74HC125N	Quad Bus Buffer Gates with 3-State Outputs	14
SN74HC126D	SN74HC126N	Quad Bus Buffer Gates with 3-State Outputs	14
SN74HC132D	SN74HC132N	Quad 2-Input P-NAND Schmitt-Trigger	14
SN74HC138D	SN74HC138N	3-To-8 Decoder/Demultiplexer	16
SN74HC139D	SN74HC139N	Dual 2-To-4 Decoder/Demultiplexer	16
SN74HC14D	SN74HC14N	Hex Schmitt-Trigger Inverter	14
SN74HC151D	SN74HC151N	8-To-1 Data Selector/Multiplexer	16
SN74HC157D	SN74HC157N	Quad 1-Of-2 Data Selector/Multiplexer	16
SN74HC161D	SN74HC161N	4-Bit Synchronous Binary Counter	16
SN74HC163D	SN74HC163N	4-Bit Synchronous Binary Counter	16
SN74HC164D	SN74HC164N	8-Bit Parallel-Out Serial Shift Register	14
SN74HC165D	SN74HC165N	8-Bit Parallel-Load Shift Register	16
SN74HC166D	SN74HC166N	8-Bit Parallel-Load Shift Register	16
SN74HC174D	SN74HC174N	Hex D-Type Flip-Flop	16
SN74HC175D	SN74HC175N	Quad D-Type Flip-Flop	16
SN74HC240DW	SN74HC240N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74HC244DW	SN74HC244N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74HC245DW	SN74HC245N	Octal Bus Transceiver with 3-State Outputs	20
SN74HC251D	SN74HC251N	1-Of-8 Data Selector/Mux with 3-State Outputs	16
SN74HC257D	SN74HC257N	Quad 2-To-1 Data Selector/Mux with 3-State Outputs	16
SN74HC259D	SN74HC259N	8-Bit Addressable Latch	16
SN74HC273DW	SN74HC273N	Octal D-Type Flip-Flop	20
SN74HC32D	SN74HC32N	Quad 2-Input Positive-OR Gate	14
SN74HC367D	SN74HC367N	Hex Driver with 3-State Outputs	16
SN74HC373DW	SN74HC373N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74HC374DW	SN74HC374N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74HC377DW	SN74HC377N	Octal D-Type Flip-Flop with Clock Enable	20
SN74HC393D	SN74HC393N	Dual 4-Bit Binary Counter	14
SN74HC4040D	SN74HC4040N	12-Bit Asynchronous Binary Counter	16
SN74HC540DW	SN74HC540N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74HC541DW	SN74HC541N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74HC573ADW	SN74HC573AN	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74HC574DW	SN74HC574N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74HC590ADW	SN74HC590AN	8-Bit Binary Counter with 3-State Outputs	16
SN74HC594DW	SN74HC594N	8-Bit Shift Register with Output Register	16
SN74HC595DW	SN74HC595N	8-Bit Shift Register with 3-State Outputs	16
SN74HC7001D	SN74HC7001N	Quad P-AND Gate with Schmitt-Trigger	14
SN74HC74D	SN74HC74N	Dual D-Type Flip-Flop	14
SN74HC86D	SN74HC86N	Quad 2-Input Exclusive-OR Gate	14

SN74HCT: High Speed CMOS-TTL Logic

SN74HCT00D	SN74HCT00N	Quad 2-Input Positive-NAND Gate	14
SN74HCT04D	SN74HCT04N	Hex Inverter	14
SN74HCT08D	SN74HCT08N	Quad 2-Input Positive-AND Gate	14
SN74HCT138D	SN74HCT138N	3-To-8 Decoder/Demultiplexer	16
SN74HCT240DW	SN74HCT240N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74HCT244DW	SN74HCT244N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74HCT245DW	SN74HCT245N	Octal Bus Transceiver with 3-State Outputs	20
SN74HCT273DW	SN74HCT273N	Octal D-Type Flip-Flop	20
SN74HCT32D	SN74HCT32N	Quad 2-Input Positive-OR Gate	14
SN74HCT373DW	SN74HCT373N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74HCT374DW	SN74HCT374N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74HCT541DW	SN74HCT541N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74HCT573DW	SN74HCT573N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74HCT574DW	SN74HCT574N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74HCT646DW	SN74HCT646N	Octal Bus Xceiver AND Register with 3-State Outputs	24

SN74HCT: High Speed CMOS-TTL Logic

Mfr.'s Type		Description	No. of Leads
SOIC	PDIP		
SN74HCT652DW	SN74HCT652NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74HCT74D	SN74HCT74N	Dual D-Type Flip-Flop	14

SN74LS: Low Power Schottky TTL Logic

SN74LS00D	SN74LS00N	Quad 2-Input Positive-NAND Gate	14
SN74LS02D	SN74LS02N	Quad 2-Input Positive-NOR Gate	14
SN74LS04D	SN74LS04N	Hex Inverter	14
SN74LS05D	SN74LS05N	Hex Inverter with Open-Collector Outputs	14
SN74LS06D	SN74LS06N	Hex Inverter with Open-Collector Outputs	14
SN74LS07D	SN74LS07N	Hex Buffer with Open-Collector Outputs	14
SN74LS08D	SN74LS08N	Quad 2-Input Positive-AND Gate	14
SN74LS10D	SN74LS10N	Triple 3-Input Positive-NAND Gate	14
SN74LS123D	SN74LS123N	Dual Monostable Multivibrator	16
SN74LS125AD	SN74LS125AN	Quad Bus Buffer Gates with 3-State Outputs	14
SN74LS126AD	SN74LS126AN	Quad Bus Buffer Gates with 3-State Outputs	14
SN74LS132D	SN74LS132N	Quad 2-Input P-NAND Schmitt-Trigger	14
SN74LS137D	SN74LS137N	3-To-8 Decoder/Demux with Address Latch	16
SN74LS138D	SN74LS138N	3-To-8 Decoder/Demultiplexer	16
SN74LS139AD	SN74LS139AN	Dual 2-To-4 Decoder/Demultiplexer	16
SN74LS145D	SN74LS145N	BCD-to-Decimal Decoder/Driver	16
SN74LS146D	SN74LS146N	8-To-3 Line Priority Encoder	16
SN74LS147D	SN74LS147N	Hex Schmitt-Trigger Inverter	14
SN74LS151D	SN74LS151N	8-To-1 Data Selector/Multiplexer	16
SN74LS153D	SN74LS153N	Dual 4-To-1 Data Selector/Multiplexer	16
SN74LS156D	SN74LS156N	Dual 2-To-4 Line Decode/Demux with Open Collector Outputs	16
SN74LS157D	SN74LS157N	Quad 1-Of-2 Data Selector/Multiplexer	16
SN74LS161AD	SN74LS161AN	4-Bit Synchronous Binary Counter	16
SN74LS163AD	SN74LS163AN	4-Bit Synchronous Binary Counter	16
SN74LS164D	SN74LS164N	8-Bit Parallel-Out Serial Shift Register	14
SN74LS165AD	SN74LS165AN	8-Bit Parallel-Load Shift Register	16
SN74LS166AD	SN74LS166AN	8-Bit Parallel-Load Shift Register	16
SN74LS174D	SN74LS174N	Hex D-Type Flip-Flop	16
SN74LS175D	SN74LS175N	Quad D-Type Flip-Flop	16
SN74LS193D	SN74LS193N	4-Bit Synchronous Up/Down Binary Counter	16
SN74LS19AD	SN74LS19AN	Hex Schmitt-Trigger Inverter	14
SN74LS221D	SN74LS221N	Dual Monostable Multivibrator	16
SN74LS224AD	SN74LS224AN	16x4 Synchronous FIFO, 10 MHz	16
SN74LS240DW	SN74LS240N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74LS241DW	SN74LS241N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74LS244DW	SN74LS244N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74LS245DW	SN74LS245N	Octal Bus Transceiver with 3-State Outputs	20
SN74LS251D	SN74LS251N	1-Of-8 Data Selector/Mux with 3-State Outputs	16
SN74LS253D	SN74LS253N	Dual 4-To-1 Data Selector/Mux with 3-State Outputs	16
SN74LS257BD	SN74LS257BN	Quad 2-To-1 Data Selector/Mux with 3-State Outputs	16
SN74LS259BD	SN74LS259BN	8-Bit Addressable Latch	16
SN74LS273DW	SN74LS273N	Octal D-Type Flip-Flop	20
SN74LS280D	SN74LS280N	9-Bit Parity Generator/Checker	14
SN74LS283D	SN74LS283N	4-Bit Binary Full Adder	16
SN74LS292D	SN74LS292N	30-Bit Programmable Counter	16
SN74LS299DW	SN74LS299N	8-Bit Universal Shift/Storage Register	20
SN74LS30D	SN74LS30N	8-Input Positive-NAND Gate	14
SN74LS32D	SN74LS32N	Quad 2-Input Positive-OR Gate	14
SN74LS365AD	SN74LS365AN	Hex Driver with 3-State Outputs	16
SN74LS367AD	SN74LS367AN	Hex Driver with 3-State Outputs	16
SN74LS368AD	SN74LS368AN	Hex Driver with 3-State Outputs	16
SN74LS373DW	SN74LS373N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74LS374DW	SN74LS374N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74LS377DW	SN74LS377N	Octal D-Type Flip-Flop with Clock Enable	20
SN74LS378D	SN74LS378N	Hex D-Type Flip-Flop with Clock Enable	16
SN74LS38D	SN74LS38N	Quad 2-Input P-NAND Buffer with Open Collector	14
SN74LS393D	SN74LS393N	Dual 4-Bit Binary Counter	14
SN74LS396D	SN74LS396N	Octal Storage Register	16
SN74LS540DW	SN74LS540N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74LS541DW	SN74LS541N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74LS590D	SN74LS590N	8-Bit Binary Counter with 3-State Outputs	16
SN74LS592D	SN74LS592N	Binary Counter with Input Registers	16
SN74LS593DW	SN74LS593N	8-Bit Binary Counter with 3-State I/O Registers	20
SN74LS595D	SN74LS595N	8-Bit Shift Register with 3-State Outputs	16
SN74LS597D	SN74LS597N	Shift Register with Input Latch	16
SN74LS624D	SN74LS624N	Voltage-Controlled Oscillator	14
SN74LS628D	SN74LS628N	Voltage-Controlled Oscillator	14
SN74LS640-1DW	SN74LS640-1N	Octal Bus Transceiver with 3-State Outputs	20
SN74LS640DW	SN74LS640N	Octal Bus Transceiver with 3-State Outputs	20
SN74LS645-1DW	SN74LS645-1N	Octal Bus Transceiver with 3-State Outputs	20
SN74LS646DW	SN74LS646N	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74LS652DW	SN74LS652NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74LS670D	SN74LS670N	4-Bit Register File	16
SN74LS682D	SN74LS682N	8-Bit Magnitude Comparator	20
SN74LS684DW	SN74LS684N	8-Bit Magnitude Comparator	20
SN74LS688DW	SN74LS688N	8-Bit Identity Comparator	20
SN74LS74AD	SN74LS74AN	Dual D-Type Flip-Flop	14
SN74LS85D	SN74LS85N	4-Bit Magnitude Comparator	14
SN74LS86AD	SN74LS86AN	Quad 2-Input Exclusive-OR Gate	14

SN74S: Schottky TTL Logic

SN74S00D	SN74S00N	Quad 2-Input Positive-NAND Gate	14
—	SN74S02N	Quad 2-Input Positive-NOR Gate	14
SN74S04D	SN74S04N	Hex Inverter	14
SN74S05D	SN74S05N	Hex Inverter with Open-Collector Outputs	14
SN74S1050D	SN74S1050N	12-Bit Schottky Barrier Diode	16
SN74S1051D	SN74S1051N	12-Bit Schottky Barrier Diode	16
SN74S1053DW	SN74S1053N	16-Bit Schottky Barrier Diode	20
SN74S1056D	SN74S1056S*	8-Bit Schottky Barrier Diode	16
SN74S112AD	SN74S112AN	Dual J-K Negative-Edge Flip-Flop	16
SN74S124D	SN74S124N	Dual Voltage-Controlled Oscillators	16
SN74S138AD	SN74S138AN	3-To-8 Decoder/Demultiplexer	16
SN74S163D	SN74S163N	4-Bit Synchronous Binary Counter	16
SN74S175D	SN74S175N	Quad D-Type Flip-Flop	16
—	SN74S225N	16x5 Asynchronous FIFO, 10 MHz	20
SN74S240DW	SN74S240N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74S241DW	SN74S241N	Octal Buffer/Line Driver with 3-State Outputs	20

*Single in line package.

Thomson Consumer Electronics SK Replacement Technical Manual and Cross Reference

- ▶ Bipolar Transistors
- ▶ Field Effect Transistors
- ▶ Zener Diodes
- ▶ Diodes and Rectifiers
- ▶ Industrial Rectifiers

- ▶ SCRs and Triacs
- ▶ Metal Oxide Varistors
- ▶ Optoelectronics
- ▶ Linear Integrated Circuits
- ▶ Digital Integrated Circuits

SK Replacement Solid State Devices are "Top of the Line" quality units, purchased to OEM standards, from original manufacturers. This guide contains 3600 SK devices which replace over 235000 parts. Each transistor, TRIAC, SCR, Thyristor, Integrated Circuit can be used to replace a broad variety of devices used in electronic equipment. Electrical characteristics are equal to or better than original specified components. The easy to use cross reference section enables you to locate the exact replacement needed for over 235000 solid state devices.

902-0010. SKG202GEACH 4.95

Thomson Consumer Electronics SK Cross

This comprehensive PC-based cross reference software contains information on over 235000 semiconductor devices which can be accessed easily and quickly. Advantages included the ability to scroll through the entire cross reference, descriptions next to the part number, technical notes below descriptions, transistor complements, matched pairs and matched complementary pairs listed in the description. The minimum system requirements are an IBM PC compatible computer with 640K RAM, 5 1/4" or 3 1/2" floppy drive, and 14 Megabytes of hard disk space.

UCC3889EVAL For Evaluating the UCC3889 Off-Line Power Supply Controller

UCC3912EVAL For Evaluating the UCC3912 Programmable Electronic Circuit Breaker

► High Step-Down Ratios Without a Transformer
► Off-Line Power Supply Controller

► Regulated Output Voltage Determined by Simple Control Algorithm

► Digital Programmable Current Limit from 0 to 3 A
► Integrated 0.2 Ω Power MOSFET

► Power Down/Sleep Mode Capability
► 3 V to 8 V Operation

Drivers

Power driver ICs provide an ideal interface between low power control circuitry and high power motor drive or power supply output devices. A wide variety of power MOSFET driver ICs combine high speed with high output current drive

capability which greatly simplifies power stage design. Transformer isolated solutions are also provided for both power MOSFET and IGBT drive applications.

Mfr.'s Type	Description	Power Driver	FET Driver	Isolated Driver Pairs	Input Configuration	Output Rise Time (ns)	Maximum Voltage (V)	Peak Output Current (A)
UC2950T	Half Bridge Bipolar Switch	Single	—	—	Sink/Source TTL	—	35	4.0
UC3705N	High Speed Power Driver	Single	—	—	Complementary	60	40	1.5
UC3706N	Dual Output Driver	Dual	—	—	Complementary	60	40	1.5
UC3707N	Dual Channel Power Driver	Dual	—	—	Complementary	50	40	1.5
UC3708N	Dual Non-Inverting Power Driver	Dual Noninverting	—	—	Inverting	75	35	3.0
UC3709N	Dual High Speed FET Driver	—	Single	—	Non-Inverting	40	40	1.5
UC3710N	High Current FET Driver	—	Single	—	Complementary	40	20	6.0
UC3711N	Dual Ultra High Speed FET Driver	—	Dual	—	Non-Inverting	20	40	1.5

Interface

Interface chips include octal EIA line driver and receivers, and SCSI (small computer system interface) 18-line and 9-line terminators. Octal line drivers and receivers are used to interface terminal servers, printers, network routers, and video

terminals over long distances. Terminators are used to at the end of long cables in SCSI application to prevent line reflections, which would result in false signals and interference.

Communications Interface Drivers and Receivers

Mfr.'s Type	Description	Number of Drivers	Number of Receivers	Supply Voltage (V)	EIA232 V.28	EIA423 V.10	EIA422 V.11	V.35	AppleTalk
UC5170CN	Octal Line Driver	8	—	± 10	Yes	Yes	No	No	No
UC5171N	Octal Line Driver	8	—	± 10	Yes	Yes	No	No	No
UC5172N	Octal Line Driver	8	—	± 10	Yes	Yes	No	No	No
UC5180CN	Octal Line Receiver	—	8	+ 5	Yes	Yes	Yes	Yes	No
UC5181CN	Octal Line Receiver	—	8	+ 5	Yes	Yes	Yes	Yes	Yes

SCSI Active Terminators

Mfr.'s Type	Description	Signal Line Channels	Channel Capacitance (pF)	Termination Impedance (Ω)	Disconnect High or Low	Input Voltage Range (V)	Supports Active Negation	SCSI Hot Plug Current (nA)
UC5601N	18 Line SCSI Active Terminator	18	10	110	High	4.0 to 5.25	No	<10
UC5602N	18 Line SCSI Active Terminator	18	11	110	High	4.0 to 5.25	No	<10
UC5603N	9 Line SCSI Active Terminator	9	6	110	High	4.0 to 5.25	Yes	<10
UC5604N	9 Line SCSI Active Terminator	9	9	110	High	4.0 to 5.25	No	<10
UC5605N	9 Line Low Capacitance SCSI Active Terminator	9	4	110	Low	4.0 to 5.25	Yes	<10
UC5612N	9 Line Low Capacitance SCSI Active Terminator	9	4	110	High	4.0 to 5.25	Yes	<10

Intelligent Motion Circuits

Motor control ICs include a wide variety of voice coil drivers, stepper motor drivers, and both brush and brushless DC motor controllers. On board power drivers provide a complete motor drive design solution for low power applications.

High power solutions combine sophisticated control and fault protection features with easy interface to external power amplifiers.

PWM Motor Controllers and Drivers

Mfr.'s Type	Description	Hall Logic	Microstepping	Number of Outputs	Output Current Per Output (A)	Current Sense Amplifier
UC3517N	Stepper Motor Drive Circuit	—	—	2	0.5	—
UC3620V	Switchmode Driver for Brushless DC Motors	Yes	—	3	2.0	Single Ended
UC3622V	Switchmode Driver for Brushless DC Motors	Yes	—	3	2.0	Single Ended

UC3177QP	Full Bridge Power Amplifier	Yes	2	1	3-35	2.00	Differential
UC3178QP	Full Bridge Power Amplifier	Yes	2	2	3-35	0.45	Differential

Phase Locked Frequency Controllers

Mfr.'s Type	Description	Phase Locked Loop Control	Internal Oscillator	Phase Drive Logic	Divide Logic	Maximum Frequency (MHz)	Sense Amplifier
UC3633N	Phase Locked Frequency Controller	Yes	Yes	—	2/4/8	10	Yes
UC3634N	Phase Locked Frequency Controller	Yes	Yes	—	2/4/8	10	Yes
UC3635N	Phase Locked Frequency Controller	Yes	Yes	—	2/4	10	Yes

Power Factor Correction

Power Factor Correction chips are preregulators used in off-line and battery powered power supplies to maintain the phase of the input current as close as possible to the phase of the input voltage. Used in conjunction with an inductor,

diode, and MOSFET switch, power factor as high as 0.99 can result. Power factor correction is needed to meet the IEC 555-2 standard which regulates input line current harmonics.

Mfr.'s Type	Description	Maximum Practical Operating Frequency	Current Error Amplifier Bandwidth	Output Drive (A)	Startup Current (mA)	Under Voltage Lockout (V)
UC3852N	High Power-Factor Preregulator	Variable	—	0.5	1.00	11.5/16.3
UC3854AN	Enhanced High Power-Factor Preregulator	200 KHz	5 MHz	1.0	1.50	10.0/16.0
UC3854BN	Enhanced High Power-Factor Preregulator	200 KHz	5 MHz	1.0	1.50	10.0/10.5

UCC383T-ADJ	Low Dropout Linear Regulator	Adjustable	0.45 at 3 A	400 μ A	9	Short Circuit Current 3% Duty Cycle Limited	1	2

Power Supply Circuits — Continued

Power Supply Support

Mfr.'s Type	Description	Application
UC3730N	Thermal Monitor	This device combines a temperature transducer, precision ref. and temp. comparator. Allows multiple independent power supplies to be paralleled such that each unit supplies only its proportional share of the total load current, Optocoupler driving capability, 4.5 V to 35 V operation. Sets control voltage for UC3886. Provides three comparators for fault monitoring. Single supply monitoring, 8 V to 12 V voltage range with programmable threshold and time delay.
UC3907N	Load Share Controller	
UC3910N	4-Bit DAC and Fault Monitor	

PWM Controllers

PWM Controllers consist of a reference voltage, ramp generator, latched PWM comparator, error amplifier, clock and output driver. The pulse width of the converter's power switch is modulated (adjusted) with changes in input voltage or

output current. Used in conjunction with an external inductor in buck, boost or flyback topologies, these converters provide a regulated output voltage at high efficiency.

Mfr.'s Type	Description	Application	Topology	Peak Output Current	Output Frequency	Outputs	Startup Current	Maximum Duty Cycle
UC3572N	Negative Output Flyback PWM	Low Power, High Efficiency, Spot Regulator	Negative Output, Flyback	0.50 A	300.0 KHz	Single, Totem Pole	—	100%
UC3573N	PWM Step-Down Voltage Regulator	Low Power, High Efficiency, Spot Regulator	Buck	0.50 A	300.0 KHz	Single, Totem Pole	—	100%

VisionTek™ Memory Upgrades

VisionTek™ Memory Upgrades

VisionTek™: The Future Of Memory Upgrades

A leader in the design and manufacturer of proprietary memory for the computer reseller market, VisionTek has been providing quality memory upgrades since 1988. Started as a DRAM brokerage in the founders' apartment, VisionTek has nearly doubled its revenues each year. VisionTek is now one of the largest memory manufacturers in the US and is known

in the memory industry for delivering personalized service, superior quality and consistent availability in an often volatile market. VisionTek has been a memory industry innovator in service offerings such as a lifetime product warranty, an inventory buy back program for resellers and their end users, and a unique corporate assistance program.

IBM Memory Upgrades from VisionTek

Mfr.'s Type	Description	Model To Be Upgraded	Maximum Memory Megabytes	No. of Sockets	OEM Part No.
56054.0	8 MB Module	Apitva 300 Series	64	2	92G7541
56054.0	8 MB Module	Apitva 500 and 700 Series	128	4	92G7541
56022.0	4 MB Kit (4)	EduQuest Forty and Fifty Series	20	4	60G0868
56022.0	4 MB Kit (4)	EduQuest Thirty Series	16 or 20	4	60G0868
56022.0	4 MB Kit (4)	EduQuest Thirty-five Series	16	4	60G0868
56784.0	16 MB Module	PC Server 320	256	8	92G7204
56784.0	16 MB Module	PC Server 486 Series	128	4	92G7204
56584.0	16 MB ECC Module	PC Server 500 Series	256	8	32G3270
56784.0	16 MB Module	PC Server Pentium Series	192	6	92G7204
56550.0	2 MB Module	PS/1 2123 Pro 386SX	16	2	6450902
56520.0	2 MB Module	PS/1 386SX Series	16	2	6450608
56301.0	4 MB Module (T)	PS/1 486 Series (32 MB max 2 skt)	32	2	6450128-T
56787.0	4 MB Kit (4)	PS/1 486 Series (32 MB max 8 skt)	32	8	96F9290 (4)
56301.0	4 MB Module (T)	PS/1 486 Series (64 MB max 2 skt)	64	2	6450128-T
56301.0	4 MB Module (T)	PS/1 486 Series (64 MB max 4 skt)	64	4	6450128-T
56301.0	4 MB Module (T)	PS/1 486 Series (64 MB max 4 skt)	64	4	6450128-T
56080.0	2 MB Kit (2)	PS/2 25 and 30 286 Series	4/16	4/1	30F5360
56450.3	2 MB Module	PS/2 25 SX Series	16	2	6450604
56450.3	2 MB Module	PS/2 35LS, 35SX, 40SX	16	3	6450604
56450.3	2 MB Module	PS/2 50-021, 60-041, 60-071	1/16	1	6450604
56450.3	2 MB Module	PS/2 50Z-031, 061	2/16	1/1	6450604
56550.0	2 MB Module	PS/2 53, 53LS	16	3	6450902
56450.3	2 MB Module	PS/2 55LS SX-041, 061, 081, 65SX	8/16	2/1	6450604
56450.3	2 MB Module	PS/2 55SX-031	8/16	2/1	6450604
56550.0	2 MB Module	PS/2 56 and 57 Series	16	3	6450902
56450.3	2 MB Module	PS/2 70-061, 081, 121, 161, E61	6/64	3/1	6450604
56520.0	2 MB Module	PS/2 70-A16, 21, 61, 81, 821, 61	8/64	4/1	6450608
56450.3	2 MB Module	PS/2 73 P70-031 Portable	8/64	4/1	6450604
56450.3	2 MB Module	PS/2 73 P70-061, 121 Portable	8/64	2/1	6450604
56550.0	2 MB Module	PS/2 73 P75-161, 401 Portable	16	4	6450902
56550.0	2 MB Module	PS/2 76 and 77 Series	32	4	6450902
56784.0	16 MB Module	PS/2 76i.s and 77i.s Series	64	4	92G7204
56150.0	4-16 MB Board	PS/2 80-041	2/64	2/1	34F3011
56150.0	4-16 MB Board	PS/2 80-071	2/64	0/1	34F3011

XC2064/XC2018 Logic Cell Arrays

The Logic Cell Array (LCA) is a high density CMOS integrated circuit. Its user-programmable array architecture is made up of three types of configurable elements: Input/Output Blocks, Logic Blocks and Interconnect. The Designer can define individual I/O blocks for interface to external circuitry, define logic blocks to implement logic functions and define

interconnection networks to compose larger scale logic functions. The XACT Development System provides interactive graphic design capture and automatic routing. Both logic simulation and in-circuit emulation are available for design verification.

Mfr.'s Type	Logic Capacity (Gates)	Configurable Logic Blocks	User I/Os	Configuration Program (Bits)	Package Type	No. of Pins

XC3000, XC3000A, and XC3100A Logic Cell Array Families

The CMOS XC3000 Logic Cell Array (LCA) family provides a group of high performance, high density, digital integrated circuits. Their regular, extendable, flexible, user-programmable array architecture is composed of a configuration program store plus three types of configurable elements: a perimeter of IOPs, a core array of CLBs and resources for

interconnection. The XACT development system provides schematic capture and auto place-and-route for design entry. Logic and timing simulation, and in-circuit emulation are available as design verification alternatives. The design editor is used for interactive design optimization, and to compile the data pattern that represents the configuration program.

XC3000 and XC3000A Family

The XC3000A family has additional interconnect resources to drive the I-inputs of TBUFFs driving horizontal Longlines. The CLB Clock Enable input can be driven from a second vertical Longline. These two additions result in more efficient and

faster designs when horizontal Longlines are used for data bussing.

XC4000 and XC4000A Logic Cell Array Families

The XC4000 family of Field-Programmable Gate Arrays (FPGAs) provides the benefits of custom CMOS VLSI, while avoiding the initial cost, time delay, and inherent risk of a conventional masked gate array. The XC4000 family provides a regular, flexible, programmable architecture of Configurable Logic Blocks (CLBs), interconnected by a powerful hierarchy

of versatile routing resources, and surrounded by a perimeter of programmable Input/Output Blocks (IOBs). It is supported by powerful and sophisticated software, covering every aspect of design: from schematic entry, to simulation, to automatic block placement and routing of interconnects, and finally the creation of the configuration bit stream.

XC5000 FPGA Family

The XC5000 FPGA family from Xilinx was engineered to deliver the lowest cost of any FPGA family. By combining the new VersaBlock™ architecture, 0.6 micron CMOS SRAM process technology and Triple-Layer-Metal (TLM), dramatic advances

have been achieved in maximizing gates/area. This technology breakthrough positions the XC5000 as a cost effective, high volume alternative to gate arrays.

XC7200 and XC7300 EPLD Devices

In the XC7200 and XC7300 devices, Xilinx offers two evolutionary and compatible generations of Erasable Programmable Logic Devices (EPLDs). Xilinx EPLDs combine the advantages of LSI-high-level of integrations, small size, low cost,

high-reliability, with the user's need to create applications-specific circuits, without incurring the cost, delay, and risk of mask-programmable gate arrays.

XC17000 Family of Serial Configuration PROMs

In early 1993, Xilinx introduced the D-series of serial PROMs, the XC1718D, XC1736D, and the XC1765D, all with programmable Reset polarity, improved ESD protection, and all with max 5 MHz clock frequency. These devices are programmed with a lower voltage and a different programming algorithm than the older parts. The user needs the appropriate update from the programmer vendor. These devices will become the mainstream serial PROMs, and, beyond the traditional packages, they are also available in the space-saving SO8 package. Also in 1993, Xilinx introduced the

L-series of serial PROMs, the XC1718L and XC1765L. These devices operate at the new industry standard low supply voltage of 3.3 V (3.0 to 3.6 V). The XC1736A is the only serial PROM that lacks the programmable Reset polarity option, and the XC17128 is the only serial PROM that can be clocked at the full 10 MHz required by the XC4000 in fast configuration mode. All other serial PROMs can be clocked at up to 5 MHz.

1995 IC MASTER*

- ▶ Digital
- ▶ DSP
- ▶ Microprocessor
- ▶ Interface
- ▶ MPU Development Systems
- ▶ Linear
- ▶ PLDs
- ▶ ASICs
- ▶ Memory
- ▶ Chip Sets and Multifunction Devices
- ▶ Plus Two Free IC Updates

The 1995 IC MASTER is organized for easier access with ICs listed by manufacturer and by function category. Functional and numerical search guide to 105,000 commercially available ICs, including over 20,000 new ICs. Alternate Source Directory lists 106,000 devices, cross-referenced and verified for fit, form, and function. Includes complete Manufacturers and Distributors Directory.

All New 1995 Annual Edition Includes 20,000 New Devices

Parameter search data on a total of more than 105,000 commercially available ICs.

Expanded Data and New Sections

- ▶ Voltage Regulators Expanded with New Data on Tolerances
- ▶ Reorganized and Expanded Data on Clocks, Synthesizers, and Prescalers
- ▶ Updated and Revised Data on Voltage References, Voltage Sensors, and Voltage Detectors
- ▶ New Format and New Entries in Microprocessor Development Systems
- ▶ Application Note Directory Expanded to Over 4,000 Notes, with More Than 1,000 New Application Notes
- ▶ New Section on PLDs/SRAM
- ▶ New Categories in Converters...DC-DC/AC-DC/AC-AC/DC-AC
- ▶ New Section on Pulse-Width Modulators

504-1095. 1995 IC MASTER (3 Volume Set).....EACH 185.00

*Contact Allied for 1996 Edition availability.

1995 IC MASTER CD-ROM PLUS*

Your direct link to the IC industry, with the latest product information on 105,000 integrated circuits, including more than 20,000 new device listings...on a single compact disk!

Electronic direct access to the entire IC MASTER CD-ROM PLUS, in both Windows and DOS versions. The Windows version, designed for the 386 and more powerful machines, permits device selection by a flexible category search as well as a key work search. The Windows version features high speed sort and rubberband zoom capability for the manufacturer's data pages. The DOS version accommodates a broad base of hardware, including the PC-XT.

The IC MASTER CD-ROM PLUS includes hundreds of manufacturer supplied data pages, a complete Manufacturers and Distributors Directory and a powerful Vendor Inquiry Generation and Tracking program. Multiuser and network versions available.

NTE Selection Guide

- ▶ Over 253,000 Devices Replaced with NTE Numbers

The NTE catalog has become the industry's guide when you need semi-conductors for maintenance and repair work. Now available is the 6th edition containing over 250,000 cross references to American, European and Japanese, industrial and commercial devices. The catalog includes short form specifications and cross reference in a new easier to read format for the over 3500 devices in NTE's line. Each NTE transistor, triac, silicon controlled rectifier (SCR), integrated circuit, thyristor or microprocessor can be used to replace a broad variety of devices used in electronic equipment. Electrical characteristics are equal to or better than originally specified components.

The easy to use cross reference section enables you to locate the exact replacement needed for over 253,000 solid state devices.

Quick Cross

- ▶ NTE's Computer Based Cross Reference Disk For Semiconductors and Relays

NTE Electronics, Inc. has taken its entire Semiconductor and Relay Cross References and put them on IBM PC compatible diskettes. These disks, once loaded into your PC, will only take up a little more than 2 Megabytes of disk space. You will have instant access to over 250,000 Semiconductor Cross References and 22,000 Relay Cross References. Minimum system requirements are an IBM PC compatible computer with 640K RAM, 5 MB hard disk.

Thomson Consumer Electronics SK CROSS

This comprehensive PC-based cross reference software contains information on over 235,000 semiconductor devices which can be accessed easily and quickly. Advantages included the ability to scroll through the entire cross reference, descriptions next to the part number, technical notes below descriptions, transistor complements, matched pairs and matched complementary pairs listed in the description. The minimum system requirements are an IBM PC compatible computer with 640 K RAM, 5 1/4" or 3 1/2" floppy drive, and 14 Megabytes of hard disk space.

B. Universal PC Board. Type 276-168. Accepts ICs up to 40 pins. Total of 750 indexed, solder-ringed holes. Two busses, one grounding strip. Mounting holes at corners. 2 13/16 x 3 1/4".

910-2194 EACH 2.49

C. Multi-Purpose Bus Board. Type 276-150. Two bus strips at the center. PC pattern traced on component side speeds building. 417 solder points. 1 7/8 x 2 7/8".

910-2188 EACH 1.19

D. Dual Mini General-Purpose Board. Type 276-148. 213 holes. 1 3/4 x 3 5/8". Can be snapped in half.

910-2187 EACH 1.49

E. Dual IC Board. Type 276-159. Accepts two 6 to 20-pin DIPs. Four connecting points for each IC pin. 1 3/4 x 3 3/8".

910-2191 EACH 1.69

44-Position Card Edge Socket. Type 276-1551. For Fig. C above.

910-2200 EACH 2.99

Experimenter's Solderless Boards

H

I

F

G

The fast efficient way to design your own solid-state circuits. The modular breadboards are reusable and accept a wide variety of components. When you have your circuit working properly, it's easy to transfer it to the matching PC board for a soldered, permanent version.

F. Experimenter's PC Board. Type 276-170. Layout matches modular breadboard. 550 pre-drilled connection points. 2 1/8 x 5 7/8 x 1 1/16".

910-2197 EACH 2.79

G. Modular IC Breadboard Socket. Type 276-174. Snaps together horizontally or vertically for more complex designs. Silver-nickel contacts accepts 30 to 22 gauge solid wire. Features two bus strips and 550 indexed connection points. 2 1/8 x 6".

910-6707 EACH 12.49

H. Modular IC Breadboard Socket. Type 276-175. Smaller version of 276-174 with 270 indexed connection points. 2 1/8 x 3 5/8 x 1 1/16".

910-6708 EACH 7.99

I. Universal Breadboard. Type 276-169. Our Finest! The 2 1/4 x 6 1/2" breadboard is mounted on a 7 x 4" 'stay put' steel base with rubber feet. Accepts DIPs, discrete components and up to 22 gauge wire. Total of 640 plug-in tie points. 3 binding posts for power hookup, etc.

910-2196 EACH 21.99

Archer® Printed Circuit Kit has Everything You Need

This kit contains everything you need to design and make printed circuit boards. Two printed circuit boards, resist ink pen, 6-oz. bottle of etchant, 2-oz. bottle of resist ink solvent, 1/8" drill bit, 7/8 x 5/8 x 2" plastic box. **Shpg. wt.: 2 lbs.**

910-6726. Type 276-1576 EACH 10.99

Printed Circuit Etchant Solution

- Takes Copper Off Perfboard
- Safe, Easy And Fast To Use
- 16 Fluid Ounces

A PC 'must' for hobbyists, builders, experimenters! A special ferric chloride solution removes copper completely without damage to board material. **Shpg. wt.: 1 1/2 lbs.**

910-6715. Type 276-1535 EACH 2.69

Prototyping General Purpose Boards

Twin Industries general purpose prototype boards provide a versatile solution for many research and development projects. Available in Four Different Types: the 7100 series; perf board with plated through holes, the 8000 series; perf board with plated through holes with a plane on one side, the 8100 series; perf board

with plated through holes and planes on both sides, the 8200 series. Boards are available in a number of sizes. Material is FR-4 fiber glass with UL Flammability Class 94V-0. They are .062" thick with .035" plated through holes and .042" non plated on a 0.1" x 0.1" grid spacing.

Stock No.	Mfr.'s Type	Description	Width	Length	EACH
237-0100	4010-4565	Interleave plane design. .042 Plated through holes on a 0.1" grid.	4.50	6.50	45.00
237-0101	7036-50	2.8" x 3.4" of plated holes on a .05" grid. 2/18 gold fingers on .156 centers.	3.50	4.00	28.00
237-0102	7044-54	Prototype board with 2/22. 156 I/O connector. Capacity: up to 54 16-pin sockets.	6.20	4.50	28.00
237-0103	7050-100	Plated holes on a .05" grid and 4.0" x 8.0" of plated holes on a .10" grid.	8.00	8.00	58.00
237-0104	7072-54	2/36 connector on .100 centers. Space provided for 54 ICs with up to 16 pins per socket.	6.20	4.50	28.00
237-0105	7100-062-4565	Prototype board featuring a 0.1" x 0.1" grid of non-plated .062" through holes.	4.50	6.50	7.50
237-0106	7100-062-4565	Prototype board featuring a 0.1" x 0.1" grid of non-plated .062" through holes.	4.50	8.50	11.25
237-0107	7100-1010	Prototype board featuring a 0.1" x 0.1" grid of non-plated through holes.	10.00	10.00	22.50
237-0108	7100-1020	Prototype board featuring a 0.1" x 0.1" grid of non-plated through holes.	10.00	20.00	45.00
237-0109	7100-144	Prototyping board with 2/50 connector on .100 centers. Space provided for 144 ICs with up to 16 pins per socket.	9.25	8.00	45.00
237-0110	7100-410	Prototype board featuring a 0.1" x 0.1" grid of non-plated through holes.	4.00	10.00	9.00
237-0111	7100-44EXT	Extender I/O connector 2/22 on .156 center.	4.50	6.50	45.00
237-0112	7100-45	Prototype board featuring a 0.1" x 0.1" grid of non-plated through holes.	4.00	5.00	4.50
237-0113	7100-4517	Prototype board featuring a 0.1" x 0.1" grid of non-plated through holes.	4.50	17.00	22.50
237-0114	7100-4565	Prototype board featuring a 0.1" x 0.1" grid of non-plated through holes.	4.50	6.50	7.50
237-0115	7100-8517	Prototype board featuring a 0.1" x 0.1" grid of non-plated through holes.	8.50	17.00	45.00
237-0116	8000-1010	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, no plane.	10.00	10.00	59.00
237-0117	8000-1020	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, no plane.	10.00	20.00	118.00
237-0118	8000-410	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, no plane.	4.00	10.00	23.60
237-0119	8000-45	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, no plane.	4.00	5.00	11.80
237-0120	8000-4565	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, no plane.	4.50	6.50	19.67
237-0121	8044-30	Prototype board with 2/22 connector on .156 centers. Space provided for 30 ICs with up to 16 pins per socket.	4.50	6.50	28.00
237-0122	8100-1010	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, one plane.	10.00	10.00	59.00
237-0123	8100-1020	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, one plane.	10.00	20.00	118.00
237-0124	8100-1020-DB	Prototype board featuring a 0.1" x 0.1" grid of plated through holes. The board is separated into two planes, perfect for prototypes with two VCC levels.	10.00	10.00	59.00
237-0125	8100-410	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, one plane.	4.00	10.00	23.60
237-0126	8100-45	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, one plane.	4.00	5.00	11.80
237-0127	8100-4565	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, one plane.	4.50	6.50	19.67
237-0128	8100-546	Prototype board with space provided for 546 ICs with up to 16 pins per socket.	12.00	22.00	220.00
237-0129	8196-EXT	96 pin extender.	5.00	3.90	58.00
237-0130	8200-1010	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, two planes.	10.00	10.00	59.00
237-0131	8200-1020	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, two planes.	10.00	20.00	118.00
237-0132	8200-410	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, two planes.	4.00	10.00	23.60
237-0133	8200-45	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, two planes.	4.00	5.00	11.80
237-0134	8200-4565	Prototype board featuring a 0.1" x 0.1" grid of plated through holes, two planes.	4.50	6.50	19.67
237-0135	812-C2	Double Sided One Ounce Copper Clad.	8.00	12.00	12.96
237-0136	612C2	Double Sided One Ounce Copper Clad.	6.00	12.00	9.72
237-0137	810C2	Double Sided One Ounce Copper Clad.	8.00	10.00	10.80
237-0138	55C2	Double Sided One Ounce Copper Clad.	5.00	5.00	3.38
237-0139	4517C2	Double Sided One Ounce Copper Clad.	4.50	17.00	10.33

Prototyping BUS Specific Boards

Stock No.	Mfr.'s Type	Description	Width	Length	BUS	EACH
237-0140	8096-54	Space provided for 54 ICs with up to 20 pins per socket.	12.90	4.00	APPLE	58.00
237-0141	7060-45	Capacity: 18 ICs with up to 20 pins per socket and 27 - 16 pin ICs.	11.65	2.75	APPLE	30.00
237-0142	7198-100	Uncommitted prototyping area of 12.2" x 4.3"	13.30	4.50	EISA	78.00
237-0143	7182-111M	Models 70 and 80 four layer prototyping board. Internal VCC and ground. Capacity: 111 20 pin ICs and uncommitted prototyping area of 3.0" x 3.0"	11.50	7.10	PSII	124.00
237-0144	7136-34M	Models 50 and 60 four layer prototyping board. Internal VCC and ground. Capacity: 34 20 pin ICs and uncommitted prototyping area of 3.0" x 3.0"	11.50	3.40	PSII	98.00
237-0145	7182-36M	Models 70 and 80 four layer prototyping board. Internal VCC and ground. Capacity: 36 20 pin ICs and uncommitted prototyping area of 3.0" x 3.0"	11.50	3.40	PSII	98.00
237-0146	7098-200	Uncommitted prototyping area of 12.0" x 13.25"	12.10	13.40	ISA	98.00
237-0147	7098-52	Space provided for 26 ICs with up to 20 pins per socket, 26 ICs with up to 16 pins per socket and an uncommitted prototyping area of 5.7" x 3.9".	13.10	4.50	ISA	68.00
237-0148	7098-104	Space provided for 52 ICs with up to 20 pins per socket and 52 ICs with up to 16 pins per socket. Plane on solder side.	13.10	4.50	ISA	68.00
237-0149	7098-100	Uncommitted prototyping area of 13.0" x 4.4" on a 0.1" grid of plated through holes. Plane on solder side.	13.10	4.50	ISA	68.00
237-0150	7086-150	Space provided for 25 ICs with up to 20 pins per socket and 125 ICs with up to 16 pins per socket.	12.00	6.50	MULTIBUS	78.00
237-0151	7062-99	Space provided for 81 ICs with up to 16 pins per socket and 18 ICs with up to 20 pins per socket.	13.10	4.10	PC-XT	58.00
237-0152	7062-47	Space provided for 29 ICs with up to 16 pins per socket, 18 ICs with up to 20 pins per socket and an uncommitted prototyping area of 5.6" x 3.5"	3.80	3.50	PC104	68.00
237-0153	PC104	Uncommitted prototyping area of 3.6" x 3.3"	12.20	3.90	PCI 32 BIT	68.00
237-0154	7586-5100	Uncommitted prototyping area of 11.2" x 3.7"	12.20	3.90	PCI 64 BIT	78.00
237-0155	7564-100	Uncommitted prototyping area of 11.2" x 3.7"	8.25	10.80	PCMCIA	135.00
237-0156	3300-EX100	VCC monitor and VCC bus on outer holes. Marked signals for easy probing.	5.00	10.00	S100	32.00
237-0157	SD100C	Space provided for 144 ICs with up to 16 pins per socket and 36 ICs with up to 20 pins per socket. I/O connector 2/50. 125 centers.	5.00	10.00	S100	32.00
237-0158	S-100	Space provided for 90 ICs with up to 16 pins per socket.	6.20	4.50	STD BUS	28.00
237-0159	7056-54	Space provided for 54 ICs with up to 16 pins per socket.	12.00	7.75	VESA	95.00
237-0160	7210-100	Uncommitted prototyping area of 11.5" x 7.3"	13.13	4.50	VESA	68.00
237-0161	7210-52	Space provided for 26 ICs with up to 16 pins per socket, 26 ICs with up to 20 pins per socket and 95 ICs with up to 16 pins per socket.	9.20	8.66	VME	64.00
237-0162	8192-114	Uncommitted area of 8.7" x 2.4" on a 0.1" grid and space provided for 19 ICs with up to 20 pins per socket and 93 ICs with up to 16 pins per socket.	14.44	11.02	VME	95.00
237-0163	8288-217	Uncommitted area of 14.437" x 2.8" on a 0.1" grid and space provided for 124 ICs with up to 20 pins per socket and 40 ICs with up to 16 pins per socket.	3.90	8.66	VME	32.00
237-0164	8096-48	Uncommitted area of 3.7" x 2.4" on a 0.1" grid and space provided for 8 ICs with up to 20 pins per socket and 40 ICs with up to 16 pins per socket.

237-0188	8100-SMT4	SMT Adapters for SOIC medium, wide, metric and plastic. miniflat packages	6.00	4.00	28.00
237-0189	8100-SMT5	SMT Adapters for Quad Flat Pack (QFP) Package 208.	4.00	4.00	28.00

Hot Insertion PCI Extender Card

The PCI-EXT+64 is a high-speed 64-Bit PCI Bus Extender Card with switchable bus isolation switches supporting both 32 and 64-bit PCI Cards. This allows for "hot insertion" of the boards that are being tested without having to power down or reboot the host system.

Stock No.	Mfr.'s Type	Description	EACH
237-0190	PCI-EXT+64	Slot power on/off switch eliminates rebooting. Auto overload and voltage protection. Test points for all PCI signals. 3 and 5 volt current probe points.	495.00

High Quality PCB Connectors

High Quality PCB Connectors These high quality connectors are the same used in Twin Industries line of extender cards and feature gold/nickel plated mating contacts for maximum reliability.

Stock No.	Mfr.'s Type	Description	EACH
237-0191	CBTE-3214	PCI 32 Bit Edge Connector	15.00
237-0192	CBTE-5214	PCI 64 Bit Edge Connector	21.00
237-0193	CSTE-S420	ISA Bus Connector — Wire Wrap	27.00
237-0194	CTE-F96S	96 Pin DIN Connector — Right Angle, Solder Tail — Female	10.00
237-0195	CTE-M96S	96 Pin DIN Connector — Right Angle, Solder Tail — Male	10.00

VME Backplanes

237-0200. VME-05-BPNL. VME 5 slot J1/J2 monolithic backplane 10.374" x 3.8"	EACH 296.00

237-0202. VME-12-BPNL. VME 12 slot J1/J2 monolithic backplane 10.374" x 9.4"	EACH 497.00
237-0203. VME-21-BPNL. VME 21 slot J1/J2 monolithic backplane 10.374" x 16.6"	EACH 875.00

J Pin Terminal - Y Pin Terminal - 0.035" Socket Pins - Push In Terminals

These high quality pins, sockets and terminals are made for use with Twin Industries line of Prototyping Boards and Extender Cards. The J and Y pins mate tightly with the plated through holes found in Twin's series 8000, 8100, 8200 and bus specific prototyping boards. The push-in terminals are made for use with the non-plated 7100-series of products. The PCB pins are gold over nickel for quality connections for use with any of Twin Industries products.

237-0196. J-PIN-T. J-Pin — 100 pack. 0.025 square posts	EACH 6.90
237-0197. TW3006. Printed Circuit Pin. Press-fit in .034 mounting hole. 10u" gold over 100u" nickel. — 100 Pack	EACH 6.00
237-0198. T28/C. Push-In Terminal — 100 pack	EACH 5.40
237-0199. Y-PIN-T. Y-Pin — 100 pack. 0.025 square posts	EACH 4.30

Vectorbord® — Punchboards

— NEW —

Precision drilled or prepunched, Vectorbord® Prototyping Boards are convenient economical design tools and cost efficient alternatives to custom designs. Available in several hole patterns, many are copper clad. Sockets and pins, terminals, tools, and accessories are available separately to facilitate construction of your prototype boards, see Accessories page.

Circbord® — Printed Circuit Prototyping Boards

Circbord® prototyping boards with printed circuitry cover a wide range of design requirements—without the expense of edge connectors. All boards have provisions for I/O connectors. Several circuit patterns are available. All bus and pad surfaces are solder coated for user convenience. Holes are 0.042" diameter, hole patterns are based on 0.1" grids. Sockets and pins, terminals, tools, and accessories are available separately, see Accessories page.

LF316SC3T1
3 U x 160 mm

LF622SC3T1
6 U x 220 mm

LF616SC3T1
6 U x 160 mm

Easiest Route from Drawing Board, or CRT to Finished Circuit. Low insertion force pins in holes on 0.1" grids. High speed, high density multilayer boards — available in standard DIN sizes with a wide range of options to meet your needs:

- ▶ Two Circuit Patterns: Schottky (SCH) and High Speed Universal (HSU)
- ▶ Four Independent Layers
- ▶ High Density Socket Pin Configurations With Large Grid Array Mounting Area
- ▶ Surface Mounted Decoupling Capacitors Installed

Vectorbord® Metric Extender Cards

Model VMEE-M J1 & J2 Extender (assembly) is for 160mm & 220mm depths. Three-layer construction, controlled impedance design, and patented signal trace shielding minimize crosstalk. Jumpers are provided for interrupting all signal lines. Mounting pads for additional DIN connector or for test point mounting of logic analyzer also included.

PCI Developer's Kit (P/N 4624-10)

PCI Developer's Kit For Fast Development Of Adapter Card To PCI Bus; Become Familiar With The PCI Bus Through Hands-On Use.

- ▶ Allows Engineers An Initial Design Advantage.
- ▶ Allows Programmers Master Bus Compliance Early In The Product Cycle
- ▶ Provides Prototype Space And Additional Boards And Accessories For Circuit Layout
- ▶ Provides Bus Mastering Functions Compliant With PCI Spec 2.1.
- ▶ Includes Software Tools For Diagnostic And Device Programming
- ▶ Includes Chip And Kit Documentation, Including Schematics And Circuit Layout Drawings
- ▶ Makes Bus Interface Easy And Cost Effective

Kit contains four PC boards including: PCI board with the AMCC matchmaker chip, with memory and provisions for flash memory on board for actual software use; one ISA board for communicating with another computer (or the same computer); and two additional breadboards for additional development which plug on to the Matchmaker board; Software for bus interface diagnostics and design configuration, and documentation books and quick reference guide.

Vector-Pak® Series 810 VME Portable Towers

- ▶ Fully Assembled Aluminum
- ▶ Slide Out Subrack for Easy Access
- ▶ 5, 7 and 12-slot J1/J2 Backplanes
- ▶ 250 - 500 Watt Power Supply
- ▶ 60 CFM fans

Specifications. Accessibility: Subrack removes completely from enclosure. The subrack is an assembled, integrated system and slides into the enclosure on tracks. Results in quick installation of cards and short repair time. **Backplane:** 5, 7, and 12 slots are available in standard models. **Peripheral Bay Options:** Up to 3 ea., half-height drives may be front mounted. Accommodates internal drives. **Card Loading:** Vertical, 6U x 160 mm cards. **Cooling:** Bottom mounted fan(s). Separate fan-cooled power supply area. **Power Supply:** 5-slot, 250 W; 7-slot, 400 W; 12-slot, 500 W. **Slide out Subrack:** 3 U light-weight slide out subrack, brushed aluminum. May mount up to 3 ea., 3.5" or two 5.25" half-height drives. **Finish:** Durable, pearl white powder coat. **Electrical Specifications. Frequency:** 47-63 Hz. **Voltage:** 90-132 VAC or 180-264 VAC. **Power:** 250, 400 or 500 Watt. **Harnesses and Cables:** Included, with per. bay cables wired to power supply On/Off, Model 810 — rear mounted, lighted; Model 820 — front mounted On/Off, lighted. Reset optional. **Power Input Module:** Rear mounted (IEC 320 type), with fuse. (Units shown with optional SCSI connector, output, reset and slot covers. **Weight:** 22 Lbs.

Model 810-616-052-02-00H00 (Right). Portable tower with 5-slot J1/J2 VME Backplane and 250 W power supply.
977-1089.1-9 EACH 1670.25

Model 810-616-072-04-00H00 (Center). 7-slot, J1/J2 VME Backplane with 400 W power supply.

96-Pin DIN Connectors

For solder or Wire Wrap applications, designed in accordance with DIN Specification 41612. Superior two-piece design features gold/nickel plated copper alloy contacts and glass-filled polycarbonate or polyester sulphone insulating material. Mounting hole centers 3.54".

Wire Wrap and Solder Tail Edge Card Connectors

Designed for low insertion force, minimum wear on circuit board edge contacts. Edge Card Connectors are supplied with between-contact polarizing keys. Part No. R644 supplied with in-contact polarizing keys. **Specifications:** **Solder Type:** Insulator Material: Phenolic, UL-94V-0 or Glass filled Diallylphthalate UL-94V-1 or Rytion R10. **Wire-Wrap Type Insulator Material:** Phenolic, UL-94V-0 or Glass filled Diallylphthalate UL-94V-1 or Polyester (VALOX) UL-94V-0. **Contact Material:** Phosphor bronze QQ-B-750 or Beryllium copper. **Contact Plating:** .000010" gold over .000050" nickel. **Test Voltage:** 650 VAC. **Rated Current:** 3 A. **Contact Res. Drop:** 30 mV Max. @ rated current. **Insulation Resistance:** 5000 Megohms, nom. @ 500 VDC.

Push-In Terminals

T42 — For 0.042" Diameter Holes

- Wiring Terminals For Mounting Leads Or Wires Horizontally Or Vertically (Through Board Hole)
- Connectors Require No Staking For Most Applications
- Horizontal Slot Holds Up To Seven Wires, Depending Upon Thickness Of Wire

977-0970. T42-1/C. PK/100. 1-9	EACH	4.83
10-Up	EACH	4.59
977-0971. T42-1/M. PK/1000. 1-9	EACH	26.81
10-Up	EACH	25.47

T28 — For 0.062" Diameter Holes

- Vertical Slot Holes 0.025" Diameter Leads Or .22 Gauge Wires
- 0.018" Diameter Tab Holes Can Be Used To Hold Additional Wires
- Material: Phos. Bronze, Tin Plating

977-8362. T28/C. PK/100. 1-9	EACH	6.25
10-Up	EACH	5.93
977-0951. T28/M. PK/1000. 1-9	EACH	34.76
10-Up	EACH	33.02

Package quantities of 100 or 1000. Consult factory for applicable tools.

Press-In Terminals

T46 — For 0.042" Diameter Holes

- Single and Double-Tailed (Accessible From Both Sides) Wire-Wrap Terminals
- 0.025" Square Posts
- Provides Secure Contact Without Soldering Or Staking
- Rectangular Base With Stepped Shank Presses Into Plain Or Plated-Thru Holes and Is Retained Without Etching or Soldering

977-0980. T46-5-9/C. PK/100. 1-9	EACH	7.97
10-Up	EACH	7.57
977-1079. T46-5-9/M. PK/1000. 1-9	EACH	65.37
10-Up	EACH	62.10

Package quantities of 100 or 1000. Use P158 or P133B insertion tools, sold separately.

Terminals

T44, T68 — For 0.042" Diameter Holes

- Wire Wrap Tail With Two-Pronged Receptacle For Wires Or Leads
- 0.025 Square Posts
- Rectangular Terminal With Stepped Shank Presses Securely Into Plated Or Unplated Holes, Requires No Staking Or Soldering
- Bifurcated End Holds Soldered Leads Securely
- For 3 Level Wire Wraps

977-0972. T44/C. PK/100. 1-9	EACH	4.96
10-Up	EACH	4.71
977-0973. T44/M. PK/1000. 1-9	EACH	32.69
10-Up	EACH	31.06
977-0984. T68/C. PK/100. 1-9	EACH	6.12

10-Up	EACH	29.48

T49 Klipwrap Terminal — For 0.042" Diameter Holes

- Wire Wrap Tail (0.025" Square) With 3-Pronged Clip For Up To 22 Gauge Wires
- Up To 3 Wires May Be Pressfit, Crimped Or Soldered Into Clip
- Tail For 3 Level Wire Wraps

977-5060. T49/C. PK/100. 1-9	EACH	8.45
10-Up	EACH	8.03
977-5036. T49/M. PK/1000. 1-9	EACH	66.98
10-Up	EACH	63.63

Package quantities of 100 or 1000. Use P158 or A13, A13-1, P156 insertion tools, sold separately.

K32 — J Pin Terminal — For 0.042" Diameter Holes

- Wire Wrap Pin (0.025" Square) Fits and Connects Two Adjacent Holes (0.042" D) On A .1" Grid
- Short Log Can Be Bent To Secure Pin
- Shorting Pin Allows Wire Wrap Connection To Wiring Side Pads Or Circuits

977-0595. K32/C. PK/100. 1-9	EACH	8.79
10-Up	EACH	8.35
977-1078. K32/M. PK/1000. 1-9	EACH	53.62
10-Up	EACH	50.94

Package quantities of 100 or 1000. Use P158 insertion tool, sold separately.

Solder Washers For .042" and .055" Holes

Multi-functional solder washer kits, with three sizes of washers. Different sizes provided to fit over sockets and tails of most Vector socket pins and wiring terminals. Ideal tools for committing pins to voltage and ground planes.

KM6-II Card Cages

Conforming fully to IEC 297-3 these card cages are manufactured utilizing fully conductive components. This is a versatile design which uses large cross section extrusions for superior mechanical strength. Tapped strips, all fixings and assembly instructions are supplied with the kit in addition to the structural members. Backplane spacer strips and card guides must be ordered separately.

VMExcel Monolithic Backplanes

VMExcel is a six layer (+5V - Signal - 0V - +5V - Signal - 0V) stripline, controlled impedance (57Ω) backplane. Excellent cross talk performance is achieved using 'guard track' technology and an anti-cross talk termination component layout. Decoupling capacitor positions are provided between each slot to permit fine tuning of system parameters.

VMExcel Monolithic J1/J2 Backplanes with on Board Termination, Standard DIN Connectors and Mate'n'Lok Power Connections

Stock No.	Mfr.'s Type	Slot Size	EACH

*Faston power connections

VME Microracks

Fig. A — Vertical Mount

A vertical mount microrack comprises of the following: **Rack:** Mountable card cage with cover over the board area. **Card Cage:** To suit 160 mm deep VME boards. **Fan Tray:** Fitted below card cage (three fans). **Monolithic Backplane:** (Combined Monolithic J1/J2 — our VMExcel product). **Power Supply:** fitted into a standard, hinged, rear module which has Vc connector cutouts. The product is fully wired and ready to be powered up.

Backplane Spacer Strips

In order to maintain the correct dimension between the backplane and the front panel these spacer strips must be used. Two types are available; Insulating (for VME type applications) and Conductive (for Multibus type applications).

Stock No.	Mfr.'s Type	Size	EACH
961-0111	950-10014H	Insulating single level, 84 HP	1.55
961-0112	950-10015E	Insulating two level, 84 HP	2.25

Card Guides

These positive retention guides are molded with two anti-vibration clips per guide which restrict any free play lateral movement of the daughter board. A "bolt down" hole is provided which permits the guide to be secured to the front tie bars. Additional tapped strips must be purchased to use this feature.

Stock No.	Mfr.'s Type	Size (mm)	EACH

Extender Cards

VME extender cards are of a multilayer construction with a full ground plane and in addition 'guard tracks' are provided between each signal line. Jumper links are provided for signal interrogation and a logic analyzer or termination module may be fitted. A conversion kit can join the J1 and J2 together. Double sided extender cards provide line to line extension of 96 way DIN 41612 connectors. Two versions are available, 3U and a monolithic 6U. Multilayer extender card with excellent cross talk performance, 3 layer construction with full central ground plane and 'guard tracks' between each signal line. Line jumper pins and logic analyzer or termination module are provided.

Ther-O-Bond Adhesive

Ther-O-Bond is a 2-part thermally conductive epoxy adhesive system that also has good electrical insulating qualities. It bonds readily to metal, ceramics, glass, plastics and many other materials. An easy-to-spread thixotropic paste, it offers high heat transfer, low shrinkage, and a coefficient of thermal expansion comparable to that of copper and aluminum. It cures overnight at room temperature, or in 2 hours at 65°C. Pot life is about 60 minutes.

Typical Properties — Series 1500.
Color: Black. Thermal Conductivity, Btu/ft.²/hr./°F/in.: 9.0. Tensile Strength, psi @ 25°C: 9800. Dielectric Strength, Volt/Mil: 600.

Ther-O-Link 1000 Thermally-Conductive Compound

Ther-O-Link Series 1000 compound was developed to reduce the high thermal resistance of the air gap otherwise present between mating surfaces of a heat sink and semiconductor. It provides an excellent thermal path by displacing the air gap between the two mating surfaces. Ther-O-Link provides a low thermal resistance of only 0.05°C/W when using a 0.001" film on a one-inch square area. Ther-O-Link will not become hard, and retains its viscous consistency even after continuous operation up to 200°C. It has the consistency of a viscous hand lotion and will wet-out the surfaces and displace more air than heavier compounds. Ther-O-Link is easily brushed on to the mating surfaces of semiconductor devices. When applying, spread or brush the compound evenly over the entire mating surface. For maximum performance, proper torque should be used when mounting stud-mounted devices. The compound can easily be removed with a damp cloth using any commercially-available clean-up solvent.

Typical Properties — Series 1000. Specific Gravity: 2.1-2.1. Viscosity: Paste. Thermal Conductivity, Btu/ft.²/hr./°F/in.: 5.2. Thermal Resistivity, °C in./watt: 52. Volume Resistivity, ohm-cm: 10¹⁵. Dielectric Strength, volts/mil: 250. Weight Loss, % after 24 Hours at 200°C: 0.6.

Shooter Stand Alone Low Cost EPROM Programmer

- ▶ Stand Alone or PC Based Through Serial RS-232 Port
- ▶ Supports EPROMs and EEPROMs
- ▶ Load, Program, Verify From Front Panel
- ▶ Upload/Download Motorola, Intel Binary, Hex Files
- ▶ Edit Files in PC or In Shooter RAM
- ▶ Works with Dumb Terminal or Any PC
- ▶ Compact Size Fits in Briefcase
- ▶ Free IBM PC Communications Software (ProLink)
- ▶ Ideal for Engineers, Technicians and Field Personnel
- ▶ Built-In DIP Socket, Optional PLCC Adapters
- ▶ One Year Warranty
- ▶ Satisfaction Guaranteed

XPRO-1 Stand Alone Intelligent EPROM/FPGA Gang Programmer

- ▶ Copy, Program, Verify, Test Chips, EPROMs, PROMs, Micros Stand Alone or PC Based
- ▶ Easy To Use LCD and Keypad Lets Your Program-In Most Frequent Used Devices
- ▶ Built In High Speed Serial Port, Lets You Integrate with PC in DOS or Windows 3.1
- ▶ 1, 4, 8 Meg Internal RAM Buffer Options, Allows Data Storage Within Unit
- ▶ Single Socket or Gang of 8 Adapter in DIP or PLCC Direct Docking Heads
- ▶ High Speed Gang Algorithms for Fast Production Throughput
- ▶ Cluster Multiple Units for Expanded for Production Setup (64 EPROMs At A Time)
- ▶ Powerful Development Facility, Download in Motorola, Intel, Binary, Hex File Formats
- ▶ Programs EPROM, EEPROMs, Serial PROMs, Micros, FPGAs, EPLDs
- ▶ Lifetime Free Software Update Via BBS, 100% Made-In-USA
- ▶ Battery Backed Up, Protects Against Accidental Data Loss Due to Power Glitches
- ▶ 12-Bit DAC Controlled, Highly Accurate, Requires No Calibration
- ▶ External Power Source, UL, CSA, VDE Approved, ISO 9000 Traceability
- ▶ Optional TSOP, PCMCIA, PQFP, BGA, PGA, SOIC, LCC Socket Adapters

UV Erasers Ultra Fast EPROM — Erasing 1-200 Devices at a Time

- ▶ One Year Warranty
- ▶ Satisfaction Guaranteed

UV Eraser to Meet Every Need

The Logical Devices family of UV eraser are professionally designed for erasing UV EPROMs and microcontrollers at an optimum speed and safety. All products are designed to avoid any leakage of Ultraviolet rays which can be harmful to human eyes and skin. Each unit is equipped with a safety interlock switch which is activated only when the unit tray is sealed shut. The Ultraviolet Eraser units come in a variety of sizes and models and could even be custom made to a specific application.

Stock No.	Mfr.'s Type	Description	Capacity	Timer	Erase Time	Dimension Inches	EACH
864-1000	ERAPME-000	Palm Erase	1	No	30 Min.	2 x 4 x 2	52.45

864-1400	ERAMAX-000	Ultralite-Max	100	Yes	20 Min.	13.5 x 19 x 5	495.00

All Spectroline erasers are handsomely styled of rugged, anodized aluminum and stainless steel. They have a safety interlock to protect the user against accidental exposure to hazardous short wave (254 nm) UV radiation. Also, the devices are protected by conductive foam pads which prevent electrostatic charge build-up. **All models are UL listed and meet OSHA safety standards. PE-Series are CSA approved.**

PE-Series Lamps

- Small Capacity, Medium Intensity
- Efficient and Complete Erasing in as Little as 11 to 13 Minutes, Depending on the Model
- Type PE-240T Erases 12 Chips, Type PE-140 and PE-140T, 9 Chips
- CSA Approved

PE-140, PE-140T, and PE-240T are desktop lamps specifically designed for personal and small-system users. They are the perfect choice for fast and complete EPROM erasure. The PE-140 and PE-140T use a single 4 watt UV tube, while the PE-240T uses two 4 watt UV tubes. Tube life is rated at 6,000 hours. Safety features include fully shielded UV tubes with UV-absorbing light indicators to signal when tubes are lit. The PE-140T and PE-240T feature the added convenience of a 60-minute timer for automatic unit shut-off.

986-2537	BLE-2537S	Tube for PE-Series Lamps		27.50

PL-265T Lamp

- Medium Capacity, Medium Intensity
- Compact and Economical
- Erases up to 30 Chips
- Efficient and Complete Erasing in as Little as 11 Minutes
- Accepts PC Boards up to 4" x 9"

PL-265T is ideal for data processing centers and other medium-volume EPROM users. This unit uses two 6-watt UV tubes. Tube life is rated at 6,000 hours. The PL-265T lamp erases up to 30 EPROM chips or will accept PC boards up to 4" x 9". A specular aluminum reflector assures maximum intensity. The loading drawer contains a removable tray insert which is adjustable to varying heights to ensure optimum exposure. Safety features include UV-absorbing light indicators to signal when tubes are lit. A 60-minute timer automatically shuts off unit at the end of each erasing cycle.

PR-Series Lamps

- PR-125T Erases 25 Chips
- PR-320T Erases 42 Chips
- Medium Capacity, High Intensity
- Complete Erasing in as Little as 6 Minutes

PR-125T and PR-320T are designed for medium to large-volume EPROM users. The PR-Series features high-intensity UV grid tubes that provide maximum irradiance uniformity, for extremely fast and efficient erasing. Grid tube life is rated at 5000 hours. They can completely erase EPROMs on PC boards up to 4" x 9". The PR-125T can hold up to 25 EPROMs while the PR-320T accommodates up to 42 individual EPROMs. A specular aluminum reflector assures maximum intensity. The loading drawer contains a removable insert which is adjustable to varying heights to ensure optimum exposure. Safety features include UV-absorbing light indicators to signal when tubes are lit. Other features include a 60-minute timer which automatically shuts off the unit and a carrying handle to ease portability.

Digital Ultraviolet Radiometers

- Measure UV Intensity with ±5% Accuracy
- Reliable Solid-State Circuitry
- Calibrated to NIST Standards
- Perfect for Calculations
- Durable Plastic Case

DM-254X and DS-254E precisely measure the UV output of EPROM erasers. They make erase time calculations easy and accurate, and are perfect for monitoring the useful life of your eraser's UV source. The DS-254E not only measures UV irradiance, but actually calculates proper erasing time. Both units feature 4 1/2 digit LED display, measuring range 0-19, 990μW/Cm² with accuracy of ±5%. Calibrated to NIST standards. Both come complete with four non-rechargeable, 1.5V alkaline batteries.

PC-Series Cabinets

- Large Capacity, Ultra-High Intensity
- Complete Erasing in Less than 5.5 Minutes
- Erase from 84 to 336 Chips Depending on Model
- Accepts PC Boards from 8" x 12" to 32" x 12"

PC-1100A, PC-2200A, PC-3300A, and PC-4400A Erasing Cabinets are specifically designed for high-volume production requirements. In as little as 5.5 minutes, their high-intensity, UV grid lamps completely erase programmed memories. Quartz grids are mounted on a specular-aluminum reflector, providing uniform irradiance with a typical peak intensity of 18,500μW/cm². The 8" x 8" modular assemblies feature a special drop-in design making replacement quick and easy. As well as erasing individual EPROMs, these cabinets will accept various quantities of PC boards, wafers, and metric cards. The PC-3300 and PC-4400A will accommodate open-face stocking tubes. UV-absorbing light indicators signal when grids are lit. Chamber temperature is controlled by powerful internal cooling fans, maintaining maximum UV intensity and prolonging grid life, which is rated at 5000 hours. Also features adjustable tray to ensure optimum exposure.

Periodic Wrist Strap Tester

The 3M Model 746 Wrist Strap Tester is a compact unit that can be used for daily testing in a production facility; periodic testing at telephone central offices and remote sites; and by field service personnel. The "Tester" comes with a 110/120 AC adapter and the unit can be wall-mounted. A long-life lithium battery provides back-up power for portable applications or during power failures.

Shoe Grounding Assembly

This long lasting assembly effectively grounds personnel when they are in contact with conductive flooring. One size fits most shoes and boots. A comfortable elastic handle strap and 24-inch long conductive ribbon for insertion into the shoe complete the ground path to the operator. To be effective, the shoe grounders must be worn on both feet. Models are available with a one megohm or a 240K ohms resistor. Contains a one megohm resistor. **Note: The 2051 Grounding Assembly is not to be used in areas where**

the individual may come in contact with electrical circuitry exceeding 250 volts.

Bag Check

The 705 Bag Check provides an easy way to identify 3M 2100E/2110E Static-Shielding Bags which are suitable for reuse. Three resistance ranges (0-1 K, 0-10 K, and 0-50 K ohms) can be selected to verify the "around-the-bag" electrical resistance of the bag. Red and green LEDs indicate test results. A calibrator is included with each bag check. An A/C Adapter is optional.

Dissipative Three-Layer Floor and Table Mats

3M 8200 Series Mats are soft table and floor mats with a unique three-layer construction. The top layer is durable static-dissipative vinyl which has sufficiently low resistivity to discharge static-laden conductors, yet will prevent the shorting of pins on the backs of printed circuit boards laid on the mat.

8200 Series Floor Mat

Includes one 15 ft. (4.6M) 3040 Ground Cord and two 3050 Female Snap Fasteners (installed).

Stock No.	Mfr.'s Type	Description	EACH

Work Station Monitors

Work Station Monitors use DC current to make a resistance determination. They continuously pulse a signal which is returned to the monitor through a special wrist strap and cord that contain two separate sets of independent conductors. They measure operator resistance to ground, have a resistor by-pass warning, use a safe, low current signal pulse, provide dual ground paths, and have passive system actuation. Remote Input Jack Size: 3/16" x 1" x 1/2".

Scotch™ 40 Anti-Static Utility Tape

— NEW —

3M Scotch™ 40 Anti-Static Utility Tape represents a breakthrough in PSA tape technology. This new tape, which generates less than 50 volts on unwind and removal from stainless steel, helps prevent ESD damage to sensitive electronic components in manufacturing environments. Use this tape a third hand to hold work orders, notes or documentation in place, or to hold down obstructions. This tape can also be used as a sealing tape to secure static shielding bags, boxes containing electronic components, DIP tubes or to hold IC rails.

Power Units

NOTE: All American Beauty power units are standard 120 VAC, 60 Hz, with 3-wire cord and NEMA plug. Also available on special order for 220/240 VAC, 60 Hz. All power ratings based on 50% duty cycle.

Variable Power Control Unit

Infinitely variable, stepless dialing. Ideal where precise settings and repeatability are essential. Dial reads zero to 100, gives exact guide for duplicating heat output at a later date. **Wattage Range:** 0 to 100 W. Pilot light. Fuse. Ventilated steel case, 3 3/4" x 3 7/8" x 5 1/4" (9.53 x 9.84 x 13.34 cm) with black and white crackle finish. **Shipping Weight:** 7 1/2 lbs. (3.40 kg). **709-2303.** Model 105-A3-120.....EACH 207.80

V-3500 Variable Voltage Dual Soldering Station

- ▶ Output Voltage Infinitely Variable from 0% to 100% of Line Voltage
- ▶ Accepts Miniature and Pencil-Type Irons Up to 50 Watts
- ▶ 3-Conductor Power Outlets for Two Irons (Irons Not Included, Order Separately)

Gives the operator simultaneous, independent control of two soldering irons for special purposes such as: a) alternate use of two irons to compensate for large heat requirements; b) when different size irons are needed by the same operator; c) controlling iron output during idle situations.

709-3500. Model V3500.....EACH 181.00

5000 Series Temperature Controlled Soldering Stations

- ▶ Holds Temperature to Within $\pm 5^\circ\text{F}$ (9°C) or Less
- ▶ Zero Cross-Switching, Total Grounding of the Station's Iron and All-Metal Housing to Protect Sensitive Work
- ▶ Iron Completely Isolated when Idling in Station's Spring-Type Holder
- ▶ Iron Equipped with Paragon Quality Tip No. 646 (Chisel)
- ▶ Deep-Well, Self-Moistening Tip Cleaner
- ▶ Meets or Exceeds MIL SPECS, Including DOD-2000-1B
- ▶ 120 AC, 60 Hz 3-Wire Cord, NEMA Plug

Three 50-watt all-electric stations. Each utilize a different mode of temperature selection to meet different needs. **Overall Size:** Length — 8 7/8"; Width — 3 3/4"; Height — 8 1/4" (22.54 x 9.53 x 20.95 cm) including soldering iron holder.

Model 5000. Offers continuous temperature selection from 600° to 800°F. **709Q5000.** Model 5000.....EACH 318.00

Model 5100. Specifications similar to Model 5000 except temperature selection limited to four most used settings — 600°, 650°, 700°, 750°F (316°, 343°, 371°, 399°C). **709Q5100.** Model 5100.....EACH 318.00

Model 5200. Specifications similar to Model 5000 except that this model has no external temperature controls. Temperature set by supervisor by means of selector control inside of cabinet. Settings limited to 600°, 650°, 700°, 750°F (316°, 343°, 371°, 399°C). Replacement sponges and Paragon Quality® tips are available from your Allied Distributor. **709Q5200.** Model 5200.....EACH 318.00

Variable Power Control Unit with Automatic Switching

Same as 105-A3-120, except for cradle-type ON-OFF switch for wirestripping applications. Power turns ON when handpiece is lifted from cradle, OFF when handpiece is returned to cradle. Eliminates need for footswitch. Extends element life. Saves power. **Shipping Weight:** 7 1/2 lbs. (3.40 kg). **709-6060.** Model 105-A3T-120.....EACH 258.60

Medium Power, Infinitely Variable Unit

A power range of 0 to 250 watts (0.8 to 2.8 volts) makes this unit a desirable power source for a wide variety of handpieces. Combines rugged construction with economy and convenience. Stepless dialing from 0% to 100% of power range for precision and repeatability. Has ON/OFF switch, pilot light and fuse. Ventilated steel case with black and white crackle finish. **Size:** 7 1/8" x 4 1/2" x 3 11/16" (18.10 x 11.43 x 9.37 cm). **Shipping Weight:** 7 3/4 lbs. (3.52 kg). **709-6050.** Model 105-A12-120.....EACH 296.80

Footswitches

For foot control of all power units up to an including 1000 W. Eliminates sparking on contact and removal of electrodes from work. Provides more accurate timing of soldering operations. Recommended in most applications. A rugged industrial switch with six-foot (1.83 m), three-wire cord and NEMA plug. **Shipping Weight:** 1 lb. (.45 kg). **709-2310.** Model 10519. 1-4.....EACH 40.00

Solid State, Temperature-Controlled Solder Pots

Model 675 features remote control module with solid-state, close tolerance temperature control $\pm 5^\circ\text{F}$ from set point. Meets or exceeds all MIL spec. requirements including DOD-2001-B. 400-800°F range. 2 3/4 lb. capacity. Removable dross skimmer included. Permanently attached control module can be placed up to 18" from solder pot.

709Q675. Model 675.....EACH 667.80

Surface Mount Handwork System Kit — NEW —

Designed for rework, salvage and manual fabrication of SMD circuits. One tool does it all — holds the SMD, solders and desolders. The handpiece is a micro-tweezer whose gripping points are also heating elements, specially shaped to work between closely spaced SMDs. To protect adjacent components, traces and substrates, no heat is applied until the tweezer is firmly positioned. Only then is current turned on via Footswitch to supply a controlled level of heat — just enough for soldering and desoldering of two size flat pack SMDs. The kit consists of the Power Unit (105A3-120V), a Footswitch (10519), Elements (105156, 105157, 105160), and a 105131 handpiece.

709Q6070. Model 105SMD-120. Kit.....EACH 417.50

Temperature Regulating Stands

Maintain soldering iron at preset safe idle temperature, during downtime. Fast return to full on. Extends element life, prevents cooking and detinning tips. Saves current. **Note:** For perforated guard (as shown) add "SG" to catalog number. 3-wire cord with NEMA plug, standard.

Tweezers

Regular Tweezer

For "squeeze and pull" stripping of thermoplastic insulation from wires up to 14 gauge. Now improved to meet increasing need for faster stripping of "tough" insulations such as Teflon and other PTFE-based materials. Now accepts special flat-blade heating elements designed to mount at 90° for a more powerful bite. Still accepts standard elements that mount at 45°. Strips lengths 1/8" to 1 1/2" (3.18 to 38.10 mm). Use with 15 to 100 W power (50 W for continuous operation; 100 W with intermittent switching). **Length:** 4 1/2" (11.43 cm). **Weight:** 4 oz. (.11 kg). **Cord:** 4' (1.22 m). **Shipping Weight:** 1 lb. (.45 kg). **709-2319.** Model 10517. 1-3.....EACH 114.00

Dri-Wick® Fine De-Soldering Tool on a Spool

Tested, proved...and backed by American Beauty. Dri-Wick is used in U.S. space program, at flight centers and by subcontractors. Proved most efficient for de-soldering, re-work, salvage. Any place you can put solder, you can remove it in a second with Dri-wick. Lay Dri-wick on joint and apply tip of hot soldering iron. Capillary action draws out all solder, leaves joint clean, ready for salvage or rework. Specially woven copper, each strand coated with water-white resin. Packaged 5 ft. per spool, 25 spools per carton. (No. 484-6, 2 1/2 ft. spools.) Six widths. Test quickly indicate best width to use. Table below gives general guidance.

Soldering Irons for Microelectronic Circuits

- ▶ Long-lasting Elements → Designed for Production Line Service
- ▶ Heat to Full Operating Temperature in Seconds ... Hold Constant Tip Temperature
- ▶ Safe for Delicate Components
- ▶ Maximum Heat Transfer Efficiency with Slide-on Replaceable Tips
- ▶ All Models Meet OSHA Standards for Safety
- ▶ 3-Wire Ground Plug

Soldering irons ruggedly built for long-lasting, heavy-duty service and production line use. Fast heat-up and recovery time, efficient heat transfer assure steady tip temperature and superior performance in all microelectronic soldering applications. Low current leakage and near-infinite insulation of heating elements from tip eliminate risk of damage to transistors, integrated circuits and other delicate components, and assure safety of the operator. Interchangeable tips in a variety of sizes and shapes cover a full range of soldering requirements. No set screws to freeze and break. Three models, three power ranges: 15 watts, 18 watts, 25 watts. Cords are ultra-flexible for easy handling. For 110-120 V, 50-60 Hz AC.

Spirally Cut Cable Wrap

U.L. Recognized Heli-Tube® is a spirally cut, expandable plastic cable harness. Bundles wires, cables or hoses firmly but allows flexibility. Wraps on like tape, can be re-used, quickly and simply. Resists abrasion and insulates. Clamps bundles to standoff. Dampens vibration. Can have wire breakouts in any orientation. Wires can be routed or re-routed after Heli-Tube® is in place; either new wires or replacement wires. Stocked by Allied in 100' spools of Clear Polyethylene, Black Polyethylene, and Black Fire-Resistant Polyethylene. The Clear Polyethylene is a low cost material ideal for general applications. Not affected by ordinary solvents and

extremely resistant to abrasion. **Maximum Operating Temperature:** 101°C to 215°F. **Minimum Operating Temperature:** -76°C to -105°F. **MIL Spec. and Approvals:** Fed. Spec. LP390, MIL 1631D, MIL P26692. The Black Polyethylene is ultra-violet-resistant which permits it to be used in direct sunlight for long periods of time. Same temperature range and MIL spec. as Clear Polyethylene. The Black Fire-Resistant Polyethylene is self-extinguishing. **Maximum Operating Temperature:** 93°C to 200°F. **Minimum Operating Temperature:** -19°C to -1°F.

Solid-State Temperature Controlled Solder Station

Auto-temp solder station for precise temperature control. Features electronically controlled low-voltage system and LED power indicator. User-set temperature with front panel control. Fast warm-up. CMOS-safe, fully grounded conical tip included — a wide variety of tips available. Provides accurate control over a range of 200° to 900°F with meter indication of exact temperature at all times. Designed for production or service of sensitive electronic circuits. **Specifications.** Line Voltage: 110-125VAC. **Heater Power:** 48W. **Heater Voltage:** 24V. Comes with tip, cleaning sponge, and iron holder.

EACH 119.40

Replacement Tips

Iron-clad copper tips — premium quality, long life for continuous heavy-duty soldering.

Solder Popper

The Solder Popper combines the popular snap-vacuum solder removal tool with a soldering iron for fast, one-hand operation, and is an excellent tool for field repair or production work. Has a tightly sealed vacuum pump that snaps up all of the solder quickly. A removable reservoir stores solder and cleans out in seconds. The 30-watt iron melts solder rapidly and features a long-life tip that unscrews for easy replacement.

Precision Probes

Stainless steel probes that have been popular for a long time are now even more valued as soldering/desoldering aids in SMD assemblies. Stainless is non-contaminating, static-free and will not solder. Needle point tips permit exact placement. Hex handles prevent rolling, allows better grip.

Solder Wick (Pure Copper)

GC/3S Wick is a superior solder absorbing wick for complete solder removal. Wicking starts faster than with conventional wicks due to a unique rosin. Faster wicking means for less trouble with excessive heat that damages components and PC board traces. Available on 25 ft. or 5 ft. spools.

Tempmaster Soldering Iron

The Tempmaster is an iron for practically all uses. The temperature may be user-set from very low (barely melting 60/40 solder) up to 840°F for brute-force work. Lower temperatures at about mid-range are ideal for most assembly and service work. Higher ranges may be used when heating large areas or solder removal braid. Temperature setting is readily adjusted by turning a control on the handle with a screwdriver. The Tempmaster has a grounded tip via 3-prong U-plug for ESD damage prevention. Replacement tips are available in a variety of shapes (see GC Nos. 12-072 through 12-078).

796-1248, Model 12-048 EACH 48.75

25 Watt Soldering Iron

A well made iron that is tough enough for daily use in production or at the service bench. Three-wire grounded tip prevents inducing ESD failures. A wide range of long-life tips is available (Nos. 12-072 through 12-078) for special applications.

796-1238, Model 12-038 EACH 29.58

Featherweight 16 Soldering Iron

A fine tipped iron that is ideal for soldering or desoldering in delicate circuits. Lightweight and very easy to handle. Sixteen watts keep temperature lower for safe work with ICs and other heat-sensitive devices.

796-1225, Model 12-025 EACH 17.52
Replacement Tip
796-1226, Model 12-026 EACH 2.97

Heat Gun

UL Listed, 115V AC. A dual range heat gun for use in heating shrink tube and drying coatings, adhesives, etc. Low temperature range setting produces a nominal 700°F (2,000 BTUs), high range 975°F (4,000 BTUs). Maximum setting draws 10 Amps, low heat draws 5 Amps. A light weight design that is easy to handle. Designed so that it may be put down to cool without a special holder.

796-1297, Model 12-997 EACH 73.81

15pc Electronic Tech. Tool Kit

A compact and complete quality kit of precision tools. "Excellent kit for the lab or field technician." The pliers of this kit are constructed of drop forged steel for durability, with an excellent cutting edge. This kit also includes 6 precision jeweler's screwdrivers, measuring tape, and a useful utility knife. These tools are packed in high density foam in a sturdy plastic carrying case for organization and longevity. Contains the following: 4 1/2" end nipper plier, 4 1/2" needle nose plier, 4 1/2" diagonal cutting plier, 4 1/2" long nose plier, 4 1/2" bent nose plier, 4 1/2" flat nose plier, 4 1/2" lineman's plier, 6 pc. precision screwdrivers, 1 yd. measuring tape, and 5 1/2" utility knife.

796-1277, Model 12-277 EACH 124.59

P-1 Cordless, Refillable Butane Gas-Power'd Soldering Tool

Designed and engineered for micro-precision soldering applications, the patented Portasol® soldering tool is cordless, refillable, and operates up to 90 continuous minutes on standard butane lighter fuel. The tool is ergonomically designed to minimize operator fatigue, at a weight of 2.5 oz. and length of less than 7", can be used for virtually any anti-static* soldering or desoldering applications. The tool eliminates all risk of leakage current to sensitive circuits and allows anti-static soldering. Product features include a fast, flint sparked ignition in the cap and an adjustable temperature control for providing the equivalent of 10-60 watts of power. This allows the tool to melt solder in less than 40 seconds. Refilling the tool is simple and takes only 20 seconds. The unit comes standard with 2.4 mm (3/32") soldering tip. A complete range of optional soldering tips, 1.0 mm (1/32"), 2.4 mm (3/32"), 3.2 mm (1/8"), 4.8 mm (3/16"), and heat tool accessories make the unit ideal for a variety of applications. Heat tool accessories include a blow torch, hot blower and hot knife.

Kester "44" Rosin Core Solder

Fast-acting and instant wetting design allows for faster soldering. The non-corrosive, non-conductive flux is ideal where a strong, long-lasting bond is needed. Available in any size ranging from .005" to .250". Also available for Fed Spec QQ-S-571d. Two standard put-ups: 1 lb. and 5 lb. spools; 20 lb. spools available on special order.

Flux Pens

Kester Flux Pen is a unique tool for rework and touch-up soldering. It allows controlled application of flux, eliminating the mess from flux bottles. The chisel point allows for work in very confined spaces. The flux pen is ideally suited for tab assembly no-clean and surface mount rework application because it can deliver flux to a specific area.

Ultratorch® Heat Tools

- ▶ Most Complete Line of Heat Tools to Choose From
- ▶ Top Quality Tools for Professionals
- ▶ Featuring "New" Self-Igniting Models
- ▶ Easy to Handle
- ▶ Instant Heat
- ▶ No Electrical Interference
- ▶ Complete Range of Soldering and Heat Tip Sizes Available

Introducing the most complete line of multifunctional portable soldering irons, butane torches and flameless heat tools. They are completely cordless, running on butane refill fuel, which means no AC current or battery is required. There is no electrical leakage or radio interference.

These unique heat tools perform a variety of tasks . . . from soldering to shrinking and terminating insulated solder preforms and environmental splices. They are lightweight and easy to handle, so you can carry them with you to any job.

Newly introduced to the line are the self-igniting models.

UT-100 and UT-100Si

UT-100 — Compact, Yet High-Performance Heat Tool

The Standard Ultratorch comes complete with one ejector for soldering and heat tip applications; and one ejector for torch applications. Also included is a heat shrink attachment, a tool holder, a solder sponge, a spanner wrench, soldering tip, heat tip and a metal carrying case. Optional accessories available.

861-1500. UT-100.EACH 108.90

UT-100Si — Self Igniting Model

UT-100Si comes complete with one ejector for soldering, a soldering and heat tip, a spanner wrench, open end wrench, shrink attachment and protective cap. All existing UT-100 soldering and heat tips will also fit your new self-igniting UT-100Si Ultratorch. **Note: The self-igniting Ultratorch operates only as a soldering iron and heat tool. NO TORCH MODE.**

861-1311. UT-100Si.EACH 89.00

Optional Accessories

All available soldering and heat tips and attachments are interchangeable between UT-100 and UT-100Si.

Master Heat Gun® and Varitemp®

Both Master Heat Gun and Varitemp heat guns provide the following features:

- Double Protected Element Housing
- Reinforced, Mica-Insulated Ceramic Heating Elements
- Sturdy Die-Cast Aluminum Housing Is Rugged and Light Weight
- Adjustable Air Intake Controls Air Volume And Temperature Range
- Powerful High Speed Universal Motor
- Externally Accessible Brush Holders

Master Heat Guns®

The number one choice of industry. Has a rugged aluminum die-cast construction for heavy duty use. Four models provide temperatures up to 300°F, 500°F, 750°F and 1,000°F. "Wherever fast, portable flameless heat is the need."

Varitemp®

- The Varitemp Provides A Safe Way To Heat Sensitive Materials Such As Thermoset Resins and Potting Compounds, When Exact Temperatures Are Needed
- The Dial-In Temperature Control Can Be "Locked-In" To The Required Temperature For Each Individual Job. This Feature Is Unique In That Once It Is Locked, It Cannot Be Accidentally Changed To An Incorrect Temperature

The Variable temperature version of the Master Heat Gun. One model provides temperatures from ambient to 1000°F. It also has identical air flow characteristics to the Master Heat Gun. We recommend using the Varitemp in the laboratory where specific temperatures are required. It is also recommended for spot drying, defrosting and softening thermoplastic sheet, rod and tubing. All Master Heat Gun® attachments are interchangeable with the Varitemp® heat gun.

The Master-Mite® Heat Gun

The Master-Mite is a lightweight complete bench-top heating system, equipped to perform jobs without the excess air flow. It comes standard with an adjustable stand, a standard 650°F (343°C) heating element and a heat shrink attachment. The air flow rating is 3.8 CFM 700 FPM.

Weighing only 28 ounces, the Master-Mite can be hand-held for jobs such as vinyl repair or drying film without causing operator fatigue. The adjustable stand allows the operator to work with both hands free. The quiet operation and low power draw (4.5 amps, maximum) of the brushless continuous-duty motor, assures you of a quiet work environment. Size: 8.875" L x 3.375" W x 7" H. Nozzle Opening Dia.: 1". Heating Element: 3.875" long. Net Weight: 1.75 lbs. Shipping Weight: 3 lbs. Cord Length: 7 ft.

The Masterflow® Heat Blower

The Masterflow heat blower is the perfect answer wherever a continuous high volume of dry hot air is needed. It is ideal for installation on machinery and equipment for localized heating applications. The non-slip rubber-backed base permits a full 90° rotation of the blower for use in any position on workbench or assembly line. Three models offer temperatures of 300°, 500° and 750°F (150°, 260°, 400°C). The Masterflow features a quiet, oversize squirrel-cage blower which delivers up to 47 CFM 2,200 FPM through a 1.875" diameter nozzle and a brushless shaded-pole motor for continuous 24-hour operation. The hot/cold/off toggle switch permits blowing cool air which cools down the heating element after use and eliminates residual heat. Overall Dimensions: 12" L x 6" W x 9" H, 6" x 6" base (except AH-301 and AH-302, 9" L x 6" W x 9" H. Nozzle Diameter: 2.625" O.D., 1.875 air opening. Net Weight: 6 lbs. Shipping Weight: 8 lbs. Proheat® Heat Gun and Proheat Varitemp® Heat Guns

Proheat® Heat Gun

This heat gun with temperature settings of 570° and 1050°F (299 and 565°C); and airflow of 15 CFM at 3650 FPM meets the requirements of most materials. The variety of attachments available makes the Proheat heat gun adaptable for a wide variety of uses including aircraft and marine applications.

The Proheat features a DC permanent magnet motor that is compatible with all electrical frequencies. The compact, ergonomically-designed "Lexan" housing, enclosed ceramic heating element and wrap-around air intake assure you of a lightweight (1 lb. 10 oz.), easy-to-use source of flameless heat whether you're working with shrinkable packaging materials, spot-drying paint, bending plastics/laminates or activating adhesives.

*Registered Trademark of General Electric.

Proheat Varitemp® Heat Gun

This easy-to-use heat gun offers all the features of the Proheat heat gun, plus variable temperature control that allows the user to dial in any temperature from ambient to 1050°F (565°C). The airflow rating is 15 CFM at 3650 FPM. Its thermostatic control maintains the pre-selected temperature and prevents heat back-up or overheating when airflow is restricted. The Supervisor Temperature Lock-in feature allows pre-setting or temperature and sealing of access opening to assure compliance with pre-set temperature.

The Proheat Varitemp is suited to applications such as activating adhesives and potting compounds, curing and setting adhesives and epoxy resins. It is ideal for use in confined spaces or for applications where its lightweight construction can prevent operator fatigue.

SA-500 Series Soldering Stations

- ▶ High Power Soldering with No Trade-Offs
- ▶ 600°F to 800°F Operating Range for Multi-Application Use
- ▶ Precise RTD Temperature Control for Excellent Stability and Repeatability
- ▶ Powerful 70W Heating Element for Quick Recovery on Heavy Joints
- ▶ Six Extra-Fine, Fine and Heavy Duty Tips Listed Below, More Available as Special Order
- ▶ Directly Grounded Tip to Meet MIL-STD-2000 Resistance and Voltage Requirements
- ▶ Light-Weight, ESD-Safe Handle for Maximum Operator Comfort, Component Safety
- ▶ Low Profile, Small Foot-Print Housing Uses Minimum Bench Space
- ▶ Low Cost, High Reliability with 12 Month Station Warranty

Hand soldering in the 1990s will require a highly flexible station; one with high power for boards with exceptional thermal demands, a wide range of tips for standard and micro components and consistent performance for cost-effective and reliable results. OK Industries SA-570 Series is a part of a new generation of soldering products with no trade-offs; designed for quick recovery, durability and low cost.

IC Insertion/Extraction Kits, Tools and Accessories

Insertion/Extraction Kit

WK-7, a kit of DIP IC extractors and inserters to accommodate all ICs from 8 to 40 pins. All tools that engage conductive surfaces are CMOS safe and include grounding lugs where appropriate. The kit consists of extractors EX-1 to 14-16 pin devices, and EX-2 for 14-16 pin devices, and EX-2 for 14-16 pin devices, and EX-2 for 14-16 pin devices.

827-4007. Model WK-7 Kit.....	EACH 75.00
-------------------------------	------------

Insertion/Extraction Tools

For highly sensitive MOS and CMOS ICs. Ground strap may be easily attached. Durable chrome ABS construction features precision parts for long life and easy on-hand operation. For use with DIP sockets.

827-1417. MOS-1416.....	EACH 18.95
-------------------------	------------

For easy insertion of 24-28 pin ICs, same features as MOS-1416. For use with DIP sockets.

827-1420. MOS-2428.....	EACH 19.50
-------------------------	------------

This insertion tool also aligns bent-out pins. A twist of the handle compresses the pins to proper .600 inch spacing and locks the IC into the tool. Then simply place the tool on the socket and depress the plunger for instant and accurate insertion. Features heavy chrome plating throughout for reliable static dissipation. Includes terminal lug for attachment to ground strap. For use with DIP sockets.

Circuit Troubleshooting Kit

- ▶ Spring Loaded Guides to Accommodate Different Board Sizes
- ▶ Angled Board Position for Ease of Use
- ▶ Adjustable Foam-Lines Retaining Cover
- ▶ Removable Center Bar
- ▶ Replaceable Foam and Conductive Foam Available

These four printed circuit board holders are constructed of rugged steel components for durability as well as stability in use. The frame rotates a full 360° and steel backed foam cover opens (from either end) to expose component side of PC board for stuffing components, testing, or assembly work. Close and lock cover to hold components in place then flip over frame on pivot to allow for final work on PCB.

Lead Bender Crimper

LB-100. Unique lead bender and crimper handles all common axial components and can be used on many radial and "TO" packages as well. The lead bending section enables simple right-angle layover of leads on any centers from 0.375 to 1.500" (9.5-38.1 mm) while an additional feature enables "vertical" bends. For applications requiring "stand-off" or "snap-in" lead forms, just use the built-in crimper. This device is easily adjusted for both lead diameter and crimp size and requires no additional tooling or die changes. Simply set the adjusting screw, insert the lead, and crimp. May be hand-held or mounted in a vise.

827-1100. Model LB-100 EACH 28.75

Portable Wire Wrapping Tool (Model BW-2630)

Quick on the draw, on performance and durability. The pistol grip design Model BW-2630 is a revolutionary, rugged ABS construction wire-wrapping tool that operates on 2 standard "C" Nicad batteries (not included) and accepts either of two specially designed bits. Bit Model BT-30 is for wrapping 30 AWG wire onto .025" square pins; BT-2628 wraps 26-28 AWG wire. Also includes both positive indexing and anti-overwrapping mechanisms — features usually found on models of this type costing much more.

Pur-Air Fume Extraction And Purification Systems

Soldering Station

Easy Fit Piping

Flexible Pipe

5 Station Unit

Typical Pur-Air 5 Station Application Using EP-051 KS Kit

- ▶ Three Stage Filtration To Class 100 Cleanroom Standard
- ▶ Exhaust Can Be Recycled Back Into Workshop
- ▶ Low Noise Level (50 dB)
- ▶ 34 Liters/Min. At Each Tip Extraction

Exposure To Flux Fumes (And Other Gases) Is Known To Cause:

- ▶ Occupational Asthma
- ▶ Irritation To Eyes, Nose And Throat
- ▶ Excessive Employee Sick Time

With today's concern about occupational asthma and personal exposure to flux fumes, OK Industries has launched a range of extraction and purification systems which comply with OSHA standards. OK Industries Pur-Air Systems incorporate a HEPA (High Efficiency Particle Air) filter which removes 99.997% of all airborne particles down to .3 micron, chemical/gas filter which eliminates the hazardous gases and noxious odors from the solder fumes, and a prefilter for removing large particles. These kits are complete turnkey systems that provide fool proof custom set-up for most applications. 115 V, 60 Hz.

7100/7200 Circuit Works Conductive Grease

Circuit Works Conductive Greases provide electrical and thermal conductivity, proven lubrication properties, and protection from moisture, oxidation and other environmental hazards. 7100 Circuit Works Silver Conductive Grease. Contains pure silver for maximum electrical and thermal conductivity while maintaining superior lubrication properties. 7200 Circuit Works Carbon Conductive Grease. Relies on cost-effective carbon for good conductivity and lubrication properties. Both greases are inert, thermally stable over a wide temperature range, and exhibit excellent lubricating properties when used at low to moderate loads and speeds. Circuit Works greases use advanced silicone lubrication technology to protect components against moisture, corrosion, radiation and oxidation while remaining compatible with metal, rubber and plastic.

4300 Circuit Works Quick-Bond Kit

Circuit Works Quick-Bond Gel and Accelerator. Provide strong instant bonding of metals, rubbers, and plastics in design, prototype and repair applications.

Not for use on polyethylene or polypropylene.

- ▶ Provides Strong, Instant Bonding to Rubbers, Metals and Plastics
- ▶ Gel Formula Is Easy to Apply and Stays in Place; Ideal for Filling Gaps, Wide Tolerances or Bonding Dissimilar Materials
- ▶ Triple Distilled Cyanoacrylate for Long Shelf-Life and Improved Adhesive Performance
- ▶ Quick-Bond Accelerator Insures Reliable Instant Bonding
- ▶ Accelerator Is Safe for Metals, Plastics and Rubbers; Contains No Ozone Depleting Materials
- ▶ Adhesive Features Excellent Resistance to Impact, Weathering and Thermal Cycling

Circuit Works Quick-Bond Gel is a nonmigrating cyanoacrylate gel that provides superior bond strength on a variety of materials and features excellent resistance to thermal cycling, impact and weathering. The gel is easy to apply and will not flow to unwanted areas after application. Quick-Bond Accelerator can be painted on or applied directly over Quick-Bond Gel for instant bonding. Recommended for design, prototype and repair applications, Circuit Works Quick-Bond Gel features excellent adhesion to plastics, rubbers and metals and is ideal for filling gaps, wide tolerances, or bonding dissimilar materials. Use Quick-Bond Gel to fixture surface mount components, tack jumper wires, mount components, provide strain relief and for shallow potting applications.

Quick-Bond Gel bonds in 30-60 seconds without accelerator. Brush on or apply accelerator directly over adhesive. Instant bonding will occur. Adhesive is cured in 5-10 seconds after contacting accelerator. Allow 243 hours for maximum properties. Service temperature is -65°F to 200°F (-54°C to 93°C) with a softening point of 329°F (165°C). Aluminum-to-aluminum tensile strength is 3770 psi.

Micro Tip 2200 Circuit Works Conductive Pen

Use to: Repair, Prototype, Shield, Connect, Jumper and more....

- | | |
|-------------------------------|-----------------------------|
| New Micro Tip Version | ▶ Improved Silver Conductor |
| ▶ Fine Line Conductive Traces | ▶ Precise Trace Application |

- | | |
|--|--|
| ▶ Makes Instant Conductive Silver Traces | ▶ Lower the Cost of PCB Fabrication and Repair |
| ▶ Dries in Minutes at Room Temperature | ▶ Speed Prototype and Design of PCBs |
| ▶ Valved Pen Tip for Easy Application | ▶ Cut Rework Time and Materials |
| ▶ Can Be Soldered at Low Temperatures | |
| ▶ Use Where Conductive Traces Are Needed | |

Draw precise conductive silver traces, jumpers and shielding as easily as writing with a 2200 Circuit Works Conductive Pen. The new Micro Tip version applies fine line conductive silver traces with added precision. Circuit board traces can be repaired easily and quickly. Try this improved version of the 2200 Circuit Works Conductive Pen on your next repair, prototype or rework project.

Use the 3300 Circuit Works Overcoat Pen to repair solder mask for complete circuit board repair.

974-0005. 2200-MT.....	EACH 12.95
------------------------	------------

3300 Circuit Works Overcoat Pen

- ▶ Insulates Against Shorting and Arcing
- ▶ Protects Against Abrasion, Moisture and Chemicals
- ▶ Helps Prevent Static Discharge Problems on Sensitive Circuits
- ▶ Matches the Coloring and Durability of Solder Masks for Nearly Invisible Repairs
- ▶ Dries in Minutes at Room Temperature with Minimal Shrinkage
- ▶ Compatible with the 2200 Circuit Works Conductive Pen

Planned Products brings together valved pen and conformal coating technologies in the Circuit Works Overcoat Pen. The 3300 pen applies a tough conformal overcoat to protect and insulate circuit boards, components and delicate electronics as easily as writing. Used primarily to repair solder mask, the 3300 Circuit Works Overcoat Pen makes it easy to insulate against high-voltage arcing and corona shorts in addition to protecting against moisture, abrasion, chemicals, fungus and other environmental hazards. Use the 3300 Circuit Works Overcoat Pen to speed research and development, design, prototype and repair projects. The 3300 overcoat material improves the reliability of circuit board modifications and repairs by eliminating the possibility of shorting, arcing and environmental damage. Engineers, technicians and hobbyists are using the Circuit Works Overcoat Pen to cut rework and repair costs while speeding their design, prototype and repair projects. The 3300 material air dries in 5-10 minutes at room temperature to a

circuit works
overcoat pen

durable tack-free protective coating. The material can be heat cured at 250-300°F in 10-15 minutes for demanding applications. Maximum temperature is 400°F, which allows the material to act both as a spot solder mask for inline soldering operations and a durable conformal overcoat for modifications and repairs after soldering. At higher temperatures, the material can be soldered through for easy board modification and repair if necessary.

2400 Circuit Works Conductive Epoxy

- | | |
|---------------------------------------|--|
| ▶ Solderless Electronic Connections | ▶ Two Part, Easy to Mix, 1 to 1 Ratio System |
| ▶ Quick No or Low Heat Cure | ▶ Convenient Tubed Packaging |
| ▶ Strong Electronic Component Bonding | ▶ Small, Cost Effective Quantities |
| ▶ Maximum Conductivity | |

Use this two part electrically conductive silver epoxy for quick connections and bonding in electronic design, prototype and repair projects. Applications include circuit board repair, surface mount connections, static discharge, shielding and grounding. The material is ideal for solderless connections and bonding of heat sensitive components. The 2400 Circuit Works Conductive Epoxy bonds aggressively to a wide variety of materials including solder, mylar, glass and copper.

The new epoxy shows good conductivity in 8 hours and is fully cured in 24 hours at 75°F (24°C). Rapid curing is still possible in 10-15 minutes with heating to 212°F (100°C). The

circuit works
conductive epoxy

new formulation provides even better conductive room temperature bonding for circuit repair, surface mount connections, static discharge and grounding applications. The new material is ideal for solderless connections and conductive bonding of heat sensitive components.

Use this product with the 2200 Circuit Works Conductive and 3300 Overcoat pens for complete design, prototype and repair.

Weller® Ungar 2024 Series

The 2024 service center is a shop air tool used for electronic repair and rework. Increased production is made possible by rapid heat up and vacuum response, with temperature variation from 500°F-850°F. Tiplet clogging is decreased with the built-in trigger time delay circuit. This feature insures complete flow of solder into the collector tube. The unit operates with either inline or pistol-grip style handles. Other features include the iron holder, which may be customized for the operator by allowing for adjustment of the angle. The 2024 is totally ESD safe.

984-9702. 2024IL. Desolder system with 5088AS inline desolder iron.....	EACH	693.00

Weller® WRS 3000

- ▶ ESD Safe, UL Listed
- ▶ Operator Lock-Out
- ▶ Completely Self-Contained
- ▶ Digital Readout
- ▶ Dimensions: 9.6" (W) × 4.1" (H) × 10.6" (L)
- ▶ Power Input: 300 W
- ▶ Meets MIL-SPECS
- ▶ Maximum Air Flow For The Hot-Air Pencil Is 10/L Min.; For Desoldering Vacuum Is 20.7 Hg
- ▶ Temperature Range For Hot Air Is 300°F-980°F; For Solder/Desolder It's 300°F-850°F

The Weller WRS 3000 is designed to handle all rework and repair of mixed technology boards. It has a built-in microprocessor that provides simultaneous controlled desoldering, soldering and hot air functions with complete accuracy and reliability. Temperature, hot air time and automatic temperature set-back can be programmed. An operator lock-out feature prevents any unauthorized changes. The WRS 3000 has its own internal pump — eliminating the need for shop air — and is compatible with both Weller and Ungar products and is totally ESD safe.

Weller® Ungar 4924 Series

The new 4924 service center is designed to handle virtually all repair and rework applications. Totally ESD safe, it can be powered continuously or by means of a foot pedal, and has three voltage ranges for use with a broad range of tools. The 4924 has its own internal pump — eliminating the

need for shop air — and is substantially quieter than older stations. Desoldering or heat shrinking is made possible by means of an air reversal switch, which changes from vacuum to hot air flow. Tiplet clogging is decreased with the built-in trigger time delay circuit. This feature insures complete flow of solder into the collector tube. Temperature can be controlled from 500°F-850°F for either of two desoldering handles and from 550°F-850°F for any of two 24 VAC soldering irons. An adjustable angled iron holder allows the unit to be customized to suit the operator.

Weller® Airex Fume-Extraction System

- ▶ Quiet Operation, Utilizes Factory Air Supply
- ▶ Compact — Requires Very Little Space
- ▶ Low Operation Costs
- ▶ Long Service Life
- ▶ Easy to Install
- ▶ Serves 1 or 2 Stations

AIREX is a complete 3-stage filter that insures 99.97% filtration of particles. It connects to soldering irons with integral fume extraction or converted soldering irons with a clip-on extractor kit.

Cordless Soldering Irons

Cordless convenience, lightweight and 50 W performance. Tip temperature reaches 700°F in 5 sec. Up to 125 soldered connections per battery charge. Nickel cadmium batteries feature long service life. Isolated-tip design eliminates electrical leakage and the need for grounding when soldering in delicate solid-state equipment. Designed for good "feel" and balance — only 8" long. Weight: 8 oz. Built-in light. Safety lock switch prevents accidental heating. Standard batteries recharge from charging stand or from 12 V automotive battery. Full line of accessories and several complete kits provide variety of selections.

"Quick Charge" Iso-Tip

Recharges in 3 to 4 1/2 hours from complete discharge. Nickel cadmium battery can withstand high-rate charging without damage (cannot overcharge).

Weller® WP Series Professional Soldering Irons

- ▶ Quick Change Knurled Collar Makes Changing Heaters Simple
- ▶ Small, Lightweight Handle Now With Cushioned Grip
- ▶ Iron-Plated Tips For Long Life and Greater Soldering Efficiency
- ▶ Ideal For A Wide Variety Of Electronic and Electrical Work
- ▶ Three Wattages Available: 25, 30 and 35 W

Weller introduces a new line of professional soldering irons with interchangeable heating elements. Just a twist of the knurled collar and the element can be unplugged and changed for the required wattage. Now a single handle plus three different elements effectively gives you a trio of irons to handle different jobs. For additional safety, all irons come with a three-wire cord. Heaters are available in 25, 30 and 35 watts plus 8 interchangeable, iron plated tips that make the WP Series suitable for a wide variety of electrical and electronic work.

Add the comfort of the new cushion grip handle, and you'll see why the Weller WP Series Soldering Irons are taking a turn for the better.

WCC100 Electronic Soldering Station

921ZX Soldering Station

Introducing Our Most Affordable Temperature-Controlled Station Ever

- ▶ Electronically Controlled-Zero Cross Circuitry
- ▶ Spike Free — ESD Safe
- ▶ Ceramic Heater Rated For Exceptionally Long Life
- ▶ Variable Control — Fully Adjustable 550°-850°
- ▶ Over 19 Tips Available Including SMT Tips
- ▶ External Fuse and Calibration Access
- ▶ Cool, Lightweight Handpiece

Now you can get the quality, dependability, and reputation of a Weller soldering station at a price that's very competitive. The ceramic heating element is exceptionally reliable and long lasting. Should it ever need replacing, the new element just plugs in. There are no tools required. The 24 V handle is not only safe, it is cool and comfortable. The 921ZX is electronically controlled and fully adjustable. It is ESD safe/MIL compliant. The 921ZX carries a full one year warranty, and you have the Weller/Ungar technical service department available to help you with any questions or problems.

Weller® EC Series Soldering Stations

— NEW —

EC2002M Series

The EC2002M Series has a three digit LED read out displaying temperature settings and tip temperature with resolution of $\pm 1^\circ\text{F}$. Tip temperature "set" mode included in the dial control. With the addition of the WCM1-Calibrator the station has the following features; user calibration, lockout, $\frac{1}{2}$ read out, temperature set-back and automatic shut off. Continuously variable tip temperature from 350-850°F. Positive temperature coefficient sensor deep inside tip provides temperature feedback to maintain tip temperature at set point. Zero crossing control of heater current to eliminate RF/EMI and accurate time proportioning to reduce tip temperature hysteresis are features of the control circuit and ensure against any high voltage spikes or magnetic fields on the soldering tip. A transformer isolates the EC power unit from the AC line. External fuse allows easy maintenance by user. 24 VAC isolated voltage drives the heating element. The irons are interchangeable on all EC units and do not require recalibration. Power unit provided with extra large sponge and iron holder. All EC stations meet the following Mil Specs DOD STD 2000-1A, DOD STD 1686, Mil-S-45743, W-S-6356 and W-S-570.

EC1002 Series

The EC1002 Series is a dial controlled electronic soldering station. The dial is calibrated in 10°F (6°C) steps and provides accurate temperature control at all times. The control of the station ensures maintenance of the temperature selected ($\pm 10^\circ\text{F}$). The unit is fully calibratable by the user and has an external fuse for ease of maintenance. The irons are interchangeable on all EC units and do not require recalibration. Power unit provided with extra large sponge and iron holder. All EC stations meet the following Mil Specs DOD STD 2000-1A, DOD STD 1686, Mil-S-45743, W-S-6356 and W-S-570.

Controlled Output Station

- Automatic Output and Temperature Control
- Lightweight Iron
- UL Listed
- Impact-Resistant Case

Model WTCPT. This closed-loop, low-voltage circuit automatically controls output and temperature in three ranges: 600°F (315°C), 700°F (371°C), and 800°F (427°C). The operator selects temperatures by changing grounded, heat-sensing tip with the knurled thumbscrew. This unit's lightweight iron has locking designs for interchangeability and a nonburnable silicone rubber cord. The power unit is in an impact-resistant case and has a unitized on/off rocker switch with indicator light, nonheat-sinking iron holder, storage tray for extra tips, and tip cleaning sponge. **Cord:** 3-wire 4.5' (1.4 m) long. **Tip:** $\frac{1}{16}$ " (1.58 mm) screwdriver tip 700°F (371°C) PTA7 furnished. UL Listed. Features the TC201P iron and is safe for IC soldering.

LB36

- ▶ For Industrial, Machine Shops, Transportation
- ▶ Prevents Rust
- ▶ Loosens Nuts and Bolts
- ▶ Dries Wet Electrical Contacts
- ▶ Non Conductive

LB-36 is a water displacing and anti-corrosion spray. It creeps along surfaces and into cracks to lubricate, prevent rust, loosen frozen parts and displace water. Its uses in the automotive, marine, sporting goods, farm, aviation, electrical and mechanical maintenance fields are unlimited. When an automotive, marine, or any other engine has stalled due to water in the ignition system, just spray on LB-36. It displaces the water and the engine can be started immediately. While working on the engine, LB-36 is an invaluable tool in loosening nuts and bolts, and parts that have been corroded and frozen together. It is also sprayed on all moving parts to make them operate smoother, such as carburetor linkages, windshield wipers, etc.

- ▶ Effective From -40°F to 400°F

421 SILICONE stops squeaking, sticking, binding and retards corrosion. Makes cleaning easier and quicker. Saves valuable time, protects and preserves equipment. Use on any surface — metal, glass, rubber, plastic, painted finishes and fabrics. It is odorless, colorless, non-staining and heat stable — unaffected by temperatures ranging from -40°F to 400°F. It has unusually low surface-tension properties.

596Q1013. eZ10025. 16 Fluid OuncesPER PK./12 44.28

SprēZ MOISTURE GONE

- ▶ Penetrates Through Water
- ▶ Restores Electric Current to Water Damaged Equipment
- ▶ Residual Anti-Corrosive Coating
- ▶ Will Not Harden, Evaporate, or Become Brittle

Specifications. Odor: Sweet solvent. Color: Light amber. Spray Pattern: Circular, medium sized particles. Flammability: Non-flammable.

596Q1014. eZ9710. 16 Fluid OuncesPER PK./12 44.28

SprēZ SAFETY SOL

- ▶ Non-Flammable Safety Solvent
- ▶ Cleaner Degreaser
- ▶ High Dielectric Strength
- ▶ Flushes Surface Clean
- ▶ Leaves No Residue
- ▶ Does Not Contain 1,1,1 Trichloroethane

The high solvent power of SAFETY SOL quickly dissolves oils, grease, fats and resins without attacking many plastics, coatings, varnishes or maskings. These solvent properties are particularly important where such items as electronic components, electrical insulation and metals are being cleaned.

596Q1015. eZ4655. 16 Fluid OuncesPER PK./12 44.28

New Series II Chemicals

Airjet

Airjet contains no CFCs, VOCs or HCFCs. Formulated for dusting and cleaning of components and equipment. Contains 100% of 1,1,1,2-tetrafluoroethane which is an alternative for those "dusters" which contain Freon® 12 and Freon® 22 product. Used for blowing dust and residue out of hard to reach places without scratching.

Adhesives

Cyano-Prep/Accelerator

Surface activator and cleaner for all cyanoacrylate adhesives. Provide better, faster curing bonds on materials generally difficult to bond.

796-9833. 19-125. 4 Fl. Oz. (29 ml.) Bottle.....	EACH	5.50
--	------	------

Cyano-Solv

Solvent for cyanoacrylate adhesives including GR-R-RIP. Releases cyanoacrylate adhesive bonds. Used to clean clothes, tools, spills, etc.

796-9834. 19-130. 1 Fl. Oz. (29 ml.) Bottle.....	EACH	3.56
--	------	------

GC Epoxy Putty

A two part epoxy in a single tube. Amount needed is cut off and kneaded together. Two minute work life. Applications include: Plumbing repairs, works under water. Electrical, use in place of tape. **Dielectric Strength:** 400 volts/mil. Sets hard in 20 minutes, may be drilled and tapped. **Maximum Useful Temperature:** 300°F.

796-9831. 19-348. 4 Oz. (113.4 gms.) Tube.....	EACH	7.50
--	------	------

GC Potting Epoxy

Black opaque highly filled epoxy used for potting and encapsulating electronic circuits. Use to environmentally protect or conceal circuits. This product is excellent when used with GC Chassis Boxes. **Working Time (Pot Life):** 1 hour. **Mix Ratio:** 1 to 1. **Temperature Range:** -40° to 180°F. **Electrical Properties.** **Volume Resistivity:** 10¹² at 300°F. **Dielectric Constant:** 4.2 (10⁴ CPS at 77°F). **Dissipation Factor:** .014 (10⁴ CPS at 77°F).

796-9828. 19-823. 9 Oz. Kit.....	EACH	11.38
----------------------------------	------	-------

Conductive Epoxy

Electrically conductive two part for attaching electrical components. **Mix Ratio:** 1 to 3. **Pot Life:** 40 minutes. **Cure** 24 hours. **Volume Resistivity:** 5.0 x 10⁹ ohm-cm max.

796-9850. 19-2092. 5 gms. Kit.....	EACH	17.90

Corona Dope

Quick-drying black lacquer of cellulosic resin. Excellent dielectric, arc and corona resisting properties and protects against moisture, atmospheric effects.

796-4345. 10-4702. 2 Fl. Oz. Bottle.....	EACH	5.39
--	------	------

Static Free Big Bath

An excellent cleaner, degreaser for removing dirt, oil, grease and fluxes from electronic and electrical equipment. Effective on switches, motors, PC boards, etc. Displaces moisture. Check for compatibility on sensitive plastics.

796-9849. 19-902-SF. 12 Avdp. Oz. Aerosol.....	EACH	7.50
796-9847. 19-903-SF. 22 Avdp. Oz. Aerosol.....	EACH	13.25

Static Free Air Jet

For dusting and cleaning of components and equipment especially in hard to reach places. Nonflammable.

796-9827. 19-8475-SF. 12 Avdp. Oz. Aerosol.....	EACH	9.75
---	------	------

Static Free Freeze Mist

A refrigerant spray used to locate thermal intermittents in electronic equipment and for thermal fitting. Nonflammable.

796-9824. 19-8410-SF. 12 Avdp. Oz. Aerosol.....	EACH	10.00
---	------	-------

High Strength Flux Remover

A refrigerant spray used to locate thermal intermittents in electronic equipment and for thermal fitting. Nonflammable.

796-4290. 10-7517. 12 Avdp. Oz. Aerosol.....	EACH	7.19
796-4285. 10-7521. 18 Avdp. Oz. Aerosol.....	EACH	10.09

5-Minute Epoxy Cement

Clear, fast-curing two-part Epoxy. Handle in 8-12 minutes.

796-4290. 10-114. 2 Fl. Oz. Tubes.....	EACH	5.29
--	------	------

GR-R-RIP

World famous alpha cyanoacrylate rapid bonding adhesive. Bond strength not affected by temperatures from -112°F to +212°F (-80°C to +100°C).

796-4219. 10-115. 0.75 Fl. Oz. Tube.....	EACH	4.49
--	------	------

Gelweld — Gel Cyanoacrylate Adhesive

Alpha Cyanoacrylate super strength adhesive in a "gel" form — will not drip or run. Fills gaps well.

796-4217. 10-117. .101 Fl. Oz. Tube.....	EACH	4.49
--	------	------

Electronic Grade Silicone Sealant/Adhesive

One part non-corrosive, neutral cure electronic grade silicone sealant. Will remain flexible from -60°C to +200°C (-70°F to +390°F). An excellent adhesive for many electrical and electronic applications where corrosion to metals is a problem. Good dielectric properties, high surface resistivity and resists electrical tracking. Meets the requirements of Mil-A-46146A-Type 1; meets the requirements of FDA status, FDA Regulation #177.260.

796-9845. 19-155. 3 Fl. Oz. (90 ml.) Tube.....	EACH	5.50
--	------	------

Silicone Rubber Adhesive Sealant

Excellent elastomer cures to a tough rubbery solid. Resists weathering, vibration and exposure to oil, moisture, ozone and temperatures from sub-zero to 450°F. Cures in 20 minutes.

796-4305. 10-150. 3 Fl. Oz. Tube Clear.....	EACH	6.99
---	------	------

Plastic Cement

Perfect for all plastics; acetates, butyrates, vinyls, phenolics.

796-3630. 10-324. 2 Oz. (57 gms.).....	EACH	4.59
--	------	------

Red X Corona Dope

Thixotropic polyester base red enamel. Excellent adhesion. Is oil and waterproof. Insulation of high voltage components especially in high humidity areas.

796-2068. 10-5002. 2 Fl. Oz. Bottle.....	EACH	7.39
796-3645. 10-5012. 12 1/4 Avdp. Oz. Aerosol.....	EACH	7.79

Red Gtpt. Insulating Varnish

Alkyd based resistant to environmental extremes, including oils, water, acids and alkalis. Retains high dielectric strength even if wet.

796-3670. 10-9002. 2 Fl. Oz. Bottle.....	EACH	5.59
--	------	------

Printed Circuit Soldering Chemicals

Silver Print. Draw or repair printed circuits. Made of pure silver. Air drying.

796-2035. 22-201. 1/2 Troy Oz. Bottle.....	EACH	52.99
--	------	-------

All GC Aerosols, except as noted, contain no ecology-damaging fluorocarbons.

Contact/Tuner Cleaners

Jiffy Bath

Consists of solvents, safe for use on most materials. It possesses a balanced ratio of cleaning solvents to lubricating and protecting ingredients. Contains silicone oils which will not oxidize and will remain active as protective coating and lubricating agent for years, even under adverse environmental conditions such as high humidity and contaminated atmosphere. One of the most universal and safe contact cleaners and may be used on all rotating and sliding contacts in any types of switches or controls.

796-1963. 19-638. 4 Oz. Aerosol.....EACH 3.26
796-9815. 19-640. 10 Oz. Aerosol.....EACH 7.00

DE-OX-ID

Light, oil based contact treatment compound with active ingredients to counteract oxidation. Lowers contact resistance, inhibits arcing, lubricates and protects against corrosion. For use on connectors, sockets, potentiometers, switch contacts, battery connections, telescoping antennas, relay and thermostat contacts. Should be applied sparingly (e.g. with a toothpick or a hypodermic needle injector) on dirty, dusty and heavily oxidized contacts. Precleaning with a solvent type cleaner is recommended. Best results are obtained with small amounts.

796-9839. 19-1906. 4 Oz. (113.4 gms.). Aerosol.....EACH 6.50

GC Bath Contact Cleaner/Degreaser for De-Energized Equipment

GC Bath is formulated as a heavy duty cleaner/degreaser. Exceptional performance can be expected where heavy buildups of grease, oil, dirt, grime, adhesive, and other unwanted substances are encountered. This strong action product can be sprayed on the surface to break down, wash away, and clean grease from equipment, floors, work areas, engines, metal parts, and any area needed to be cleaned. GC Bath has been found to be effective to remove adhesive and adhesive overspray from surfaces. Test for compatibility with sensitive plastics. GC Bath is formulated with no chlorinated solvents and thus has no ozone depleting chemicals. No CFCs. No HCFCs.

796-9848. 19-725. 10 Oz. Aerosol.....EACH 6.38

Little Bath

Hydrocarbon (petroleum) based cleaner/lubricant. Provides long lasting lubricating and oxidation protection for electrical controls and contacts. Applications include: Switches, contacts, potentiometers, tools, mechanical and electrical components. Not for use on energized equipment. Safe for most plastics, check for compatibility.

796-9841. 19-723. 4 Oz. (113.4 gms.). Aerosol.....EACH 3.60

GC Flux Solv for De-Energized Equipment

GC Flux Solv is excellent for the removal of ionic and Non-ionic fluxes from electronic components, PC boards or other surfaces requiring an extra strength flux remover. Fast evaporation. GC Flux Solv is formulated with no chlorinated solvents and thus has no ozone depleting chemicals. No CFCs or HCFCs.

796-9843. 19-825. 10 Oz. Aerosol.....EACH 6.48

Cleaning Compounds

GC Natural Citrus Cleaner

Excellent non-corrosive cleaner/degreaser with pleasant citrus scent. Safely removes most adhesives, plastics and tape residue. Created out of concern for the environment, this natural citrus cleaner is effective for removal of adhesives, grease, oil, stains, road tar, rubber marks, residue from decals, heel marks, graffiti, lipstick, release agents, and even soap film. Use where chlorinated solvents are not recommended. This can be used safely on most substrates, including painted surfaces, glass, porcelain, concrete, and is compatible with most plastics. This product does not contain ozone depleting chemicals. No CFCs. No HCFCs.

796-9838. 19-700. 12 Oz. Aerosol.....EACH 7.75
796-9896. 19-704. 4 Oz. Aerosol.....EACH 2.98

Special Chemicals

Polystyrene O-Dope Thinner

Thins polystyrene base dopes and cements.

796-4360. 10-4104. 4 Fl. Oz. Bottle.....EACH 4.29

EMI-RFI Shield

An extremely conductive graphite coating. Adheres to glass, plastics for protecting circuitry from external interference or containing low level signals. 75 ohms/square at 1 mil.

796-4375. 10-4807. 12 Avdp Oz. Aerosol.....EACH 21.29

Silicone Heat Sink Compound

Zinc oxide filled silicone grease with heat transfer properties. Does not soften under elevated temperatures. Will not dry and harden.

796-8109. 10-8109. 1 Fl. Oz. Tube.....EACH 10.89

Silicone Compound

Soft Inert Silicone Grease for moisture proofing connections with excellent dielectric properties. Also lubricant for rubber and plastics.

796-8101. 10-8101. 1 Fl. Oz. Tube.....EACH 9.99

Type 44 Heat Sink Compound

Non-contaminating Synthetic-Ester based, capable of moving 46% more heat than other compounds. Passed Western Electric Std. KS-21343 and exceeds MIL performance Spec. MIL-C-47009.

796-4390. 10-8118. 1/2 Fl. Oz. Tube.....EACH 11.59

796-4395. 10-8120. 1 Fl. Oz. Tube.....EACH 18.49

796-4400. 10-8126. 1 Pound Jar.....EACH 62.00

Type 22-270 Solder Flux Remover and Cleaner

Convenient, fast and easy to use. Removes all types of organic flux. Use within one hour of soldering. Simply spray and wash from top to bottom. No CFCs. No HCFCs.

796-2037. 22-270. 16 Avdp Oz. Aerosol.....EACH 10.19

Liquid Solder Flux

Completely non-corrosive liquid solder flux consisting of a solution of special rosin in alcohol. Contains no traces of acids or chlorides and is completely safe to use on even the most delicate electronic equipment.

796-4202. 10-4202. 2 Fl. Oz. (59 ml). Bottle.....EACH 4.67

Lubricants

Lubriplate

Grease type super lubricant reduces friction loss, prevents rust and corrosion.

796-2040. 10-2302. 1 1/4 Oz. (50 gms.). Tube.....EACH 4.89

GC 70 Rust Penetrant and Lubricant

Effectively cleans most surfaces of grease, tar, grime, and contains a long lasting lubricant that continues to lubricate long after other products have evaporated. Use on dies and molds, tools, vending equipment, windows, doors, locks, rusted bolts or fittings, linkages, cables, chains, cranks, electronic gear, battery terminals, plus thousands of other uses.

796-9816. 19-070. 10 Oz. Aerosol.....EACH 2.50

GC TFE Coat

GC TFE Coat is all purpose dry film coating that contains minutes Teflon particles in tough, durable, long lasting binder (paint). Resistant to friction, chemical corrosion, rust and weathering.

796-9817. 19-800. 14.5 Oz. (411 gms.). Aerosol.....EACH 6.25

GC Dry TFE

GC Dry TFE is an all purpose dry film lubricant and release agent that contains minute Teflon particles to lubricate where a dry lubricant is needed. Excellent as a mold release and for potting compounds.

796-9818. 19-810. 4 Oz. (113.4 gms.). Aerosol.....EACH 4.25

Conductive Grease and Anti-Oxidant Compound

A lithium soap base grease with Zinc and graphite fillers. As a lubricant, it will dissipate static charges (use only in light load applications). Also useful for wire connectors and aluminum conduit joints. Penetrates aluminum oxide to maintain inter-strand and inter-conductor current paths. Guards against oxidation, improves conductivity and produces a cooler connection.

796-9821. 19-820. 1 Oz. Tube.....EACH 3.10

Graphite Lubricant

Dry powdered graphite is the finest lubricant for metal, wood, plastic, and rubber. (No solvents to harm plastics.) Guards against sticking and dirt build up. Reduces wear and corrosion. Ideal for many uses including locks, hinges, doors, wheels, and rubber parts.

796-9822. 19-821. 1 1/4 Oz. Squeeze Bottle.....EACH 2.90

GC Compu-Lube Moly/PTFE Lubricant

Super low friction, low wear, low viscosity lubricant for the micro computer age. Effective from -60 to +500°F. Applications: Computers, CD and VCR units, printers and all high speed mechanisms.

796-9819. 19-832. 0.5 Fl. Oz. (14 ml). Squeeze Tube.....EACH 6.50

Non-Aerosol Cleaner

Isopropyl Alcohol (Anhydrous). This extremely pure alcohol is frequently the recommended cleaner by manufacturers of tape heads, disc drives, etc. Does an excellent job of dissolving and removing oxides from recording heads, also an excellent degreaser. This pure alcohol contains no water, usually a problem with alcohols, and leaves no residue. Suggested for use with swabs, clean cloth, or by immersion.

796-1507. 10-1507. One Pint (16 Fl. Oz.) Can.....EACH 6.09

Cements

Service Cement

Quick drying and waterproof clear cement. Use on porous or semi-porous materials such as metals, plastics, etc.

796-4320. 10-302. Btl. 2 Fl. Oz. Bottle.....EACH 5.59

796-4325. 10-304. Btl. 4 Fl. Oz. Bottle.....EACH 5.89

Rubber to Metal Cement

Bonds synthetic rubber, metal, wood, and plastic. Dries quickly and produces a lasting bond.

796-4330. 10-352. 2 Fl. Oz. Bottle.....EACH 4.59

GC Bond Nitrile Cement

Produces a waterproof, resilient, and long-lasting flexible bond on metals and glass. Dries 15 to 30 minutes.

796-3640. 10-4302. 2 Fl. Oz. Bottle.....EACH 5.39

Epoxy Glue

Specified by N.A.S.A. for use in its space program. Super grip, slow set. A drop holds tons. Two 2 oz. (57 gms.) tubes of resin and hardener.

796-2098. 10-347. 2 Oz. (57 gms.). Tube.....PER PKG./2 11.65

Acrylic Cement

Specially formulated to mend acrylic materials such as lucite and plexiglass. Forms an inseparable, usually invisible joint.

796-2060. 10-4002. 2 Oz. (57 gms.). Bottle.....EACH 4.19

Acid Brushes

Brushes for cleaning with solvents, applying coatings and a host of other uses. These brushes are economical enough to use as throw-aways in many applications. Or may be used repeatedly with cleaners such as Freon TF, Chlorothene, Flux Solv, etc. Handles are of tin plated steel and bristles a medium-fine horse hair. Also fine for dusting keyboards, optics, etc. All 6" long, width below refers to width at base of bristles.

Stock No.	Mfr.'s Type	Width (Bristle)	Qty. Per Pkg.	Description	PER PKG.*
796-0251	10-251	3/8"	4	No. 1 Acid Brush	2.29

796-0253	10-253	1/2"	3	No. 3 Acid Brush	2.49
796-0255	10-255	3/4"	2	No. 5 Acid Brush	2.69
796-0259	10-249	—	—	Assortment, 7 pcs.	6.09

*NOTE: Bulk pricing can be obtained if you have bulk requirements of 1000+.

Standard Fluxes, Thinners, and Cleaners

Chemicals

#5768 Bio-Clean Saponifier

Saponifiers turn rosin residue into a water soluble soap. #5768 is used as an alternative to ozone depleting chemicals used to remove rosin flux residues. A 4% to 10% solution is made with water and then followed by a water rinse. Available in quart and 1 gallon units.

833-6214. 63-0000-5768. 1 gallon.....EACH 51.20

Residue Remover

Formula 5315 Residue Remover

Kester No. 5315 is a solvent blend designed for use as a cleaner for automated conveyor fingers in soldering machines. It is specifically developed for removal of built up residues from low solids "No-Clean" fluxes. Continuous use of 5315 prevents excessive flux residues from contaminating the conveyor and transferring to the circuit board assembly. The solvent cleaner is more effective than isopropyl alcohol and other commonly used solvents.

Water Soluble Fluxes

1429 Water Soluble All Purpose Flux

Has been one of Kester's standard water washable materials for a long time. It is capable of soldering to most metals including some mild steels, but is not generally used for wave soldering. Available in quart and 1 gallon units.

833-6304. 63-0000-1429. 1 gallon.....EACH 33.60
833-6305. 62-0000-1429. 1 quart.....EACH 13.40

2224-25 Organic Acid Water Soluble Flux

Kester's strongest flux for wave soldering. It is recommended where component and board quality are difficult to control. Available in quart and 1 gallon units.

833-6306. 63-0025-2224. 1 gallon.....EACH 37.00
833-6307. 62-0025-2224. 1 quart.....EACH 14.80

2331-ZX Neutral pH Water Soluble Flux

Relatively mild and safe water soluble flux used for electronic assembly. The residues left after soldering are still conductive, however, and must be removed in most applications. Available in quart and 1 gallon units.

833-1225. 63-0097-2331. 1 gallon.....EACH 40.40
833-1226. 62-0097-2331. 1 quart.....EACH 16.20

HF-1189 VOC (Volatile Organic Compound) Free Water Soluble Flux

A water based, halide (chloride) free liquid flux that combines moderate activity with environmental friendliness. It contains no alcohols which are photochemically reactive and been linked to global warming. The residue left after soldering must be cleaned with water. Available in quart and 1 gallon units.

833-6308. 63-0086-1189. 1 gallon.....EACH 81.80
833-6309. 62-0086-1189. 1 quart.....EACH 32.80

120 Thinner

A mixture of alcohols used to replace lost solvent in 186 liquid flux. Solvent is commonly lost when liquid flux is applied by foaming or waving. Available in quart and one gallon units.

833-6301. 63-0000-0120. 1 gallon.....EACH 23.80
833-6201. 62-0000-0120. 1 quart.....EACH 9.60

Low Solids, No Clean Fluxes

951, 2% Low Solids No-Clean Flux

Kester's best selling Low solids flux. It combines good activity with no visible residue after wave soldering. The low solids content helps to eliminate defects when soldering bottom side surface mount components, but overall board and component solderability must be good for best results. #951 can be foamed, waved or sprayed and also comes in a flux pen. Available in quart and one gallon units.

833-6202. 63-0000-0951. 1 gallon.....EACH 35.00
833-6203. 62-0000-0951. 1 quart.....EACH 14.00

110 Thinner

Contains a mixture of alcohols used to replace solvents lost when using #951 liquid flux. Available in quart and one gallon units.

833-6204. 63-0000-0110. 1 gallon.....EACH 26.60
833-6205. 62-0000-0110. 1 quart.....EACH 10.60

#961, 3% Low Solids No-Clean Flux

A higher activity version of Kester #951 which has better solderability, but leaves behind a little more residue. It is recommended when component solderability or boards design require a flux which is slightly more active than #951. Available in quart and 1 gallon units.

833-6206. 63-0000-0961. 1 gallon.....EACH 36.40
833-6207. 62-0000-0961. 1 quart.....EACH 14.60

#111-B Thinner

Contains a mixture of alcohols which are used to replace solvents lost when using Kester #961 liquid flux. Available in quart and 1 gallon units.

833-6208. 63-0002-0111. 1 gallon.....EACH 25.60
833-6209. 62-0002-0111. 1 quart.....EACH 10.20

#970 VOC (Volatile Organic Compound) Free No-Clean Flux

The way that all liquid fluxes will eventually evolve. It combines environmental friendliness with cost effective no-clean technology. It is a water based, halide free liquid flux that can be applied by dip, spray, wave or foam. Although thinning is not normally required, ordinary deionized water can be used. Kester has applied for a patent to protect the technology. Available in quart and 1 gallon units.

833-6210. 63-0000-0970. 1 gallon.....EACH 57.00
833-6211. 62-0000-0970. 1 quart.....EACH 22.80

RA Fluxes

1515 RA 15% Solids Activated Rosin Flux

Developed for wave soldering of consumer or non-critical electronic assemblies. It can also be used for other general applications. Even though 1515 is a fully activated flux many customers do remove the residue after cleaning. Available in quart and 1 gallon units.

833-6302. 63-0000-1515. 1 gallon.....EACH 33.40
833-6303. 62-0000-1515. 1 quart.....EACH 13.40

Formula 4662 Thinner

A mixture of alcohols used to replace lost solvent in Kester formulas 1515, 2224-25, and 2331-ZX. Available in quart and 1 gallon units.

833-1230. 63-0000-4662. 1 gallon.....EACH 22.80
833-1231. 62-0000-4662. 1 quart.....EACH 9.20

1544 RA 50% Solids Activated Rosin Flux

The liquid version of Kester 44 resin. The high solids content gives it good heat stability for dipping and hand applications. Available in quart and 1 gallon units.

833-1201. 63-0000-1544. 1 gallon.....EACH 38.60

SMT Stencil Cleaners and Wipers — NEW —

SMT Stencil Cleaner

Hydrocarbon-based, non-ozone depleting stencil cleaner effectively removes solder paste from screens, misprinted boards and equipment. Its proprietary blend works on most wet or dried thick film and solder paste compositions. Ideal for hand cleaning application equipment and misprinted substrates. The solvent's high flash point reduces risk of flammability. Its non-corrosive nature makes the cleaner a perfect choice for precious metals.

Envi-Ro-Tech™

Envi-Ro-Tech™ Anti-Static Freezer 1747

100% HFCs, no CFCs, no HCFCs. A rapidly evaporating HFC-134a product that contains an anti-static agent. Because HFCs do not harm the ozone, this product has a zero ozone depletion factor. This product is used as a trouble shooting aid in static sensitive areas for intermittently faulting capacitors, resistors, semiconductors, and other defective components. Also detects cold solder joints and oxidized junctions.

**Production Chemicals****Wondermask™ P 2211**

Peelable temp. solder mask for any wave solder system. Non-contaminating. Excellent resistance to polar and non-polar solvent systems. Can be used as a spot mask, mask prior to conformal coating, or as a protective storage or shipping shield. Self-leveling; quick film formation. Non-ammoniated.

907-0165. 2211-8SQ. 8 oz. Air/Therm. CureEACH 7.06

Wondermask W 2205

A temporary protective water soluble masking agent. Easily and completely removed in normal hot water washing cycle. Leaves no residue. Non Flammable - Non Corrosive - Non Contaminating - Non Dripping.

907-1697. 2205-8SQ. 8 oz. Air/Therm. CureEACH 6.72

**1978 Silicone Free Heat Sink Compound**

Features exceptionally low bleed and evaporation characteristics. Will not harden, dry out, or melt; will not contaminate wave and solder baths. Meets or exceeds KS 21343 and MIL-C-47113. Use with both metal and plastic.

907-0190. 1978-DP. 2 oz. tubeEACH 8.42

**1977 Transistor Silicone Grease**

A heat conductive material used to coat the bases of power transistors as they are connected to heat sinks. The grease is heat conductive and will draw the heat away from the transistor allowing it to run cooler.

907-1977. 1977-DP. 1 oz. Squeeze TubeEACH 5.27

Envi-Ro-Tech Fine-L-Kote® Remover*

No Methylene Chloride. Effectively and safely removes most conformal coatings, including acrylic, epoxy, urethane, and some silicones. Can also be used to remove enamels, paints, varnishes and lacquers. This product quickly removes tar, adhesives, crayon, rubber, and carbon.

907-0195. 1618-P. 1 Pint in MetalEACH 15.22

907-0196. 1618-G. 1 Gallon in MetalEACH 72.00

*This product is not recommended for acrylic, polystyrene, or polycarbonate materials. Always test in an inconspicuous area before use.

**No-Clean Wick Desoldering Braid**

- ▶ Removes Up to Four Times More Solder
- ▶ Residue Halide Free and Non-Conductive
- ▶ Does Not Have to Be Cleaned Off the Board
- ▶ Designed to Improve Reworking Efficiency in Both Conventional and No-Clean Operations

Fine-L-Kote

Tough conformal coatings for PC boards, components, and electrical equipment. Protects against corrosive atmosphere, salt, water, dilute acids, and alkali solutions. Prevents formation of conducting films or moisture. Formulated with OPTI/SCAN, an ultraviolet material for conformity checks under a black light.

Snap Assembly Thumbwheel Switches

Subminiature Toggle Switches

For manual control, solid-state devices and miniature circuits. Single pole types are 1/4" thin, double poles less than 1/2" square. Single hold mounting. 1/4" threaded bushing. **Nominal rating:** 5 amps, 125 VAC or 24VDC. **Initial contact resistance:** 5 milliohms. **Insulation resistance:** 10,000 megohms. **Life under load:** 50,000 make/break cycles. Bat handles have 30° throw. Silver contact. Solder terminals. PCB Series are subminiature for direct insertion in PC boards. Terminals are silver plated.

► Similar to Interswitch and Intermarket Series Thumbwheel Products

All parts of the thumbwheel switches are assembled by a lock one step only without use of screw. The resin springs are made for the joint cotter on basis of human mechanics providing soft and comfort push for assembly. Complete assembly can be achieved on lock only by pushing the spring of the shell into the cotter hole from the front. Useful as a controller of sheets for copiers, temperature and numerical quality or as a timer. End plate is fitted on both ends of the switch set. The resin spring, together with the shell easily locks the parts on the cotter hole.

High reliability and longterm stability — quick, easy installation no additional screws required for mounting — ideal for preset counters, temperature controller, timer and automatic central equipments use where presetting is required.

Specifications. Operating Temperature: -40°C - +85°C. Switching Load (Resistance): AC50V/DC28V, 10µA-0.15A. Continuous Load: 1A max. Contact Resistance: 100 milliohms (initial), 200 milliohms max. (after life test). Insulation Resistance (terminal to case): 1000 megohms min. Insulation Resistance (terminal to terminal): 100 megohms min. Electrical Life: over than 20 × 10⁴ time switching between any two adjacent positions.

Materials. Body and Wheel: Acetal resin. Printed Circuit Boards: hard gold plated copper on epoxy fiberglass. Contacts: gold plated Be-Cu alloy.

Disconnect Switches

- ▶ 600 V
- ▶ UL/CSA Pending
- ▶ High Short Circuit Withstand Rating
- ▶ Meets IEC 947-1, 2, 3

Altech offers two switch types, the Standard with Toggle or Lever operators and the Compact with Lever operators. Typical applications include: Disconnect, Safety, ON-OFF, Emergency, Maintenance and Distribution. Mount on DIN rail or to panel; front panel mount versions are available. Order basic switch and operators separately (except for Toggle operated types).

GF Foot Switch

Attractive and sturdy GF Series Foot Switches are available in one, two and three pedal models with and without Foot Shields for demanding industrial and medical applications. Standard Press to Start — Release to Stop Momentary Contacts are available in Slow Make/Break or Snap Action configurations. Foot Switches with Maintained contacts remain in the ON or OFF position until the pedal is activated again. No need to maintain foot

GF Foot Switch

One Pedal (1GF) with One Threaded Hole for Strain Relief PG 13.5
Dimensions (W × H × L): 70 × 72 × 220 mm (2.76 × 2.84 × 8.66").

Stock No.	Mfr.'s Type	Switch Function ¹ (For Each Pedal)	Current/Voltage	EACH

This switch series is a double throw, dual in-line package (DIP) switch primarily designed for logic level switching. Switch is capable of controlling AC and DC current.

Electrical Circuits: 5 volts at 100 milliamperes or 24 volts at 25 milliamperes in the switching mode and 50 volts at 1.5 amperes in the non-switching mode. Lead Spacing: .100 x .300.

6000 Series Rotary Switches

— NEW —

- ▶ Compact Design — Small Diameter, Low Profile Switches Are Ideal For PC Board Mounting
- ▶ Wide Choice Of Outputs: 8-Position Binary Coded Octal, 10-Position Binary Coded Decimal, 16-Position Hexadecimal and 10- Or 16-Position Single Pole
- ▶ Versatile Application — Styles Include Slotted, Bar Type and Thumbwheel Versions For Hand Rotation
- ▶ Economical — Board Mounting Eliminates Need For Input-Output Wiring To Perform Switching Functions
- ▶ Positive Switching — Contacts Have Positive Detent Action
- ▶ All Switch Positions Easily Identified By Large Readable Characters Or Dots
- ▶ Optimum Reliability — Fully Enclosed Design Protects Contacts Against Contamination

Electrical. Current/Voltage Rating: Switching — 115 VAC or 28 VDC at 125 milliamperes max.; Nonswitching — 115 VAC or 28 VDC at 250 milliamperes max. **Durability:** 1000 cycles. **Dielectric Breakdown Voltage:** 500 VDC. **Mechanical and Environmental.** **Operating Torque:** 2-12 inch-ounces initial and after durability. **Operating Temperature:** -18°C to +88°C. **Storage Temperature:** -45°C to +88°C.

DIP Switches

DR Series Rotary DIP Switch

DR Series Features highest contact reliability with a pin-point high contact pressure mechanism providing longer life expectancy by penetrating oxides and sulfurized film allowing more than 10000 rotations. Insert molded terminals and internal "O" ring allow wave soldering and immersion cleaning. 32 styles to choose from: screwdriver, knob and shaft types are available in both upright and right angle versions. Plus your choice of 4 standard output codes. **Specifications. Contact Rating:** 0.4 VA @ 20 VDC (max.). **Initial Contact Resistance:** 50 milliohms max. @ 2 VDC. **Insulation Resistance:** 1000 milliohms min. @ 100 VDC. **Dielectric Strength:** 300 VAC 1 minute. **Operating Temperature Range:** -10°C to +85°C. **Life Expectancy:** 10000 rotations. Surface mount types available on special order.

AD Series Auto Insertable DIP Switch

Unique ceramic substrate allows soldering temperature of 245°C ±5% for up to 30 seconds. Auto-insertable using standard insertion equipment. Gas tight contacts (280000 PSI). Allows wave soldering and aqueous or solvent cleaning without the use of tape seals. **Base:** PBT encapsulated ceramic. **Cover and Actuation:** PBT 94V-0. Gold flash beryllium copper moving contacts. Solder coated brass fixed contact and terminal. **Operating Force:** Less than 800 grams. **Contact Rating:** 4VA at 20VDC max. **Operating Temperature:** -30°C to +86°C. **Dielectric Strength:** 500VAC rms at sea level. **Life Expectancy:** 5000 operations.

GD Series DIP Switch

- ▶ High Temperature Plastics Provide Process Compatibility with Reflow Soldering up to 260°C
- ▶ Tape Seal Corner Notch, No Cumbersome Tape to Interfere with Component Placement Equipment
- ▶ Gold-to-Gold Contact System Provides High Reliability
- ▶ Thru Board or SMD Terminals. SMD Configuration Facilitates Cost Savings Through the Use of Smaller PC Boards and Enhanced Board Density
- ▶ Variety of Actuator Styles to Satisfy Every Application

The GD Series Dip Switch family from Augat/Alcoswitch offers you slide, piano, rocker and button actuator styles in thru board and surface mount terminal configurations. High temperature polymers provide compatibility with reflow soldering temperature as high as 260°C. Standard tape seal with unique corner notch to facilitate removal. Bifurcated gold contacts provide the reliability your programming requirements demand.

TSP Series — Tiny Sealed Pushbutton Switch

- ▶ Rating: 0.4VA Max. at 20 VAC/DC
- ▶ High Temperature Plastics — Liquid Crystal Polymer (LCP)
- ▶ Specifically Designed for Thru-Hole and Surface Mount Applications — Tin/Lead Plated Terminals
- ▶ Washable Process Sealed Construction — Internal Actuator O-Ring

Material Specifications: Contacts: Copper alloy with gold over nickel plating. **Case Material:** Thermoplastic (LCP). **Actuator Material:** Thermoplastic (Nylon). **Terminals:** Tin/Lead plated. **Typical Performance Characteristics:** Contact Rating: 0.4VA max. at 20VDC or peak AC. Life Expectancy: 80000 cycles. Operating Temperature: -30°C to +85°C.

Pushbutton Switch MPA/MPE/MPG Series

Molded-in heat terminals eliminate switch mechanism contamination. Gold flash contacts and terminals inhibit oxidation and extend shelf life. Diallyl phthalate cases permit these switches to withstand wide temperature ranges. Each switch has one-piece bushing to reduce the possibility of tear-off damage when mounting. All hardware is supplied unmounted. **Contact Rating:** 6 amps at 125VAC; 3 amps at 250VAC; 4 amps at 28VDC. Solid silver contacts. **Operating Force:** 2.5 to 4.4 lbs. **Plunger Travel:** 125° avg. **Insulation Resistance:** 1000 ohms. **Dielectric Strength:** 1500V rms at sea level. **Life Expectancy:** 50K operations. Terminal seal included at no extra charge. Order cap separately.

MP/MSP Series Pushbutton Switch

Material Specifications: Contacts: MSPF/MSP3/MSPS: Silver plate. MSPM: Gold. **Case Material:** MSPF: Thermoset. MSPM: Steel. MSP3/MSPS: Thermoplastic. **Actuator Material:** MSPM: Nylon. MSPF/MSP3/MSPS: Thermoplastic. **Terminals:** Silver plate. **Typical Performance Characteristics:** Contact Rating: MSPF: 0.5 Amps at 125VAC. MSPM: 1.0 VA optimum (100 mA max. 50 VDC max). MSP3: 3 Amps at 125 VAC. MSPS: 0.5 Amps at 125 VAC. Life Expectancy: MSPF: 10000 Cycles min. MSPM: 500000 Cycles at 0.1VA. MSP3/MSPS: 10000 Cycles. Operating Temperature: MSPF: -20°C to 80°C. MSPM: -10°C to 80°C. MSP3/MSPS: -20°C to 80°C.

MSS Series Slide Switch

Designed for PC applications. These slide switches save installation time and eliminate wiring errors. Available in vertical or right angle mount with mounting tabs on the perimeter of the frames for added stability. All switches in this series feature a positive wiping action to assure low contact resistance and make-before-break action. **Contact Rating:** Silver, 300mA at 125VAC. **Contact Resistance:** 30 milliohms max. **Insulation Resistance:** 1000 megohms min. **Dielectric Strength:** 500V rms at sea level.

PC Mount Slide Switch — TSS Tiny Series

These compact pushbutton switches are used in a variety of applications such as: instrumentation, telecom systems, computers, etc. Contacts and terminals are fully gold plated for dependability in frequent switching and gold solderability. Right angle models are ideal for PC board edge mounting. Contacts and terminals are fully gold plated for dependability in frequent switching and gold solderability. Right angle models are ideal for PC board edge mounting. **Contact Rating:** 0.4 VA max. at 20VDC or peak AC. **Contact Resistance:** 20 milliohms max. **Insulation Resistance:** 1000 megohms min. at 500VDC. **Dielectric Strength:** 1000V rms at sea level. Thermoset plastic case material. Gold over nickel barrier plating. **Plunger Travel:** Approximately .030".

Reliant '22 Series Oil Tight Industrial Controls

- Fits 7/8" (22 mm) Diameter Holes
- Protection Level: 1 P 65
- Buttons Are Full Size
- Meets NEMA 1, 12, 13
- Finish: Matte Black Bezel
- Simple "No-Tool" Mounting
- Fully Insulated — Thermoplastic or Heavy-Duty Metal Bushings
- Contacts: Double-Break Silver Snap-Block, 6A @ 600 VAC
- Stackable
